John,

Are you saying Echolink is an excuse for you to not want to upgrade? I would hope not. There are many used HF rigs out there that can be had for a song. May not have all the bells and whistles but at least it will get you on the air, using the "airwaves". Like I said before, it we don't use the frequencies, we are going to lose them. Echolink may provide you with a "temporary" means of enjoying ham radio, but by all means don't let it stop you from upgrading and really enjoying the hobby.

A portion of Echolink may go through an amateur repeater or transmitter. Or sometimes a person might use their HT to access it If not for that, it could be used by anyone.

And face it, all that would work better if the radios were simply not in
the equation at all.

Sure, there are things you can do with it, but you could meet with
people in a chat room also. That's the thing about Voip. It is a cross
between a chat room and a phone patch. neither of which is all that
exciting.(to me)

Hackers excluded, for the majority of computer users (using Microsoft there are:

1) Yahoo Messenger
2) AOL Instant Messenger
3) MSN Messenger
4) ICQ
5) IRC
6) CGI or Java or HTML-based web chat
7) Multiple-service compatible messengers, such as Trillian, iChat
8) Microsoft Netmeeting or similar protocol multimedia conferencing programs

Let's keep this argument to the majority of the computer world, thank you.

John

One of many... I am not on trial so I will not go through every "excuse".

There are tons of hams who are anti-Echolink and will go after HF so I don't have to. I have no
worries.

I enjoy ham radio immensely and I hear a lot of frustrated hams that try to use HF only to find out
they can't. I don't want to join in their frustration and have my enjoyment of the hobby decreased.

Why not keep the argument to ham radio?
How many of those chat programs have you run over ham radio?

Hi

Having initiated this post I didn't want to create a controversy about
Echolink but simply gathering opinions of pro and cons.
After some days I see that I had to enter the debate to correct some errors.

I see that the subject was developped in depth, with many false comments
about the product too. Anyway, many hams corrected mistakes of others and
give back to Echolink some of its features (i.e. radio connexions when
working with repeaters on 144, 432 and even 2.4 GHz with converters.
Excellent). That proof that the product is well supported and recognized by
the HAM communityn in a much better way that some of its competitors.

I would like to highlight Max's opinion. Indeed many OM continue to work
using both modes : Echolink on one side of their shack and their RTX on the
other side connected to their favorite antennas.

Personally, questionning on Echolink in parallel to this this "poll" through
Echolink, I discovered that a lot of retired OM (not retired from HAM
activities, but from QRM pro, hi !!) are using Echolink quasi daily or so.

This is a good new; that means that even people that we though at first sight be more "oldtimers" oriented, can be also very involved in new technologies and find quickly and easily the utility of this new tool

That also means that our hobby extends to new horizons if we can say that. VoiP is there for long what could happened, and people who do not take the train in course, will stay there, out of the business. Some do not care, OK. So this post is not of your concern. But if you are interested, even from far to new technologies and modes, please take a look at Echolink and... appreciate.
I bet that you will not disappointed.

Might Be Ham Radio or Not Ham Radio
1.SSB
2.CW
3.PSK31
4.Pactor
5.SSTV
6.Packet
7.2-SSB
8.6-SSB
9.Contesting
10.FieldDay
11.VHF Contest
12.AO-40
13.IRLP
14.Echolink

These are just a few that one use a computer with,And yet some still say Echolink is Not Ham Radio.Call it what you like,Echolink is a fun mod of amateur radio the way i see it.Fieldday you use computers to log,You use computers to work AO-40 to get the data,Most hams use computers to work CW packet packtor amtor and digital mods.

Yes i say let use the ham bands and all of them,But most of you can not becouse you cant pass the 5 wpm code like most of use have all ready done the 13 wpm code.Any yes if there a national emergency most likely we want be on computers or many even the hf bands.So dont knock echolink untill you have downloaded the software and tryed it.If you dont like echolink then take it off your computer and go fire up your Amp to talk to your friends 75 miles away and bleed all over the bands with your Amp.

Just my Dime worth
Bobby/N2BR

I think echolink has brought many old hams back into the ranks of 'active'. I'm always talking to hams that talk non-stop about finally being able to be a ham again. Some of them are in retirement homes and some just don't have the money to maintain a system any more.

I got my tech ticket in June 2001 and put echolink on one of our local repeaters in 2002. It's really opened up the traffic on a basically unused repeater. Now when locals go to FL for the winter, or anywhere for that matter, they can get on a link via rf from there and connect back home to PA and keep in touch with family and friends. Free, from their mobile or HT.

Echolink motivated me to learn my code and upgrade. I just got my General ticket a few days ago. Now I can talk to people I've met on echolink over the air. It's a great way to set up an HF DX QSO. Many of the hams in my community are working to upgrade because of their experiences with echolink.

Nomatter what your opinion, many love it, many hate it, and there are many undescided. Sounds like every other fasset of ham radio to me.

I used to like ICQ but the spamming technique being used there makes it totally un-worthwile. People will use the request for chat function or instant message function to spam ya. Last couple of weeks that I used it I was getting "hit" that way at least 50-100 times per day, and mostly for porn links that I could definitely care less about.

That brings up a completely different point of contention for me! Chat programs or other programs (using PC's on the air) is where we have definitely fallen behind as a communications field/hobby.

There are so many services that have dwarfed amateur radio at this point, in regards to digital technology that makes us look like we are in the stone ages. PSK31 is nice, but through a variety of reasons it is primarily only used on HF. It could be utilized on 6 meters where there is some equipment out there for ssb/cw. Technically speaking, it could also be used on FM, as discussed in an article in QST (in a 2000 or 2001 edition, I will look for it again....) for 2 meters or 70cm. There was a experiment done in this article where it showed promise on FM for locally based communications.

As far as packet, that has fallen so far behind, that it is a serious shame. Most of the programs are old, crappy DOS based programs, (am unaware of any Windows based programs) and with incredibly slow transmission speeds and limited file sharing capability, I am surprised it hasn't died out completely.

Other modes of digital communcations, which are in the most basic sense, chat/contact/QSO related, are fine for jsut that, but overall we have fallen behind the mark. Currently there are some cities fairly close to me that have wide-area-internet-service that covers a 20-30 mile radius with speeds of over 20kps, (considering most dialups get 2kps-6kps)
or more and the person can be almost anywhere with that radius and connect. I am not saying we should provide internet access, for those that want to read into that, but can you imagine working a disaster situation, where you have say for instance a dozen different operators able to send digital pics or even streaming video (to a point) possibly even simultaneous to net control or EOC's? Current packet speeds are not worth bothering for regular use, and limited message capability is another issue.

Look at what is commonly used with most law enforcement MDT's, which basically were spawned in part from ham radio packet radio. The are not perfect yet, but the capabilities are phenomenal compared to existing packet capabilities.

I know this is a little different than the intention of the thread, but I think we really need to look at our digital capabilities and see what we could do, work on getting those limitations that we have lifted and designing new and better ways that may make us the envy of other services, and making the technology so good that it may be emulated as other things amateur radio have been in the past such as cellphone technology, mobile data communicators as well as quite a few other technologies the general public now enjoys thanks to ham radio.

I have noticed some non standard RTTY like signal at 14.080 MHz in FSK (or LSB) that cannot be decoded by my PK-232. I tried the Signal Identication command and it comes back with noise.

It sounds like someone with a sick (very sick) sound card. It tries to send a CWid from time to tome but cannot be read.

If you have some thing better than a PK-232, please let me know who or what is transmitting at 14.080

There's equipment readily available for doing cw and ssb up through 47GHz.
Joe Taylor's WSJT software has largely usurped psk31's effectiveness for
narrow-band, truly weak-signal DX communications, whether tropo, EME or meteor
scatter.

We run chat over NET/ROM here, and could run any of the
tcp/ip based chats as well ... but there is near zero interest.

90% of the users are "stuck" in the 1984 world ... they use some
VT100 emulator program to read and send messages at 1200 baud.

The other 10% use 9600 or 19200 links, run IP as well as AX.25,
and are starting to use 13 cm links (811b) that support both IP
and AX.25. The big question is how to convince that first 90% that
faster links make more interesting applications possible :-)

All the above are easy to run over ham radio.

But as mentioned in another post, there does not seem to be
much interest in doing these things. Hams seem to be mostly
stuck in the early 80's paradigm.

From the EchoLink home page:

"EchoLink is software which allows Amateur Radio stations to communicat
with one another over the internet, using voice-over-IP (VoIP) technology.
The program allows worldwide connections to be made between stations,
from computer to station, or from computer to computer. ..."
Does not require a radio.

Now do you understand?

Because it can be hooked to a radio to transmit over the airwaves. By limiting echolink to licensed users, the control operators of the radios that could be accessed over the echolink have some minimal assurance that only licensed users will be transmitting over their radios.

You don't need a license. You just need a callsign to fool the guy who
passes out the node numbers into thinking you do have a license.

And you don't need a QSL manager either.

Hi ,

There are many logging programs to choose from so I am looking for assistance in locating a logging program that with the following features:

* The software vendor should have versions that run under Windows XP AND the Pocket PC. I'm not really interested in running two different packages.
* Have a built in sync feature so that contacts logged on the PocketPC can automatically be synchronized to the WinXP machine when the PocketPC is put back in its cradle. I would prefer that the sync is handled by the program and not manually through the use of ADIF files.
* The WinXP version should have a good control program for the ICOM 706 MKIIG
* The WinXP version should be able to output a Cabrillo format log for contests
* The ability to easily log non amateur activity (SWL, etc) would be nice but is a low priority.
* If the product is in beta or not yet available I'm interested in hearing about it also

Many thanks in advance for your response !

[If you aren't aware of something that can meet these requirements please don't respond :-) Thanks]

Ed

Sure, you can send Morse code over the internet. Read about
how we did it here:

http://kh2d.net/kh7r/

To send Morse code with Echolink, all you gotta do is hook the
oscillator from a keyer to the sound card input. Piece of cake...

But then to find anybody who could RECEIVE it on Echolink might
be another problem.

I understand you are being selective. You obviously didn't see (or refused to admit) that the
program is also meant to interface with radios, like IRLP, which runs on Linux interfaces connected
to amateur radio repeaters.

The program is NOT EXCLUSIVELY ONLY VOIP WITH NO RADIOS ALLOWED AT ALL. If it were, it wouldn't be
ham-only.

Mincing words. "Optional" DOES NOT EQUAL "won't be used because nobody uses options."

Look. My common sense tells me that as long as radio is USABLE as part of the method, it does not
mean that the method is totally faulty as serving as a ham radio method. This debate will never end,
will it?!?!?!?!?!

Hello all,

Does someone knows a good program
for (yagi) antenna calculation?
Such like an optimizer, or a (yagi) designer.

I know there are some good programs, but
that are DOS programs, it give problems
with windows XP.

Please your information!!!

I think there is an answer to all of it. The general ham population is simply not going bother with modes and technolgies which are simply reguritations of what they can get with a $15/month dialup connection. Ham radio will survive by being able to do what the Internet cannot do. However this is a swamp with no end because it involves personal preferences and perceptions which in turn makes ham radio unique amongst the radio services. Comparisons with what the other services are doing with advanced technologies therefore are generally moot when it comes to ham radio.

It's a people "problem" and we all know that far-end technocrats historically do not fare particularly well in this field. Been there, done it and I quit beating my brains out long ago.

> As far as packet, that has fallen so far behind, that it is a serious shame.
> Most of the programs are old, crappy DOS based programs, (am unaware of any
> Windows based programs)

Most packet activity today is concentrated in the 2M spots networks and the software is integrated into the Windoze computer logging programs. Look up Writelog and DX4WIN for examples.

> and with incredibly slow transmission speeds and
> limited file sharing capability, I am surprised it hasn't died out
> completely.

It's far from dead but it has "degenerated" into a boring-as-hell but quite useful utility mode for HF dxers and contesters of all flavors.

Nobody in these groups swaps files around on the air, why would they when they can do that on the Internet orders of magnitude faster?

The 2M spots nets are however currently threatened by the more recently available Telnet spots systems. But using a Telnet node involves hanging online for the duration of the contest, typically for 48 hours at a crack. Plus there are still bogus spot filtering problems, etc. Many are not willing to do Telnet so they continue to tune a neighborhood 2M spots node. In this local region we have about 250 regular spots net users and about eight 2M nodes.

Does anybody have any info on the above, I have one, but can find no info on it. Any help much appreciated.

Do you know what the outputs are on the back, they are unmarked on mine, I have a coax input, 2 outputs and 2 pairs of wire terminals and a single ground (apart from the Ezitune connections). There is a pair of black and a pair of red terminals, I expected to have the ground side of a pair distinguished, and I am assuming that the pairs are for high and low impedance matching, but don't know which way.

What I want to use it for is to tune a wire as an antenna, I am restricted in what I can use (conservation area in our "world heritage site" city!!!!) so need to run something around the plastic guttering - any ideas would be great.

There can be more reasons than that. I'm not operating from a twenty year old perspective, and I have that same amount of interest in those chats.

There you have it. The keyword is interesting. If something interesting comes around, people will go to it. We shouldn't have a blind spot regarding our favorite portion of the hobby.

RITTY by K6STI is, by general consensus, the best of all soundcard programs for decoding RTTY under weak-signal conditions. It has some drawbacks: It is expensive ($100), runs only under DOS (not a DOS window) and has specific hardware requirements. Most people probably will not be interested since MMTTY is very nearly as good, but if you want the best, RITTY is it.

Good luck getting practically totally reliable VoIP on dialup. I tried. I failed.

So does EchoLink, if you choose to use it via RF, that means you you require a radio, and RF is
utilized, making it fulfill your original criteria.

As a relation:
Guns can kill people, but one can choose to injure a threat non-lethally if aimed at a certain point
of the body. Obviously, they are also used for non-threatening purposes (sport shooting). Does that
mean that they are not dangerous weapons? Hardly.

John

Might possibly be that particular ISP. I subscribe to two different ones,
both dialup. On one of them I can almost never get a hookup. Something in
their firewall system interferes. On the other one I can always get a
practical, reliable hookup. The odd thing is that the one that works is the
"busier" system.

English not your first language I guess, or perhaps you skipped "How to read
101"?

Eh what?

Why are you against Ham Radio?
Some irrational fear of RF perhaps?

Rich the way to determine activity from any location is use the DX Summit
search
URL: http://oh2w.kolumbus.com/dxs/qin.html

Type in FO0 and see the spots -- last one was June 2, 2003

But checking the DX Summit periodically will reveal calls, time they were
on, and where they were heard.

NuMorse Professional, like NuMorse but extra features.
NuCode, Koch based code training course
NuTest, for the Tech, General, Extra written tests
Above from the Nu-Ware website:
http://www.Nu-Ware.com

Code Weaver preview from http://www.nu-ware.com/Weaver/wdload.htm looks like
it will be useful when it is finished!

Wow, that's handy, I knew about DX clusters, but did not know you could search them.

Cheers!

Like you say, you can get a hang on who is active, when and on what band with the search facility. I'm impressed!

Rich.

1110. Be SURE to oppose Broadband Over Power Lines

Newsgroup: rec.radio.amateur.dx

BE SURE TO FILE YOUR COMMENTS WITH THE FCC. You can do this easily and conveniently at:

http://gullfoss2.fcc.gov/ecfs/Upload/

Just select "Broadband Over Power Line (BPL) - Docket 03-104" and press Continue.

If you don't know what all this is about, go to:
http://www.arrl.org/news/stories/2003/05/08/3/#noi

Nah, I've been on tons of dialup ISPs. What I meant by reliable was the bandwidth. 56k dialup
download bandwidth, at it's absolute fastest, was 3 kb/sec. So figure the upload was worse than
that. This was with the receive window optimized and the speed verified on DSLreports.com.

Piping through VoIP is troublesome with 3 kb/sec down, and worthless to try with any less, in my
varied ISP experience.

RADIO LAW: HAMS PETITION TO OUTLAW HI-FI SSB

On-air experimentation with so-called High Fidelity or Enhanced Single Sideband transmissions could be outlawed if thr FCC adopts a proposed rules change requested by two radio amateurs on opposite sides of the country. Amateur Radio Newsline’s Paul Courson, WA3VJB, reports from the nations capital:

--

A petition for rulemaking was sent to the FCC and accepted by the agency May 27th. It was not immediately issued a Rulemaking Number so it was hard to find in the public record. However, Newsline has talked with two sources who have seen the proposal, and it calls for what many would consider severe bandwidth limitations on HF phone.

The petition asks for a federally mandated bandwidth limit of 2.8 kilohertz for SSB, well below the extended bandwidth needed for what has been called enhanced audio.

One of the two hams who submitted the petition told the FCC they are motivated by interference problems caused by two groups of single sideband operators. These groups are portrayed by the petitioners as, in both cases, having cast aside traditional voluntary limits on bandwidth of roughly three kilohertz. The petition therefore asks that these voluntary limits be made mandatory to provide a clear enforcement mechanism for regulators.

The petitioners, Michael Lonneke WØYR of Virginia, and Melvin Ladisky W6FDR of California, said hams from one of the groups come on during radio contests, and are found tweaking their transmitters to splatter purposely to provide elbowroom on a very crowded band. The two men characterize the other group as those who experiment with high-fidelity audio, apparently trying to replicate the sound of FM Broadcast stations.

Newsline has recently reported on advisory letters sent out by FCC Enforcement Counsel Riley Hollingsworth, K4ZDH, who wrote to several members of the enhanced SSB group telling them the agency had received interference complaints. The letters did not validate nor dispute the complaints, but warned the stations that if such complaints continued, the unresolved friction could trigger petitions for rulemaking. One such petition is now at hand.

A Newsline reporter spoke with Lonneke, who declined to provide a copy of his petition for this report. He said he and Ladisky hold the same views on the matter of excessive bandwidth causing interference, and that they teamed up on the petition to add strength to their call for regulatory intervention. Lonneke declined further comment, and said the petition will speak for itself if the FCC chooses to assign it a rulemaking number and put it to public comment.

Members of the enhanced SSB group have told Newsline they believe their experimentation with improved audio is totally in line with the spirit of ham radio, and thet when conducted under appropriate conditions, is every bit as justified in bandwidth consumption as any other spectrum-intensive activity, including contesting. But the FCC's Hollingsworth, reacting to such comments, disagreed, suggesting the mode of SSB was commissioned for the amateur service as a spectrum conservation mode, counter to the idea of high-fidelity audio and the bandwidth it requires.

Hollingsworth could not be reached to comment on the proposed Petition, and another FCC official declined to comment.

The petition also mentions the legacy mode of AM, and said it, quote, does not create the same problems that the burgeoning use of so-called 'Hi-Fi Single Sideband' creates. Nonetheless, the petition asks the FCC to impose a 5.6 kilohertz bandwith limitation on AM, with the restrictions asked for on all HF allocations below 28.8 megahertz.

Previous regulatory proposals based on bandwidth have failed, including Docket 20777 from the mid 1970s. The conclusion then was that having loosely-defined technical standards allowed the greatest range of experimentation in ham radio, as long as such signals are clean. Indeed, many present-day violations of splatter, overdriven amplifiers, and poorly administered audio lashups can already trigger enforcement action under existing FCC rules governing the purity of signal.

Reporting for Newsline, Paul Courson, WA3VJB, in Washington

--

As we go to air, the ten page petition by W0YR and W6FDR has not been been assigned a Rule Making number designation. More on this story in future amateur Radio Newsline reports. (ARNewsline™, W5YI)

**

ON THE AIR: PERTH HAMS JAMMED OFF 2.4 GHZ

A cloud of radio frequency interference has settled in on the 2 point 4 Gigahertz in the city of Perth Australia. For many hams it is making satellite operations impossible. Felix Scerri, VK4FUQ, reports from the city

of Ingham – down under:

--
You may not hear many VK6 hams on AO40 for a while. Many are suffering from interference from some form of wide band data transmission centred on 2.4GHz. The signal covers much of the Perth metro area and is very strong. So strong in fact that it does not matter where you beam you can still hear it - mainly from reflections.

The signal, which runs continuously, sounds like a 100Hz buzzing sound and has a bandwidth of about MHz. Looking at the signal on a spectrum analyzer it has a flat top and very steep sides. The signal started about 6 weeks ago and one suggestion is that it might be an image response of S band down converters to the 2.1GHz G3 mobile phone service that have just started tests.

--

At airtime, the interference is still there and hams in Perth are wondering what to do to make the problem, go away. (Q-News)

**

WRC 2003: AN UPDATE

Radio regulators from around the world are still gathered in Geneva Switzerland trying to work out numerous spectrum issues including some dealing with Amateur Radio. Q-News Graham Kemp, VK4BB, is here with the latest:

--

The International Telecommunication Union's 2003 World Radiocommunication Conference got under way June 9th in Geneva Switzerland. Amateur Radio is only a small part of the conference which is trying to complete work on more than 40 agenda items.

Amateur Radio is but a small part of the conference, which is trying to complete work on more than 40 agenda items. Three are especially important to us: realignment of 7 MHz allocations (agenda item 1.23), revision of the regulations governing the amateur and amateur-satellite services (agenda item 1.7), and consideration of an allocation for satellite-borne synthetic aperture radars (SARs) in the 70-cm band (agenda item 1.38).

Two other agenda items that could potentially have a great impact are the drafting of an agenda for the next WRC scheduled for 2007 (agenda item 7.2) and the revision of footnotes to the Table of Frequency Allocations (agenda item 1.1). A member of the IARU core team has been assigned to follow each of these five items, with the most focus being on 7 MHz.

It is the intention of the IARU core team to send timely and accurate reports of final decisions reached on Amateur Radio issues. It is important to remember that nothing is final until the second reading of a document in the Plenary, which in the case of controversial issues
will not take place until the final week of the conference, 30 June to 4 July.

--

Look for up to date briefings on the ARRL website at www.arrl.org and weekly summaries here on Amateur Radio Newsline. (ARRL, Q-News)

IN THE MEDIA: HAM RADIO HIGHLIGHTED ON WBUR RADIO

Ham radio was the featured guest when WBUR radio in Boston Massachusettes devoted its show titled "The Connection" to the hobby on Thursday, June 12th. Hosted by Dick Gordon, the show's theme was that ham radio is alive and vital with close to two-and-a-half million hams world wide still consider ham radio their preferred way to fly.

The program was also centered around the new book titled "Hello World: A Life in Ham Radio" by Danny Gregory and Paul Sahre. A book based on the collection of QSL cards of silent key W2OJW. And while neither of the authors was there, Bob Hopkins, WB2UDC was. Hoskins is Director of the Computer Center at Cooper Union University in New York and played a key role in the books development:

--

Hopkins: "Hello World is a wonderful book, and where I work over at Cooper Union I have collegues that do many things. We have an engineering school, an art school and an arcetecture school. Because of the archecture aspect, a collegue of mine who works at the Princeton Archecture Press as well as Cooper Union contacted me and said that he had a couple of friends who were thinking of putting together a book on ham radio post cards and wanted to do the graphic design and would I be interested in having a conversation with them. I said -- oh sure -- fine -- bring them in. These guys came in with these fabulous cards dating back to 1927 up to the present."

--

Also appearing on the program were were Moody Law, WQ6I in Claremont California, Joe Leto, W0ANT from Ankeny Iowa, and Harry Han, BG4AGY, in Shanghai. Each spoke on the way ham radio has affected their personal lives and those around them.

Even though its well over a week since the perogram aired, it is archived as a Real Audio stream at the WBUR website. To hear it take your web browser to http://www.theconnection.org/shows/2003/06/20030612_b_main.asp

Our thanks to Daron Manoogian who is the Manager of National Program Marketing at WBUR for permission to use the audio you heard in this report. (K1TW)

**

RADIO LAW: NY HAM CITED UNDER STATE SCANNER LAW

A New York ham has been cited for having radio gear in his car even though the state law governing scanner radios exempts licensed Amateur Radio operators. On May 31st Richard C. Lalone II, KC5GAX, of Calcium, says that he was stopped while driving well under the posted speed limit by a New York State Trooper and given a ticket for having Icom IC 1500 and IC 706 radios in his vehicle.

Lalone says via the qrz.com website that he did try to explain that that he was an Amateur Radio Operator and even provided his Amateur license for the officer’s review. Apparently, this was not good enough and the ticket was issued.

Lalone appeared in court on June 10th to answer the summons. At that time he approached the judge with both his license and a copy of New York Traffic Law 397 a copy of PR Docket 91-36. But the Court Recorder immediately took the documentation from the judge and returned it to KC5GAX. The judge then conferred with the Court Recorder after which he told Lalone that he was entering a plea of innocent for him. He then instructed Lalone to seek an attorney and be present in court July 9th. They court then offered KC5GAX paperwork to obtain a public defender, and returned the citation with the new court date.

Its not clear as to what will transpire on July 9th. Lalone’s posting did not state if this was a trial date or other type of preliminary hearing. If he is convicted of violating New York’s scanner control law Lalone faces a fine of $1000, 6 months in jail, or both. (W6EM, qrz.com)

**

ENFORCEMENT: FCC WRITES PART 15 DEVICE USERS ABOUT ALLEGED INTERFERENCE TO AMATEUR RADIO

Turning to enforcement issues, the FCC has written two Northern Virginia residents to follow up on complaints from a local amateur. A ham who alleges that he's on the receiving end of harmful interference from telephone devices with the capability to support multiple cordless remotes. Amateur Radio Newsline’s Bill Pasternak, WA6ITF, has more:

--

According to the ARRL Letter both units interfereing with Bernie Keiser, W4SW, of Vienna, Virginia, are unlicensed Part 15 consumer electronics made by a well-known manufacturer. In separate June 2nd letters to the two users, the FCC’s Sharon Bowers pointed out that if their units are the cause of harmful interference to a licensed spectrum user, they are responsible for solving the problem. Also, that the operator of the device is responsible for correcting the interference or ceasing operation whenever such interference occurs.

Bowers is the deputy chief of the Consumer Inquiries and Complaint Division of the FCC's Consumer and Governmental Affairs Bureau. She explained in her letters that the equipment was classified as an intentional radiator and noted that harmful interference to a licensed radio service from such a device is a violation of FCC rules. She advised the consumers that the alleged harmful interference must be corrected before they may use the devices legally. She suggested they contact the manufacturer or retailer of the equipment to see if they'd either allow them to return them or exchange them for devices that don't cause interference.

The interference to W4SW’s ham radio operation took the form of broadband noise from 2400 to 2450 Mhz. This made it it difficult for him to hear the AO-40 downlink and beacon in the 2.4 Ghz band.

For the Amateur Radio Newsline, I’m Bill Pasternak, WA6ITF.

--

The complaints against the two Vienna Virginia consumers represent a bit of a turnabout from the typical interference scenario. Usually its the ham who generates complaints of RFI to consumer electronic gear and hears from the FCC. (ARRL)

**

ENFORCEMENT: HAM ACCUSED OF FALSE DISTRESS CALLS ORDERED OFF THE AIR

A California ham has lost his right to operate an Amateur Radio station. This, based on allegations by the FCC that he may have been the source of a number of phony distress calls made by radio.

On June 3rd the agency’s Riley Hollingsworth notified Michael V. Swift, the now former KG6QOB to inform him that his license had been cancelled. This, based on evidence that the San Ramon ham had made numerous false distress calls on Marine Channels 16 and 22A.

In his letter Hollingsworth said that in view of the agency’s action that Swift no longer has authority to operate Amateur Radio transmitting equipment. He also warned that any continued on-air operation by Swift could lead to a fine or criminal prosecution. (FCC, RAIN)

**

SPECTRUM REALLOCATION: FCC PROPOSES UNLICENSED DEVICES IN THE 5 GHZ BAND

Still with regulatory matters, the FCC has proposed making 5.47 to 5.725 Gigahertz available to National Information Infrastructure devices, including Radio Local Area Networks, on an unlicensed basis. If adopted, this plan will increase the spectrum available to license-free devices in the 5 GHz region by nearly 80%.

The complete story is on the web at the FCC’s website. A direct link to it is http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-03-110A1.doc (CGC)

**

WITH THE HANDI HAMS: NEW BLIND FRIENDLY WEB THEME FOR WWW.HANDIHAM.ORG

Phil Temples, K9HI, has created a blind-friendly theme for the Handi Ham System website. The reorganized site eliminates the complicated page structure that works well for sighted users but was difficult for blind users employing audio programs like JAWS or Window-Eyes to navigate. To take advantage of the new navigation system visit www.handiham.org and choose the "Courage" theme for easy blind navigation. (HandiHams)

**

NAMES IN THE NEWS: WA8SME NEW COORDINATOR OF ARRL'S "THE BIG PROJECT"

Mark Spencer, WA8SME, has joined the ARRL Headquarters staff as the new coordinator of the ARRL Amateur Radio Education and Technology program. That program is better known in ham radio circles "The Big Project." Spencer succeeds Jerry Hill, KH6HU, who has returned to Hawaii. (ARRL)

**

EMERGING TECHNOLOGY: THE TRUE UNIVERSAL REMOTE

A true universal remote unit that will literally help to control your entire lifestyle is now under development. Researchers on the project say that the all-in-one controller that would choreograph not just home entertainment systems but also intelligent appliances all around the house.

Maya Designs Inc. in cooperation with Pennsylvania’s Carnegie Mellon University has created a prototype based on a Compaq iPAQ portable digital assistant. The experimental handheld has so far been used to control two lamps, a fan and a stereo with a five-CD changer. Researchers say that more is on the way once standardization of remote control codes for various appliances

is achieved.

The Consumer Electronics Association is working on this aspect of the problem. It estimates the average household has at least four remote control units. It also understand why the consumer electronics industry considers a universal remote an important device for the marketplace. (Science Today)

**

RADIO AND SPACE: MOUNTAIN PEAK NAMED IN HONOR OF ILL FATED COLUMBIA CREW

A Colorado mountain peak has been named Columbia Point. This, in honor of the seven astronauts who died when the space shuttle Columbia broke up over Texas on Februay 1st.

The peak on Kit Carson Mountain in the Sangre de Cristo Range near Colorado Springs is close to the 14,081-foot Challenger Point. That peak was named in honor of the seven crew members who died in the Challenger space shuttle explosion in 1986. The newly cvhristened Columbia Point also is roughly 14,000 feet. (ANS)

INTERNATIONAL - EUROPE: PMR446 MEANS FUN

From a listener in Europe comes word of a new communications network called PMR446. This is a licence free 500 milliwatt personal mobile radio service that is quite similar to the United States Family Radio Service with one big difference. The pan-Eueropean service permits is users to connect their radio gear to the Internet using personal computers and software interfaces. The software of choice is eQSO and with it Eueropean experimenters have created a network of linked rf-gateways.

On the R-F side, the radio gear is limited to flea power and built-in antennas, but thanks to gateway linking PMR 446 is quickly developing into quite a hobby thats bringinging together hams and non hams alike. In fact, it even has its own home in cyberspace at www.446user.co.uk. Drop by and have a look at what’s happening on the other side of the Atlantic. (PMR446 Users Group)

INTERNATIONAL - HOLLAND: RADIO NETHERLANDS TARGETED BY PUBLIC BROADCASTER

Radio Netherlands management have reacted angrily to a recent edition of the Dutch domestic current affairs TV programme Nova. A story reported on Nova said that drastic budget cuts of up to 85% was in the offering for Radio Netherlands, and as a result everything except broadcasts to the Netherlands Antilles and Surinam would be scrapped.

According to Radio Netherlands, the erroneous item was based on a leaked copy of a report into the efficiency of public broadcasting that was jointly commissioned by the Dutch Ministry of Culture and the broadcasters themselves. Nova seized on one section of the report and interviewed a representative of the Dutch Association of Journalists, who said this would effectively mean the

end of Radio Netherlands.

But Radio Netherlands says that the report was not a call to action. Rather, its purpose of the report was to identify multiple scenarios where cost savings could be made. The example quoted by Nova was just one. The Hilversum based station also noted that decisions on the mission of Radio Netherlands are made by politicians in The Hague, not by other public broadcasters or the authors of a commissioned report. (Media Network)

ON THE AIR: MUSEUM SHIPS 2003

On the air, K3CLG says that the 2003 Museum Ships Weekend special event stations will be held on the weekend July 19th and 20th. Operations will encompass all modes including phone, C-W, PSK-31, APRS and even contacts via the Internet Radio Linking Project or IRLP. You can check on all the details at this easy to copy URL. Its all at www.qsl.net/ww2dd/event.html (K3CLG)

**

DX

In D-X, word that SM3CVM, plans to be on as portable CU2 from Sao Miguel in the Azores through July 6th. Activity will be mainly CW on 80 through 10 meters. This will be a holiday operation, so he will mostly be active late evenings local time. QSL to his home callsign via the bureau or direct to his callbook address. (GB2RS)

Also V31MX and V-31-M-F will be active from Caye Caulker from July 23rd until noon of July 29th. They will operate on 80 through 10 meters SSB with some CW activity. QSL both callsign via KZBCN, either direct or via the bureau. (OPDX)

THAT FINAL ITEM: N6ZE’S CROSS-COUNTRY ROVING ODYSSEY

And finally this week, the story of Peter Heins, N6ZE, who may now hold the record for a QRP Rover in the June ARRL VHF QSO Party. In less than two days, Pete managed to rove coast-to-coast, from Grid Square FN-20 to CN-87. Thats a distance of 2754 miles and he operated 6 and 2 meter SSB from each location. Here’s how he did it.

From 1400 to 14:45 E-D-T on Saturday June 14th, Pete was on the air from park bench overlooking Hudson River at Weehawken New Jersey. From there he even managed to work a station in grid EL-86 thru the tremendous E skip that was present at the time.

A bit more operating from a hotel room in midtown Manhattan followed until 15:30 Eastern Daylight Time. Then a quick drive out to the airport where Pete, who is a commercial airline pilot, traded his ham radio microphone and key for the co-pilots seat of a Boeing jetliner. He then spent the next several hours flying to Salt Lake City Utah.

During the layover, Pete rented a car, unpacked his FT-690 and IC-202 and took to the airwaves. From 8:45 to 15:30 Mountain Daylight Time hN-6-Zed-E roved through Grids DN30, 31, 40 and 41 operating both 6 and 2 meters.

He then repacked the gear, got back in the plane and flew it another 689 miles on to Seattle. Thanks to another hours time change, Pete was back on the air around 19:52 Pacific Daylight Time in Grid CN-87 from the airport ramp making two QSO’s. His last contact took place at 19:59 Pacific Daylight Tine. That was just 1 minute before end of contest.

His totals for the contest period: On 6 meters he had 16 QSO’s, 16 QSO points and 8 multipliers. 2 meters yielded 24 QSO’s, 24 QSO points and 9 multipliers for a grand total of 960 points.

In his posting to the VHF Reflector, Pete put out a special thank you to the hams in the Salt Lake City area who provided lots of information for operating sites in 4 grids that helped to make his cross country VHF roving odyssey, complete. (ARNewsline™, N6ZE)

1114. Is upgrade to DX-398 from DX-375 worth it?

Newsgroup: rec.radio.amateur.dx

I have been shortwave listening on a DX-375 for a number of years and I am considering upgrading to a DX-398, but wonder just how much improvement in listening quality I would be getting. Can anyone give me some advice? For example I listen frequently to the BBC on 5975 and 15190.

Don,

Will you be using an external antenna? If so, you may find an
advantage with the DX-398. The downsides to the DX-398 is that it is
not very sensitive just off the whip and the battery life is very
disappointing. The 375 has fantastic battery life and pretty lively
right off the whip.

I have both radios here. You will like the 398 a lot if you use an
external antenna and keep it tethered to an AC adapter. With the 398,
you can fine tune plus listen to single sideband. Also the 398 covers
the "frequency holes" that the 375 doesn't cover.

73 Russ also in N.C.

This year I picked up a DX-398 with several mods, audio, sensitivity, tuning, light... I must say this is the most pleasing portable I have ever owned and I have owned many. I have owned the Sony 2010, 7600G/GR, SAT 700. I use headphones or computer speakers and the audio is excellent! I can listen to 80M hams with ease on the whip antenna. Broadcast tuning and listening is a pleasure. The stock DX-398 can't compare at all!

I have the DX-398 and the Sony 7600GR, I don't notice substantial differences between the two regarding sensitivity. Believe me, it is not deaf off of the whip. The use of a small reel antenna helps. I was listening to the Liberty Net last night, using a Yaesu FT-840 and the DX-398. The performance was similar, the DX-398 with the reel antenna only partially deployed, the Yaesu with approximately 30 feet of wire. I have had problems with not being able to adequately center the receiving frequency on the DX-398 when in the SSB mode, giving a slight distortion to the sound. The Sony seems better able to correctly tune the SSB signals. BUT, most of the time, even with SSB, the DX-398 is a performer.

At a good price for the DX-398, I'd go for it if I were you.

Regards.

hi Don;

I have both receivers. side by side the Dx-375 picks up
everything the same or better. But everything changes when an outside
antenna is used. With an outside antenna the Dx-398 shines - Better
audio, more stations. The only draw back is the Dx-398's poor battery
life. It eat's batteries! So I use my Dx-375 for general listening and
my Dx-398 for Ham's and Utilities.

Have fun SWLing. Paul

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 15th/June, through Sunday, 22nd/June there were 212 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3V, 3W, 3X, 4J, 4L, 4S, 4U1I, 4U1U, 4W, 4X, 5B, 5H, 5N, 5R, 5T, 5U, 5V, 5W, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A3, A4, A5, A6, A7, AP, BV, BY, C3, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FO, FP, FR, FY, G, GD, GI, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HZ, I, IS, J3, J5, J6, J8, JA, JD/m, JD/o, JT, JW, JY, K, KH0, KH6, KH9, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ7, PY, PZ, S2, S5, S9, SM, SP, SU, SV, SV5, SV9, T2, T32, T5, T7, T9, TA, TF, TG, TI, TJ, TK, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V4, V5, V7, VE, VK, VK9N, VP2E, VP2V, VP5, VP6, VP8, VP8/o, VQ9, VR, VU, XE, XU, XW, YA, YB, YI, YJ, YK, YL, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

4U, UNITED NATIONS HQ. Frank/W2IX and Ray/W2RE gave many a real treat and surprise to work 4U1UN on Sunday morning, June 22nd. They were operating SSB and CW. Activity was on 20/17/6 meters as this bulletin was being typed.

7Q7/10JUNE, MALAWI (Good or Not!). It seems this one caused some confusion over a week ago. First reports indicated that this was a PIRATE station. However, this is NOT the case. According to Leo, CT1CSN, activity was by Vasco, 7Q7CT, who has a Malawian official document granting the use of the callsign, 7Q7/10JUNE, to be used as a special event. June 10th was Portugal's Day and is commemorated by the various Portuguese communities around the world. So those who worked Vasco with the callsign 7Q7/10JUNE made a legitimate contact. QSL Manager is ZS6AMX.

9A, CROATIA. THIS IS JUST A REMINDER! Operators Kresimir/9A7K, Phil/F5OGG and Branko/9A6BND will activate several islands and lighthouses over the next week until June 30th. Activity began over the past weekend. Watch around 14260 kHz. Remember to QSL via operator's home callsign, except Phil/F5OGG (QSL via LX1NO). LAST MINUTE UPDATE: Look for the 9A0LH team to be active from Palagruza (EU-090 and WLH-0057) early Monday morning, June 23rd.

CT3, MADEIRA ISLANDS. Francisco, CT1EAT, informs OPDX that he will be active as CT3/CT1EAT on a DX holiday, from Porto Santo Island (AF-014) starting on the July 24th, ending on the 30th. The radio operation will take place mainly on the AO-40 satellite, but also on HF (from 20-10m), on SSB and RTTY modes. He will be an entry in the IOTA Contest as CT9T as a Single Operator/Low Power, SSB only. QSL via CT bureau, or direct to his home callsign via CBA address: P.O. Box 172, 7801-902 Beja, Portugal. For more information, please visit his home page at: http://www.qsl.net/ct1eat

FH, MAYOTTE. Martial, F5SIE, will be active as FH/F5SIE, from Mayotte Island (IOTA AF-027 and DIFO FH001) between July 1-15th. This will be a CW only operation with activity on 40/17/15 meters with a TS-50 and wire antennas. QSL (PLEASE) via the French REF bureau.

HP, PANAMA (Special Event). Members of the Panama Radio Club invite all amateur radio stations in the world to make a contact with special event station HP100RCP to commemorate the 100th anniversary of the Republic of Panama. Activity will take place November 1-3rd on all bands on modes CW/SSB/RTTY/PSK31. A special commemorate QSL can be obtained by sending your QSL plus 2 IRC or one USD to: Radio Club de Panama, P.O. Box 10745, Panama 4, Panama. You can view the special event station at HP100RCP and the QSL card on PRC's Web sites at: http://www.radioclubdepanama.org http://www.qsl.net/hp1rcp

IOTA CONTEST (Attention Island-hopper and Island-chaser!). Ric, DL2VFR, informs OPDX that already 42 stations have announced their participation in the 2003 IOTA Contest and have been listed now on the following Web page at: http://www.iota-post.com
Ric states, "This is useful if you are looking for a QTH or if you are looking to see who will be QRV ?" Everybody is invited to send his/her island QTH report to: info@iota-post.com
In the last years he has had more than 130 reports. Deadline for reports are the 24th of July. After that date Ric is heading to EU-129 where he is participating with the team of DL0KWH from Usedom Island.

IOTA NEWS.....
AF-019. Paolo, IZ8FDH (member of "VESUVIO DX TEAM") will be active from Favignana Island (IIA TP-011) as IF9/IZ8FDH, fron June 29th to July 6th. Activity will be on HF and 6 meters. QSL to IZ8FDH via the bureau or direct to the address: Paolo Capobianco, Via Enrico Cocchia n. 26, 80124 Napoli-Italy.

AS-080. If you were lucky this past weekend to work 6K2BYF/3 it was from Anmyun Island. Choi, HL5FUA, states activity is expected to last until June 23rd on 40-10 meters including the WARC bands. QSL via 6K2BYF.

EU-008. John, GM0VIV, will be active as GM0VIV/p from the following Inner Hebrides Islands Group between June 23-25th as follows: Monday evening, June 23rd, from Mull (IOSA NH-15, SCOTIA CN10); Tuesday morning, June 24th 0900z from Gometra (IOSA NH-28, SCOTIA CN-06); Tuesday afternoon, June 24th, from Ulva (IOSA NH-18, SCOTIA CN-05); and Wednesday morning, June 25th 1000z from Iona (IOSA NH-16, SCOTIA CN-01). He will be on Mull overnight Monday, Tuesday and Wednesday nights. QSL via home callsign, CBA.

EU-101. Hans, OH6MY, will be active as OH6MY/p from his summer QTH at Anterskar (Lapporarna Island -- WW Loc. KP03OI) between July 7th to August 3rd. He will be using a IC-706 at low power on a car battery with a G5RV antenna. QSL via his home callsign, direct or via the bureau.

EU-184. A group of Finnish operators will be active from Hailuoto Island and Marjaniemi Lighthouse as OH6AW/8 between June 27th and July 1st. Operations will be on HF, 6 meters and 2 meters. Operators will be OH6HJE, OH6NJ, OH6UV and OH6XX. QSL via OH6AD.

SA-040. Operators Pablo/HK8RQS, Victor/HK8JEH and Albaro/HK8HIX will be active from Morro Island, October 11-14th.

SA-063. Ramon, YV5EED, Events Coordinator for ARV Caracas and Grupo DX Caracas, informs OPDX that the Association of Radioamateurs of Venezuela and the Grupo DX Caracas has activated Remediadora Island instead of La Cotorra Island to celebrate the 65th Anniversary of the Venezuelan National Guard Day 2003, from June 20-24th. They will operate on HF from 160-10 meters, including 6 meters on SSB and CW. QSL via W4SO (mail drop). Cards will be verified and mailed from Venezuela.

OC-241. CHANGE IN PLANS! The multi-team active from Rote Island were expected to use the callsign 8A9R, but they used another callsign instaed, YE9R. They will be active until June 25th. QSL via YC9BU.

KH2, GUAM. Yoshiro, N1VF, plans to be signing N1VF/KH2 from Guam Islands (OC-026), November 21-24th. No details on bands/modes of activity were provided. QSL to his home call: Yoshiro Nishimura, c/o David Manela,

2248 Mountain Ridge Rd., Chula Vista CA 91914 USA.

LIGHTHOUSE ACTIVITY.....
Members of the Georgian Bay ARC will be back at Flower Pot Island on August 2nd, 3rd and 4th. They will be transmitting on 20, 40 and 80 meters. Flower Pot Island is in the Great Lakes in Georgian Bay. The Lighthouse reference number is WLH 0763 and is wanted by 70% of the lighthouse chasers.

Mike, GM4SUC, sends the following reminder: "Well it doesn't seem nearly a year has passed since the last International Lighthouse/ Lightship Weekend when over 385 stations were active at lighthouses and lightships throughout the world. This year the event will be from 0001z on Saturday, August 16th until 2359z on Sunday, August 17th, 2003. Full details of the rules and an entry form can be found at: http://lighthouses.net.au/illw/index.html
A list of stations that have already confirmed their participation can be found at: http://lighthouses.net.au/illw/2003.htm
So come and join us in the fun of the weekend, listen out for the QRP, newly licensed and other lighthouses/lightships, and give them a call."

NEW DX WEB PAGE. Marek, DH9SB, reports he has a new Web site which contains a weekly overview of DXpeditions/Special Event Stations operating in the current week. He provides two URL addresses:
http://www.dx-info.de/
http://www.dx-info.com/

QSL INFO AND NEWS.....
Operators CT1GFK/P, CT1GPQ/P and CT2IHP/P were active from Culatra Island (IOTA EU-145, DIP AL-01 for the Portuguese Islands Award) during the past weekend. QSL via their home callsigns, direct or bureau.

Gordon, KU4EC, informs OPDX that his 2002 KG4EC Guantanamo Bay logs are now available on-line at: http://www.qsl.net/n8ch/gitmo02.htm
He states, "For those who want to check if they are in the log or not, sorry for the delay getting these posted."

QSL UPDATE FOR TI/AI5P. Rick, AI5P, reports that QSLs arrived June 16th from the printer. He expects to have all direct cards received answered in about 10 days or so. He thanks you for your patience.

Silvano, I2YSB, QSL Manager of TX4PG, reports to OPDX that all direct requests for TX4PG QSLs have been sent out.

ANYONE NEED A QSL MANAGER? Gert, K5WW, writes to OPDX and states: "I am offering my services as QSL manager to the DX community. Anyone who makes a lot of QSOs and doesn't have enough time to handle his/her own QSL, has no local QSL bureau or just wants to spend more time on the radio instead of QSL'ing can contact me. I have several years of experience handling the incoming and outgoing QSL for the members of two large clubs and their contest stations. I'm a member of The QSL Managers' Society. I accept paper and/or electronic logs. If you don't already have it a webpage with information about your station and a

logbook search will be created. All requests are welcome at:
k5ww@arrl.net
I'd appreciate it if you could find a couple of lines in the next edition of your magazine to publish this. I recently moved and now live in a 'no antennas welcome' neighborhood. So my own DX activities have to be postponed, and I have plenty of time to help other DX'ers with their QSL."

Claudio, IV3OWC (aka-ST2CF and 9E1C), informs us that his ST2CF QSLs have arrived, and he has begun to confirm direct cards. Also, QSLs for his 9E1C operation have all been sent out.

XW2A QSL PROBLEMS. Hiro, XW2A, reports he has a big problem with the postal system. So, please do not send U.S. dollars, only IRC's!!! He states over 95% of mail with green stamps are stolen. His address is: PO Box 10003, Mail Service Office, Vientiane, Laos.

RUSSIAN MOUNTAIN DXPEDITION. A group of Russian amateurs are going on a mountain DXpedition in Carachayevo-Cherkessya Republic, Russia, from June 25-29th. The exact location is Gidam-Bashi Mountain (2410m), Aksaut Canyon, Main Caucasus Range. Reference numbers are: QTH-locator is LN03PO, R-03-03 for Russian Mountain Award, and KC-04 for Russian Districts Award. The members of the DXpedition are: RA6ED/P, UA6ECU/P, UA6EM/P, UA6EDQ/P, RA6EAG/P, UA6EZ/P, UA6EDU/P, RZ6HGG/P, RW6HKF/P, RN6FJ/P and RV6HJD/P. They plan to be active on 80-15 meters SSB/CW and 144/430 FM. QSL are 100% via the bureau and direct.

S7, SEYCHELLES (Update to OPDX.613). John Warburton, G4IRN, will be active from here September 13-16th and 23-27th. This past week John received his licence for The Seychelles. His callsign will be S79IRN.

SPACE DX NEWS ACTIVITY.....
Look for GB1WIS (first Woman In Space) to be active on the LEO (Low Earth Orbiting) satellitess UO14, FO29, AO7 and possibly AO40 up to June 30th. Activity periods will be posted on the AMSAT NA BB at regular intervals.

Next weekend is the ARRL's Field Day and participants may have a real treat to work the Space Station during the weekend event. The "ARRL Letter" states: "The Expedition 7 crew may be on the air from NA1SS during ARRL Field Day the weekend of June 28-29th. 'We don't know if the crew will be active or not, but give it a try,' said ARISS Mentor Charlie Sufana, AJ9N. Sufana advises 'good operating sense' and recommends that FD operators wait for the crew to finish a previous contact before calling. 'You may be only hearing a station or two, he pointed out, 'but they are hearing hundreds.' Look for the ISS during Field Day during these time slots: Northern and Southeastern U.S., June 28th, 1821-1842 UTC; Southern and Northeastern U.S., June 29th, 1059-1117 UTC; Western U.S., June 29th, 1233-1253 UTC; Northeastern U.S., June 29th, 1723-1744 UTC; and Northwestern and Southern U.S., June 29th, 1859-1920 UTC. ARRL Contest Branch Manager Dan Henderson, N1ND, notes that Field Day contacts with the ISS crew do not count

for satellite QSO bonus points, just contact credit. 'Valid satellite contacts must be Earth-satellite-Earth contacts through a satellite transponder or repeater,' he explained. (See Field Day rule 7.3.7.)"

SPECIAL EVENT. French operators will activate the special callsign TM5AR to participate in the celebration of the " 'L' Armada Rouen 2003". Activity will be on 80-2 meters. For the 4th time since 1989, a large group of sail boats (fleet) will gather/head to Rouen, Normandy, France. More than 30 great barques, two/three/or four masted schooners, bricks, ketches and other sea clippers from all over the whole world will stay and parade on the River Seine from June 28th to July 6th. The last Armada was in 1999, where more than 10 millions people enjoyed the visit from the ships. More are expected this year. QSL via instructions for direct cards or via the French REF Bureau.

SV5, DODECANESE. Bert, PA1KW, informs OPDX that he will be active during the IOTA Contest in July from Kos Island (EU-001) as SV5/PA1KW. He also mentions that he will be active before and after the contest. QSL via his home callsign, bureau or direct (SASE).

T2, TUVALU. Mike/T21MY and Jan/T2YL continue to be active until about June 26th. Mike was heard this past week on 80/30/15/12/10 meters CW at various times. Jan was heard on 20/17/15 meters SSB. QSL Manager George, OM2SA, reports that he has received the first set of logs about two weeks ago and the first batch of direct QSLs (500) are in the mail. He is working on them everyday and requests everyone to please be patient.

T5, SOMALIA. Baldur, DJ6SI, has once again surprised everyone and showed up as T5X on June 16th. The length of his stay is not known. He has been very active on 17 meters CW as well as 80/40/30/20/15 meters. QSL via DJ6SI.

V31, BELIZE. Wayne/N5WD and his wife Pamela/KB5UAE are planning to be active as V31WD and V31UA, respectively, from Placencia (EK56), July 15-21st. Wayne will be concentrating on 6 meters during the CQWW VHF Contest weekend. However, he will be on 80-6 meters at other times during the week and can do PSK31/SSB/CW. He tells OPDX, "Maybe next trip we'll add WSJT". QSLs to N5WD, callbook address or via the W5 bureau.

VP2V, BRITISH VIRGIN ISLANDS. Mike Foster is now operating as VP2V/7Q7FM until he gets his own British Virgin callsign. His activity is mostly on 20 meters until he gets his antennas sorted out. Watch around 14200 kHz. QSL "ONLY DIRECT" via Allen, G0IAS. Allen states, "PLEASE add a bit to the return postage....sorry, my pockets are only so deep...and NO return postage no card."

VP5, TURKS AND CAICOS ISLANDS. Gary/K4UU and Bud/K4ISV are now active from North Caicos until June 25th. Their callsign are homecalls/VP5. Gary was heard over the past weekend on/around 14184 kHz after 0100z. Bud was heard on 80 meters SSB (3793 and 3796 kHz) after 1000z and again at 0130z. QSLs for K4UU/VP5 go to his home callsign. No QSL details were provided for Bud's activity.

VP8, SOUTH SHETLAND ISLANDS. Look for LZ2UU to be active as VP8/LZ2UU during the CQ World Wide DX CW Contest (November 29-30th) as a Single-Op/ All Band/Low Power entry. Activity will be from LZ0A, the Bulgarian Antarctic Base on Livingston Island, South Shetland. QSL via LZ2UU.

YI, IRAQ. Steve, OM3JW, reports that his son Mike, OM2DX, will be going back to Baghdad on June 25th. Mike's activity will be limited to a few weeks because Slovak Ambassy in Baghdad was totally destroyed. His power amplifier was lost and antenna systems (log-periodic yagi for 20-10m, vertical HF6 and wire dipoles on low bands) were destroyed. Mike expects to operate as YI1BGD from the club station. However, he believe that he will receive his personal callsign very soon. He will also look for YI1BGD documents (licence that was issue in 1978) and will send his copy to ARRL. The reason for this is that some people are now having their YI1BGD QSLs rejected for DXCC (Mike's activity). For more info and updates, go to the following Web page at: http://www.qsl.net/om2dx

I am sick and tired of you whiner puss boys on this subject its OLD news boys. If you dont like it dont use it simple as that. I am sure some of the whiners are waiting for the CW to be dropped totally too so they can get here Gen tickets. But wait there is more..... They it will kick in to oh my these written tests are to hard, to unrealistic bla bla bla. Bite me babies. I could of waited a few months to get the easy road 5wpm (helen keller speed, she could pass) but I took the 13 and passed with flying colors and proudly display my csce on the wall for all that 5wpm whiners to look at when they come over. I have run a echolink gateway before it was echolink. When it was I-Link. I still on occasion turn on my 10 meter FM link but do prefer HF only ops and no links. IT does however suit its purpose well and I do use it to talk to a few friends I met in the UK.

1123. PETITION FILED TO OUTLAW HI-FI SSB ON THE HF BANDS

Newsgroup: rec.radio.amateur.dx
Date: 2003-06-23 13:55:16 UTC
From: channel391@juno.com
Message-ID: <ae188f77.0306230555.1fb50431@posting.google.com>
Source record: 9907
Cross-posted to: rec.radio.amateur.policy,rec.radio.amateur.dx,rec.radio.amateur.misc,rec.radio.cb

Newsline has the following report on the problems being caused by
those hi-fi SSB operators and a petition to run them off the airwaves:

RADIO LAW: HAMS PETITION TO OUTLAW HI-FI SSB

On-air experimentation with so-called High Fidelity or Enhanced Single
Sideband
transmissions could be outlawed if thr FCC adopts a proposed rules
change
requested by two radio amateurs on opposite sides of the country.
Amateur
Radio Newsline's Paul Courson, WA3VJB, reports from the nations
capital:

--

A petition for rulemaking was sent to the FCC and accepted by the
agency May
27th. It was not immediately issued a Rulemaking Number so it was hard
to find
in the public record. However, Newsline has talked with two sources
who have
seen the proposal, and it calls for what many would consider severe
bandwidth
limitations on HF phone.

The petition asks for a federally mandated bandwidth limit of 2.8
kilohertz for
SSB, well below the extended bandwidth needed for what has been called
enhanced
audio.

One of the two hams who submitted the petition told the FCC they are
motivated
by interference problems caused by two groups of single sideband
operators.
These groups are portrayed by the petitioners as, in both cases,
having cast
aside traditional voluntary limits on bandwidth of roughly three
kilohertz. The
petition therefore asks that these voluntary limits be made mandatory
to
provide a clear enforcement mechanism for regulators.

The petitioners, Michael Lonneke W0YR of Virginia, and Melvin Ladisky W6FDR of California, said hams from one of the groups come on during radio contests, and are found tweaking their transmitters to splatter purposely to provide elbowroom on a very crowded band. The two men characterize the other group as those who experiment with high-fidelity audio, apparently trying to replicate the sound of FM Broadcast stations.

Newsline has recently reported on advisory letters sent out by FCC Enforcement Counsel Riley Hollingsworth, K4ZDH, who wrote to several members of the enhanced SSB group telling them the agency had received interference complaints. The letters did not validate nor dispute the complaints, but warned the stations that if such complaints continued, the unresolved friction could trigger petitions for rulemaking. One such petition is now at hand.

A Newsline reporter spoke with Lonneke, who declined to provide a copy of his petition for this report. He said he and Ladisky hold the same views on the matter of excessive bandwidth causing interference, and that they teamed up on the petition to add strength to their call for regulatory intervention. Lonneke declined further comment, and said the petition will speak for itself if the FCC chooses to assign it a rulemaking number and put it to public comment.

Members of the enhanced SSB group have told Newsline they believe their experimentation with improved audio is totally in line with the spirit of ham radio, and thet when conducted under appropriate conditions, is every bit as justified in bandwidth consumption as any other spectrum-intensive activity, including contesting. But the FCC's Hollingsworth, reacting to such comments, disagreed, suggesting the mode of SSB was commissioned for the amateur service as a spectrum conservation mode, counter to the idea of high-fidelity audio and the bandwidth it requires.

Hollingsworth could not be reached to comment on the proposed Petition, and
another FCC official declined to comment.

The petition also mentions the legacy mode of AM, and said it, quote, does not
create the same problems that the burgeoning use of so-called 'Hi-Fi Single
Sideband' creates. Nonetheless, the petition asks the FCC to impose a 5.6
kilohertz bandwith limitation on AM, with the restrictions asked for on all HF
allocations below 28.8 megahertz.

Previous regulatory proposals based on bandwidth have failed, including Docket
20777 from the mid 1970s. The conclusion then was that having loosely-defined
technical standards allowed the greatest range of experimentation in ham radio,
as long as such signals are clean. Indeed, many present-day violations of
splatter, overdriven amplifiers, and poorly administered audio lashups can
already trigger enforcement action under existing FCC rules governing the
purity of signal.

Reporting for Newsline, Paul Courson, WA3VJB, in Washington

--

As we go to air, the ten page petition by W0YR and W6FDR has not been been
assigned a Rule Making number designation. More on this story in future
amateur Radio Newsline reports. (ARNewsline(tm), W5YI)

I love it! You guys don't see the FCC's plan do you?

This stuff is so incredibly broad banded that it will also affect Standard AM Broadcast, shortwave as well as over the air TV Broadcasts.

Ahhh, but if your rich, you can afford to buy a new Digital AM DAB receiver or XM Satellite receiver to listen to that dimwit Rush Limburger... and of course.....

We ALL have to buy that Digital HDTV if you wanna watch TV over the air or keep your old NTSC TV and pay for a Satellite or cable TV hookup.

Either way, you gonna have to spend money to keep what you got now!

See the plan now ???

No wonder Commissioner Powell jr is getting a big woody over this!

This one technology alone will FORCE everyone to go digital. Like it or not.

So just sit there, take it and don't say anything.

It's what they are hoping for.

More whining hambos! I always thought amateur radio was all about
experimenting.

If this is so bad, why is Hi-Fi AM still allowed on 75 meter phone?
Talk about your wide bandwidth!

1) AM IBOC is fragile enough that I think it would also be affected. And
may never get the stamp of approval because of how bad it sounds. And
because each station
occupies three channels. In itself, AM IBOC may kill AM for most people.

2) Limburger isn't on XM.

Would the interference from these broad banded power line signals
disturb the digital signals as well as analog ?
I know the hdtv is higher up the the analog tv signals.

Echolink or I Link? Which ever one you use or don't use, if you do not like it, don't use it. Simple! There are a small but growing number of amateur radio operators who as they age are no longer able to maintain their own homes. Unfortunatly these operators must move into codos or apartments, etc. that do not allow radio antennas to be installed. For many, Echolink is the only way they can keep in touch with their ham radio friends. There is room in this hobby for Echolinkers, Packet folks, PSK31 people, phone guys, and the CW boys. Some like HF, others like VHF, still others like satelite. This hobby has alot of different asspects to it. We do not have to do it all or use all ham radio has to offer. But we do need to respect each other and our different likes and dislikes. The hobby is changing, yes! But the traditional ways will always be enjoyed by someone.

There was one in QST back in the early 60s on two meters with a KW.

Now its done with single yagis and 180watts. Big changes.

I have no problem with experimenting, even experimenting with wide SSB.

The problem is doing it on 75 or 20 meters where it causes un-necessary interference. The un-necessary interference is the problem.

Experiment on a band with plenty of 'space'.

I seem to remember a series of articles on one of the Ham mags using
BC-348 surplus HF receivers with simple converters for moonbounce, not
easy but doable with a little ingenuity and persistence.

Mind you that was when I was home brewing 14 tube HF SSB rigs - now I
can afford and use commerical rigs which are somewhat more versatile and
smaller.
Still have a pile of parts including mechanical and crystal SSB filters
for 'the next one', but I doubt I'll live long enough - got lazy like so
many of us. But, it most definitely ain't anywhere near as much fun or
nearly as satisfying

I see no reason why a 348 couldn't be used as a IF. If the noise figure was decent enough on the converter.

I don't remember that article, but Id say they were using a 417a, or a 416B triode tube for the RF side of things and possibly a 6J6 for the osc/mult chain. eh?

I don't see a need to ban wide SSB entirely. Just assert a rule saying
that it is a secondary
type of transmission, afforded no protection from QRM, and that it not
QRM other users.
A way of saying "If the band is empty, go ahead and play with it, but if
things are crowded,
forget it". This could also open up other wide band modes like spread
spectrum on HF,
"okay to experiment if the band is empty". IF these modes can be shown
to not trash more
traditional modes, then they could be permitted in more crowded times.

No, I think the article being referred to came later. It was in the November
1972 issue of 73 (it was the thickest issue to that point, and had an article
about "building" a computer). The article, by someone named Brown, was
more an idea article about low cost moonbounce. So by that point it
was transistorized converters. There was an article or two that followed
about some conversions he did to the 348, and he wrote a slew of articles
that in some way referenced the main project. But, the moonbounce seemed
to be a pipe dream, while he persued all kinds of other things.

Sent a direct QSL w /$ to OM2SA tail end of Jan.No response yet.

Found this on the latest OPDX rag,strange that OM2SA reports he is already mailing T2 QSL:'s when it appears that no one has received the T31 cards yet
Joe
W7KQU

"T2, TUVALU. Mike/T21MY and Jan/T2YL continue to be active until about June 26th. Mike was heard this past week on 80/30/15/12/10 meters CW at various times. Jan was heard on 20/17/15 meters SSB. QSL Manager George, OM2SA, reports that he has received the first set of logs about two weeks ago and the first batch of direct QSLs (500) are in the mail. He is working on them everyday and requests everyone to please be patient."

There is no argument as to what Amateur Radio is -- According to the FCC (the only one that matters) , Amateur radio is a service and it has a basis and purpose
URL: http://www.arrl.org/FandES/field/regulations/news/part97/

Anything else is in the eye or ear of the beholder such as hobby, etc. No where in the FCC rules/regs does it say hobby.

This shud stir up some controversy

FYI.
Hi,

Many OM and YL appreciate to look at the dark sky too, doing visual observations or practicing astrophotography.
In the course of the past months I have gathered some callsigns of hams who own a telescope, have built various radioastronomy instruments or who can easily access to a large public observatory (i.e. to get the information you need if the case arises). Here they are :
AF9Y, K6ALF, KC0ODY, KD6QLG, N1IRZ, WD4HIM, VK2THN, F1PVM, ON4EU as well as your devoted LX3SKY, hi !

If you are ham and very involved in astronomy, I would like to complete my list in receiving your callsign by email. One or another day we could be in QSO on the air or via Echolink. I think that these QSO, whatever their technical level, will interest many hams and listeners too...

Best 73 (or Have a dark sky...) !

Thierry, LX3SKY
Echolink node 2273
Astro http://www.astrosurf.com/lombry
Radio http://www.astrosurf.com/lombry/menu-qsl.htm

I just spoke to Jan on Tuvalu (June 25) and she indicates they got a late jump on the T31 QSL's. I think it might have been a QSL printing delay, but I'm not sure...her signal was fading quite a bit.

73,

Dave AA1VX

Great !
Some well-known amateur astronomers answered me directly... Many thanks guy's !
You help me to complete my log ;-)
But conversely, is there some OM (men) or YL (women) from rradx forum who practice astronomy ?

It seems there are much more amateur astronomers who got their ham license than ham radio interested in astronomy. Strange, because this is exactly the way I entered the ham community, through the astronomy (passion for the ionosphere, auroras, meteors-scatter, eme...).
Now both are really on par, but with highs and lows as in all life.

Hope to work you soon on the air or via Echolink to speak radio+astronomy.

Well it may be dumb ass ham humor, but I wish I could kick the ass of all the dumb asses that tune up for minutes on end on the air on or near a weak DX station. As for tuning into an imperfect antenna, you can use a dummy load to get close, then touch it up on the air QUICKLY! The ham bands would be a nicer place to listen to if everyone had a dummy load and used it. So stupid is as stupid does....

It's as exciting as neckcar. I'm sorry, maybe Jim Rome has skewed my view a
bit. Sorry that you can watch a motor spin and be entertained.

I'm not a ham (don't have a transceiver) but I sometimes listen to ham conversations on my Sony 7600G and occasionally over internet-tuned radios. Usually pretty boring stuff unless your deep into amateur radio, but occasionally some lively stuff (not unlike internet chatrooms of which I perceive a similarity). Point being: If you get a group together to talk about astronomy, I'd love to listen in (and many others I'd think). Please post the frequency (and if USB or LSB) and times. Could be lots of fun.

Which channel is he on?

I haven't found mention of him on the XM web site. I've found the listings
for what seems to be the righty-talk channel and he's not in the schedule
contained therein.

I surfed for quite a while and found many, many messages saying that
Limbaugh is NOT on XM, and only one that said he is. No details were given.

Why would you want to use it? It is not covered by the CEPT agreement and
you are from Holland, aren't you? You cannot use 6m on holidays on your CEPT
licence!

If you have a dutch C-licence (CEPT 2): only 144 MHz and up
If you have a dutch A-licence (CEPT 1): only < 30 MHz and 144 MHz and up,
not 6!!!

As a ham I'm tempted to join the fun communicating via "meteor scatter"
durng a shower (or storm) on VHF/UHF...

But as a amateur astronomer I'm drawn to go out an look up at the sky
instead (besides, I don't have the equipment for meteor scatter operation
;-)

The two hobbies use the same event for different, mutually exclusive
purposes :-(

Hi,
Many thanks.
The list is growing... : AC4WY, AF9Y, K6ALF, KB1GSF, KC0ODY, KD5TXD, KD6QLG, N1IRZ, N1JDU, N7SO, W2QAK, WB3LFJ, WB5IZD, WD4HIM, F1PVM, ON4EU, SM0ULB, VK2THN and your dear devoted LX3SKY soon LX1SKY (remember this last, hi). Of course some will never work DX on the air but prefer Internet forums.
The same add was published on F.S.A forum (french), but many less OM have got a ticket. I will however renew the add on other french forums.

For the fun it should be great if Howard, N7SO could arrange a visit at MMT, hi ! An idea I keep for the day I will visit the USA and my friend KC0ODY, in the list.
Of course visiting MMT will not be easy for VK, SM, ON or LX hams...

A net ? Sure ! But even when bands are full open up to 1 mW (listen to beacons) or using beam with 1 kW pep on the 20 or 15m band, it will not be easy at all to get at the same time such a huge collection of hams (there are also 2 YL) interested in the same matters. What time to choose between LX, K6 and VK : timeshift exceed 15 hours. The middle is near GMT, so in LX... he-he, hi... !
I really think that for such activity Echolink could be an excellent alternative : all Dxers arrive to each other 59+ without QRM... (but no controversy please, otherwise see my page http://www.astrosurf.com/lombry/qsl-echolink.htm)

Of course I will seriously think to create a net on the air too, probably on the upper frequency 20-10m, may be in the 20m. Maybe on weekends bec' I observe that many of my contacts are easier free at that time. To experiment.
Personnaly I cannot be on the air until late 2003 and for some of us the equipment (RTX and antenna) can be the main problem as some readers have already told me that they do no more own any ham rig. So once again Echolink appears to be good alternative...

Stay tune guys. If someone in the list wants already to create this SKY net, it is up to you. In all cases you will soon hear from me as I keep this list in a warm place ;-)

As soon you will heard (or read on forums or Echolink) something related to "SKY", prick up one's ear... I should be near.
Best 73

Act before July 1st to preserve your privacy.

Hi All,

Subject: Your Credit: Personal Information goes public

Starting July 1st, 2003, the four major credit bureaus in the US (Equifax,etc) will be allowed to release credit info, mailing addresses, phone numbers, etc., to ANYONE who requests it. If you do not want to be included in this release of your personal information,

you can call 1-888-567-8688.

Once the message starts
you will want option #2 - wait for the long silence to offer it!!!!!
(even though option #1 refers to this email, push #2)

Be sure to listen closely, the first option is only for a two-year period.

Make sure you wait until they prompt for the option which opts you out FOREVER.

PRACTICE this call at least once to hear the whole ball of wax through. The message menuing is designed to obscure your options and to muddy the water in their favor. It is heavily designed so that you take the first less protective path (note, they approach this with your ignorance giving them everything). Nothing will happen until you are prompted to speak your name, and punch in your street address to put the gears into place. PRACTICE this call to that point until you are satisfied.

You should receive their paperwork in the mail confirming the "opting out" in less than one week after making the call.

Then write your congresspeople and thank them for entitling these agencies to stream your private information to ANYONE (not just creditors).

Hi,

Mm, mm... new amateur astronomers appears... but the air is full of stars...
!

To the attention of hams,... or to the amateur astronomers listenings HF
bands... ;-)
I confirm the idea of creating a "SKY" network on the air (formely called
SKYnet). It remains to find the time, and the HF frequency. Unfortunately I
could not be present for its birth before 2004. But someone in the list can
create the net, this is not a problem. If you are interested in, please
contact me by email or Echolink to plan the QRG, etc.

NB. The frequency should be selected in taken in account the General lic.
hams (+ novice and foundation, to check) who do no have access to all the HF
band plan (so i.e. above 14.200 MHz or so for General, etc).

At first sight the weekend looks fine for these QSO and probably not near
6-8z +-2 hr but rather near 20z +- a few hours as we have to take in account
many timezones (K6-K1, F-LX, SM and maybe up to VK) and propagation
conditions from K to Europe. To see later. Give me already your ideas by
email. Of course in a first time the SKYnet can already work between K and W
stations as they are the main representatives.

So, the idea to create an Echolink alternative (even to complete the first
net) is always in the pipe; it can be set up immediately and for free if
necessary (I mean without using RF links if you do not have any rig). We can
even gain experience in using Echolink in taking the time to plan a good HF
net, but I am not sure that it will be as performing as its brother on VoIP.

I have first thought to create an Echoling/IRPL conference server, wide open
to worldwide hams. But it is suspended. That requests that my system be
online 24hr a day and that I share a directory. This is not my objective.
Here the "aerial" solution, working in HF, cannot be bypassed. This
demonstrate - and this is only one example - to the "naysayers" than
traditionnal ham radio (SSB mode, etc) and digital modes have both their
place, and pros and cons.
Of course someone else can set up such a server and I should be happy to see
a *SKYnet* in the list of available conference servers.

However there is a "lighter" solution : this is creating a regular "meeting
point" around LX3SKY or any other friend speaking english and, if possible
but not mandatory, french and other languages...
I opened my node nbr 2273 up to 20 connexions (so 20 hams at once as I am
using a DSL link to my ISP. I will see later his reaction, hi !).

Depending my QRM pro I am usually standby from 17z (set your alarm log) to 21z or so on weeks days and much more some weekends.

Of course this node will not be up every day, as you will probably not be on the air or connected every day neither.
This a hobby first that can not overload your usual occupations...
But this is already a progress... :-))

Hope to hear from you soon, whatever the mode.

So if you have difficulties to find "hams in the sky", here is the last update I received :
AC4WY, AF9Y, K6ALF, KB1GSF, KC0ODY, KC6QVE, KD5TXD, KD6QLG, N1IRZ, N1JDU, N5KOA, N7SO, W2QAK, WB3LFJ, WB5IZD, WD4HIM, F1PVM, ON4EU, SM0ULB, VK2THN and your dear devoted LX3SKY (we have already 2 YL !!).
Do not hesitate to complete the list in sending me an email or in this post if you are interested in both ham radio (licensed) and amateur astronomy. Do think you must be an advanced ham to enter, novices are of course warmly encouraged to participate... at the condition to make a difference between a star and a planet, a nebula and a galaxy, hi. A joke. In all cases this is the best way to improve your knowledges, and meet new friends ;-)

A similar request will be repost in a few weeks/months.

Best 73 and have a clear and dark sky.

Hi, Richard. Please make snopes.com a regular part of your reading day. Here's a particular URL:
http://www.snopes.com/inboxer/pending/credit.htm
with a particular quote:
Claim: The four major U.S. credit bureaus will be allowed to share your private information with anyone who requests it as of 1 July 2003 unless you specifically request them not to.

Status: False.

Example: [Collected on the Internet, 2001]

Just wanted to let everyone know who hasn't already heard, the four major credit bureaus in the US. will be allowed, starting July 1, to release your credit info, mailing addresses, phone numbers etc. to anyone who requests it. If you would like to 'opt out' of this release of info, you can call 1-888-567-8688. It only takes a couple of minutes to do, and you can take care of anyone else in the household while making only one call, you'll just need to know their social security number. Be sure to listen closely, the first opt out is only for two years, make sure you wait until they prompt you to press '3' on your keypad to opt out for good.

Origins:
...
However, it is not true that consumers must call this number before 1 July 2003, nor is it true that recent legislation allows credit bureaus to share private information with "anyone who requests it." This misinformation has been circulating since 2001, and the same message keeps getting get dusted off and sent around every year with an updated deadline. (In fact, if you call the number listed above, the first option you're presented is to listen to a message explaining why the e-mail quoted above is false.)

The entire page explains what the problem is and how the hoax keeps getting sent around. By the way, have you sent your business card to that poor boy in England who wants to have the biggest collection before he dies of a brain tumor? :-)

I've been a ham since November of 1994. KB2SMS here. Talked to John Blaha on Mir back on January 4th 1997. The QSO is on my hobby web site, www.vh.net/~kb2sms/index.html

ARUFON, the Amateur Radio UFO net meets on Tuesdays and Saturdays at 8 pm eastern time on 3.977. If that's noisy they move to 40m. They often talk astronomy as well. I haven't checked in in a long time, they're probably wondering where the hell I am....

This fact is NOT a fact at all.

There is NO explanation at all. the FIRST option is, just I
described, an offer to allow you to withdraw for 2 years.

The SECOND option comes after some great length of dead air, long
enough to give every appearance of the first being the ONLY option.
The operator (a mechanical voice actually) zips through this quickly
to then offer:

The THIRD option is for you to RESCIND your opt-out, or to SIGN UP for
this benefit! It comes expressed in language tailored for your choice
over the quick skim of the second option.

It is quite obvious that if one were to follow the instructions, now
perpetuated by you, at the page you offer without regard to what was
being said, the individual would be blowing off their privacy. HENCE
my caution about LISTENing closely and doing it more than once!

Industry shills are working overtime, and I can see the makings of an
Option Roulette being played to good advantage - even here.

forgive me for the lack of a warm closing, you don't seem to have a
call, and you certainly don't have the facts nor the experience.

Here Richard will this help you to understand??

CREDIT REPORTING INDUSTRY ONCE AGAIN WARNS CONSUMERS ABOUT FALSE E-MAIL

Atlanta, April 16, 2003 Consumers are once again being advised by the credit reporting industry to be wary of a false e-mail circulating the Internet regarding the information handling practices of consumer credit reporting companies.

The false e-mail reads:

"Just wanted to let everyone know who hasn't already heard, the four major credit bureaus in the U.S. will be allowed, starting July 1, to release your credit info, mailing addresses, phone numbers... to anyone who requests it. If you would like to "opt out" of this release of info., you can call 1-888-567-8688. It only takes a couple of minutes to do, and you can take care of anyone else in the household while making only one call, you'll just need their social security number."

Contrary to claims made in the e-mail, credit-reporting companies do not provide personal consumer data to "anyone who requests it." Federal law prohibits such a practice. Consumer credit reports are only provided to legitimate businesses that have a permissible purpose under the law. Such permissible purposes typically involve the extension of credit, insurance, employment, or government benefit.

The toll-free number included in the e-mail is valid only for consumers who want to remove their names from mailing lists for pre-approved offers of credit lawfully generated by the major credit reporting companies. That opt-out number has been in effect and available to consumers since 1997.

The Consumer Data Industry Association issued three previous news releases noting the e-mail was false and misleading. Consumers can access the original release sent out in July of 2001 by clicking on "Media Room" at www.cdiaonline.org. The Federal Trade Commission (FTC) also issued a consumer alert in 2001 when this message first circulated to advise consumers.

--Source: Consumer Data Industry Association, April 9, 2003

And here is the link from where this info came from
http://www.equifax.com/corp/pressroom/pressreleases/2003/2003_04_16.shtml

Good luck too on getting all that money from Nigerian nephew of the former President that only required your bank acount number.

Scott

In actuality, your credit records pretty much _are_ available to everyone. It might be illegal to look them up or to use them, but it happens all the time, to the point where one company I can think of does a credit check on potential employees. Just because it's illegal doesn't mean that it does not happen regularly.

:-> Whoa, Dick! You are on a _rant_!

The URL again is http://www.snopes.com/inboxer/pending/credit.htm
and I have nothing to do with snopes.com -- it's an excellent resource for reading about hoaxes such as the false claim that credit bureaus can sell all our private information unless we opt out. In fact, the Fair Credit Reporting Act of 1997 contains limitations on who may request the information and for what purposes. The link I provide to snopes.com explains it all in plain English for those not so angry they've lost the ability to read.

And while you're (well, not you, Dick, but the other readers) at snopes.com, browse around and read about the online myths that a tooth left in Coke will dissolve overnight, the _true_ story of a medical student who discovers that an anatomy class cadaver is the body of his relative, the unfortunate hoaxes about children sick with cancer who will receive money/accolades/fame for every business card/email/birthday card/whatever that is sent to someone who is now being buried by unwanted mail or email. And be sure to search snopes.com for ManBeef. Or maybe not.

I also invite one and all to drop by my Website at
http://www.PhilipStripling.com/
and see if I've baited the trap for the unwary. :-> I'm sorry to tell you (well, not you, Dick, but you know that already) that it's not nearly as entertaining as snopes.com, but who knows you (er...) might find something interesting or educational.

Buh-bye, Dick. I'm sorry you're so freaked out over being led astray by the email hoax. You're not alone, though.

73, Dick!
Your pal,
Phil

Hi Scott,

Reptilian Lawyers find ways to both scout out the loopholes and to
perpetuate myths couched in the expression of "serving the public."
The links I supplied to Bob:

varying by degrees of depth of discussion are the following sources of
CURRENT and historical discussion:
http://www.privacyrights.org/
http://www.consumer-action.org/
http://www.epic.org/
and especially
http://www.pirg.org/consumer/privacy/glb.htm

list a number of deceptions practiced that lead to legislation
relating to this act of congress (remember to thank your
representatives).

73's
Richard Clark, KB7QHC

Source record: 10091

Can anybody do a lookup for me in an early 1950s DX Callbook?
Am looking for the town where DL3BE (SK) was located in those days.

Mni tnx,
WX4A

1208. Re: Hams in the Sky

Hi Tom (and the followers on the list !),

Without antenna, uou can still work with Echolink, hum hum (hum hum because there are much controversies when speaking about this product with hams). However 3 hams on the list already use Echolink.

Here is the last updated list of "Hams in the Sky",
http://www.astrosurf.com/lombry/qsl-hamsinthesky.htm
with two QSL.
To all "subscribers", if you have a good QSL, you can sent it to me by email for publication in this page too.

Best 73 and have dark and clear skies,
Thierry
LX3SKY

And here's an oldie but goodie, posted, a while ago, to
rec.radio.shortwave by Radiomatt:

From: Radiomatt (radiomatt@aol.com)
Subject: WWV Survey
Newsgroups: rec.radio.shortwave
Date: 2001-02-22 08:38:17 PST

Dear SWL:

As you know the National Institute of Standards operates radio stations
WWV,
WWVH, and WWVB for purposes of providing timely information to the Short
Wave
Community.

As part of our GAO review process, we are required to justify our
continued
funding. We ask that you complete the following questionaire and return
it to
the address at the bottom of the form:

GENERAL:
Your Age___
Your Sex___ (PLEASE, do not answer "three times a week" or "yes")
What are your most frequently listened to frequencies (mark '1" for the
most
used, "2" for the second. and so on)
2.5 MHz ___
5.00 MHz___
10.00 MHz___
15.00 MHz___
20.00 MHz___
25.00 MHz___

60 kHz___
60 Hz___
How much time each day do you listen to WWV, on average?
0-4 minutes___
5-10 minutes___
11-30 minutes___
31-60 minutes___
61-180 minutes___
over 181 minutes___
Do you monitor constantly? YES NO (Not more than 24 hrs per day)

What is your age?____
Are you listening to WWV now?___
Are you able to retune your radio? YES NO
Are you incarcerated? YES NO
(If YES, is WWV being used as part of an interrogation process? YES
NO)

Stations WWV/WWVH currently carry additional features, please check
those you
use regularly:
Propagation Forecasts___
GPS Information___
Weather Alerts___
DEFCON Status___
Sports Scores___
Stock Quotes___
Stock Market Updates___
Casey Kasem Countdown___
Voting in Congress___
Population updates___
Pork Belly Prices___
Time Signals___

What is the longest time you have listened to us in one sitting? ____
Hours
Were you inebriated at the time? YES NO
Did you enjoy our varied programming? YES NO
Would you object to commercials from oil companies? YES NO
If AOL/Time Warner were to provide enhanced programming, would this
increase
your listening time? YES NO

What sort of program enhancements would you like? (check all that apply)
Please remember that each of these items must be less than 55 seconds
long.

Poetry___
Short Encyclopedia Articles___
News___
Sports Scores___
Book Reviews___

Paid Personal Greetings ___ (Happy Birthday, etc)
Paid Personals___ (Man seeks Woman, etc)
Paid Obituaries___
Paid insults___
EBay auctions___
Disctionary entries___ (definitions, spelling)
Anti-communist propaganda___
Anti-orient propaganda___
Anti-Aussie propaganda___
Readings from Scriptures___
Love Personals___
UFO Alerts___
Autos For Sale___
Other classifieds___
Capsule Reviews of Shortwave Radios___
Capsule Reviews of Shortwave Antennas___
Computer tips___

What type of receiving equipment do you use to receive our signals?
Tube Home-type Radio___
Tube Communications-type radio___
Portable transistor radio___
Portable tube radio___
Heavy tube radio (over 50 lbs) which I carry around to show off___
Heavy tube radio nobody wants, so I use it for WWV___
Crystal set___
Clock with internal radio which is reset by WWVB___
My teeth___
Homebuilt Radio___
Solid state Communications receiver___

What is your ZIP code?_____ (If overseas, what country?_____)

Do you listen to CHU?
Which Frequency?
3330___ 7335___ 14330___
On a scale of one to 30, which do you like better? CHU___ WWV
family___
Are you Canadian? YES NO

How important is time accuracy? If WWV were to reduce accuracy, costs
would be
lowered and more ancillary services could be offered. Please indicate
level of
tolerance: figures are one part in___/second(10 to nth power)
__10 -12
__10 -8
__10 -3
__10 +2
__10 +30

Accuracy of other services. Please indicate your tolerance for
Sports Scores ___(+ or - 10 points) ___(+ or - 1 point) ___ (exact
only)
Dow Jones Average ___ (+ or - 25%) ___(+ or minus 10&) ____ (exact
only)
Weather Accuracy: 100%___ 50%___ 10%___ -10%___ -50%___ -100%___

EDITOR'S NOTE: WOW!!! It was a real challenge putting this one together. I started Saturday about 5:00 PM and wrote this between operating Field Day (also fighting off spiders and bugs), and driving back and forth from the Field Day site (Headed home about 3:15 AM. Not much sleep... Must have been the bugs!). I woke up real early Sunday morning. Finished writing around 11:15 AM so the official proof-reader (my wife) can look at it while I head back out to Field Day. I came home around 3:30 PM, and corrected and added more to the bulletin... I do not recommend this to anyone.... Hope you had fun at Field Day!!! 73 de Tedd KB8NW

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 22nd/June, through Sunday, 29th/June there were 208 countries active. Countries available: 3A, 3B8, 3B9, 3V, 3W, 3X, 4J, 4L, 4S, 4U1I, 4U1U, 4W, 4X, 5A, 5B, 5H, 5R, 5T, 5U, 5V, 5W, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9V, A2, A4, A6, A7, AP, BV, BY, C3, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FR, FY, G, GD, GI, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HK0/a, HL, HM, HP, HR, HS, HV, I, IS, J6, J8, JA, JD/m, JD/o, JT, JW, JY, K, KH0, KH2, KH6, KH8, KH9, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, S2, S5, S9, SM, SP, SU, SV, SV5, SV9, T2, T5, T7, T9, TA, TF, TG, TI, TK, TL, TR, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5,

V7, VE, VK, VK9N, VP2V, VP5, VP8, VQ9, VR, VU, XE, XW, YA, YB, YI, YK, YL, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD9, ZF, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

3C0, ANNOBON ISLAND. Operators Franz/DJ9ZB, Elmo/EA5BYP, Victor/EA5FO and Vicente/EA5YN, will be active from Annobon Island in October. The station callsign is absolutely as sured, and it will be announced before the operation starts with other complete details (bands, modes, dates, etc). QSL via DJ9ZB.

4W, TIMOR LESTE. Well known DXer Kan Mizoguchi, JA1BK, sent out a press release (via WA2MOE) explaining why "East Timor" should be removed from the ARRL DXCC List and "Timor Leste" should be added as a new DXCC entity. Kan explains:
"Explanation of our petition to remove the former 4W and to add Timor Leste: The Eastern part of the island Timor was originally a Portuguese colony but was invaded by Indonesia in 1975.
Following the resignation of the Indonesian dictator General Suharto, Portugal and Indonesia entered into a treaty allowing an independence referendum to be held among the area's residents, and the United Nations began a short period of temporary administration and peacekeeping.
That area was called "East Timor", and the UN agency charged with assisting the people to independence was called UNTAET, standing for United Nations Transitional Administration of East Timor. It should be remembered that UNTAET was not a country but was a UN agency only.
The International Telecommunication Union (ITU) allocated to UNTAET a bloc of call prefixes 4WA-4WZ , and under the provisions of DXCC2000 rules, ARRL made "East Timor" a DXCC entity.
There is a problem with this. At the time the entity was established there was no state or country, just a land area which shortly would have a referendum for independence according to the treaty. DXCC2000 states that if '...provisional assignments not be ratified later by the full ITU, the Entity will be removed from the DXCC List '.
The referendum was held on May 20, 2002. Independence won, and the provisional allocation of 4WA-4WZ was returned to ITU by UNTAET. The allocation was never ratified. According to DXCC2000, UNTAET should have been removed immediately from the entities list. It was not.
The new political state is known as the Democratic Republic of Timor Leste and has been admitted to the United Nations. The ITU has now reallocated the same bloc of prefixes to Timor Leste and the government of that country has established a procedure whereby amateur radio licenses can be and are issued.
The conclusion is obvious: Since the ARRL added UNTAET/4W to the DXCC list it had to be removed when the provisional call bloc was cancelled effective May 20, 2002 because UNTAET disappeared and the United Nations returned this provisional allocation to ITU. The allocation to UNTAET was never ratified so removal from the DXCC list should have been automatic according to the rules of DXCC2000.
On the other hand, the Democratic Republic of Timor Leste became a

United Nations member state on September 27, 2002 and is now eligible to be a new entity according to DXCC2000 criteria a).
ITU has reallocated 4WA-4WZ to the Democratic Republic of Timor Leste and actual amateur radio activities started after this reallocation."

9A, CROATIA. OPDX has been informed that Braco, OE1EMS/T94JJ, is active at the moment from Krk Island (EU-136), and he is using the callsign 9A/OE1EMS. He will activate some other Croatian Islands and will use the callsign 9A/OE1EMS/p. With this callsign you can expect activity only on 20 meters and maybe 40 meters. Please note he will be active in the IOTA contest from Krk Island. QSL via DJ2MX.

9H, MALTA. Thomas, DL1ASA, will be on holiday on Gozo Island (EU-023) from August 1-15th. His callsign will be 9H3TM. His activity will be on all HF bands on CW, SSB, RTTY and will participate in the WAE-CW Contest on the weekend of August 9-10th. He will enter the contest as a Single-OP in Low-Power. QSL is "OK" via the DARC Bureau. For more details, see his Web site at: http://www.dl1asa.de.vu

B4, CHINA. Michael, BD5RV, reports that the People's Republic of China Headquarters Station BY1PK (operated by the JiangSu DX Club) will be active in the IARU HF World Championship. They will use the callsign B4HQ. QSL via BA4RD: Ken Wang, P.O.BOX 538, Nanjing 210005, P.R. CHINA.

C6, BAHAMAS. Look for Jimmy, W6JKV, to be active as C6/W6JKV between now and July 7th. His activity over the past week has been on 6 meters at various times between 1000-1800z (usually looking for Europe). Watch around/between 50110-50125 kHz.

CONVENTION. Hans, K0HB, states, "Keep your calendars clear for October 18th! The Twin City DX Association of Minnesota is proud to present the W0DXCC 2003 Conference at the Holiday Inn, Route 35W in Bloomington, Minnesota! Top DX speakers, the W0 Buro, ARRL DX Advisory Committee, DXCC card checking, retailers and demos of the top radios plus lots more for a an exciting day of DX fun. It's near Mall of America for the family, and don't miss the Vikings play the Denver Broncos on October 19th!"
Visit the following Web page for more details at: http://www.TCDXA.org

DX INFO ON THE WEB. Dejan Menges, T94DJ, reports he is a Contest/DX Editor for the ARABiH. Please visit the ARABiH official Web page at: http://www.arabih.org

FO, FRENCH POLYNESIA (Also, a ZL IOTA and Austral Islands [FO/A]). Look for operators Barry/ZS1FJ/G4MFW/ZL1MFW, Phil/G3SWH and Deon/ZS1ZL, to activate the following islands during a DXpedition to French Polynesia in July:
* Tubuai Island (OC-152) in the Austral Islands, July 11-14th
ADDED NOTE: A short operation may also take place on Rurutu Island OC-050 in the Austral Islands.
* Mangareva Island (OC-063) in the Gambier Islands, July 15-22nd
* Tahiti Island (OC-046) in the Society Islands, July 23-24th
* Great Barrier Island (OC-201) in the New Zealand Island Group

around July 25-26th
The callsigns to be used are: FO/G4MFW on SSB and RTTY and FO/G3SWH on CW. QSL routes: FO/G4MFW via ZS1FJ and FO/G3SWH via G3SWH. Activity will be on all bands, including the WARC bands (even during the IARU Contest weekend while on Tubuai Island). The low bands 160, 80 and 40 meters will also be on the air. Modes are SSB, CW and RTTY. The preliminary frequencies are:
SSB - 28495, 24945, 21295, 18145, 14195, 7095 and 3795 kHz
CW - 28025, 24895, 21025, 18075, 14025, 10105, 7005, 3505 and 1830 kHz
RTTY - 28075, 24922, 21085, 18102 and 14075 kHz
Please note that small deviations might be needed, e.g. if the announced frequency is busy, not busy enough or filled with QRM. They will always work split, listening up 5 on SSB and up 1-2 on CW and RTTY. Strategically located pilot stations have been appointed to assist the expedition members in the efficient flow of traffic and information.
European Pilot: Don, G3XTT Pacific Pilot: Harry, KH6FKG
US Pilot: Don, W0DM African Pilot: ZS1AU
Expedition costs in the Pacific Region are extremely high and any donations from DX associations and individuals will be gratefully accepted and may be sent to G3SWH. Please do not send checks in any currency other than sterling or cash in currencies other than Euros and U.S. dollars. The expedition website will publish daily news, frequencies, operating conditions, pilot station activity, equipment status, E-mail addresses and QSL information. Web site is at: http://www.qsl.net/g4mfw

I5, ITALY (Castles and IOTA). Paul-Joel, F2YT, will be touring the Italian Province of Grossetto (I5) from August 8-31st. He will be using the callsign I/F2YT. Paul-Joel will be activating a lot of Italian castles which count for the Italian Castles Award. Ottavio, IK1PML, the well known QSL cards printer, will also go with him, at times. A short trip to Elba Island (IOTA EU-028, IIA LI-001) is also scheduled between August 15-31st, where Paul will sign IA5/F2YT. Watch the clusters for spots. Activity is planned on 7052 and 14252 kHz SSB, but by request, Paul can make a CW QSO on the same frequency. QSL via F2YT, either direct or via the bureau.

IOTA NEWS.....
AS-036. Operators Takeshi/JA3GJE and Hajime/JP3TKP will be active as homecall/6 from Iki Island (Iki-jima Gounuura-cho Iki-gun Nagasaki-ken) from 0700z, July 3rd to 0000z, July 7th. Their activity will be on 40/17/12/10 meters SSB. QSL via the Bureau to their home callsigns.

AS-080. Club members of Pyong-taek DX Club (Operators DS2GOO, 6K2CLF, 6K2CEO and 6K2CEW) will be active from Anmyon Island (KDN F26) between July 4-6th as D90HE/3 or with their private Homecall/3. QSL via Han, DS2GOO (P.O.Box 39, Pyongtaek, Kyonggi-do, 450-600, South Korea). Log search and pictures will be available at: http://myhome.naver.com/~dxer2han/2003/

AS-147. Takeshi/JI3DST will be active as JI3DST/8 from Okushiri Island (Okushiri-cho Okushiri-gun Hokkaidou) from 0700z, July 25th to

0000z, August 3rd. Activity will be on 40/17/15/12/10/6 meters SSB. QSL via the BUREAU (BURO is best). Also, look for Takeshi to be active in the IOTA contest.

EU-001. Jun, OE1ZKC, will be on the air from Kos Island, Dodecakese Island, as SV5/OE1ZKC from July 16-23rd. QSL via home call.

EU-031
EU-144. Operators Ciro/I8ACB, Luigi/IK8OZZ, Antonio/IK8VRH, Maurizio/IK8YTA, Gianni/IZ8CGS and Giuseppe/IZ8EBI will be active with the callsign IR8DX and IR8DX/P from Campania Region Group (EU-031) and Calabria/Basilicata Region Group (EU-144) between July 1st and October 30th. QSL via IK8VRH or the ARI Bureau.

EU-050. Operators IZ8CGS, IK7YTT, IZ8CCW, IZ6FIR, IW8ROS and IK0ESW will be active as IL7M from the Island of San Domino during the IOTA Contest. QSL via IZ8CGS. For more details, visit the Web page at: http://www.mdxc.org/il7m

EU-136. Bill, ON5JE, is expected to be active now through July 17th as 9A/ON5JE from Rab Island (IOCA CI-096). QSL via his home callsign, direct or by the bureau.

SA-040. FALSE INFORMATION RECEIVED. OPDX received some false information last week (for OPDX. 615). Operators Pablo/HK8RQS, Victor/HK8JEH and Albaro/HK8HIX are NOT going to Morro Island, October 11-14th. Also, Morro Island is actually SA-081, not SA-040.

LIGHTHOUSE ACTIVITY. Francis/F6HKS and Jean Claude/F6HDH will be operating from the Contis Lighthouse, (FRA088, PB 060) for the International Lighthouse/Lightship Weekend, August 16-17th. They will be operating on CW and SSB from 40-10 meters, except the WARC bands. The other reference indicators are: French Departments Loire Atlantique, 44 and Province Brittany. QSL via their home callsign, include a SAE + sufficient postage or via the French REF bureau.

P4, ARUBA. John, KK9A, will be active as P40A during the CQ World Wide DX SSB Contest (October 25-26th) as a Single-Op/Single Band (20m) entry. QSL via WD9DZV.

QSL INFO AND NEWS.....
Members of the Pina Colada Contest Club (KP2AA) and Federacion de Radioaficionados de Cuba did a first-ever joint Cuban-U.S. Field Day operation over the past weekend as CO0US. A special commemorative QSL recognizing their common interest in emergency communications preparedness, and international goodwill through Amateur Radio will be available for SASE or SAE and other return postage. QSL via K7JA. Operators were: CO2OJ, CO2II, CM2OY, CO2KL, plus CO2KK, CO2JA and others; W1HIJ, K6PEQ, KF6SGV, N6PEQ, K7JA, and KL7MF.

OPDX has been informed that Hiroo, JA2EZD (aka XW2A, XY2A and XY2M), has set up (changed) his postal box because of thieves. He even went as far as to set a trap to see if his mail was being stolen (He put six

air mail letters in the box on a Friday and on Monday they were gone!). He will use the new P.O. Box for receiving QSL cards (it is a Mail Service Office). The new POB is: P.O.BOX 10.003 Vientiane, Laos.

Joe, JJ1BDX/3 informs OPDX that QSL cards for Manabu, UK/JI2MED, should preferably be sent to his home callsign JI2MED via JARL bureau only. Manabu also accepts direct QSLs to the following address, only for those who promptly need his card: Manabu SHIMOYASHIRO, 107-B, Amir Temur str., Tashkent 70084, Uzbekistan. DO NOT SEND DIRECT QSLs to his home address in Japan.

QSL ROUTE CHANGE. Yoshiro, N1VF/KH2, who plans to be on from Guam Islands (OC-026), November 21-24th, seems to have changed his QSL route. QSL via Yoshiro Nishimura M.D., 2-6 Takemidai 4-Chome, Suita City, OSAKA 565-0863 JAPAN.

T31MY QSL STATUS. George, OM2SA, reports that the next 700 QSLs for T31MY are answered and should be mailed out this week. ADDED NOTE (Thanks to Pick, WA5PAE): As you know, Mike/T21MY and Jan/T2YL went QRT and will be heading to Fiji to visit with Paul, 3D2AJ, and his wife Va'inga. Mike said that he had no plans to do any more radio operations until they stop at Vanuatu (YJ) later this year on their way back to Austrailia to be "land lubbers" during the typhoon season.

Ralph, K2PF, informs OPDX that he is now handling QSL cards for Dejo, T94DJ.

XQ6ET QSL STATUS. George, W8UVZ, reports: "I finished processing all current requests yesterday (June 25th) and the final batch is going in the mail today. And I have mailed, and Bob has RX 150 blank QSLs, to respond to about 100 QSL requests that he was holding. A couple of reminders for those still needing XQ6ET confirms:
One call per envelope please
Old style IRCs still won't flow easily thru our USPS.
Send all QSL requests to W8UVZ with SASE or SAE and funds for postage.
But note that I do not have logs to check E-mail 'in log' requests.
All QSLs are still verified over the air. There has been a good outpouring of donations to help fund the amp that was sent to Bob last month. Bob has the MLA 2500 on the air and his top band signals are much improved, in spite of some still poor low band condx. We expect many more QSL requests for low band QSOs since Bob is again quite active in his winter season. And Bob has designs on improving his modest antenna setups soon. Thanks to the needy for being patient with this change in QSL route."

SILENT KEY. It was announced last week that well known DXer "Al" Albert H. Hix, W8AH, became a Silent Key (SK) on June 25th. Almost every DXer who attended the Dayton Hamvention and DX Dinner Banquet knew or knew of Al. With DXCC totals of 388 it was hard not to notice him. He will surely be missed. OPDX and its readers would like to send out our deepest sympathy to his family and friends. ADDED NOTE: WV ARRL Section Manager, Hal, KC8FS, has provided OPDX InterNet Subscribers (as an additional bulletin) with

a writeup from the Charleston Gazette on Al, W8AH.

SN0, POLAND. A Polish team for the IARU HF World Championship (July 12-13th) will be again active using the callsign of SN0HQ. QSOs will be confirmed via the bureau. QSL Manager is SP2PI. More details about SN0HQ (list of operators, station locations, SN0HQ award etc.) can be found at: http://www.sp5zcc.waw.pl/iaru/info.html

SOMETHING FREE! Emir, 9A6AA, member of the Croatian Amateur Radio Association and IOCA Manager, reports that the new IOCA directory (booklet) is finished. You can change (free of charge) your old IOCA booklet for a new one, during the "Hamradio" in Friedrichshafen.

SPECIAL EVENT. Territory Day is July 1st and marks the celebrating of the 25th year of Self-Government in the Northern Territory (NT). Early on July 1st, the most senior elected member of the Northern Territory government, the Honourable Chief Minister Clare Martin will be the first person to transmit on-air using a special amateur radio callsign, VI8NT, to celebrate the anniversary of self-government in the Northern Territory.

TK, CORSICA, Fred, F5OZK, will be active as TK/F5OZK between July 5-25th. Activity will be on 40-10 meters, including the WARC bands. QSL via his home callsign, direct or by the bureau.

TM0, FRANCE. Look for TM0HQ to be active from the Official French Headquarter during the next IARU HF Contest, July 13-14th. QSL via the French REF Bureau.

MESSAGE FROM JUN, VK4SJ (aka - ZK1AYL). Jun, VK4SJ, sent OPDX the following message:
"I wish to SINCERELY THANK 'ALL' who sent E-Mails, Cards and Messages of Sympathy after the tragic accident on Rarotonga, Cook Islands on the 23rd of May that took the life of my husband Doug VK4BP - ZK1SIM. These tributes and cards were of a great comfort to our 2 Son's and myself and helped to ease the pain of our loss. The QSL cards for our DXpedition on Aitutaki OC-083 and Rarotonga OC-013 have been processed and will be posted by this coming weekend (June 28-29th). All cards without return postage will be returned via the Bureau. ..... June VK4SJ - ZK1AYL". Her address is: June Sim, VK4SJ, P.O. Box 406, Caloundra, Queensland, AUSTRALIA 4551.

VP5, TURKS AND CAICOS ISLANDS (Operators Needed!). Operators KY1V/David, WA4PGM/Kyle, plus three other ops are headed to VP5 for the 2003 CQWW CW Contest. Kyle/WA4PGM announced this past week that they are looking for one teenage operator that will get an all expense paid trip! (WOW!!!!) Plus two others ops to complete the team. La Villa Rose has been secured as the contest station; for more information go to:
http://www.qth.com/vp5/ham-radio.html
Please contact them ASAP to insure your spot. Their E-mail addresses are: KY1V - dave@ky1v.com WA4PGM - vp5@wa4pgm.us

VP8, SOUTH SHETLAND (Update to OPDX.615). Dany, LZ2UU, informs OPDX more details of his stay at the Bulgarian Antarctic Base "St. Kliment Ohridski",

situated on South Shetlands (Livingston Island). He will basically be
their radio operator. Dany wil be there from the middle of November until
the end of February 2004. He will use the callsign LZ0A on all amateur
radio bands, CW, SSB and RTTY mode. However, in the CQWW DX-CW Contest,
he will use the VP8/LZ2UU callsign (Also, maybe in any other contests
too). There is no E-mail and Internet available there.

YV, VENEZUELA (Contest Activity). The Radio Club Venezolano Contest
Committee would like to invite everyone to take part (and celebrate)
in Radio Club Venezolano 70th anniversary during the Venezuela
Independence Contest on July 5- 6th. Activity will be on CW/SSB and
the new rules for the contest can be downloaded at:
http://www.radioclub.venezolano.org (look for concursos)
A special anniversary QSL will be available with QSOs with YV5AJ,
the HQ station.

> is made on 144 MHz!

Unfortunately that depends on cooperation from this end -- which I fear may be not forthcoming, more from ignorance than anything else!

(it seems one of the trans-Atlantic FM signals heard was a 97.5 station in Watertown, New York State - 97.5MHz and well over 300km inland from the coast... Yet nobody on this side has heard even an E2 TV carrier??)

(I acknowledge the time issue mentioned by the other poster on your side. There's a typo somewhere. The sound file posted elsewhere certainly does match up though. Even more so the sound file on WHCF Bangor, Maine which really leaves no doubt.)

QRN. Storms up around Chicago. (at least they stayed up there<grin>)

> Still the same old problem ... ops who have not read the rules
> refusing to work me because "DX is not good for FD points". :-(

Yep. Heck, now DX within the Americas can even submit FD entries.

Do understand that FD brings out people who only operate HF once a year. Indeed, the rules now encourage establishment of an extra station specifically for new operators. Really a very good idea but it does contribute to some confusion when something unusual happens.

There are certain circumstances when a FD station may legitimately need to refuse to work a DX station. When the operator is not licensed to operate on the HF bands (and is operating under supervision of an operator who is HF-authorized) they are considered to be engaged in third-party traffic. (at least under the U.S. interpretation of the rules, other countries may feel otherwise...) This of course limits them to working stations in countries with which the U.S. has a third-party traffic agreement - most European stations are a no-no.

I think that's VERY unlikely to happen on CW though.

Oh, the other issue is that some computer software won't accept "DX" as
a QTH. (not much of an excuse)

And hundreds, perhaps thousands, "qualified" for this nonsense many years ago but are simply not interested in silly bits of paper stuck on their walls.

Anyway, if "awards" are all you want, just print your own ! Easy-peasy with any inkjet these days and no-one will ever be able to tell the difference once you've mounted it in your fancy polished-walnut frame....!

Almost as silly as contesting......

.....but not quite!

Young Nick

Well Young Nick -- over 38,000 Amateurs world wide have the DXCC awards --
I suspect they disagree with you.
DXCC is an achievment and some folks strive to achieve.

Through DXing, I have met dozens of folks in person from other countries
including yours (The UK). On many occasions, we have hosted each other in
our respective countries.

And a charter of US Amateur Radio is to promote international goodwill --
which DXing and Contesting achieves. If a Ham comes to the USA, all they
have to do is contact the area DX or Contest Club and people will offer
lodging, invites to meetings and even a tourist view of the area. Hundreds
have done this.

In this manner, I have met Hams from Germany, UK, Italy, Australia, Japan,
Korea, Netherlands, and several other countries -- either here or when I
traveled overseas. My trips overseas was much more enjoyable by having local
hams host my visit. I thoroughly enjoyed hosting hams from other countries.

Although you are entitled to your opinion, your post begs a few questions.

Why if you hate DXing and Contesting -- do you read this news group?

Would you be willing to host a visiting Ham from another country? Have you
ever??

What have you done to promote International Amateur Radio goodwill?

Hi,
Last year I did a few stats and extrapoling the numbers of most associations
I arrived to a total of about 2 millions hams (licenced) and active (most in
USA & JA indeed), I mean working on a regular base on HF or V/UHF whatever
the mode.
Including those who still have a license, a shack in good state ready to go
on the air we can easily double this number.
This is right similar to your value.
I use this number on my website too.

best 73

Well Thierry, I was on 15M one time trying to work a DXpedition QRP -- yes I was really running only 5 Watts Out.

I guess I was bombing into Florida with a 10 over nine signal and a Florida Ham sed "QRP my foot -- you mean California Kilowatt"

The DXpedition shut down so I called the Florida station (2,000 miles away) and sed -- here is 5 Watts, then I increased power to 100 Watts and then turned on the linear to 600 Watts. The guy in Florida was amazed becuase he didn't understand that 5 Watts and EXCELLENT propagation can INDEED put in a 10 over nine signal.

So the U and I stations you mentioned may have been running QRP and the propagation to you was ideal.

Incidently at 6dB per S-Unit --- 5 W to 600W is only about 3 S-Units

What some folks don't understand about using a linear is that it can often get your signal out of the noise for a understandable contact. Otherwise use what ever power is necessary to make a contact.

But in a pileup that can be a lot -- hi hi.

Some stations call With High Power, then go QRP, but this is unethical but very few do this.

In comp.dcom.telecom , they mentioned that the WWV format change was a hoax. I can't vouch either way, but go take a look.

Any recommendations on the best products to achieve as complete a range of reception and transmission as possible? All band, all mode, CW, VLF, Low Band, VHF, UHF, AM aircraft, etc.? Kenwood TS-2000? Harris? Is there an all-in-one radio? I've got six old radios (tube sets mostly) to accomplish this, and would like to get more space and tech efficient. I just don't know the new products. Suggestions?

That gets said a lot but I wonder if anybody can name just one ham that worked enough "honor roll" countries that didn't bother with QSLs or the certificate?
O' course without the cards there's no proof and some ol' fart growling that he has "worked all them g..d... places" when in fact all he has worked is a few Central American countries (and maybe France) seems to be the norm for such claims.
People who don't chase the carrot aren't going to stumble on it by accident - certainly not with an attitude.

One call for the Easter Bunny is IM1BUGS/CE&#65533; two ops Bugs & Peter (Rabbit Brothers) -- Counts for Easter Island -- QSL Via IM&#65533;QSL

Hard to work as they were jammed by IM1FUD Handle Elmer

Old timers swear they worked the Easter Bunny with call sign N&#65533;EGG, and N&#65533;DOG -- but alas they were really SL1MS and P1RTE doing their usual things.

Round up the usual jammers -- Rains in the movie CasaBlanker

From AN&#65533;N

P.S. I know lots of Hams who have worked DXCC Mixed, Phone, and CW who do not collect or submit cards. Some with counts in the high 200's

Why -- too cheap, beneath their dignity to collect postcards, tis a personal achievent, and from the treasure of Sierra Madre ----- QSL cards QSL card -- I don't gotta show you no stinkin QSL cards.

Based on previously given statistics:

"over 38,000 Amateurs world wide have the DXCC awards"

It seems like a relatively small percentage of the ham population
collect post cards and redeem them for DXCC awards.

If 38,000 U.S. amateurs had DXCC awards, that would be 5.5% of
the total U.S. ham population, which was 684,637 as of 7/01/2003.

So we can assume that over 95% of U.S. licensed hams don't play
DXCC - which means it is totally acceptable not to collect post cards
and play DXCC and still be a ham.

Looks like lots of hams still measure things with a ruler instead of
with DXCC clicks.....

Lots of hams have never turned on anything more than a 2 meter handy-talkie and aren't interested in DXing anyway...much less award chasing. Fine. DXCC is not a requirement for anything.

Now if instead of the 684,637 total hams (that includes Novices, Techs, etc) you would use the number of DX-interested hams I think you'd find a very large percentage, probably well over half.

-Bill

1245. How Come So Few Have or Apply for DXCC ???

Newsgroup: rec.radio.amateur.dx
Date: 2003-07-04 01:18:30 UTC
From: Guessing <Guessing@connectnet.net>
Message-ID: <FB4Na.87281$Pc5.72440@fed1read01>
Source record: 9979

Ah tis true I spect Jim

Some more factors

Also the fact that ARRL Membership is required for USA Hams for DXCC -- this
may influence the number who apply. -- from URL:
http://www.arrl.org/awards/dxcc/rules.html#si

"ARRL membership is required for DXCC applicants in the US, its possessions,
and Puerto Rico. ARRL membership is not required for foreign applicants."
==
COST OF QSLing is a deterrent to many.

And using the ARRL outgoing QSL Burro requires ARRL membership, but not the
incoming - URL's:
http://www.arrl.org/qsl/qslout.html
AND
http://www.arrl.org/qsl/qslin.html

ARRL Outgoing QSL Burro is really a bargain tho. ARRL sez:

"Members (including foreign, QSL Managers, or managers for DXpeditions)
should enclose payment of $4.00 for the first • pound of cards or portion
thereof--approximately 75 cards weigh 1/2 pound. $8.00 for one pound, the
fee rate then increases at the rate of $4.00 for each additional • pound
(i.e. a package containing 1 • pounds of cards should include the fee of
$12.00 and so on). A package of only Ten (10) cards or fewer costs only
$1.00. Eleven (11) to Twenty (20) cards are $2.00. Twenty-One (21) to Thirty
(30) cards are $3.00. "

==

Another factor in QSL card chasing is the cost of direct QSLing -- maybe
$2.00 to $3.00 a card times 100 = $200 to $300 dollars. Nuts -- some say
I'll use eQSL http://www.eqsl.cc/qslcard/ But doesn't count for DXCC

But the ARRL now has a beta version in test ("Logbook of the World") ---
membership required ?????

http://www2.arrl.org/news/stories/2003/05/15/102/?nc=1

WHERE ARE ALL THE TOUGH GUYS IN THIS SHORTWAVE NEWSGROUP?

Where are all the tough guys in this shortwave newsgroup like GrtPumpkin32 (Linus), RHF, Bball, N8KDV(Steve), Starman, Phil, Frank Dresser, Dan Conti, Tad Early, Tasd Early, Red October90, Brian Denley, DeWayne, Al Patrick, Agent Smith, Burr, Mike Maghakian, Paul, Joe Strain, bpnjensen (Bruce Jensen), Diver4777, Radioman390, Eric F. Richards, R274C, Hfguy, DougSlug, RFCOMMSYS, Signalchaser, Robert, MJC , Dxlover, Elfa , J Tabor, Telamon, Dxing since 1957, Michael Moore, Mark Keith, Radioguy and the rest of the regular contributors of this shortwave newsgroup. "I THOUGHT ALL OF YOU ARE MACHO MEN", What happened? Perhaps your all R.I.P. (Rest In Peace) dominated by the intellectual gays and politics groups.
Perhaps all of you are hiding at the back of your wives because you cannot fight back against the infiltrators like the gays and the politics groups that dominated the shortwave newsgroup at this time. In short all of you are a bundle of cowards, you are running away from the high ground of the shortwave newsgroup. Wake up, fight back your rights. That is your group, don't allow the infiltrators to throw you out of your own newsgroup.
The infiltrator has discovered that all you in this shortwave newsgroup are all weak. You cannot compose a very intellectual article or contribute valuable information related to shortwave which you can learn out of it. Instead all of you placed rubbish topics, using offensive languages on your posts and insulting each other.
In order to throw out the infiltrators, you should learn how to compose a good article related to shortwave which everybody will learn. Because its not only you are reading or viewing this newsgroup but it becomes the focus of the world to read articles. Even though they are not a member of this group but they read those articles that you post in this shortwave newsgroup. Remember this is the Internet, people get information from this medium.
Google shortwave newsgroup is not moderated why, because they want freedom of speech and expression to post a good article related to the topic and accept criticisms on the article posted on the group and allow also exchanging of views in a certain article. It doesn't muzzle free speech or express its views. Google shortwave newsgroup is like a mirror of democracy in the public arena on the Internet.
Stop hiding, there is nowhere to hide. Go and challenge the gays and politics infiltrators on your shortwave newsgroup. "STOP THEM".

Andre

Hello,
I have 3 telescopes. Two of them are home built Dobsonians.
One of the Dobsonians is a sun telescope that I ground the mirror
for myself. I learned how to do this in a class taught by John
Dobson
himself. They are great fun when the propagation is not so good.

I guess I just wasted an 80 cent overseas airmail stamp, etc. since I
didn't use a "photocopy of the original" page. I'll be vacationing in
London and Blackpool this Summer, so maybe I'll look for an original
magazine while I'm there.

Question to ponder:

I wonder if the USA phone band, 7150-7300 Khz, will be adjusted to allow
General Class operation in the 7150-7200 segment, or whether it will
remain for Advanced/Extra licenses??

It probably will take 6 years for bureaucracy to decide.

Well, Incentive Licensing still has a breath left but I suspect it won't
last another 6 years.
I'd worry more about them doing something totally silly like doing away
with CW by 2009.

I doubt they are under an obligation to accept all applications- any more
than a shop owner must sell you something at the marked price, he can just
refuse to sell it.

I confess to being a bit annoyed- after 13 our so years of not being a
member I joined about 3 or 4 weeks back, at the full price :-(

Hello All,

I want to buy a handheld for 2, and 70cm.
I was thinking to buy a kenwood th-f7e, or
a yeasu vx-5r.
They are now in stock, the price is the same, it's
399 euro.

I heard the kenwood th-f7e has some problems.
The microphone quality of the th-f7e does not so
good (a th-f7 user told me that),a ext mic solve that problem.

S-meter reading is not correctly, weak stations
with noise are going easely to s-9 read out.

The HF bands receiving is bad, but that is easy to
explain, short antenna, and there is not enough
space for good filters.

Hf-bands is not importand for me, but we pay
for it.

I read this all on internet, and in a Radio magazine
of Holland.

There is more.

I did not find test information about the yaesu vx-5r
It has hf, but not SSB on it (it is not so importand for me!).

It has 6 meter (mode FM), the antenne is ofcourse
short for this band, and what is there to do on
FM on 50 Mhz?
I do not have expiriance on 6 meters, but I
think that it is a SSB dx-band (are there enough FM signals?)..

Does someone have expiriance with this yaesu
handheld?

Are there any problems with this trx?

Please your comments in this newsgroup.

Reportedly the antenna _will_ load up on 6 meters, if you install the
6-meter tip, but it's very inefficient. I've never actually tried to
use it.

> and what is there to do on
>FM on 50 Mhz?

Not very much. There are a number of 6-meter FM repeaters here in the
San Francisco bay area, but fewer than there were some years ago (I
understand) and there's not much activity at all.

>I do not have expiriance on 6 meters, but I
>think that it is a SSB dx-band (are there enough FM signals?)..

SSB and CW in the lower-frequency portions, FM in the upper.

>Does someone have expiriance with this yaesu
>handheld?
>
>Are there any problems with this trx?

I've had one for about a year. It's a nice little HT. I treat it
strictly as a dual-bander, having swapped the original antenna for a
more flexible 2m/440 duck from Pryme. The lithium battery carries
quite a respectable charge - I have yet to actually run it down. The
U.S. version can be programmed to monitor FM frequencies in the
222-225 MHz U.S. amateur band - nice for monitoring a few local
repeaters, although it can't transmit on those frequencies.

The VX-5 does get very warm during extended transmission at full power;
the case and the operator's hand are obviously part of the heatsink.
The SMA jack on the top has a tendency to work loose and isn't rated

for a lot of attach/detach cycles - I recommend tightening it carefully, and then installing an SMA/BNC adapter with a rubber washer or grommet at the bottom to act as a strain relief. The belt clip is untrustworthy... shop around for a replacement which actually *clips* onto your belt!

The VX-5's RF input filtering isn't great. If I hook it to an efficient full-size antenna (quarter-wave groundplane whip or magmount, roll-up or bicycle or base-station J-pole) there's quite a bit of intermodulation-related signal breakthrough from the powerful 156 MHz paging transmitters in my area. I now use an outboard anti-pager notch filter when using it with sensitive or high-gain antennas, and this solves the problem very nicely.

Audio quality seems quite good, both on transmit and receive.

The lettering on the rubber keys is reported to wear off after a few months of heavy use (a problem with many HTs these days). Yaesu makes a leather-and-plastic soft-case, which protect the keys and the display from actually being touched - I've had my VX-5 in one since I bought it and the keys show no sign of wear or fading.

There's plenty of information on the Net about the VX-5, including modifications, programming tips, and so forth.

Hello All,

Many thanks for the information (i will reply later, its late now!).

Does anyone know some details from the vx-7 review in practical wirles?

What do you mean "often dies"? I bought a TH-F7 yesterday for no
particular reason (impulse buy) and now I'm not sure if I should regret
it.

Arse.

The UHF preamp dies if you wear two radios on the same side of your
betl, or if you have two antennae with small distance installed on top
of your roof, one connected to a high power transceiver and the other
one to the F7. Kenwood knows about the problem, they should write this
in the manual...

That's good then, thanks. I won't be suffering from the problem you
describe as this is currently the only radio I possess and I don't have
any erections on the roof.

Hello All,

Why does kenwood not made a good protection
in the RX front end section after so many years
expiriance?
It must have the same problem when people are in
the fields with contest (hi power).
I do not like the idea to always renember that the th-
f7 is sensetive for that.
It's intresting, I think to download a schematic of
this kenwood handheld by www.mods.dk

But I think to choose for the yaesu VX-5 or the new
VX-7.

What is the difference between them?

Does the VX-7 have something bad, or is het
100% okay?

Cor

Join the Radio Society of Great Britain for ï¿½1.05 or 2 US dollars

Normal membership cost is ï¿½42.50 but if you join in July

with the RSGB special offer Membership will cost you ï¿½1.05

Thatï¿½s a massive saving of ï¿½41.45 pounds!

For that you get one years membership of RSGB which includes the RSGB
national radio magazine Radcom.

Go to http://www.qsl.net/g3zhi/rsgb.jpg for the application form.

Hello,

I had an email from the RSGB telling me to use the form in the current RADCOM - so I sent a reply asking "HOW" when i am not already a member of the RSGB ?

Good question. They do not see this as a real problem, and I was told
by a Kenwood representative at a hamfest that wearing two handhelds on
a belt is almost misuse :(

And another problem is, many users even do not know that their
receiver is damaged, because they do not feel the difference between
0.2 and 0.6 uV at 12dB SINAD, and/or they do not have another radio to
compare.

The thought had crossed my mind,
but I really don't want all that waste paper cluttering up the house again.
Now if they were offering QST that might be a horse of a different
nationality.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 29th/June, through Sunday, 6th/July there were 214 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 3X, 4J, 4L, 4S, 4U1I, 4W, 4X, 5B, 5H, 5N, 5R, 5T, 5U, 5V, 5W, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A4, A6, A7, AP, BV, BY, C3, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FP, FR, FY, G, GD, GI, GM, GU, GW, H4, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J3, J8, JA, JD/m, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KH8, KH9, KL, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, PA, PJ2, PY, PZ, S0, S2, S5, S9, SM, SP, ST, SU, SV, SV5, SV9, T32, T7, T9, TA, TF, TG, TI, TK, TL, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, VE, VK, VK9N, VP2E, VP8, VP9, VQ9, VR, VU, XE, XU, XW, YA, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD9, ZF, ZK1/s, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

3D2, FIJI (Addition/Correction to OPDX.616). Paul, A35RK, informs OPDX that Mike/KM9D (aka T21MY), Jan/KF4TUG (aka T2YL), himself, and his wife Va'inga will be visiting with Jytte Jarl, 3D2AJ, and her husband Arnold,

at their home on Vanua Levu. They will be there from July 12-21st. Mike and Jan, who have been sailing around the Pacific the last two years, may stay longer on Fiji. Anyway, Paul states he will be active, on a casual basis, from Vanua Levu, using his Fiji callsign, 3D2RK. This is a holiday for them, not a DXpedition operation, but there will be equipment and antennas available to them. Mike and Jan may also be active from the same QTH, but Paul doesn't know their callsigns yet. QSL 3D2RK via W7TSQ.

3DA, SWAZILAND. Rad/ZS6RAD, Ron/ZS5ABD, Cliff/ZS6BOX and Willie/ZS5WI will be operating from Swaziland from July 29th to August 3rd. They have been granted the callsign 3DA0DX by the Swaziland authorities. They will be joined by Willy/3DA0BD and Andy/3DA0TM. Activity will be on most bands from 160 meters through to UHF as time and conditions dictate. They will be using Phone, CW, WSJT, Slow Scan and RTTY from 0300-0700z and from 1400-2200z daily. QSL via the bureau or direct to ZS5WI: PO Box 1064, Eshowe, 3815, KZN, South Africa (Enclose a SAE, and it will be appreciated if the cost of postage can be covered as they have not secured any sponsorship).

40 METERS TO CHANGE! The following was announced on the ARRL Web site this past week:
"Radio History is Made at WRC-03 with 7-MHz Realignment Compromise (July 3, 2003) -- There's good news from World Radiocommunication Conference 2003 (WRC-03) for 40-meter enthusiasts. In an 11th-hour compromise, delegates to WRC-03, which wraps up officially July 4, agreed to move broadcasters out of 7100 to 7200 kHz in Regions 1 and 3 to make room for the Amateur Service. The agreement eventually will mean a 200-kHz worldwide allocation at 40 meters. Although the change does not go into effect until 2009, that's considered speedy in International Telecommunication Union (ITU) terms. Some of the timelines proposed during discussions on the 7 MHz agenda item would have held off the changes until 2033! The WRC-03 action on 7 MHz makes no change in the exclusive US 40-meter allocation. US amateurs will continue to enjoy the full 7000 to 7300 kHz band they now have."

60 METERS IS UP AND ACTIVE! Martin, W9XN/8, reports that the 1st Continental U.S. QSO on 60 meters took place at on 5403.5 kHz at 0400z, on July 3rd. QSO was between W9XN/8 (Martin) in Westover, W.V. and N0FW (Pete) in Cincinnati (Hamilton), OH. RS reports were 59 both ways. Martin states that he used a TS-430S and 60 Meter Tri-Pole.

7P, LESOTHO (Update to OPDX.612). The July 18-25th 7P8 DXpedition by the Lone Star DX Association and the Texas DX Society has added two additional operators to its team. Noted Texas contester Larry Alkoff, N2LA, and his XYL Karen, K2DXV, of Austin have joined the U.S.-Canada team of K5LBU/7P8CF, W0IZ/7P8IZ, K4SV/7P8DA, W5MJ/7P8MJ, VA7DX/7P8NK and WW5L/7P8TA that will be on an all bands, all modes operation from Mohale's Hoek, Lesotho. The Alkoffs have requested the callsign 7P8LA and 7P8KA. The Alkoffs are members of the Central Texas DX and Contest Club in Austin. A online Web site and log search will be available once the DXpedition begins at: http://www.amsatnet.com/7p8.html

9A, CROATIA. Operators 9A1A, 9A7A, 9A3B, 9A4D, 9A5D and 9A7D will be active as 9A0HQ in the IARU HF World Championship (July 12-13th). Activity will be on all bands and modes. QSL via 9A1A (automatically via the bureau for all contacts).

C6, BAHAMAS. Steve/AK0M and his wife Sandy (callsign not provided) will be active as C6ASB and C6ASC, repectively, on Abaco Island (NA-080) from July 22-30th. Steve informs OPDX that this trip is primarily a family vacation, and he will be on the air as time permits. However, he does mention he will do some participation in the RSGB IOTA Contest (July 26-27th) as a Single-Op. Steve states this operation will be low key, 100 watts (IC-706) and QRP (FT-817) to a vertical from N4JQQ's old QTH, and a Buddipole from the beach. CW is his preferred mode, but there may be some SSB, and maybe PSK31. QSL via his home callsign, AK0M.

CP1, BOLIVIA (Special Activity/Contest). Look for Radio Club La Paz's official club station, CP1AA, to be on the air along with some other CP1 stations July 19th. Stations will be calling: CQ OH! LINDA LA PAZ TEST. A nice diploma will be awarded and a QSL confirming the contact. All amateur stations can participate. Their band/mode schedule are as follows:
MODE BAND CP TIME UTC TIME
SSB 80 1800-2200 2200-0200
SSB 40 1300-2200 1700-0200
SSB 20 1600-2000 2000-0000
CW 20 1600-2000 2000-0000
RTTY 20 1600-2000 2000-0000
QSLs should be sent before August 31st, 2003, to: RADIO CLUB LA PAZ, P.O.BOX 2111, LA PAZ, BOLIVIA. Their Web site is at: http://www.radioclublapaz.netfirms.com

DA0, GERMANY. Look for 55 operators from DARC to activate the callsign DA0HQ in the IARU Contest. QSL via DL5AXX.

HB9, SWITZERLAND. Operators HB9CVN, HB9DOS, HB9DQP, HB9FAE, HB9FBL, HB9FBM, HB9DOM, HB9YC, HB9ALM and HB9BZM will be active during the IARU Contest using the callsign HB9A. Activity will be on all bands and modes.

IOTA NEWS.....
AF-046. A team of operators will headed to Desertas Island, Madeira Islands, between July 23-27th. The main purpose of this trip is to mount a VHF repeater on this island, which will enlarge the VHF communications between all the islands in the Madeira Archiplego. Activity will be on SSB, CW and RTTY, on 80/40/20/17/15/12/10/6 meters. They will try to use the IOTA frequencies and also enter in the RSGB IOTA Contest. Callsigns will be CT9D and CT9M for RTTY. Operators are: CT3BD, CT3DL, CT3EE, CT3IA, CT3EN, CT3IQ, CT3KY, CT3KU and DF4SA. QSL via CS3MAD: Associacao de Radioamadores da Regiao da Madeira, P.O.Box 4694, 9000 Funchal, Ilha da Madeira, Portugal.

AS-NEW. Operators Kim/HL1OYF, Phil/HL1TXQ, Park/HL1EJT, Han/HL1VAU, Kim/HL3QP, Butch/HL9DX, Jeon/DS1EVQ, Cho/DS1KOQ, Jeon/DS3BGI, and Ryu/DS4NYE (ed. This list of operators MAY change!) will

be active between July 17-20th from Chuk Island (a new IOTA in the Kangwon-Do Province group). They will sign homecall/2. Due to the island being a military defense zone, operation will only take place during the daytime hours. The daily schedule will be as follows: Daily operation will start at 2030z and daily withdraw from island will be at 1000z. Since their time is limited, PLEASE DO NOT DUPLICATE QSOs. Activity will take place around the usual IOTA frequencies and DX windows. QSL direct only to Kim, HL1OYF: P.O.Box 54 Dong-jak, 156-600 Seoul, South Korea.

EU-016. Roger, 9A/ON4TX, will activate the Island of Prezba (CI-092) from July 13-27th. No bands or modes of activity were provided.

EU-129. Look for German operators DH1LA, DH2AX, DH7NO, DL2RTK, DL2SWW, DL2VFR, DL6ATM and possibly others to participate in the IOTA Contest (July 26-27th) as DL0KWH from Peenemuende, Usedom Island. They will be active 2-3 days before the contest and will operate using their individual callsigns on CW, SSB, RTTY and PSK. QSL via the Bureau.

EU-136. Operators 9A2EU, 9A3SM, 9A4KJ and 9A5MR will be active as 9A7T/p from Trstenik Island in the RSGB IOTA Contest (July 26-27th) as a Multi-Single Low Power Island Expedition entry. QSL via 9A2EU.

EU-145. Operators CT1AGF, CT1HGS, CT3FN, F6HMJ, G3KHZ, VA2AM and possibly some more CT1 operators will be active in the RSGB IOTA Contest as an Expedition class entry from Culatra Island. Their callsign will be CS5C. QSL route is not yet set, maybe CT1AHU. For more information, visit the Web page at:
http://ct1end.netpower.pt/eu145_culatra_2003

EU-170. IOCA 2003 TOUR UPDATE (Refer to OPDX.614). Emir, 9A6AA, reports that 4 new islands have been added to their list of islands to be activated during their "IOCA 2003 TOUR" (Operators are Eugene, 9A/RZ3EC; Sergey, 9A/UA3NAN; and Emir, 9A6AA. Activity on July 12-19th.) is:
* Kosmerka : CI-441 (near Zirje Island)
* Vrtlac : CI-442 (near Zirje Island)
* Sedlo : CI-249 (between Kurba V. and Zirje Islands)
* Samograd : CI-248 (between Kurba V. and Zirje Islands)

EU-181. Operators LZ1QV, LZ1ZM, LZ1ZU, LZ1TA, LZ3YY, LZ4BU and possibly others will be active as LZ1KSL from Sveta Anastasiya Island in the RSGB IOTA Contest (July 26-27th). QSL via LZ4BU.

EU-187. Operators SV9ANJ, SV9ANK, SV9BGE, SV9BKZ, SV9BMC, SV9BMJ, SV9COL, SV9DJR, SV9FBG, SV9FBM and SV9GPM will be participating in the RSGB IOTA Contest from Dia Island (Crete's costal island) as a Multi-Operator/Mixed Mode/IOTA Island Station (DXpedition)/ High Power entry. They will use the special callsign J49DIA. Their time of activity will be from 1200z, July 26th to 1200z,

July 27th. QSL via SV9ANK.

NA-140. Jay, AE4MK, will be active as W3I from "Maryland West", Kent Island in the RSGB IOTA Contest (July 26-27) as a Single-Op/Phone entry. He plans on operating 12 hours for contest on 40-10 meters between 1200-2400z on July 26th. QSL via AE4MK.

SA-024. Members of the Rio DX Group will operate from Comprida Island (Grid Locator: GG65) July 25th to August 3rd. Callsigns will be PT2C and PQ2C. Activity will be on 40-6 meters CW/SSB, on or near the usual DX and IOTA frequencies. Operators are: PY1NEW (Pete), PY1NEZ (Lima) and PY1VOY (Rick). The team will be active in the RSGB IOTA Contest (July 26-27th and the K/VE Island Contest (August 2-3rd). QSL the following via Direct or by the Bureau: PT2C via PY1NEZ and PQ2C via PY1NEW. Electronic QSL (eQSL) to PT2C and PQ2C will be confirmed: http://via www.eQSL.cc

JX, JAN MAYEN. Ove, LA2IJ, will be active as JX2IJ from July 24-31st. Activity will be mostly on RTTY, but also on SSB. Operating hours are uncertain. Suggested frequencies are: for RTTY 14083 and 21083; and for SSB on 20/17/15/12/10 meters depending on conditions. Ove informs OPDX he will be busy with work most of the days. QSL via LA2IJ direct or via the bureau. If direct, return postage must be 2 USD or 1 IRC due to high postal rates in Norway.

KP4, PUERTO RICO. Alfredo, WP3C, will be active as KP4AH in the RSGB IOTA Contest (July 26-27th) as a Single-Op/24 Hrs/CW Only entry. QSL via DIRECT ONLY to KP4AH.

LIGHTHOUSE ACTIVITY.....
Operators CT1AGF, CT1EPV and CT3FN will activate the Lighthouse on Cabo de Santa Maria Culatra Island (IOTA: EU-145, L.H. numbers: LH 0144 and POR 013 36) using the callsign CS5F from July 19-20th. QSL CS5F via HB9CRV/CT3FN: Hermann Stein, Brueelmatten 13, CH4410 Liestal, Switzerland. For more information, visit the Web page at: http://ct1end.netpower.pt/eu145_culatra_2003

The Bahia Blanca DX Group will take part again in the International Lighthouse/Lightship Weekend (August 16-17th). This time from three different lighthouses at the same time. The group will not use any special callsign this time, only their personal callsigns/provincial letters (depending on the Lighthouse). Activity from all three lighthouses will be on all bands (including the WARC bands) and modes during the 48 hours event, uninterrupted. Here are the lighthouses that will be activated along with the operators:
* Recalada Lighthouse -- Grid: FF91ia (ARG-009, Buenos Aires Province "/D"). Operators are: LU8EBK/Marcos, LU6EPR/Ricardo, LU4DRH/Dario, LU6DRD/Diego, LU8ECF/Hugo, LW9EVA/Hugo, LU8EHQ/ Carlos, LW3DKO/Cira and LW7DNS/Alejandra.

* El Rincon Lighthouse -- Grid: FF80xo (ARG-???, Buenos Aires Province "/D"). Operators are: LU4ETN/Carlos, LU8EBJ/Gabriel, LW3DKC/Sebastian and LW8DMK/Marcelo.

* Rio Negro Lighthouse -- Grid: FE88ow (ARG-???, Rio Negro Province "/V"). Operators are: LU7DSY/Carlos, LU5DRV/Walter, LW9EAG/ Gabriel, LU9ESD/Emmanuel and LU8DWR/Osmar.
Their QSL Manager is LU7DSY/Carlos: P.O. Box 709, 8000 Bahia Blanca, Buenos Aires, Argentina. The BBDX Group's Web site is at: http://www.geocities.com/bbdxgroup

LT1, ARGENTINA. The "Bad Power Team", consisting of operators LU1FAM, LU1FGE, LU1FKR and LW9EOC, will be active in the IARU International Contest as LT1F. QSL via AC7DX. Their Web page is at: http://www.badpower.com.ar

OE, AUSTRIA. Be looking for several OE*XHQ stations to be active and handing out multipliers during the IARU World Championship. For example, don't be surprised to hear OE1XHQ on SSB on one band, and on the same band on SSB hear them signing OE5XHQ. Complete details on WHO is operating WHAT callsigns on what band ....etc is currently not available.

OJ0, MARKET REEF. Seppo/OH1VR and Lasse/OH0RJ will be active from here July 10-14th. They will be active as OJ0VR and OJ0RJ on 160-6 meters. Look for them to be active as OJ0U during the IARU World Championship. QSL via OH1VR, direct ONLY!

OY, FAROE ISLANDS. Karl, DK4ARL, will be active as OY/DK4ARL from August 4-13th. He prefers CW and SSB. Karl will be active from a camping site. His mobile home will be his QTH. QSL via the DARC Bureau.

QSL INFO AND NEWS.....
The 4W3DX (Timor-Leste) logs have now been posted by Thor, TF3MM, on his Web site at: http://www.simnet.is/tf3mm/log4w3dx.html

Pedro, HK3JJH, informs OPDX that he made 2070 QSOs from Titumate Island (SA-093) in October 2002. He received 803 direct QSL cards, and all have been answered direct. He made 1970 QSOs from Morro Grande Island (SA-082) in June 2003, and received 170 direct QSL cards, and all have been answered direct. No QSLs were received via the bureau for these two operations, and Pedro thinks he will not receive any in the future. Pedro wants to remind everyone that the ONLY QSL Manager he has is for his Malpelo operations (N4AA). All other expeditions are answerd only direct to his home callsign.

QSL RECEIVED! George, K8GG, reports "I received my S05X QSLs last week from the April 2003 operation via the URE in Madrid and I received my TX4PG QSLs this week from the April/May 2003 operation via I2YSB. QSLs were mailed 7 weeks after the operation!"

USE THE CORRECT ADDRESS. Ric, DL2VFR, informs OPDX that the new address for DL2SWW and DF9TM (recently active as V31FG and V31DG) is only correct on BUCK.com. The address on QRZ.com is incorrect, and they are trying to have it changed. The correct address is: Family Dreyer, Gartenweg 9,

D-19069 Alt-Meteln, Germany. The Dreyers currently have no internet access, and the fowarding of mail from the old address will end very soon. By the way, V31FG and V31DG cards will be coming from the printer soon.

Rick, NE8Z, announced last week that he is now the QSL Manager for all VQ9DX QSOs going back to 1996. Ron, AA5DX/VQ9DX is his cousin. His mother and Rick's mother (WB8WNJ) are sisters. QSLs are being printed and all old/new logs will be at his QTH within 2-3 weeks. Ron is presently active again on Diego Garcia (AF-007) until the end of July. NE8Z's address is: Rick Dorsch, P.O. Box 616, Hamburg, MI 48139.

SV5, DODECANESE. Look for Hubert, DK9NCX, to be active as SV5/DK9NCX from August 20th through September 3rd. Activity will be QRP and on CW/SSB. QSL via the DARC Bureau.

SV/A, MOUNT ATHOS (Gone Silent!). Bad News! Kostas, SV1DPI, informed the DX community this past week that he telephoned Monk Apollo to ask him to be active again. Monk Apollo told him that his HF transceiver (an old Icom) has been burned up for two months. A friend of his (a radioamateur from Thessaloniki) tried to repair it without success. So he now has no radio, and it looks like no activity until he receives another radio.

T32, EAST KIRIBATI (Also, possibly KH6). Hiro, JA0SC (ex-KH0/JA0SC, 3D2HY, XU7ABE, A35SC, 5W0HY, T22SC, 9N7SC, VK9CI and VK9LI), plans a visit to Christmas Island, East Kiribati, and work on the digital modes mostly as T32SC in early August. He will depart Narita on August 2nd and arrive in Honolulu, Hawaii, on the same day. He might be active as KH6/JA0SC. Hiro will depart Honolulu on Augast 3rd and arrive on Christmas Island on the same day. Using the callsign T32SC, he will be active from Captain Cook Hotel for 7 days. Activity will be on 20-10 meters, mostly using SSTV and RTTY. His equipment is: Rigs - HL-200BDX and FT-100 (Max-power 200 watts); Antennas: 2 element HB9CV and 14-28 Mhz tri-bander. He will depart Christmas Island on August 11th and arrive in Honolulu on the same day. Once again, he might be active as KH6/JA0SC before returning to Narita (August 12th). QSL to his home callsign JA0SC direct (address is OK on QRZ.COM). ADDED NOTE: Hiro will be active in the "26th JASTA SSTV Activity Contest". Contest rules are available at the URL: http://village.infoweb.ne.jp/%7Ejasta/english/index.html

T5/EI5C (Where are the doc's?). Bill Leehan, N5SUM, is trying to put together a list of DXers who like to see or be interested in "pushing" (getting the ball rolling) the Irish IRTS (ARRL) to obtain/submit documentation for their 1994 T5/EI5C operation. Currently, T5/EI5C cards are NOT accepted for DXCC because they never submitted the necessary documents. Bill has tried on several occasions to contact the operator, the club (EI5C) president and the secretary of the IRTS. He has NEVER received the courtesy of a reply, even when he sent money ($$) for postage. If you are interested in helping to get the ball rolling or would like to be added to the list of DXers that need T5/EI5C to count, please E-mail Bill at: n5sum@totacc.com

TF, ICELAND. After his activity from Faroe Island (see OY above), Karl, DK4ARL, will head to Iceland and be active as TF/DK4ARL from August 14-21st. QSL via the DARC Bureau.

TZ, MALI. A intenational team called the "NUMBER-ONES" is preparing to go to the Mali Republic, and will be active on the air from August 12-23rd. Activity will be on CW, SSB, RTTY, PSK, SSTV and Satellite AO-40 with operations on all bands. Their QTH will be from Bamako, the capital city of this beautiful and tropical African country. All operators are veteran Dxpeditioners and "Number One" operators:
From Mexico - The outstanding DXer and well known expeditioner Luis, XE1L.
From USA - The best specialist in digitals and satellites from Oakland, California: Doug, N6TQS.
From Italy - Computers specialist and complete CW/SSB operator (from operations such as EL2PP, 1A0KM, JT1Y, E30GA, T77V, TT8MM, T32R, KH5/I8NHJ, K5K and XR0X), Max, I8NHJ.
From Spain - A young, but veteran, CW operator from Valencia land, Javi, EA5KM. And finally Paco, EA5RD, SSB/Digitals and Julio, EA5XX, SSB/Digitals organizing and planning of this International DXpedition.
There will be more operators added to complete this "DREAM TEAM" operating from Mali. They want to reach every place in the world with very strong signals from Africa in a 10 days, 24 hours, all modes, all bands operation. The URE, Spanish Radioamatuer Association, will be the QSL manager, so the QSL cards will be via EA4URE. More information is forthcoming.

VP5, TURKS AND CAICOS ISLANDS. Matt, IK2SGC, informs OPDX that he will be on North Caicos as VP5/IK2SGC from August 10-19th. Activity will be on 160-10 meters and also 6 meters.

VP5, TURKS AND CAICOS ISLANDS. Dave, AH6HY, will be active as VP5/AH6HY from Grand Turk Island (NA-003), September 26th through October 4th. His activity will be on 40-10 meters SSB only. QSL via AH6HY. His Web site is at: http://www.qsl.net/ah6hy/

VP9, BERMUDA. Lou, K1YR, informs OPDX that he will be operating as VP9/K1YR from VP9GE's QTH from July 9-16th. This will include the IARU Contest. Activity will be on SSB/CW HF and maybe 6 meters. QSL to his home call.

W1AW/3 IARU OPERATIONS. Well-known contester Tim, K3LR, announced this past week: "As many of you already know, next weekend is the IARU HF World Championship contest. Station K3LR (nine band modes) along with two band modes at K3CR and one band mode at W3GH will host the Headquarters station for the American Radio Relay League as W1AW/3 for the 24 hour contest. As you can imagine, this operation is a dream come true for me. Many regular contest men from the K3LR multi multi team will be here to give the ARRL HQ multiplier out to as many stations as possible. Operators scheduled to be on the team are: K3UA, N3RA, N9RV, K8MR, W9ZRX, W2RQ, LZ4AX, K8AZ, K8NZ, W9RE, W3GH and N3GJ. Thanks to Jim/WA3FET and Bob/W3GH for their help in manning their stations for the W1AW/3 effort. Also special thanks to the dedication and hard work by Dave, W9ZRX, we will have real time Intenet linked combined CT log data from the station at Penn State

University (K3CR). We hope that conditions and world wide participation are good for this event."

XU, CAMBODIA. Danny/M0GMT (19 yrs old) and Oliver/DJ9AO (20 yrs old), members of the World Wide Young Contesters Club (http://www.wwyc.net), will be operating from here between August 3-18th. Their QTH will be in Sihanoukville. Activity is planned on all bands 160-6 meters on CW and SSB, if possible with two stations at the same time. The activity will include an entry in the WAE CW Contest. Their assigned callsigns are XU7ACT and XU7ACU. QSLs are via G3SWH. A Web site is available, as well as online log checking, please visit for updated information at: http://www.geocities.com/dxpedition2003

YR0, ROMANIA. The Romanian Amateur Radio Federation will participate in the 2003 IARU World Wide Championship with a team representing 50 operators gathered around the IARU HQ contest station using the callsign YR0HW. This year the RARF will use the suffix HW instead of the usual HQ suffix letters in the honor of YO4HW, their team leader for many years, who died last year after putting a serious effort in this competition. A special colored QSL card will be printed and sent via the bureau to all contacts.

ZA, ALBANIA (ALBANIA HITS THE RADIOWAVES AGAIN!). A press release from Martti Laine, OH2BH: "The International group will be in Albania as you read this. DL6LAU, DL8OBQ, OH2BH, OH2NB and OH3BHL are there and making the preparatory steps for setting up a training program to enhance amateur radio further as well as operating on several new band modes, such as 6 meters and 2 meters.
They will join Geni, ZA1B and operate this callsign until 13 July with two stations. QSL cards will be handled together with the April/May ZA1B operation by OH2BH.
At the end of the week they will team up with the Albanian resident operators for the IARU Radiosport and activate the AARA (Albanian Amateur Radio Association) HQ station. ZA1A may be re-activated for the period of the IARU Contest and the upcoming training program. QSL ZA1A also via OH2BH."

ZONE 2. Two members from "Club de Radioamateur de Beauce" will activate this rare zone between July 8-15th. Look for Jacques/VE2AZX and Rosaire/ VE2GHZ to be active from Sept-Iles, Havre Saint-Pierre and Natashquan. They will operate SSB, mainly between 2300 and 0200z, on HF bands 40, 20 and 15 meters (Suggested frequencies are: 7095/7225, 14195 and 21295 kHz up), depending on local conditions, using the callsign VE2GHZ/2. QSL via home callsign either direct (CBA) or through the bureau.

ZS5, SOUTH AFRICA. Edwin, ZS5BBO, informs OPDX that after a long absence of two years, he has finally put up his beam. He will be active as ZS5T in the up and coming IARU HF World Championship (July 12-13th). He is looking forward to working old friends and making new ones in the contest. Edwin will be operating on 10, 15 and 20 meters. Between now and the contest, Edwin will be active at odd times conducting tests and would appreciate reports from around the world.

http://www.qsl.net/dxlab/ - 8 free applications that automate DXing activities from spot collection/analysis to transceiver control to logging to propagation prediction to QSL route discovery. These applications run independently, but sense each other's presence and interoperate automatially.

If you like Pathfinder, you should try the rest of the DXLab Suite -- and its all free!

So, you come home in the evening and see what
DX you can falsely claim to have worked?

What more evidence do we need that DXing has become a
CBer's activity?

Back to the days when QSL cards and awards were a
measure of the individual's technical prowess in specifying,
designing, manufacturing and setting up his own station.

Lighten up, Airy. Dave's software collection would be outstanding if he charged for it. Having it available for free is an incredible bargain.

If you don't care for automated things, fine, but at least get your facts straight. None of Dave's software works a station for you. None of it builds, assembles or tests your hardware. If you want to live in the '50's, ok, but please don't criticize those of us who like a little progress from time to time.

Lighten up, Bill. Ham Radio is all about personal
technical achievement, and not about some automated
process doing the work for you. If the DX is going to be identified and
tracked for you, with your rig being tuned for you, as was implied,
then you might as well claim DXCC from using a GSM mobile
phone, because your "achievement" will be indistinguishable.

As to price, a CB rig being given away for free is still a CB rig.

Now that the Morse requirement is being done away with,
perhaps it is time to ask again what is the difference between a CB
operator and a Radio Ham?

Although the VX-7R has improved features, the waterproofed speaker makes
hearing much more difficult to me. Please do yourself a favor and listen
to both of them side by side before purchase.

Lighten up, Francis...

When you key a mic, or tap a key, there is an "automated process"
taking place.

That's right. "PERSONAL technical achievement". Perhaps there are
HAMS who enjoy modern technology interlacing with traditional items
like HF. Perhaps this particular HAM enjoys the orchestration of various
software processes that he manages and configures to enhance his very
PERSONAL technical achievement within the hobby?

Perhaps it is time to ask again, what have all these whiny, crybaby types
done to advance the service, or at least keep it in line with the real
world?

As far as CB-esque operators, HF is chock FULL of them, Morse code
requirment or NOT. I avoid HF like I avoid CB, and for the EXACT same
reasons!

Personally, I think an activity like HAM radio should be one where each
licensee must make certain achievements, or they forfeit the license. Such
as advance from 5wpm to something higher, or integrating modern technology
into the communication mix. If CW is a mandatory requirement (and I think it
should be), then so should areas like the digital modes, and the microwave
end.

Do you know your DHCP from your RHCP or LHCP? Doubt it!

Sitting back saying CW is the end-all, and bitching like 5 year olds does
absolutely
nothing for the hobby. At least nothing good.

As you were. 73.

Yup, and TCP/IP is nowt to do with Ham Radio. The circularly
polarised antennae are more to do with Radio Astronomy than
Ham Radio.

Hi,

My one cent commentary.
I didn't want to beleive it, but it seems according experience of advanced OM that the kenwood high-end is not the best RTX on the place (lack of ergonomy, access not so easy to usual features, etc). High-end side, their only one excellent model is still the old TS 850S. A second hand model is not more expensive that a new brand TS570D.

Take a look at YAESU (1000 MP, etc) too. They are told to be the best. Some also appreciate much the high-end from ICOM.
Read the reviews on http://www.eham.net/reviews/products/14
Another advice, check rig used by big DXpeditions (10 people or more, bugdet in million $). They are all using the best of the best rig. It is a good indication too.

Are they?

Granted DHCP is a protocol for TCP/IP networks; however,
TCP/IP networking and HAM radio have overlaps and literal
interconnections.

Radio astronomy? Hmmm...RHCP and LHCP have more to
do with wave polarity than astronomy.

Looks like you might have done a rudimentary search on the
Internet for these technologies.

In any case, the point being that NO aspect of the ARS is more
important than the next. Since life and knowledge are dynamic,
so will be activities such as the ARS.

As Morse code is a required proficiency, so should all other
aspects, even TCP/IP, encryption, and yes, software automation.

Licenses should be renewed and re-tested for every 5 years or
less.

All in the name of personal technical achievement. :-)

Guess I better toss out my old Vibroplex.
Gotta send them dots myself personally, instead of using a tool.

> If the DX is going to be identified and
> tracked for you, with your rig being tuned for you, as was implied,

Seems like you have no clue what you are talking about.

> then you might as well claim DXCC from using a GSM mobile
> phone, because your "achievement" will be indistinguishable.

Guess I should never ever call up my buddy to tell him
S9SS is 20 over nine on six meters. He can find that out
for himself. Gotta unsubscribe to this newsgroup, since
I might accidentially read one of those newsletters about
upcoming DXpeditions. No fair being notified in advance,
gotta find it out by hearing them. Scrap the subscription
to QST ... or at least NEVER read the DX column.
Rotator? Who needs a rotator! Quick run outside and
turn the beam by hand. Who needs filters? Train those
ears and they will be better than any 200 Hz filter.

Tools is tools.

Altenatively it could be said that he is a gentleman, never takng the bait and lowering himself to the gutter like many (including myself at times) in this newsgroup.

A man who seeks to encourage others into the hobby, and seeks only to share the enjoyment that he has had in the last 20+ years with others.

He has no fear of progression, and meets it head on. He is not stuck in the past like many others.

He is the kind of "face" that Amateur Radio should have, a welcoming friendly one. There is very little of that to be seen in this newsgroup.

Nope. Off the top of my head. Result of years of
technical improvement in the Ham tradition.

In any case, I don't use the Web due to the cost of the
phone calls.

Suggest you change your CB habit (apparent from the
silly childish remark below) and look at becoming
a Ham.

There are many things that "could be said" but that is no guarantee
of their veracity.

Can we assume that your statement, "never takng the bait
and lowering himself to the gutter like many (including myself at times)"
is your admission of being a CBer?

He also co-wrote some excellent training material that many clubs, schools
and youth groups (inc our sea cadet group) utilise to train new amateurs.

"Airy Bean" is Gareth Evans, G4SDW, of 13 Hardens Close, Chippenham,
Wiltshire, SN15 3AA. Gareth is one of life's failures who is jealous of
other's success but shows promise as dog turd.

I can't be bothered to look Walt up but I'm in the book
and I suspect he is. The full name and callsign tend
to imply somebody who stands by his opinions and is
prepared to own them. I may disagree with him at times
but at least he doesn't hide who he is.

The isn't the amateur bands so callsigns are not needed. Who knows if you
are really Walt Davidson who holds the callsign you use?

You can find Gareth's details in Google, if you care to look. I am sure the
real Walt Davidson's are on one of the roll of elector CDs.

It seems to be perfectly good English, correctly spelled (spelt?) and in no way abusive. It expresses an opinion which you may (almost certainly will) disagree with, but there are plenty who will find it very valid... You seem to be very ready to make your own subjective judgements of others but have great difficulty accepting their right to make their own of you.

When we find out who you are, it will be an interesting exercise
to present your profile to the Law Society.....
Either.....
1. You are making a false pretence as to your status as a legal
professional, in which case the law, let alone it's Society, will
be after you.
or.....
2. Your childish and insulting outbursts, ("shows promise as
dog turd)"? given virtually in the same breath as you pretend
to be a legal professional are bringing the legal profession
into disrepute.

Top of your head? Your answers were essentially
dead wrong, or at least answers from someone who
had little to no grasp of the technology.

Well, I thought I might have been in a QSO with
someone of basic mental capacity. Didn't realize it
was with such a mental nutcase like you, Gareth.

Suggest you get some help, and soon.

Hmmm, as one who came perilously close to marrying a member of the legal profession, I can assure you that they need no help bringing the profession into disrepute :-)

Lot of people don't provide calls on Usenet, for some reason.
Anybody that provides a real email address must LOVE SPAM.
And if you look at the message headers from Mr. Bean, you
may be able to figure out why he's not in the FCC database.

What I can't figure out is why we need to crosspost this stuff
to five different newsgroups.

Would you be more inclined to agree with Mr. Bean if you
knew his call, where he was, and his email address ?

Irrelevant.

Ham Radio is a technical pursuit for those suitably
qualified and motivated. Ham Radio is not about Cheque
Books (CB) nor Childish Blurtings (CB). Ham Radio is not
the business of operating radios without knowledge of their innards
nor the capability to modify and maintain the innards. Such
a pursuit is known as Citizen's Band.

In the context of this thread, what is the difference between the
Yank CBer and the Yank "Radio Ham"? Nothing at all, it
would seem.

Gareth,

Easy on the use of the word "Yank". Especially if you've never lived here.
I've always hated the use of that term by the "Blokes", especially when I
lived in England.

Ham Radio has traditions of gentlemanly conduct.

CB Radio is renowned for the abusive and infantile outburst.

I leave the reader to classify the quote below.

Even if you are not an ARRL member and/or disagree with its policy, you should seriously consider contributing to this fund. If the BPL technology ever gets implemented, this may very well be the end of ham radio as we know it. Make no mistake about it - we're talking 60 dB noise increase across the entire HF, not dropping the Morse requirement! And for what? So that people in the rural areas of USA can have a faster download from porn sites?

https://www.arrl.org/forms/development/donations/bpl/

A measly $25 - $100 can help prevent your $5000 equipment from becoming an expensive coffee cup warmer.

I'll ignore the "falsely claimed to have worked" allegation, but you can check my DXCC Challenge stats with ARRL if you like: http://www.arrl.org/awards/dxcc/listings/challenge.html#challenge ;they're backed up by verified QSLs.You can stop by and inspect the cards yourself, if you don't trust the DXCC desk.

Unless you built your station from a few piles of unrefined sand, coal, and iron ore, you've simply chosen a different level of technology and automation. That's your choice, and that's fine, but you're in no position to play "holier than thou". Given the ground you've staked out, I am wondering what you're doing using a computer to communicate with other amateurs. Shouldn't we be having this conversation with straight keys and spark equipment on the low end of 20m?

For the record, DXLab applications automate the mundane aspects of DXing, which means you can spend more time operating and less time paging through paper logs or filling out QSL cards or sorting through DXing tip sheets looking for operating patterns, or blindly seeking secondary propagation paths. One dimension of amateur radio has always been "do the best you can with the technology available". The technology that DXLab exploits is called modern software engineering - the ability to rapidly produce high-quality applications responsive to the needs of their user community. Unless you wrote all of the software on that PC of yours, you're probably using some of this technology too!

Couldn't of put it better myself.

Giving Brian the benefit of the doubt would at best put him into category 4,
the RAs motive is clearly category 5, The RSGB category 2 and 3,
and each group, possibly inadvertently, supports the other

and all the result of Not having a Docket system.

Since the RSGB has already destroyed ham radio in the UK - it's little more
than multi-band CB now - we feel there is little to be lost that hasn't
already
been sabotaged by our supposedly "National Radio Society".

So, roll-on BPL in this country - the sooner the better. The king is
dead...etc.

I hope you get mega-flamed for that last sentence. What a disgraceful
comment ! And what an appalling slur on the folks who live in rural
USA..... !!

Most of the FCC senior officials are lawyers who don't have a clue
about the technical side of radio. They wouldn't know a door knob
from a transistor. Come to think of it, a know lot of hams that
don't either.

Oops, looks like you hit a raw nerve there, George! I wonder why he's so
concerned, though. His recent posts have led us to believe that he conducts
his cases in person now; first in opposition to the closure of a local
byway, then to get off a charge of dangerous driving. I recall him saying
that it was these cases which had given him the confidence to go to High
Court with a libel case. I see nothing there to suggest he's employing
Messrs. Morgan Rayner again, although they are still shown as active in
Chippenham. Why is he so anxious that nobody should contact them?

Have you got any approximate dates for these cases so I can see if they are
real?

As regards Messrs M & R, maybe a little professional 'nod' is called for.

There was a case near here not so long back. A secretary took some headed
note paper home (quite legitmately to do some extra typing for the firm) but
her partner used some to fake a letter to intimidate a trademan. Secretary
lost her job and that was just the start of it.

The only information I have is from posts that have appeared on this NG, mainly from 'Airy R Bean'. I assume these cases were heard in the Chippenham area, but I know nothing further.
If I received a letter from a Solicitor acting on someone else's behalf, I would reply to the Solicitor, and not his client. If the letter then proved to be a forgery I'm sure this would be regarded as a very serious matter.
I'm sure in the case you mention the secretary losing her job was the least of their problems!

I hate to say it but...

why bother... Without the ability to outbid the utilities in the
ongoing auction of Congressional seats, the ARRL doesn't stand a chance.

Look at the low-power FM proceeding, where the technical advice of the
Chief Engineer of the FCC was ignored when a member of the House was
hired by the NAB to prevent the creation of competition.

Look at the relaxation of multiple-ownership regulations for
broadcasters, where the Commission publically recognized the greatest
amount of public input ever received on a single issue - and then
IGNORED it when a literal handful of lobbyists disagreed.

Probably a far more effective way to fight BPL is to pray it doesn't
work. Even if you're an atheist, it's probably a more effective route
than arguing with lobbyists...

What convention should we use on the air to refer to the 5 new channels in the 5MHz band? I recommend we call them Channel E1, E2, E3, E4, and E5. Simple and easy to remember.

Because he has been sending letters purporting to come
from them without due authority. The letter at the URL
you gave is clearly not from a qualified legal professional
but from a deluded fantasist who fancies he is Perry Mason.

Threatening behaviour looks favourite, but I'm sure Messrs
Morgan Raynor can come up with something much nastier to
charge him with. Forgery, deception etc. etc. I suppose he
doesn't want their attention drawn to his activities.

There's an old saying - 'be sure your sins will find you out.' That letter was written back in 1998. If it's a forgery the last thing the forger would have expected would be discovery in 2003. I wonder if Mr Bryan has still got the letter; DNA tests could be interesting!

60db is a very high figure. Where does this figure come from.
If this is correct wouldn't the VOA,BBC and others nations
broadcasts be shut out from America? Something is odd here,
I can't believe that the FCC would intentionally jam all HF
frequencies from citizen useage.
If the 60db figure is an exageration to get funds then the
augument is lost before it starts !
Even if it is correct Ham Radio could not do anything about
it because its members have shown little interest in
perpetuating the hobby with actual deeds.

1392. Rockwell-Collins PropMan 2000 - solution for issues with internet space wx data retrieval

Newsgroup: rec.radio.amateur.dx
Date: 2003-07-09 19:56:50 UTC
From: "Carl R. Stevenson" <wk3cqth@wk3c.com>
Message-ID: <6s_Oa.5707$_k2.240199@nnrp1.ptd.net>
Source record: 9675

For those of you who have the Rockwell-Collins "PropMan 2000"
propagation software ...

You may have noticed recently, as did I, that the program was no
longer able to correctly retrieve "space weather data" from the internet
that is used to improve the accuracy of its predictions and predict
"ion storms," etc. based on current solar/geomagnetic conditions.

The problem seems to be that the folks at NOAA have made some
changes in which GOES satellites are used for x-ray and proton
measurements, with the result that some files that PropMan looks for
either no longer exist (have been replaced with equivalent data in the
same format, but with different filenames, due to being sourced from
instruments on a different GOES satellite) or no longer seem to be
available via "GOPHER" ... and the directory names have changed
for access via http ...

After some poking around the NOAA website where the data resides
and hacking on the "propman.ini" file, I have come up with a propman.ini
file that works.

This new "propman.ini" file is available from my personal website at:

http://home.ptd.net/~wk3c

and may be freely used for non-commercial purposes by radio amateurs.

Placing this new propman.ini file in the same directory as your other
PropMan
2000 files solves the problems with ion storm warnings, etc.
(First, make a backup of your current propman.ini file by renaming it to
"propman.ini.original" or something like that ...)

There is ONE exception ... the USAF and NOAA have discontinued
the distribution of a file called "HFRP.txt" from which PropMan 2000
parsed the SSN data. This does not cause internet updates to fail, and
the SSN data is available from the following URL:

http://www.nwra-az.com/spawx/env_latest.html

Look in the row labeled NWRA SSNe: and pick the right-most value
(the data for the current day) and manually enter that into the SSN
box in your PropMan path dialog box and that will work fine.

I am in touch with the engineer in charge at Rockwell-Collins and they
appear to be working on considering a re-write of the PropMan 2000

parser to get the SSN data from the URL above ... I have suggested an
alternative approach that would not require changes to the existing
PropMan 2000 program and am awaiting a reply.

>60db is a very high figure. Where does this figure come from.

Visit www.arrl.org, take a look at their hot-news article on BPL near the top of the page, follow the link to the full story, and then look for the link which lets you download the ARRL's 121-page response to the FCC inquiry directly from the FCC's web site.

The ARRL response contains a bunch of the studies that the ARRL did. Some of them are based on standard sorts of theoretical calculations (e.g. NEC2 modelling of power lines as antennas, combined with data on the probable spectral density of BPL signals, with power levels assumed to be at or near the FCC's current Part 15 emissions limits).

If I recall correctly, the response also cites a number of studies of BPL systems which have been performed overseas. These studies showed that serious problems do exist.

>If this is correct wouldn't the VOA,BBC and others nations
>broadcasts be shut out from America?

It seems likely.

> Something is odd here,
>I can't believe that the FCC would intentionally jam all HF
>frequencies from citizen useage.

When money is involved, government bodies have been known to do some very strange things.

It has also become apparent that some very senior FCC officials are woefully ignorant about radio. Political appointees, I suppose.

>If the 60db figure is an exageration to get funds then the
>augument is lost before it starts !

So, go read the studies and decide for yourself. The ARRL has had citations for the overseas studies, and preliminary versions of their own sets of calculations, on-line on their Web site for many weeks.

The ARRL pages point out that previous studies in Japan had led the Japanese government to a similar set of conclusions about the interference potential, and that the Japanese government has concluded that BPL technologies of the sort being discussed _cannot_ be put into

production in Japan because of this unacceptable interference potential.

>Even if it is correct Ham Radio could not do anything about
>it because its members have shown little interest in
>perpetuating the hobby with actual deeds.

Feh. Looks to me as if well over 1000 individual Ham operators took the time to write down their responses to the FCC's NOI and post them on the FCC web site (this isn't counting the numerous duplicate uploads, which I suspect occurred because the FCC's upload server appears to be running on a Commodore 64-grade system and had a nasty tendency to hang during the upload/confirm process).

I spent 3-4 hours crafting my own comments on Saturday, and uploaded them successfully on Monday morning.

Uhhh, this one is even better than Christian Science. What about all the government, military, ship to shore, and navigational use of the HF spectrum? Do you think that the FCC is actually going to allow malicious interference to disrupt these services?

Whether the ARRL is involved or not, and if the statement concerning noise is true, it will never happen.

Save your BPL money and take your girl friend out for a Prime Rib dinner and a night on the town......You'll get a hell of a lot more bang for your buck.

That's because our rigs display frequencies. CBers talk about channel
numbers, TV
watchers talk about channels and so on. But broadcast AM radio talks about
frequencies, as listeners' radios are marked with frequencies (often
incorrectly as
54 to 160 KHz). The FCC talks about FM radio channel numbers, but the
public
only knows about frequencies, as that is how most all radios are marked.

Its the new ARRL policy. In the past they tried to get you to give them your money based on shear blind loyalty. Now'a'days they want to scare you into giving them the bucks. Its the old "If you cant coax them, scare the crap out of them" fundraising policy. The Catholic Church has used this for years and years.

Just think, when this Echo-link nonsense takes over (ala the ARRL's and their "Hinternet"), we'll all have $2000 CB radios.....I know I cant wait!

Maybe, but IIRC the FCC, along with the FAA, FEMA etc. etc. operate extensive HF communications systems. It seems unlikely that a source of such serious potential interference to their own communications would be authorized?

One babbled about a "slur on the folks who live in rural USA", forgetting that the vast majority of Internet traffic is comprised of illegal mp3 downloads, Internet phone traffic, mass spam e-mail and porn browsing, i.e. pure garbage traffic. Did I insult anyone? I really don't give a flying fuck. I want my ham radio.

More than one wondered about the reliability of the 60 dB figure, stating that, if it is correct, other commercial users would be affected. Here's why they won't be:

To begin with, unlike amateur radio, none of the other radio services are weak signal users. Whereas in ham radio, DX-ing is more than a rule than an exception, commercial services aim for reliable, strong signal communication. Therefore, while even as little as a 20 dB noise increase (low enough for you, Art?) effectively prevents SW ham radio usage, commercial users will barely notice it.

An overwhelming majority of SW ham radio stations are located in urban areas with a high density of low and medium voltage power grids. Military installations, otoh, are typically found in isolated rural/suburban surroundings where they have a full control over (not) allowing BPL into the bases. Btw, high voltage cross-country power lines will not carry BPL, remember? There is fiber optic already in place for that.

BPL is going to be delivered all the way to your power outlet, as well as to your next-door neighbor's power outlet, and to every single power outlet of every single resident in your city or town. Think you have a hard time from your neighbor's electric toothbrush pwr supply? You ain't seen nothing yet.

FAA does not use SW, afaik, so they couldn't care less. Ship to shore? What ship to what shore? They use satellites. Navigational? Nobody navigates downtown Los Angeles or in Manhattan. Any SW navigation is done thousands of miles away from the power lines. Who's left? Some governmental agencies that will solve a problem by increasing their budgets to allow for stronger transmitters and longer antennas?

The only way I see this being resolved is if there's enough RFI obliterating all of Rush Limbaugh's AM channels. Only then will FCC listen, because they'll have to.

That doesn't mean we have to go down without a fight. In order to fight, ARRL, the *only* American ham radio organization, needs money. However, if you'd rather cut off your nose to spite the face and pretend a turd is not in the punch bowl, it's your funeral...

These systems, as well as military HF systems, usually operate in relatively strong signal
environments. A lot of ham HF operation (especially DX chasers like myself) try to work with
very low signal levels. Hams are possibly the only HF users in this category. It seems likely that
the proposed BPL operation could substantially hamper weak-signal operation while not really
impacting strong-signal operation.

I think the threat is quite real --- an yes, I did file a comment (although it was a rather small one).
And yes, I am sending a contribution to the ARRL---it seems they are fighting as best they can.

I am not trying to be derogatory just trying to be reaslistic
but my logic may be incorrect!!!
60db I suppose could equate to an S9 signal. Is this in error?
Are we saying to the FCC that in all cases the noise will be at
a S9 level? Say the proponents Prove that the noise level will
never exceed S1 and state that the ARRL is over reacting !
If they also state that this benefits the majority of internet
users (or total population)in that it can reduce costs by half,
then ham radio would be in a very sad position.
Now I have heard it stated that from 14 thru 30 Mhz the actual
noise level is far below the normal radios thresh hold, so what
will be the TRUE noise level that we would have to compete with?
If it was declared specifically what 'S' noise level increase that
we would have to contend with on EACH band rather than the inuendo
of S9 level, we would be better positioned to determine whether we
were complaining for complaining sake and frittering away any
possible influence we do have for the future.
If we are to use our number strength wisely for the benefit of
the hobby then it would behoove the ARRL to be very specific
with respect to the possible danger so that the label of
obstructionists will not be aplied at a future date.

Art Unwin KB9MZ <aunwin@insightbb.com> wrote:

>60db I suppose could equate to an S9 signal. Is this in error?

No, I don't think so.

>Are we saying to the FCC that in all cases the noise will be at
>a S9 level?

They're saying that an Access BPL system, based on the technologies which have been proposed (and tested in other countries), would induce enough energy on nearby amateur-radio antennas (e.g. a dipole located within 30 metres of the power line), to raise the broadband noise level at HF frequencies on the rough order of 60 dB above the ambient noise levels which are now generally present in urban areas.

> Say the proponents Prove that the noise level will
>never exceed S1 and state that the ARRL is over reacting !

As far as I've been able to tell from reading the various materials, the BPL proponents here in the U.S. haven't made this sort of claim, nor have they performed any significant number of actual field trials to measure interference and noise levels.

They seem to be evading or ignoring the issue.

>If they also state that this benefits the majority of internet
> users (or total population)in that it can reduce costs by half,
>then ham radio would be in a very sad position.

I don't think they've made that level of claim either.

> Now I have heard it stated that from 14 thru 30 Mhz the actual
> noise level is far below the normal radios thresh hold, so what
> will be the TRUE noise level that we would have to compete with?

You have, I think, heard incorrectly.

What I have heard and read in the past... and what I've read in the noise specs posted in the ARRL's response to the FCC NOI - is that on the HF bands, the noise floor is dominated by atmospheric (QRN) and man-made (QRM) noise, *not* by the noise floor of the receiver's own electronics. The ambient noise level most of us face today is many dB up *above* the radio's threshold, not "far below".

It isn't until you get up into the VHF bands that the receiver's
self-noise becomes equal to, or greater than the ambient noise level.

That's the problem with BPL. It's not just that the noise levels it
generates would be quite a lot above the noise floors of our
receivers' electronics - they'd be well above the typical ambient
"band noise" levels present today on most of the HF bands.

In other words, BPL *will* bury a lot of the weak signals we can
receive today, and will bury 'em deep.

>If it was declared specifically what 'S' noise level increase that
>we would have to contend with on EACH band rather than the inuendo
>of S9 level, we would be better positioned to determine whether we
>were complaining for complaining sake and frittering away any
> possible influence we do have for the future.

So GO READ THE ARRL's RESEARCH, won't you? As I recall, the 121-page
analysis they posted a couple of days ago shows the typical
receiver-self-noise and typical ambient-band-noise levels in each of
the HF bands, and also shows the noise level which could be expected
to be created by an Access BPL system running on power lines located a
typical distance from an urban amateur's HF antenna.

They've done the research, Art, based on what appear to me to be very
reasonable (and probably conservative) models of BPL behavior,
powerline configuration, and radio sensitivity. The data's out there.
Go look for yourself.

> If we are to use our number strength wisely for the benefit of
>the hobby then it would behoove the ARRL to be very specific
>with respect to the possible danger so that the label of

Of course not! But if you live in an area criss-crossed by active lines, and have the sigs coming into your house you can expect some pretty strong interference.

> Say the proponents Prove that the noise level will
> never exceed S1 and state that the ARRL is over reacting !

I will accept Ed Hare's (and the other testers) figures. You could if you like come up with some of your own.

> If they also state that this benefits the majority of internet
> users (or total population)in that it can reduce costs by half,
> then ham radio would be in a very sad position.

It isn't just hams who use HF. Some homeland security type services do also.

Would you ever design a system that spills rf all over the place like this? Why on earth should we shield televisins, radios computers, etc if we are going to put a huge antenna up to negate all that shielding?

There are good ways to get a broadband signal into a person's house without messing up everything else.

Adn why should the internet have priority over everything else?

> Now I have heard it stated that from 14 thru 30 Mhz the actual

Excerpt from the ARRL Release:

"Studies appended to the League's comments suggest received signal levels of BPL broadband noise at typical amateur stations would be anywhere from 33.7 dB to 65.4 dB higher than typical ambient noise levels in the worst-case situations. "BPL cannot be deployed using amateur allocations in the MF, HF and VHF bands without severely high interference potential," the ARRL reiterated. "

DD, W1MCE

The ARRL has submitted 120 pages of comments including analysis and related data.

The BPL grid includes power distribution on medium power lines right down to the 240 volt feed that comes right into your house!! Is that close enough to create a +60 dB noise level??

DD, W1MCE

It is very easy to skip over my message if it annoys you. Just hit a
down arrow button. I wouldn't agree on the reading skill point, though.

> Did you ever stop and consider that because the responses to your original
> post were such, that perhaps the whole BPL matter is the usual ARRL
> exacerbated hyperbole?

Yes, I considered it for about a millisecond and then promptly dismissed
it based on my previous knowledge of the anti-League posts and feelings
from a small but vocal group of people. The only way you could get those
types on board against the BPL is if the ARRL took a pro-BPL position.
Then you'd never hear the end of it, and demonizing the League would go
on for years, like it has with no-code, for example.

> ....In the old'en days they called it "Much
> ado about nothing".

Yeah, sure. What, if I may ask, is your profession? If you are an
electrical engineer and you don't consider BPL (a dense, unshielded,
unbalanced grid of random-length wires carrying packets of digital
signals with all their harmonics straight to your shack) a huge
potential source of HF noise, then I don't know what to say. Have you
read on the subject? Have you seen the measurements from the field in
other parts of the world? All of this fails to convince you because you
know for a fact that this is just a conspiracy on the part of the ARRL
to swindle you for a couple of bucks?

Fine. Don't support it if you don't want to. Don't join the ARRL. Work
against it any chance you get. After all, CB has no representation and
organization and they've never been in a better shape, huh?

Tell that to a good friend of mine who is chief tech for Globe
Wireless (licensee of maritime public coast stations KPH and KFS)
who is responsible for maintaining 23 5 KW HF marine transmitters in
the San Framcisco area. Yes, HF - not for CW, not for SSB, but for
SITOR, the commercial version of AMTOR/FEC, tied into the Internet
for e-mail.

Satellites are "great" for occasional use until one gets the bill.
Globe Wireless' HF circuits carry e-mail traffic 24/7 according to him.

But I agree -- BPL is a danger to HF communications. No doubt about
it.`

I still hear maritime telephone service on 8 MHz USB.

Also in-flight comms over oceans are done with HF.

So, in other words you're not looking for independent opinions at all (as per you original posting) because you've already made up your mind that the BPL is a valid issue and anyone who disagrees with you is a simp. Sorry Zoran, some people wont throw their hard earned money at an issue just because you say they should.....

My god, do I actually have to explain this: The Amateur portion of the HF spectrum is not even 1/6 of the total spectrum. The remainder is controlled by COMMERCIAL and GOVERNMENT interests that have a hell of a lot more to lose with BPL's than amateurs ever will. Do actually believe that the ARRL is going to be the sole group that will rescue the bands from these evil power companies? Get real Zoran.

If you cant take someone disagreeing with you, try arguing in front of a mirror.

Just for the record, the top quote was mine, and the other two were Art's.

My own opinioin is that if BPL is adopted, we might as well throw all
interference rules out the window.

Last time I flew to Seattle aboard a 757 I stuck my GPS up to the window and
read out the aircraft speed....526MPH.
Seems like they could use a more upscale comm system aboard planes when such
technology is that common.

Hi Dick,

It's a matter of economics and regulation more than design, but also
about design.

Electronic gear in the air must meet stringent considerations. These
are based on the simple fact of weight and power consumed. There is a
heat budget to meet, there is a power budget to meet, and there is a
physical volume budget to meet. Equipment must be designed to
co-exist with other equipment (they share the same heat vent, thus the
heat budget). There is also legacy systems to consider and to
interface to. The flight controllers had or have been using tube
equipment (no, not just their screens, some computers).

Much of this is probably already anticipated by state of the art
designs (except for the packaging). Heat and power issues are by and
large far less imposing than older stuff, but packaging still must
conform to other equipment that has no "modern" replacement.

Then back to the economics and regulation. ARINC places stringent
requirements that are by and large stringent in the top loading of
engineering time. That is, it takes a cadre of support personnel to
research and cross-correlate all the various issues demanded to find
its way into a product. When I designed the flight recorder, it was
to MIL-SPEC 883B which is no regulatory slouch. How much do you think
your HF rig would cost against such a standard? $30K would be a good
place to start. Then there is the retro-fit cost to meet the new
system. Abandoning HF for satellite means air and ground systems must
change to follow the trend (it is only a trend after-all) and this ups
the ante such that a large cadre of support people must be
co-ordinated to follow to a long-term schedule of mods and upgrades
(the schedule, in turn, having taken a couple of years to fashion).
Even changing the antenna type to follow the migration from HF to SHF

impacts the air frame and issues of flight safety. This may seem absurd on the basis of civil aviation which can opt into some gear, but commercial aviation must be done across the board.

Not to disagree with your point Paul, but the part that makes me uneasy is the
fact that government may wind up with little or no choice because of the
big $$$$$ politicos who seem to be able to buy their way into most anything
given the right connections to the right....well, you get the point.

But the ARRL sure won't be able to stymie that fact, either, with or without
our
piddling amateur contributions. Only knowledgable, responsiple people in the
right places -with the intestinal fortitude to hang tough and fight the $$$$
flow-
will be able to head off this impending HF disaster. I have no idea if such
individuals in such places even exist today.

Not much at all if the network is properly designed. A poorly designed system (BPL) would probably experience several disruptions.

Hi Paul,

Given the poor service rendered by the present administration across
the board, it takes very little attention to recent FCC events to
observe their wholesale indifference to the consequences of their own
brand of one-answer-fits-all.

To expect that the other 5/6'ths of those affected will rescue this
mis-step is dreaming in technicolor and surround sound. Those who
might be affected will simply exercise their right to veto local
implementation. Follow the money, there are one or two principals
involved and their legislation and regulation has been paid for. The
sad fact of the matter is that the current administration employs the
balkanization of issues so that no single community has clout against
the indifferent neighborhood. The FCC has attempted to consolidate
the commercial market through the abandonment of serving community
needs. They entirely ignored every comment that rejected this path;
the people had to go to Congress to reverse this attitude. Those same
aggrieved are wholly unaware of this new plight, and lacking their
motivation, it will be a tougher hill for us to climb. I saw little
discussion in this regard of consolidation, even though we watch the
FCC closely which is to say we were just as indifferent, as a
community, to this plight of community service. The simple fact of it
is that our ox is being gored (we are not all that concerned about
public service as we are about having fun). To put it bluntly, your
neighbor will simply shrug off your problem and suggest you go to
Radio Shack for one of those filter thingies - you may note the hint
of an ironic smile offered.

For those who have NOT read the NOI, the FCC has carefully couched
this BPL in the jingo of Homeland Security (sic) and describes this
expressly as part of the solution of "the last mile problem"
something I have already described in past posts.

Getting real means climbing out of the grave already dug before they throw in the dirt.

WRC-03: GOOD NEWS FOR HAM RADIO - BAD NEWS FOR SUPPORTERS OF CW

The 2003 World Radiocommunications Conference in Geneva is over and there is some generally good news for ham radio. Q-News Graham Kemp, VK4BB, has been following this story and has a complete wrap up on the way that amateur radio fared:

--

The 2003 World Radiocommunication Conference concluded its discussions of the issues on its agenda on Thursday afternoon, 3 July, after marathon Plenary sessions that tested the patience and stamina of the conferees. The big news for radio amateurs is that there will be a dramatic improvement for we here in region 3 in regard the 40-meter band!

7100-7200 kHz band reallocated to the amateur service in both region 3 and 1, Region 2 7000-7300 kHz remains exclusively amateur. The change will take effect on 29 March 2009, less than six years from now!

Now the "but".. A footnote containing the names of countries that are mainly in Region 3 and the Arab States makes the band also available to the fixed and mobile services in those countries on a primary basis.

It was not easy to achieve such a positive outcome on this issue. A last-ditch effort to bridge differences was chaired by Alan Ashman of Australia.

Perhaps the magnitude of what has been accomplished for radio amateurs can best be explained this way: Never before in the history of radiocommunication has an HF broadcasting band been shifted to accommodate the needs of another service. This is not simply an accomplishment of the IARU. It would not have been possible without the cooperation of a number of broadcasters and many, many others. The people who worked with us who are not radio amateurs -- including some who were strongly opposed at the start but who acceded to the compromise --deserve much of the credit. For example, Australia came to the conference

with a strong "no change" position and had to shift its position dramatically in order to embrace the compromise.

Agenda item 1.7.1 (Article 25): A package of revisions to the international Radio Regulations that are specific to the amateur and amateur-satellite services, takes effect on Saturday, 5 July 2003. Michael Owen, VK3KI, has guided the work of IARU on this issue since 1996.

Agenda item 1.7.2 (Article 19): 432-438 MHz secondary allocation for satellite-borne synthetic aperture radars was approved in Plenary.

Agenda item 1.1 (footnotes): "Footnote fever" seized some administrations in the closing hours of the conference. Fortunately, the amateur service escaped serious damage from "footnote fever" although it may be a problem in the future if countries want to climb into the footnote for fixed and mobile at 7100-7200 kHz.

As Secretary David, K1ZZ said in wrapping up his report... "It's Over! Well, the work is over; the ceremonial closing of the Conference will occur on Friday afternoon, 4 July. Then we will
all be heading home, except for those who are staying for a two- day meeting to plan the preparatory work for WRC-07.

Yes, it's all beginning again...."

From Q-News Australia, I’m Graham Kemp, VK4BB, reporting for the Amateur Radio Newsline.
--

There are two very important documents that came out of WRC 03 that every radio amateur should read. Both were issued at the close of the conference by the International Amateur Radio Union. The first is a final wrap up on the conference by Dave Sumner, K1ZZ. The other is an in-depth explanation of the changes to the worlds radio regulations authored by Michael Owen, VK3KI. You will find links to both of them on the front page of out website at www.arnewsline.org (Q-News, IARU, ARRL, WIA, others)

**

60 METERS: A LOOK AT NIGHT ONE ON THE NEW GENTLEMENS BAND

Its being called the “New Gentlemans Band” by some. At least thats what monitoring the first availability of the new 60 meter band as it opened to the East Coast on July 3rd. Newsline’s Don Wilbanks, was listening in from the deep South:

--
The ‘New Gentlemens Band” may well be a title that will stick on 60 meters. Even as the new frequencies came to life, there was none of the on-air pushing and shoving thats so prevelant on other bands like 20 and 40 meters. Instead, those observing, operating and posting thir thoughts to the Internet seemed to agree that calm and order was the way most approached 60 meter operation.

Ron Wray, WB5HZ, was one of those listening in. He says over the qrz.com website that it seemed as if someone had kicked an anthill at 11:00 PM Central time. That’s when hundreds of stations were conducting simultaneous QSO’s on all five frequencies.

According to Wray, there were explosions of activity that continued throughout the night as each time zone jumped onto the new band in sequence. And Wray notes the apparent success of the 50 watt effective radiated power limit. He says that from his location in Dear Park Texas, the low power limit made it so that no one signal was sufficiently strong to completely control any particular frequency. And because of this amateurs were able to make solid contacts despite the unbelievable level of QRM.

Robert Harper, AFZ0H, of Park Hills Missouri was another early user of 60 meters. In his posting to QRZ, Harper said that he was very impressed by the discipline of the amateur community on opening night. Despite the noise and the crowd, everyone seemed to keep a level head. He says that it was an atmosphere that reminded him of the "good ol' days," adding that he cannot recall when he last observed such gentlemanly behavior under such crowded conditions.

And Bill Collins K8NQC, may have summed it up best. In his QRZ note he said that multiple QSO's on the same frequency will greatly help the utility of the band. He adds that the absence of big signals is really a plus.

For the Amateur Radio Newsline, I’m Don Wilbanks, AE5DW, in New Orleans,

--

So far there seem to be no complaints about the new spot frequencies that comprise the current 60 meter ham radio allocation. In fact, one ham was heard to say that the rest of high frequency Amateur Radio can learn lessons in sportsmanship and courtesy by simply tuning in. (ARNewsline(tm), from QRZ.com and other sources)

**

RADIO RULES: ANTI-ENHANCED SSB PETITION ASSIGNED RM 10740

Its taken some time, but the FCC has now assigned the designation RM 10740 to the petition by Michael Lonneke, W0YR, of Round Hill, Virginia, and Melvin Ladisky, W6FDR, of Camarillo, California to limit the bandwidth of Single Sideband an full carrier ampletude modulated signals on all ham bands below 28 MHz. As previously reported, W0YR and W6FDR want SSB signals to be limited to 2.8 Kilohertz and AM to be no wider than 5.6 kilohertz.

The petitioners make no secret that their regulastory request is aimed squarely at those hams who are experimenting with enhanced SSB signals which are wider than the 2.8 kilohertz that they believe should be the maximum bandwidth. They claim that enhanced SSB is bothersome to other operations and that some users of the pseudo mode are unwilling to cooperate in minimizing harm being caused.

What Lonneke and Ladisky have not bothered to explain is why they also targeted users of AM whom even they they freely admit are not causing a problem for other radio amateurs.

Either way, RM 10740 carries a commentary cutoff date of August 2nd. You can let the agency know how you feel by submitting commentary by mail or using the FCC's Electronic Comment Filing System. It'sated in cyberspace at www.fcc.gov. Once there use the websites search function to locate RM 10740. (ARNewsline(tm))

YHOTY 2003: JAY THOMPSON, W6JAY, NAMED ARNEWSLINE(tm) YOUNG HAM OF THE YEAR

He is not yet 18, but he is a champion class hidden transmitter hunter as well as a young ham devoted to public service and to bringing more kids into the hobby. And for these reasons and more, a select committee of judges has named Jay Thompson, W6JAY, of Santa Ana California to receive the 2003 Amateur Radio Newsline Young Ham of the Year Award. We have more in this report:

--

If the name Jay Thompson and the call sign W6JAY sound familiar, its because Jay has made news several times in the world of hidden transmitter hunting. In the five years that he has been licensed, W6JAY has participated in three championship hunts has won virtually every type of medal offered in his age group. One hunt took him all the way to China. And when you travel the world, hidden transmitter hunting can leave you with moments to remember:

--

Thompson: "In China it was raining. And in the bamboo forest, when you shook the trees, you would get a mini-shower fall on you and it would just cool you off after you had been running for a while."

--

But his exploits in T-hunting is not the only reason that Jay was chosen as this years Young Ham of the Year. He is also heavily involved in emergency communications and is a member of the Orange County Hospital Disaster Emergency Communications System. This is a medical communications support group that gave W6JAY his first taste of what responding to a real emergency is like:

--

Thompson: "During the Plecencia Linda train crash I was stationed at a hospital with my dad where we helped to allocate information where patients were going. That helped the hospitals a lot from what I heard."

--

If Jay Thompson sounds enthusiastic about his T-hunting and emergency communications work, you have to hear what he has to say about recruiting youngsters into the hobby. Jay believes that the future of ham radio is with the young:

--

Thompson: “I noticed that there were not very many active young Amateur Radio operators, so I have tried to do my part to get more of them in so that Amateur Radio can have a better future. It starts with the kids and as they grow up they realize that it is such a good activity and will get more people to join. If there are not any kids, then there is not very much of a future for Amateur Radio.”

--

A lot of people seem to agree. In fact ARRL Southwestern Division Vice Director Tuck Miller, NZ6T, calls Jay Thompson: “...a magnet for other young hams to become actively involved in the Amateur service.”

The Young Ham of the Year program is co sponsored by the Amateur Radio Newsline, Vertex Standard which manufactures Yaesu brand ham radio gear and C-Q Magazine. Jay Thompson, W6JAY, will receive his award at a presentation on Saturday August 16th at the Huntsville Hamfest in Alabama.

Right now we ask you to join us in congratulating Jay Thompson, W6JAY, as he is named 2003 Young Ham of the Year.

For the Amateur Radio Newsline, I’m Mark Abramowicz, NT3V, reporting.

--

2003 marks the 17th consecutive year that the award has been presented. (ARNewsline(tm))

**

ENFORCEMENT: FCC ACTS IN THREE CASES

The FCC has contacted three hams on various enforcement matters. The agency’s Daryl Duckworth, NN0W, has more:

--
Audio report only. Hear it at www.arnewsline.org
--

According to Duckworth, that’s the FCC’s enforcement actions through the period ending June 28th. (RAIN, FCC)

**

RESCUE RADIO: PERSONAL LOCATOR BEACONS NOW LEGALLY SOLD IN LOWER 48

Hams could have a new emergency communications job in the near future. T-Hunting down people in distress wearing Personal Locator Beacons.

The CGC Communicator reports that retail stores in the continental United States are now being allowed market the pricey beacon transmitters which can be activated when a person is in a dangerous situation. Proponents of Personal Locator Beacons claim that they will assist rescue teams in finding lost persons in emergency situations.

According to CGC, each beacon must be registered with NOAA before alert activations can be relayed via satellite to the Air Force Rescue Coordination Center at Langley Air Force Base in Virginia. Actual beacon alerts are recieved over the SARSAT COSPAS satellite system which is a long term cooperative effort between the United States and Russia.

More information is on line at www.sarsat.noaa.gov (CGC)

**

RESCUE RADIO: THE DEAN OF ARRL SECTION MANAGERS RETIRES

The dean of ARRL Section Managers, New Mexico's Joe Knight, W5PDY, stepped down from his post on July 2nd. Knight cited poor health in his decision to retire from the volunteer position after serving for nearly 27 years. This is a record of volunteer service longer than any other sitting SM.

Assistant Section Manager Bill Weatherford, KM5FT, of Albuquerque, has been named to fill the remainder of Knight's term, which ends on December 31st. In his departure statement Knight said that he plans to try to help Weatherford as much as he can to assume the Sectiin Managers job. He also thanked his constituancy for the wonderful job that they have done and asked that they support KM5FT in the same way as they did him.

Knight had recommended Weatherford's appointment as his successor. KM5FT is an ARRL life member and has served as an Assistant Section Manager for the past two years. (ARRL)

**

ACCIDENTS HAPPEN: OMAHA’S KETV-TV TOWER COLLAPSES

Joe Eisenberg, K0NEB reports that a broadcast tower being converted for digital television has fallen in Omaha Nebraska. According to a story supplied by Joe, KETV's main broadcast antenna fell to the ground Friday July 4th.

Crews had been working to install High Definition TV technology on the tower since May 30. A new antenna was to replace the aging RCA TW-15 skyhook. A station spokesman said that it is not yet clear how much the tower collapse will set back the stations conversion to digital transmission or how long it will take to clear debris and rebuild. Nor is it known what caused the main tower to fall. (K0NEB)

**

RADIO CONFLICT: PENNSYLVANIA TOWN DISCOVERS WATER AND RADIO WAVES DON'T MIX

Officials in Chambersburg, Pennsylvania have asked the FCC to intercede in a dispute between that township and Radio Station WCBG on 1590 kHz. This, s the borough hires a Louisiana attorney to try to force the owners of the radio

station to cease operating long enough for workers to finish a 2-million-gallon water storage tank project in the nearby Chambers-5 Business Park.

Chambersburg's effort to build a new, elevated, 150-foot-high water storage tank on land adjacent to WCBG's towers have stalled because workers complained of receiving RF burns. Complicating the situation are allegations that the storage tank interferes with WCBG's signal, presumably warping its radiation patterns.

WCBG operates 5 kW non-irectional daytime and, 1 kW directional at night. The whole story is on-line at http://tinyurl.com/g1dk (CGC)

**

ARRL: LOOKING FOR MULTIMEDIA PRESENTATIONS AND VIDEOS

The ARRL’s Field and Educational Services is seeking donations of Amateur Radio related presentation programs or slide shows that utilize Microsoft PowerPoint or similar computer-based slide-viewing software. The department is also interested in VHS and digital video programs to add to materials that it offers hams through the ARRL Video Series. For guidelines on whats acceptable contact Mary Lau, N1VH, 225 Main St, Newington, Connecticut 06111 or e-mail herat mlau@arrl.org. (ARRL)

**

BREAK 2

This is ham radio news for today’s radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

THE CHANGING OF THE GUARD: 40 METER DX’ER AL HIX, W8AH, - S.K.

On a sad note, the changing of the guard continues with news that an internationally known dx-er has died. And this news hits very close to this anchor desk. As local hams gathered for field day here in Charleston last month, word was received that Albert Hix, W8AH had become a silent key. Al passed away at his home here in Charleston on June 25. He was 85.

W8AH not only loved amateur radio, he loved his country and the freedom she provides. Al was a skilled member of the US Army signal corps, serving during world war 2 when he was appointed radio officer to General George Patton. He also served during the Korean war and returned to Paris to climb the Eiffel tower again for the daily net with the Pentagon.

After his military service, Al returned to Charleston with his wife and worked as an engineer for Union Carbide until his retirement in 1985. He pursued his beloved hobby with a new vengeance, earning his place on the DXCC honor role with 388 countries confirmed. On 40 meters, he holds the top honors with 362

entries. Al made hundreds of friends around the world through amateur radio, many of them he visited with his wife, Connie.

Avid DX'ers knew one side of Al Hix. Many of us knew another side, as WV ARRL section manager Hal Turley, KC8FS, explains…
--

(KC8FS audio)

--
A US Army chaplain presided during Al's funeral and he was laid to rest with military honors. Meanwhile, local hams seemed to man the field day CW station with a special vigor… and without the traditional W8AH at the key at start time.

(KC8FS audio)_

Al is survived by his charming wife, Connie, brother James and by hundreds of ham friends around the world and here at home in the West Virginia hills… where we knew that the only thing bigger than his signal, was the kind heart of W8AH. (ARNewsline(tm))

**

RADIO PUBLICATIONS: CQ RELEASES HAM RADIO MAGAZINE ANTHOLOGIES

Fans of the old Ham Radio magazine, take note: A new series of anthologies, reprinting selected articles from the pages of ham radio, is now available from the folks at CQ Magazine

The first four books in the series were introduced two weeks ago at the 2003 Dayton Hamvention. The topics covered are: "Antennas, 1968 to1972;" "Antennas, 1973 to 1975;"Homebrewing Techniques" and "Troubleshooting Techniques."

Ham radio magazine was published from 1968 to 1990 and is generally acknowledged as the premier amateur radio technical publication of its time. CQ Communications now owns the rights to Ham Radio magazine and decided to release to compilation books based on requests from the Amateur Radio community. They can be ordered on-line at www.cq-amateur-radio.com. (CQ)

**

CONVENTIONS & HAMFESTS: CINCINNATI IN JULY

On the ham radio social circuit word that the sixth annual OH KY IN Hamfest is slated for Saturday July 26th at the Diamond Oaks Caerrer Development Center in Cincinnati Ohio. The event features a giant outdoor flea market, ham radio test sessions, vendor exhibits, door prizes and lots more. Fur further information e-mail Lynn Ernst at wd8jaw@arrl.net (Via press release)

**

CONVENTIONS & HAMFESTS: DENVER COLORADO IN AUGUST

And the Denver Radio Club Hamfest is scheduled for Sunday, August 17th at the Jefferson County Fairgrounds in Golden Colorado. Doors open at 8:30 AM. For more information contact Bryan Steinberg, KCZ0CUA via e-ail to kcØcua@arrl.net, or via the club website at www.qsl.net/w0tx (Via press release)

**

HAM RADIO IN SPACE: ARISS MARKS SUCCESSFUL EURO SPACE CENTER CONTACT

Another big success for Amateur Radio on the International Space Station. This as U-S Astronaut Ed Lu, operating as NA1SS made contact with youngsters on Space Camp at the Euro Space Center in Belgium at 08:25 U-T-C on Monday July 7th. .

The center operated as ON4ESC with bout 150 children gathered in the auditorium. Some of them were Dutch speaking, others spoke only French speaking and 45 were Americans living in Europe.

Ed Lu answered the call from ON4ESC the very second the ISS was in range of the Euro Space Center. He answered 17 questions during the nearly 8 minutes long pass. At its closest approach, the space outpost was 2000 km south of Belgium, over the Pyrenees mountains. AMSAT Vice Chairman Gaston Bertels, ON4WF, was on hand to oversee the operation as well as introducing the young audience to the amateur radio service, amateur radio satellites and the ham radio stations used by astronauts and cosmonauts while operating from space. (ON4WF)

**

DX

In DX, the question is -- did you work them? Of coarse we are talking about DL6LAU, DL8OBQ, OH2BH, OH2NB and OH3BHL who have been Albania in preparation of setting up a training program to enhance amateur radio in that nation. They have also been on the air as ZA1B operating on several new bands and modes including 6 meters and 2 meters. Their operation was scheduled to conclude on July 13th with QSL’s to be handled together with the April and May ZA1B operation by OH2BH. (OH2BH via N4GN)

Bob Cumming, W2BZY, says that he will be active on 50.110 MHz from Costa Rica TI2 through July 27th. This, in an attempt to activate some of the less common grid square in that nation including EJ79. When not on 6 meters, Bob will be looking for contacts on the high frequency bands. QSL as directed on the air. (VHF Reflector)

Also, look for Desertas Island on the air from July 23rd to the 27th. This as the Madeira DX group activates CT9D and CT9M on RTTY from that rare location. The main purpose of this trip is to mount a VHF repeater on the island to enhance F-M coverage across the Madeira Archiplego. The operators will also be active on SSB, CW and RTTY during their stay. Q-S-L to CS3MAD, P.O.Box 4694 - 9000 Funchal -Ilha da Madeira - Portugal. (OPDX)

**

THAT FINAL ITEM: MISSING LILLY FOUND

And finally this week, the story of a ham radio operator and his dog. It happened back in January, but only recently was the story forwarded to us. Here’s Amateur Radio Newsline’s Bruce Tennant, K6PZW with the details.

--
Peter Kringle K-C-9-B-I-W of Superior Wisconsin tells it this way. Back in January Peter came home for lunch to find his dog Lilly missing. She has some how unhooked the standard dog clasp and a locking carabineer.

Peter first walked around the area looking for his dog. He then got in his car and drove their normal walking loop. But he was unable to find Lilly.

At this point he began asking people in the area if they had seen her. He found out that she had been seen in the area a few times and that she had escaped around 10:30am. So Peter called the local dog shelters, leaving a description of Lilly in case some one found her and brought her in.

By this time it was 3 P.M and Peter decided to try something that he had not heard of anyone else every trying before. He turned to ham radio for assistance in finding his mising pup.

Peter picked up his Yaesu VX-5, and called out on the local 146.94Mhz repeater asked if anyone his area could help my look for Lilly. Two amateur radio operators answered his call. This meant that there were now two in cars and K-C-9-B-I-W on foot looking for her. This meant that the searchers were able to cover much more ground in a very organized fashion.

It was just before 4:00 p.m. when one of the hams spotted Lilly and was able to pick her up. He then called out on the repeater to let every know she was safe. A bit later Peter was able to rendezvous and take the wandering Lilly back home. And thats a perfect happy ending to the story and to this weeks newscast as well.

For the Amateur Radio Newsline, I’m Bruce Tennant, K6PZW reporting.

--

Peters Internet positing about the help he received came with an apology. He wants to thank the two hams who helped out, but unfortunately he has forgotten their call signs. He adds that he hopes they will e-mail him so that he can give proper credit where credit is due. And if you want to see what Peter and Lilly look like, look up KC9BIW om the www.qrz.com website. (WA9ICU)

And the following Richard, is why, when I wrote my own professional answer and filed it timely, that I noted as to the issue of security that we absolutely could not afford this for that among many reasons. I stressed that not only do we have the massive problem for intereference from the proposed service, but that a carefully contrived attack on the service itself from the outside made us terribly vulnerable to security issues if we were to allow this technique.

The real issue for security is the deliberately contrived attack on the services. Who in the devil wants to risk all the network to terroristic threat from a purposeful intervention into the service. As I pointed out in my personal reply, the purpose of the service is really a point to point data link through a transmission line. To me it is bizzare that anyone would contrive to perform a service needing confidentiality on a transmission line technique that is wide open to disaster.

Tnx for the treatise, Rich, it clears up a few details that were hanging out there.

Clearly the revolution in technology is dependent on *other* factors more than on
the state of the art itself .
Which shouldn't, but as so often it happens, brings us back to
to the problem of "where do we go from here when the map is so ill defined?"

I can't help it, I keep being diverted back to the basics...all it takes for two
real radio operators to communicate is a basic radio transcieving system with very
minimal or even maybe no external support, and the skill to send and receive
radiotelegraphy....
Shucks, many of us recall when they used that system on aircraft!

Dick

Hi Mike,

You didn't go far enough. The leakage is prima facia evidence of
security loss. The government is the poorest employer of standard
civil encryption services (government meaning those various agencies
that are not affiliated with black box funding).

What was it - a couple of months back some (friendly ruski?) diplomat
sat in his car outside of a government office downloading their
activity with his snooper attachment?

Hi Dick,

One need only look at the defunct 500KHz emergency radio operation to observe that two radio operators was abandoned long ago. And it was "modern" technology in the form of a signature tone that moved it the first step away. And that was after the rules were relaxed (or put in place originally) to require 15 minutes monitoring of each hour.

In less than 100 years we went from spark gap to satellite technology from the Titanic to flight 800 - and neither of those two fared very well for it. In the millennium before, it was semaphore and smoke signals.

Clearly technology is taken up quite quickly by comparison. When I was in DC last year this time, my girlfriend was adjusting the rear view mirror and engaged the OnStar system by mistake (the buttons being located on the mount). Two decades before the best you had was CB, a decade before it was disposable cellular phones.

You obvioulsly don't own stock in ARINC or Globe Wireless....

As I pointed out earlier, INMARSAT is great until the bill shows up -
the cost is out in deep space (pardon the pun).

Wanna talk about Luddite methods of communication? How 'bout
per-message traffic handling by CW ????

>> Not by KFS/KPH, though. AT&T closed their SF HF station (KMI) a

"My guy" says that it could be ARINC filling in the gap that ATT
left, or it could be WLO, the maritime public coast station in
Mobile, AL which also remote-controls KLB, the coast station in
Seattle, WA.

>> >Also in-flight comms over oceans are done with HF.

GPS and INMARSAT are common on newer aircraft. So is Air-Ground
Phone dial-up service (put your plastic into the slot in front of
your seat). Just wait 'till the bill shows up.

It's the same factor that kept the Interstate Police HF Radiotelegraph Net in operation into the early 70's even though wireline teletype had fully matured many decades earlier. The cost of dedicated wire lines, monopolized by one AT&T in those days, was just too high to justify. Plus some states and others hired personnel to do "double duty" with both commercial radiotelegraph operators and radidotelephone operators licenses so that they could handle interstate and
interdepartmental Morse messages, operate the voice dispatch centers, and do low echelon radio maintenance as circumstances demanded. Of course it's all gone now.

> > Wanna talk about Luddite methods of communication? How 'bout

Evidently you've never observed a veteran, skilled CW message handler at work. Many would have given any voice traffic handling system a real competitive time of it, and some hams still do.

In 1972 I worked Bill Leonard, W2SKE, the TV news veteran, on 2 meters simplex when I heard him calling CQ /aeronauticala mobile. He was on a jetliner 30 m inutes out of Dallas at 30K feet headed for New York City, using a rig identical to the one I was using mobile at the time- a Drake TR22. All of a watt and a half on each end. He said he was holding his up to the window of the Boeing 707 (in the days prior to the banning of such operation) Our path didn't last long but we sure had a good noise quiet QSO while it did.
THAT was some pretty simple, inexepensive, unsophisticated but very workable technology. Looks to me that sometimes high-tech can get in the way of getting things done. But it's SACRED, and almost sacreligious to make such a statement.

Only because of economic reasons. The "technology" worked just fine
but the shipping companies figured out a way to save $100,000 per
vessel per year, which is really peanuts compared to the cost of
operating a modern cargo vessel ($5000 per day to tie up at the
dock), by getting rid of the Radio Officer, and that was only in the
last 5 or so years.

>And it was
>"modern" technology in the form of a signature tone that moved it the
>first step away.

Do you mean "auto alarm" sequence? That wasn't a tone. It was
twelve (or more) 4-second dashes (3.8 sec. to 4.2 sec. by _my_
stopwatch) with one second silence between them. I inspected and
tested an awful lot of auto-alarm generators and receivers during
ship radio safety inspections over a period of 30+ years until the
GMDSS system came in and those inspections were privatized.

Standing watch by auto-alarm receiver was permitted only on cargo
vessels which carried one operator who was required to be on duty
eight hours a day. The auto-alarm watch could be used when the
operator was off-duty or on a break.

The four-second-dash auto-alarm signal was sent to alert other
vessels and shore stations that a Distress Call (with the famous
SOS) was following. On shipboard, if watch was being kept by
auto-alarm receiver, reception of the auto-alarm signal would
trigger a loud bell on the bridge, in the radio operator's cabin,
and in the radio room. One could not miss that activation !

The radiotelephone auto-alarm signal was a two-tone signal to
actuate a muted 2182 receiver on the bridge. It was supplanted by a
watch receiver on 2187.5 kHz in a Digital Selective Call system.

>And that was after the rules were relaxed (or put in
>place originally) to require 15 minutes monitoring of each hour.

Not quite.

The original pre-WW-II requirement was two "silent periods" of three minutes each, starting fifteen minutes after the hour and 45 minutes after the hour. During those periods, as well as when not actually sending and receiving traffic on another frequency, the operator on duty was obliged to monitor 500 kHz for distress traffic. After WW-II, a similar requirement was added for radiotelephone distress traffic on 2182 kHz, with the silent periods of three minutes each starting on the hour and half-hour.

Each radio room was required to be equipped with a special clock having the silent periods marked - a red wedge for the telegraphy silent periods and a green wedge for the radiotelephone silent periods, as well as red markings around the periphery of the dial for the four-second auto-alarm dashes.

Such a clock, made by Chelsea in six-inch size in a heavy brass case with an 8-day precision windup movement, would fetch about $800 now if one could be found, but a replica 10 inch diameter wall clock with a quartz movement (and all the right markings) is available on the internet for $15, believe it or not. I have one on the wall of my comm room / ham shack and it's just as advertised at:

<http://www.cafeshops.com/amradio,amradio2,amradio3.4044580>

(I'm not connected with them in any way.)

>In the millennium before, it was semaphore and smoke signals.

In 1965, in celebration of its centenary, the ITU published a wonderful "coffee table" book entitled "From Semaphore to Satellite" which covered the events and technology of its first 100 years including some very interesting pictures. I don't know if it is still available, but I was able to pick up an original edition when I was in Geneva on ITU business in 1967.

>Two decades before the best you had was CB,

Nonsense. I had a 2-meter transceiver in my car in 1958, which worked through a repeater in Los Angeles, crystal controlled AM, of course. Many of my friends who were hams did, too. By the time that the "CB" craze hit, we had 2-meter crystal-controlled FM rigs. My first mobile dial-the-channel synthesized 2-m transceiver (Icom IC-280) was in 1976 and my first 2-meter mobile transceiver with memory channels, variable offsets, CTCSS tones, and all the bells and whistles was in 1986 (and I was a "late bloomer" on that one) when cell-phones were still lunchbox-size and their coverage was spotty.

"Nothing new umder the sun."

Hello Dick:

I rec'd the following yesterday as you probably did as well;

SB QST @ ARL $ARLB043
ARLB043 ARRL files comments, studies in Broadband Over Power Line
proceeding

ZCZC AG43
QST de W1AW
ARRL Bulletin 43 ARLB043
From ARRL Headquarters
Newington CT July 10, 2003
To all radio amateurs

SB QST ARL ARLB043
ARLB043 ARRL files comments, studies in Broadband Over Power Line
proceeding

Pointing to a potential for interference to and from Amateur Radio,
the ARRL has called on the FCC to "take no steps" to permit
Broadband over Power Line (BPL). The League's 120-page filing, which
includes several lab studies, was in response to the FCC's BPL
Notice of Inquiry in ET Docket 03-104, published May 23.

Comment: OK, this is fine, however where are these studies posted and who
performed them? Is this similar to the only study the ARRL possesses on
CC&R's that was done in 1988 in Boulder CO (which is the 4th most liberal
place in the US). The League is pouring thousands of dollars into that
particular lobbying effort (CC&R's) and resting their laurels on an inept 15

year old study. When I started investigating the CC&R issue, I found out that the only evidence the ARRL had to persuade Congress (other than throwing $$$ at them) was this pathetic study.

ARRL said the Amateur Service should not be "gored with the double-edged sword of an incompatible service" that will at once cause widespread interference and preclude any future changes in the amateur HF allocations.

Comment: OK, this is still on point but wht does the league need my money?

Citing "diligent and exhaustive research," ARRL concluded that BPL must avoid any and all amateur MF, HF and VHF allocations without exception.

Comment: What "diligent and exhaustive research," ? When someone asks you for $$$, dont they usually give you some stated facts relating to the reasons for the request? This is like reaching into a box of unmarked resistors and assuming that the one you pick is the correct value.

"This interference potential, as a matter of both law and fact, disqualifies access BPL as a potential future competitive broadband delivery system," the ARRL said in its comments.

Comment: CASE CLOSED. Its already a matter of law. No money needed.

League studies show received signal levels of BPL broadband noise at typical amateur stations would be anywhere from 33.7 dB to 65.4 dB higher than typical ambient noise levels in worst-case situations.
NNNN
/EX

Comment: Typical amateur station? 33.7 dB to 65.4 dB from what noise floor? WHERES THE BEEF?

IMO they're just following the standard organizational philosophy, that being

"Get the money while you can, while you have a good reason to request it".

Seems all organizations now operate under this plan and thus they always have
funding
available (provided they can keep from squandering it on unnecessaries) during
times when they don't have a hot-button "issue" to scare contributers with..

Hello All,

If you are intrested in receiving satellites you can
get information from my website.

http://www.qsl.net/pd0rkc

30 amateur satellite frequenties in a beautifull
collored table!!!

Satellite tracking software.

NOVA 2.1q and a link to the V version.

Hello All,

I have many kenwood information.

Reset codes voor almost any kenwood transceiver.
Also many connector information.

You can find this information on:
http://www.qsl.net/pd0rkc

Hallo All,

Here you can find a list of orginal kenwood
programming software for transceivers, and
handhelds.

You can download these software from my website:

http://www.qsl.net/pd0rkc

Do you know some other kenwood programming
software, for other kenwood transceivers, please
the newest versions.

Your information you can sent to my e-mail
adres (on my website).

1458. QSL ROUTE FOR 5W1RA

Newsgroup: rec.radio.amateur.dx
Date: 2003-07-13 18:58:31 UTC
From: nbr <nobodyreally@hotmail.com>
Message-ID: <89a3hvsdm8k1a1sq2i3h8m29pvqp311k5p@4ax.com>
Source record: 9842

In May I posted a help message asking for QSL route info for 5W1RA.
Thanks for those who replied, however, the current owner or QSL
manager for this call is -not- N6RA or W6RQ.

Apparently the call has been reassigned several times, causing
considerable confusion.

Has anyone recently worked 5W1RA and obtained valid QSL data?

Thanks and 73
Dan

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 6th/July, through Sunday, 13th/July there were 214 countries active. Countries available: 3A, 3B8, 3B9, 3V, 3W, 3X, 4J, 4L, 4S, 4U1I, 4X, 5A, 5B, 5H, 5N, 5R, 5T, 5U, 5W, 5X, 5Z, 6Y, 7P, 7Q, 7X, 8P, 8Q, 8R, 9A, 9H, 9J, 9K, 9L, 9M2, 9U, 9V, 9Y, A2, A3, A4, A5, A6, A7, AP, BV, BY, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D4, D6, DL, DU, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EZ, F, FG, FH, FJ, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HI, HK, HK0/a, HL, HP, HR, HS, I, IS, J3, J7, JA, JD/m, JD/o, JT, JW, JY, K, KG4, KH0, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, S2, S5, S9, SM, SP, SU, SV, SV5, SV9, T32, T8, T9, TA, TF, TG, TI, TK, TL, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, VE, VK, VK9N, VP2E, VP6, VP8, VP9, VQ9, VR, VU, XE, XU, XW, XZ, YA, YB, YI, YJ, YK, YL, YO, YS, YU, YV, Z3, ZA, ZB, ZC4, ZD7, ZF, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

HELP "MAY" BE ON THE WAY! Last week it was announced that Monk Apollo does not have a working radio, so this means Mount Athos (SV/A) is now silent. The members of the Northern Ohio DX Association have decided to help Monk Apollo get back on the air. Since NODXA has not heard of any other organization stepping forward to help, they have decided to try to collect funds to purchase another radio for Monk Apollo. Currently,

NODXA is looking for "PLEDGES ONLY" to see if there is enough interest to help supply Monk Apollo with another radio. Once NODXA is sure that there is enough interest, there will be an address announced to where to send the donations (also some other details). For now, please send your "PLEDGES ONLY" to: kb8nw@arrl.net

9M6, EAST MALAYSIA. Operators JA2KPV/Hiro, JF2UED/Tetsu and JJ2QXI/Mack will be active from Hillview Gardens Resort station, 9M6AAC, between July 24-29th. The operators' callsigns to be used will be 9M6/homecall. They will participate in the IOTA Contest (just for fun). They are planning to operate on 160-6 meters, including the WARC bands, on CW/RTTY/SSB. Mack informs OPDX, "I know 9M6 is not so rare of an entity, but I would like to take as much time as possible to be on the air based on QSO requests." For any SKED on a particular band/mode or comments, please visit the Web page at: http://jj2qxi.tripod.com/
QSLs should go to operators' home callsign.

9N, NEPAL. Kiyo, JH3PAS, will take a holiday in Katmandu, Nepal, August 11-19th. He will be using the callsign 9N7AS on the HF bands, CW, SSB, RTTY and PSK31. This is his third visit to Nepal, and this time he wants to make many contacts with U.S. and S.A. stations. He will concentrate on 30 meters and CW, RTTY/PSK31 modes. Don't expect any low band activities because of the summer season. QSL via his home callsign by SASE direct only to: Kiyotaka Ichikawa, IssikiI-Nishi 1-74-3, Hiraoka, Kakogawa, 675-0117 JAPAN.

BN0, TAIWAN. Mark, JJ1TBB, informs OPDX that he has just received his authorized license and callsign from the Taiwan Authority to operate as BN0F dated July 1, 2003. He passed Taiwan's Advanced class examination during this past March. The CTARL executives said that he was the first case as a foreigner to pass Taiwan's exam written in Chinese. Mark would like to operate 80-6 meters CW/SSB and is preparing to import a Cushcraft R6000 antenna. The BN0F QSL route is via JL1ANP, Mr. Tadashi Watanabe. Mark adds that he still has permission to use/operate as BU2/JJ1TBB. The BU2/JJ1TBB QSL route is the same as BN0F.

C6, BAHAMAS (Update/Additional). As mentioned in last week's bulletin, Steve/AK0M and his wife Sandy/KC0RD will be active as C6ASB and C6ASC, repectively, on Abaco Island (NA-080) from July 22-30th. QSLs for both callsigns go via AK0M.

DXCC NEWS. Bill Moore, NC1L, ARRL DXCC Manager, announced this past week that the following stations are approved for DXCC credit for Timor-Leste:
4W1BK (Effective 22 May 2003) 4W3CW (Effective 16 May 2003)
4W3AN (Effective 19 May 2003) 4W3DX (Effective 22 May 2003)

FO/A, AUSTRAL ISLANDS. Richard/DJ4OI, Andy/DL3GA, Markus/DL1IAN and Joachim/DF6IC plan to be active from Tubuai, Autral Islands (OC-152), from September 18th to October 3rd. They plan to have two stations with beams and linears and be active on 80-6 meters, including the WARC bands on SSB, CW, RTTY and possibly the other digital modes. Their callsigns will probably be FO/homecall/A. QSL via homecall, bureau cards are welcome.

IOTA NEWS.................
EU-012. Look for Peter to sign MM5PSL/p from Fair Isle (SCOTIA SH-09, WW Loc. IO99en) and Fair Isle South Lighthouse (ARLHS reference SCO 079) from August 3-6th. He will try to operate as much as possible and late into his night. QSL direct to WA7OBH.

EU-042. Thomas, DJ5DT, will be active as DJ5DT/p from Sylt in North Frisian Islands during the RSGB IOTA Contest (July 26-27th) as a 12 hour CW entry. QSL via DJ5DT.

EU-080. (UPDATE to OPDX.610) Remember a multi-national team will be active from Ons Island, July 25-27th, and during the IOTA Contest. Jose, CT1EEB, reports that the online logs will be posted as soon as the activity begins. For details, please have a look at: http://www.qsl.net/ed1ons
The ED1ONS QSL card Jpeg file is already on the homepage and QSLs should be ready by the first day of activity. QSL via ED4URJ. This DXpedition is sponsored by REP - Oliveira de Azemeis Regional branch and URE - Jarama Regional branch.

EU-084. Claes, SM0MPV, will be active as SK0HS/5 to be active from Vassaro Island during the RSGB IOTA Contest (July 26-27th) as a Single-Op/Low Power entry. QSL via the Bureau or SM0MPV.

EU-123. Operator MM0ROB and possibly others will activate Great Cumbrae as GM5C for the RSGB IOTA Contest (July 26-27th). QSL via GM0DEQ.

EU-140. Walter, IN3XUG, was active this past weekend as IV3/IN3XUG from Grado Island (GO001 for Italian Island Award). He should be QRT by the time you read this. QSL via his home callsign.

EU-145. Operators CT1AGF, CT1EPV and CT3FN will be active as CS5F from the Lighthouse Cabo de Santa Maria, Culatra Island, July 19-20th. LH reference numbers: LH 0144 / POR 013. QSL via HB9CRV/CT3FN: Hermann Stein, Brueelmatten 13, CH4410 Liestal, Switzerland. For more information, visit the Web page at: http://ct1end.netpower.pt/eu145_culatra_2003

NA-026. Mike, N2GC. will be active from Long Island in the RSGB IOTA Contest (July 26-27th). QSL via N2GC.

NA-031. Two operators form Kansas, Alan/W0NO and Bruce/K0BJ, will be activating Block Island, Rhode Island, from July 20-28th, including the IOTA Contest. Activity and shakedown will occur during the week with individual callsign while they also do sightseeing with their families. QSL via bureau or direct.

NA-062. John, W0JLC, will be active as W0JLC/4 from Marathon Island, FL, during the RSGB IOTA Contest (July 26-27th) as a Low Power entry. QSL via the Bureau.

NA-068. Members of the Fredericton Amateur Radio Club, VE9ND, will activate Miscou Island as a Multi-Op entry in the RSGB IOTA

Contest Weekend. Also, listen for VE9ND and others on 6 meters as they activate FN78 from this location as well. QSL via VE9XA's home address. Operators will be VE9AV/Dave, VE1ACU/ George, VE1JH/Brent and VE9XA/Tim.

NA-111. Andy/NP3D and Sergio/W2WB will be active and using their own callsigns from Long Beach Island during the RSGB IOTA Contest (July 26-27th). Both will be Single-Op entries. QSL direct to their home callsigns.

NA-141. Charles, W4SAA, will be active as W4SAA/p from Virginia Key during the RSGB IOTA Contest (July 26-27th) as a Single-Op/ 24 hour/CW entry. QSL via W4SAA, Bureau or the address on QRZ.com.

SA-015. Javier, YV5MBX, reports to look for YW5M from Los Monjes, July 14-20th. Activity will be on 160-2 meters CW/SSB. The suggested frequencies are:
CW - 1825, 3510, 7010, 10110, 14010, 18010, 21010, 24845 and 28010 kHz
SSB - 1850, 3795, 7085, 14185, 18145, 21285, 24945 and 28485 kHz
6m - 50110 kHz
2m - 146.520 MHz simplex
QSL via W4SO direct or by the bureau.

KP2, U.S. VIRGIN ISLANDS. Jeff, WB9CEJ, will be active as KP2/WB9CEJ from St. John and St. Thomas, U.S. Virgin Islands (NA-106) between July 14-19th. His activity will be mainly on 20/17/15 meters, using CW/SSB. QSL to his home callsign.

MUSEUM SHIPS WEEKEND ACTIVITY.....
The Museum Ships Special Event, sponsored by the USS Cassin Young ARC, will take place between 0001z, July 19th to 2359z, July 20th. Over 72 ships and submarines will be taking part in this world-wide event. For a list of stations, please visit:
http://www.qsl.net/ww2dd/event.html

Look for NA5DV to be active from the historical San Jacinto Battleground State Park in south Texas. The Houston Vintage Radio Association is restoring the original radio room with vintage radios and will be operating the station on this Special Event weekend. Look them up at:
http://www.hvra.org

Members of USS Kidd ARC will operate W5KID in Baton Rouge, LA, aboard the USS Kidd, DD-661, with a minimum of two stations through the weekend. They will periodically put out a beacon on the APRS network, so you can go to the following Web page for updates on the frequencies where they are operating at: http://www.findu.com/cgi-bin/find.cgi?call=w5kid

Lightship Columbia WLV-604 will be active as W7BU during the Museum Ships Weekend. QSL via W7LY. A #10 S.A.S.E. envelope will get you a certificate from the last Lightship to see service on the Pacfic coast.

Fred Lesnick, VE3FAL, will be operating from aboard the Tugboat James Whalen on Saturday, July 19th, from 10am-4pm local time. This is also in conjunction with the annual HarborFest, so lots of people will be in and out. He is going to be putting up a 40 foot vertical that was given to the owner when one of the Canada Steamship Lines ships was scrapped in Thunder Bay. A picture of the Whalen is on the following Web page at: http://www.city.thunder-bay.on.ca/index.cfm/fuse/html/pg/297.htm

NEW AWARD AVAILABLE. OPDX has been informed that the IOTA-JA is now issuing "Japanese IOTA Islands Award". The JIIA Award is intended for working the IOTA island of Japan. The rules for this award can be found on the following web site at:
English edition: http://www3.ocn.ne.jp/~iota/newpage61.htm
Japanese edition: http://www.h4.dion.ne.jp/~ji6uru/jiia.html
The JIIA award issue is done on Monday, July 14, 2003.

PJ7, ST. MAARTEN (Possibly FS also!). Igor Slakva, VA3YDX (also US1IDX), will be active from PJ7-land as PJ7/VE3YDX from July 12-26th. He also hopes to be active as a mobile (FS/VA3YDX/m) from the French (FS) part of the island. He is on vacation with his family, so operating may be somewhat limited from his usual style. He hopes to be on RTTY and PSK as well as SSB and CW. His rig is an ICOM w/100 watts and wire antennas. He will be in the HK Contest as well as the NA QSO RTTY Party. QSL via his home callsign VA3YDX direct to: Igor Slakva, 2900 Bathurst Street, apt. #307, Toronto, Ontario M6B 3A9, CANADA. Bureau is "OK" also.

PZ, SURINAME. Three members of the Magnolia DX Association (MDXA) will be teaming up with PZ5RA to sponsor a major operation from here between October 20-28th. They will have two full HF stations, complete with beams and amplifiers and will be on all bands 160-10 meters. The team will also participate in the 2003 CQWW SSB Contest as PZ5A and as a Multi-2 entry. This is a first ever 2x1 PZ special callsign for a contest operation. Individual team members will sign PZ5CQ (KD5CQT), PZ5FF (K2FF) and PZ5UE (W5UE) before and after the contest. QSL PZ5A via W5UE. QSL PZ5CQ, PZ5FF and PZ5UE pre/post contest activity to the individual's home callsign. For updated details, watch MDXA's Web page at:
http://www.mdxa.org/pz_2003.html

QSL INFO AND NEWS.....
The complete RTTY logs for the 9N7DX Nepal DXpedition (April-May, 2003) are now available on-line at the following two Web sites:
Main site: http://www.qsl.net/va3rj/search_9n7dx.html
Mirror : http://webhome.idirect.com/~va3rj/search_9n7dx.html

Activity by AT0HQ was the HQ station of the Amateur Radio Society of India (ARSI), their national Society, for the IARU HF Championships Contest over the past weekend. Operator was Arasu, VU2UR. QSL via SM3DBU.

Willie, DJ7RJ, has just received the QSL cards from the printer for his January J79RJ operation and will begin to start sending them out.

Twelve IARU Italian HQ Stations were expected to be active in this past weekend's IARU Contest. Multiple stations were active as IUxHQ (e.g. IU2HQ,IU4HQ,IU9HQ) QSL all to ARI. Operators involved were I4UFH, IK2NCJ, IV3TAN, IK2QEI, I2WIJ, IK0YVV, IK0XBX, I0SNY, IT9EQO, IK2JUB, IK4MGP, IV3TAN, IV3OWC, IK2PFL, IK0AZG and possibly others.

Naran, JT1BV, informed OPDX that he would be active on 40m during the past weekend's IARU HF World Championship. He states to QSL via the address on QRZ.com.

QSL JT1T (a Multi-Op/Single in the IARU Contest) via the JT1KKA or the JT Bureau.

Activity by JY6ZZ was the first ever IARU HQ activity in a IARU Contest this past weekend. According to Koji, JY9NX, Jordan's JY6ZZ RJARS HQ Station will not send QSLs via the mail. All QSOs will automatically be confirmed via the bureau. Operators were JY4NE, JY9QJ and JY9NX.

A multi-op team activated R7HQ during the IARU Contest this past weekend. QSL via RW3RN (All QSOs will be auto-confirmed via the Bureau). Operators were RU1A, RW2F, UA6AF, RU6LWZ, UA9AYA (80PH,15PH) and UA9AT (160PH).

A multi-op team activated SK9HQ during the IARU Contest this past weekend. QSL via SSA bureau.

T5/EI5C (Where are the doc's? -- Update!). Last week OPDX was asked to send out a "feeler" about the 1994 T5/EI5C operation. OPDX was contacted by ex-DXCC Manager Bill Kennamer, K5NX (ex-K5FUV), and he reported: "That operation was bogus. The reason they never sent doc's was that there are none. I found the operator had no license of his own, was bootlegging the club call, and had no authorization for Somalia."

TI2, COSTA RICA. Bob, W2BZY, will be active as TI2/W2BZY from now through July 21st from San Jose, Costa Rica. Activity will be on 40-6 meters. QSL via his home callsign.

TZ, MALI (Update and AMP put to the test!). The August 12-23rd DXpedition to Mali keeps preparing for their operation. They announced this past week that the team will be testing a new concept in Amplifiers. These amps are tiny and light but very powerful amps build in Spain with 400 watts outpower on SSB and CW. This DXpedition will be the amp's presentation and hard test to show that they are designed specially for DXpedition and mobile operations. The DXpedition team will keep preparing everyhthing to work SSB, CW, RTTY and AO-40 SAT, all bands and especially 6 meters (if there is opening from Africa on this magic band). Antennas will be outstanding since they will use a very big roof surface to install them over a 4 floor building by the Niger River coast. Verticals, yagis and dipoles will be used to be on the air with 3 stations, 24 hours a day. The QSL Manager is EA4URE, the Spanish National Bureau.

VP2M, MONTSERRAT. Look for several members of SWODXA Southwest Ohio DX Association (SWODXA) to be active from July 23-29th. Thanks to Keith, VP8MEG, the group will be on the island for the IOTA Contest. The 8

members are: Joe/W8GEX, Byron/WA8NJR, Kirk/W8QID, Jim/K8FL, Wayne/K8LEE, Bill/W8KVU, Phil/W9IXX and Mike/N9NS. The team plans to have 5 stations on the air. Two on SSB/CW both with a 3 element triband beam and a 5 band HexBeam. They would like to thank Mike Traffie of Traffie Technology for the use of the HexBeam antenna. The PSK-31 and RTTY stations will use a R-7 vertical and 3 element beam on 6 meters. The two HF stations will be running MFJ 500 watts solid state amps. On six meters they will be using a 3 element beam provided by WZ8D and a Icom 706. Their grid square will be FK86. They also just received the callsign VP2MX which used to belong to Bob Billings, VE1YX. Please do not send Bob all the QSL cards. The QSL Manager is N8QET. Please mail them with a SASE for USA. All others send at lease 1 up-to-date IRC or 1 USD, include a SAE also. This trip is dedicated to the memory of Frank Schwab, W8OK, who was a long time member of the SWODXA.

XU, CAMBODIA (Update). OPDX was informed that Danny/M0GMT and Oliver/DJ9AO will use their assigned callsigns between August 3-18th as follows:
XU7ACT for normal operations
XU7ACU for the WAE CW Contest, August 9th and 10th only
QSLs are via G3SWH. A Web site is available, as well as online log checking. Please visit for updated information at:
http://www.geocities.com/dxpedition2003

YJ, VANUATU. Operators Trent/VK4TI, AJ/VK2IR, Chris/VK3FY and Les/VK3WA will be active as YJ0X in the CQ World Wide DX SSB Contest (October 25-26th) as a Multi-Single entry. Other operators are invited to join the crew by sending an E-mail to: trent@sampson.net.au
QSL via VK4TI, using the QRZ.com address.

Can anyone send me a copy or lead me to a manual or engineering specs for a Tristao MA-550, 55 foot tubular tower, pretty much the same as a US towers MA-550 if not identical. I have heard that there is a ham in calif that has manuals etc. for many of the older towers but don't know who it is or if it is true or not. I would appreciate any assistance on this thank you. Mike Herron K7MH.

1467. No DX ?

Source record: 9702

The subject says it all - I have a CDE Ham-IV control head that is acting up and I recall web page that contains tips on how to trouble shoot.

Mine light up and the indicator falls to the right side. If I mess with the brake control it sometimes comes back to live. BTW, It still turns the beam even thought the indicator is stuck in the South position.

Anyone have the URL on the tip sheet?

Most of the posts here haven't had much to do with DX, lately. :-)
We've been arguing about internet "radio" and BPL.

> "It was June 14th, 1958 - That's the night I worked the XT1 .. and

Dick,

Just a guess, but if I remember correctly, the CDE rotors'
meters just measure the voltage across a 500 ohm potentiometer. What
I would do is to disconnect the meter from the rotor and measure the
resistance across the pot and swing arm. Then connect again and move
it, say, 90 degrees or so, then measure again. If you don't get a
reading under 500 ohms and/or it doesn't change, you have a problem in
the rotor. If it reads ok and changes, then the problem is likely in
the control.

73,

Larry W1HJF

1471. RE: What's All Dose Numbers Hams Use

Newsgroup: rec.radio.amateur.dx
Date: 2003-07-16 14:45:44 UTC
From: A Ham Elmer <"A Ham Elmer"@connectnet.net>
Message-ID: <TydRa.787$ff.615@fed1read01>
Source record: 9705

Someone asked:

>I hear Hams exchanging numbers -- what do they mean?

During a contest, Hams exchange a combined signal report and a number - like 5906 -- the 59 is a signal strength and readability number URL: http://www.cebik.com/rst.html For CW its like 599 last nine is for tone. The 06 is a ITU or CQ zone number.
Zone Numbers (CQ and ITU): http://www.cq-amateur-radio.com/wazrules.html and http://www.rsgb-hfc.org.uk/wituz.htm
Exchange varies with the contest -- see URL: http://home.online.no/~janalme/hammain.html See rules

Serial number reports like 59876 -- the 876 is the 876th contact made.

Contests sponsored by 10/10 International use a 10/10 number like 18099 - URL: http://www.ten-ten.org/

For 6M Dxing/Contesting and now some HFing -- folks pass around Grid Square Numbers. I get a lot of JA cards (HF QSO's) wanting grid squares.
Example FM16tj. Usually only the FM16 is used in the exchange.
So where is FM16 ? Maps and info following will help. (It's Elizabeth City, NC)

What are they -- see URL: http://www.arrl.org/locate/gridinfo.html

QRZ and Buckmaster will reveal your grid square -- not precise for the last two letters but usually close enough. On QRZ look up your call, then see Detailed Info for your GS.

For precision get a GPS reading, then use the AMSAT converter -- http://www.amsat.org/amsat/toys/gridconv.html

DX Atlas has a nice grid square locator -- displays a typed in grid number on the maps.
http://www.dxatlas.com/

Artsci has Repeater MapBook 10th edition & Repeater Directory
With GRID SQUARES on every U.S. Map! http://www.artscipub.com/mapbook/

ICOM Site Has a grid Map at URL:
http://www.icomamerica.com/amateur/index.html
Click on AMATEUR, then U.S. Grid Square Map (470 KB PDF)

Another At http://www.amt.org/Multimedia/images/grid-na.gif

Another at URL: http://pages.infinit.net/ve2pij/gridqra.html

And the ARRL offers the VUCC Award based on grid squares -- see URL:
http://www.arrl.org/awards/#vucc

Passin The Good Numbers -- 73
Anon to keep Jim from Spamming and Harrassing me ! Jamesx that is.

The basis for the S-unit is presumed to be as follows:

S9 corresponds to 100 microvolts "open-circuit"
from a 50 ohm generator. This corresponds to a 50
microvolt reading on the signal generator meter
scale. It also corresponds to -73 dBm in terms of
an "available power" level. The signal generator
scale markings coincide with this. Everyone seems
to agree about this much.

However, this does not mean that the actual signal
level into the receiver is 50 microvolts, because
we very seldom know the actual input impedance of
the receiver. Using "available" and "open-circuit"
we do not need to know the input impedance of the
receiver. The receiver is designed to operate from
a 50 ohm generator and that knowledge is sufficient.

The number of dB in an S-unit below the S9 level
is not, as many believe, guaranteed to be 6 dB per
S-unit. Different manufacturers have used numbers
as low as an "average" of 4 dB (Collins for
example). In vacuum tube receivers especially,
some latitude has always been necessary.

In my homebrew solid-state receiver (2003 design)
I use 5 dB because that correlates with the
"intuitive" evaluations that I have developed over
the years (that is my option for my personal
receiver). My S-meter, using precision circuitry,
is closely calibrated and marked based on accurate
sig gen readings. Also, my receiver gain does not
vary more than 1 dB across any ham band and 2 dB
from the 160 to 10 meter bands because of the way
the receiver is designed. This calibration is

quite stable and reliable. I check it frequently.

A picture of my homebrew receiver is on
QRZ.COM(W0IYH). Note the large high-quality analog
S-meter.

I was also going to venture a WAG that the indicator pot (or wiring to it)
may have "gone south."

The suggestions above are a good way to verify/discount that WAG.

Yeah, you know I just took a quick scan of the HF spectrum. Looks like most of the modern world has relinquished HF spectrum for more consistant, secure means of long range communications.
There's a few spanish speaking mariners off the coast of Chile on 8MHz, but they're waiting for some surplus AMPS cell service to show up. The same drunks on 75 every night bitching and moaning about not getting laid, 2 guys a day die at the mic on 40 trying to spark a nail while explaining their med
regiment, 20's got would-be broadcast engineers schmoozing us with swideband audio, effectively demonstrating how to make inefficient use of spectrum as the DX'ers yelling numbers across the pond. From there up to through 10 its kinda dead...except 27MHz. There's always an elevated noise floor and some potent SKIP signals on 27MHz.
Both amateur bands on either side can be dead quiet while half the iron EF Johnson ever made is pumping square waves on Channel 6. I really shouldn't mention 27MHz though because thats, well thats CB.
Its probably a result of that band selective propagation problem I noted earlier.
I really hate to be the devils advocate, and I have have enjoyed the romance with ham radio that many others from years gone by have experienced, but we may soon be exposed to the same hassle the 8-track got when cassettes showed up on the front seats of our Chevelles.
Unfortunately, the FCC has been reduced to auctioneers, directly accountable to scuzbucket politicians eager to sell off anything possible to maintain the facade.
The lucky ones leave the FCC to assume cushy positions at corporations they help during thier tenure, quite blatantly I might add. Hell, some have left to start
companies that intentionally try to destroy industries(LMR/SMR) to achieve thier means(certain cell carrier with push to talk feature)
I'm probably gonna send Newington money anyway. They irritate sometimes, but they're the biggest gun we have. I'd really miss the natural sound of an HF
radio set, and the character and tradition of our HF presense. How 'bout you?
My argument is that BPL should be high pass filtered with a 30MHz cut-off. When the leakage of data begins to propagate erratically in the lower
HF region, there may be fragmented co-node interference that may be a duplicate color code match, causing network disruptions.
Another more basic issue is, Commonwealth Edison can't keep thier 60Hz primary product from leaking. How the hell are they going to handle a sub

carrier service on ratty grids maintained by employees that think the power
is
good because your lights are on?
And finally, the sacrifice of the lower 28MHz (2-30) that is alleged to be
affected
will not drastically affect the massive volume of throughput that will be
crammed
down the throats of so many, or the massive volume of cashflow that will be
enjoyed by so few.

There are a number of public safety agencies who still make serious use of lowband
VHF below 50 mHz, all the trunked systems nothwithstanding. Converting those to
UHF or up is a big $$$$$ proposition which just aint gonna happen iin the financial
climate facing those users for the forseeable future
. The state I worked a career for that uses a series of frequencies in the 42mhz
region for statewide public safety comms
would love to abandon it all in favor of a trunked UHF or above system but can't find
the ~$250mil it'd take to do the job. I'd expect that state and several others that
I know are on low VHF to have some pretty strong language for the FCC on the BPL
issue.

If FCC wants a real hornets nest to descend on DC they can assure it by approving
the
BPL docket without many very serious limits, big chunks of frequency exemptions and
much other machinations to releive in advance a huge amount of what will be real

trouble for them if they don't. And no one knows if it would even work acceptably then, much less if there will ever be a viable business plan stem from it all. Who knows what emerging technology will render the whole scheme obsolete sometime next week?

1477. Ham friend becoming DX

Newsgroup: rec.radio.amateur.dx
Date: 2003-07-17 17:54:51 UTC
From: dapriz6@yahoo.com
Message-ID: <8a319899.0307170954.47184a23@posting.google.com>
Source record: 9711

I'm posting this for a friend, who's helping me with ham radio whom I'm in turn, helping learn Internet.

A ham friend of mine might be moving overseas and wants to of course, do some hamming from there. He already knows he can legally operate with his U.S. license, which is good, but he is concerned about mail.

He is at present, looking for a mail forwarding service that will not only be able to forward mail to him from a U.S. address, but mail letters for him too. Although he has found several services that will forward all of his mail overseas from a U.S. address, he can't find one that will drop stamped letters in the mail he sends them.

His concern is some hams seeing he has a U.S. address but is actually overseas, will send him SASEs to his U.S. mail drop in search of QSL cards, but he will not be able to mail them back through the foreign postal system. As for using friends and other such individuals, he doesn't want to burden anyone, and isn't sure if anyone else is reliable enough to mail them in a timely manner.

Even though it isn't a rare, developing country he is going to, there are hams in the U.S. who will want a QSL card from him, and he wants to continue to QSL 100% as he does now.

He also plans to check on the bureau in his new country, but knows like here, that will not always be an option.

Any tips are appreciated.

I'd suggest he find a QSL manager in the U.S. to handle cards for him.
Much simpler for him, and also for anybody who wants a card from him.

You forgot to mention where he's going. In some developing countries,
mail theft is a big problem.....

The best shot is going to be seeing what companies are operating in the location he is going to once he gets there. It is a bit difficult to determine this from the US end.
I lived in such a country and the best mail service 'company' in my town only served a couple other towns in the country. Each locality had its preference among several such outfits.
The service wasn't inexpensive. This was 10 years ago and the base rate was about $40/month and the quantity rate was about $3/lb with some wacky minimum charges for a single letter, etc. A real shocker when some vendor sends you a new 10 lb. catalog or the junk mailers get the address. Since it is YOUR account you can't simply refuse the junk mail once it arrives.
On the plus side, they would also accept outgoing mail at similar rates and even sold US stamps at a markup!
In any event, if he needs or uses the service for other personal needs then it may be justified for QSLs also but I think its kinda pricey for QSLing alone. I was fortunate enough to travel thru US territory a few times a year and usually dropped off my non-important mail at a box in the airport or gave it to friends who were travelling to the US.

There will be a big market is 'serious' amplifiers. BPL will be knocked for
a loop so often it will be rendered useless.

Not to mention the court cases that I HOPE will follow. We are the LICENSED
service.

One more thing. Remember the FCC and their decision to increase a owners amount of radio/tv stations he could hold? Well a committee in congress has put a kink in that plan.

I think we hams and other HF users should do the same thing. Write ALL your reps in congress. The FCC is obviously not qualified to do what it is doing. Anyone that even considers deploying BPL is braindead.

Wouldn't surprise me. The FCC requires the use of the least amount of
power needed to establish a given mode of communication. If BPM fills
the whole HF spectrum with S9-level fog, then QRP will go out the
door, and maximum-legal power will become technically necessary to
"burn through".

I'd hate that. So would our neighbors. Expect a big increase in
TVI/RFI complaints.

Similar things might happen with other licensed HF services... they
may also have to crank up their power.

That is a good suggestion, but he is very picky about such things. In the ARRL Operating Manual, there is something mentioned about managers volunteering to do it then after seeing how much work it is, giving up, leaving other hams high and dry. His QSLing is very important to him, and he wants it all done right. If we could find him someone who is responsible and reliable enough to do it, he might consider that option.

He's going to be living in England, and isn't really concerned about mail theft. He found a company called usabox.com that will forward his mail to the UK for him, and even let him decide what gets forwarded and what gets tossed using the WWW. He's also using it for personal mail in addition to QSLs, so he will definitely be getting a forwarding service.

I (tried) to work the contest last weekend... only got *7* contacts, only three of them DX. I was mostly on 20 meters, using my friend's Yaesu HF rig and a Cubex Quad antenna w/rotator mounted up high on the roof. Putting out only 100 watts, but still people had a very hard time hearing me. Things were no better with the Gap vertical.

That's the hot band right now... wish I had access to it, but the friend whose shack I have access to doesn't have an HF + 6 meter rig right now.

Gud DX (but probably not 'til after summer's out),

Jackie

Output suds don't mean squat. "Ya can't work 'em if ya can't hear
'em." Wherein lies the whole problem.

There's a much easier solution!! Have the FCC propose a rule that
communication receivers cannot have receivers with sensitivity lower
than 50 microvolts!

If 60 dB noise levels are real an amplifier won't help me hear the weak
ones! So, simply eliminate the ability to hear the weak ones and we will
all be happy, NO? It's much easier to install a 60 dB pad on a receiver
than pushing amplifiers and Long John Yagis. Hmmm ... ;-)

I worked around 20 countries in the IARU HF contest, 70 watts
into a horizontal loop. None of them were new ones for me,
but I also worked the FO/G4MFW operation, not part of the contest
but during it--Australs was a new one. I missed the solar peak;
I was inactive for 3 years. Maybe it looks worse to people
who were active during the peak, because you have great conditions
to compare it to. But I've worked 8 new countries since April
with my little barefoot Yaesu and wire antenna, up to 172 worked
now, and there's still DX to be had, I think. I'm certainly having
a world of fun.

Speaking of the FO/ops, I worked them again last night on 15,
and Barry was doing a great job of managing the pileup and
working us--efficient, fast, and friendly! Great job--I'm
looking forward to a story about the operation in DX Magazine
or CQ.

Shoot, propose simultaneously that hams be allowed 50 kilowatts output.
Not that either of these are remedies for the potential problem but
maybe it will help the FCC understand whats going on.

That is great! You said you have a horizontal loop-- where is it and how large is it?

I worked my first 100 DX entities since I got my General last January, and the bulk of them were in the late winter and early spring. So I have not been on the air for very long at all. I just know that I experienced some really great propagation last winter from my location.

However, I've only worked less than perhaps 12 new ones since about late April, and curiously enough, five of them were in the South Pacific region / Australs (TX4PG, Marquesas; F0/F8CFU, Tubuia Island; ZK1AYL, South Cooks; 5W0GW, Western Samoa; and T2YL on Tuvalu). I have noticed that propagation is much better to and from this area of the world than it was last winter. I didn't hear any Pacific stations until about April.

I can't wait to get my station set up in my new place, even though I'm going to be needing a "stealth" HF antenna. Not more "easy" DX from a tall vertical anymore. :-(I am moving into an apartment, so I cannot put my dipole or vertical up there. I am thinking of an HF mobile style antenna, such as the High Sierra El Dorado, or the High-Q. Will need some wire radials, but those can be easily dropped off the edges of the balcony.

Anyway, have fun and I hope that this winter sees better propagation. I can't wait for the sunspot cycle to go back on the upswing again.

My loop is about 80 meters (250 feet) of insulated #14
wire, in a lozenge shape, hanging from trees around my
yard. It's about 50 feet high (12 meters?) at the highest
points, and around half that at the lowest points. It's
fed with 450-ohm ladder line through a cheap tuner, and
it seems to work pretty well in general.

> Australs (TX4PG, Marquesas; F0/F8CFU, Tubuia Island; ZK1AYL, South Cooks;

There have been lots of articles in the magazines about
stealth antennas; you might find some in the ARRL's website,
or by buying a stack of back QSTs at a hamfest. There are
lots of possibilities, if you don't mind experimenting!

> Anyway, have fun and I hope that this winter sees better propagation. I
> can't wait for the sunspot cycle to go back on the upswing again.

I'm sorry I missed this last peak--I was playing with my
darkroom stuff and didn't touch a radio for years. But there's
DX to be had all through the cycle, I think--just a matter of
finding it. Have you read W9KNI's book, _The Complete DXer_?
There's a new edition (3rd) out and it's FULL of exceedingly
helpful (IMO) thoughts, advice, tips.

73 and good DX!

I think it is assumed that the guy on the other end would
also have more output suds, i.e. 100W would become obsolete.

Agreed. I guess my point was that if BPL interference becomes a
nationwide problem, _lots_ of people in the US will boost their
transmitter power so that they can be heard - *and* they'll be limited
to working stations who can do likewise.

This leads to a rather nasty non-compromise - you'll be limited to
working a much smaller set of stations (e.g. few or no DX, no QRP),
you'll spend a lot more on equipment, *and* your neighbors (BPL-using
and otherwise) will be much more likely to experience harmful
interference.

I wish I was moving to a place where I could have a loop. Seems so easy and yet, they work great.

> I've never worked 5W--still on my "makes me drool!" list. :-)

I was lucky that night-- I wasn't even aware they were on the air-- and I was just tuning around on 17 meters (one of my fave bands) and came across them. I wasn't sure where 5W was, so when I looked 'em up, bang! I leapt into the pile-up and put out my call a few times, and they came back to me with a 5/5 report. I worked T2YL on 17 meters as well. I really like that band. It's not as crowded as 20. I made a dipole just for 17 meters. I wish I didn't have to take it down, but someday I'll put 'er back up again, when I get my own house.

There are sure lots of 'em... seems like everyone I've talked to who's ever had to use a 'stealth' antenna has their own theories about what works best. I guess any antenna is better than none. I have considered some indoor antennas, but really want to get one outside. I do have a balcony and should be able to at least put a portable HF antenna on it.

Paydirt! I love the AC6V site, but there is SO much information on it, and I'm such a new ham, that I have not even gotten to that section yet.

I would venture to say that AC6V has one of the most complete ham sites on the Internet, from what I've come across so far...

Hello All,

I have comparisation information from 20 different
Diamond antennas (verticals).
For the bands: 50/144/430/1200Mhz.
Compare the gain and the length.

All information is to see in a nice chart!

http://www.qsl.net/pd0rkc (Click on technics).

The solar flux has taken a very steep dive since about April so that makes a
major difference. That particular parameter is dependent on the sun cycle
not the season of the year.

As we head down to the bottom of the cycle, now is the time to try nighttime
DX on 40m CW. There's also quite a bit on 20m CW and 30m (which is CW
only). While the 10m through 17m bands may be open sometimes, they are
going to be slim pickings for the next few years.

Since you are a new ham, it may be difficult for awhile to find the CW DX.
Be patient and listen a lot. You may need to listen to the station several

times before catching their call sign. Also check the internet for the DX spots to help you find them.

Dee D. Flint, N8UZE

That table is just a lot of bullshit, those figures are completely
useless and far away from truth...
I wonder why you post this useless info into 5 newsgroups without
verifying the figures.
Are you paid by diamond?

By the way, your menu is still not visible with netscape navigator...

Bingo...and don't forget sunrise times on 40. I whacked off a string of
KH6 and JA on 40 during the contest with my HW-16 and dipole.
DX isn't dead...its just not like shooting fish in a barrel as in
previous years.

Texas just had a hurricaine, albeit a fairly normal one.
The station at DPS in Austin was severly limited due to noise in their end.
Why do I point this out?
The noise levels in citites on HF are already so high as to endanger life
and property.
BTW What ever happened to fiber optics?
H.

"Harmful interference" is a specific technical term of art in
communications regulatory law that refers to interruption to a
licensed communications service and places the responsibility to
alleviate the situation on the operation causing the problem.

Your neighbors will experince "unwanted interception" which you
have no obligation to deal with except to make a reasonable amount
of tests to enable the neighbor's repair tech to check the
effectiveness of whatever protective measures they are making to the
affected home electronic/entertainment equipment.

You, OTOH, will receive "harmful interference" from the BPL operation.

Go get 'em, tiger....

I understand, but I will not post my callsign on Usenet, because there are creeps lurking on Usenet groups who can look up my address and other pertinent information on various callsign databases. I would perhaps not be as concerned if I weren't female.

So, as far as location goes, I live in the north-central part of the United States, very close to the Canadian border. About as close to the geographic center of North America as one can get... pretty far from any oceans!

Jackie

1516. Amateur Radio Legal Issues List

Fellow Amateur Radio Operators,

I have created a new list that deals specifically with legal issues pertaining to our hobby, the Amateur Radio Legal Issues List. The list is for the dissemination and discussion of legal issues (such as PRB-1 and pending legislation in Congress) and other related issues (court battles, etc.) that can affect our hobby.

If you are interested in such a list, please send a blank email to ARLI-subscribe@topica.com.

Thanks for the clarification, Phil! I'm not sure that the neighbors
will necessarily see it that way, though :-(

just one example:

you see with first glance that the claimed gain figures are
much to high,
how can an antenna 30% longer than a halfwave show 3dbs of gain
and 1/4 Lambda more yields in another 1,5db more gain?

>
> Please be a bit creative yourself.

I have always been...

>
> And Netscape: we stopped using that about 8 years ago...

fine for YOU

It would be a could idea before spamming newsgroups
to test how things are showing up with all common browsers,
there are people around the world who do not use Microsoft software
on porpuse

All for naught in enough cases to render QRO a complete waste Cecil.
The BPL crud is hammering yer rcvr with an S9 signal. It's the bottom
of the cycle. The VK with his two gallons is 10,000 miles away and
maybe an S6 on a good day. No contact.

160m is below the BPL target spectrum so far. Break out those 160m
condo hamburger deck railing-mounted aerials and beat yer brains out
that way. Choices, choices . . .

I have been a Netscape user for almost 8 years. I refuse to use IE!!

I spent years writing HTML based web pages in HTML!! And, I always Beta tested my pages against all available browsers.

The current software for designing web sites is compliant with the Bill Gates world, but, the world is bigger than Bill Gates.

Yes. I know that. It has a nice religious feel around it, bashing Microsoft.

Dave, the context of "I refuse", is nothing more than an attitude adjustment problem.
;-)

> I spent years writing HTML based web pages in HTML!! And, I always Beta
> tested my pages against all available browsers.

I've written HTML-based web pages also. And of course I always Beta test my pages as well. However "all available browsers" includes only two: NS and IE. My final tests always come out correct when testing with IE. Usually there is some little quirk with NS. That is the reason for the statement at the bottom of the page, "This site best viewed with Internet Explorer", and includes a graphic link to MS if you want to download the IE browser.

You can view the web pages with NS if you want, but the "disclaimer" is there for a reason. The guidelines that govern what nomenclature is used to make up HTML code has some differences between NS and IE. Until both companies agree on the same actual code, there will always be problems - unless you know *both* variants of HTML programming.

> The current software for designing web sites is compliant with the Bill

Jackie is correct. Whether male or female, posting your name, callsign, and e-mail address is an invitation to real harassment by the nuts.

In addition to harassment. they can sign you up for undesirable mail, chat rooms, singles, porno, etc that you never want to receive. Even phone calls from the nuts once they track you down. Has happened to several decent posters I know of -- including this old DXer.

One Ham here had a face to face confrontation with a wacko that stalked him. Sad fact of the times.

Being anon does not detract from the credibility of ones posts. So what if you give your name and callsign -- you can be as wrong as any anon poster.

Back to the subject, yes DX is getting tougher with the conditions at present, but going lower in frequency, improving antennas, and above all persistence will still net some interesting DX.

Hello Peter,

I saw again your negative comments.

Renember my diamond info is based on dBi,
2,15 less and you get dbd.

Do you think diamond want to risk there name to
put some false gain numbers on the antenna?

If a antenne does not do what it is expect to do
we can claim the money back.
Do you realy think diamond would take that risk?

Why do you think diamond has verry expensive
measure equipment?

Im wondering were your homepage is, I asume
everything must be perfect on your homepage.
So maybe you done a lot of work too (like i did),
so there might be some intresting info? (let us know!).
I saw it wasn't ready on qsl.net server.

Cor

Hello All,

Sorry for the netscape users.
I used netscape browser many years back, Im glad
with the microsoft browser.
Netscape gave me some problems with some
goverment page's (wich microsoft ie doesn't).
Netscape does not know all the html code's like
the fixed function in the background sentence (and
many more).

These fixed command is verry famous in the
internet world.

But do not worrie netscape comes with updates
they are always a littlebit later than microsoft!

well,
if there are dbi figures one some (two) antennas
one must assume the others are not

>
> Do you think diamond want to risk there name to
> put some false gain numbers on the antenna?

yes, because most people are not able to
measure ist or to simulate with NEC

>
> If a antenne does not do what it is expect to do

I have no homepage and do not need one for my ego,
but I told you already, if somebody advertises his in newsgroups
as spam, he should make shure it is readable not only with IE.
Usually it is enough to make shure, search engines as Google
collect that stuff.

Amateur Radio Newsline™ Report 1353 – July 18, 2003

Amateur Radio Newsline report number 1353 with a release date of Friday, July 18th 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T.

WRC 2003 says no more Morse but it may be years before codefree operation comes to the USA. Find out why on Amateur Radio Newsline report number 1353 coming your way right now.

(Billboard Cart Here)

**

INTRODUCTION

G’day and welcome to the first Amateur Radio Newsline report ever recorded in Australia. I’m this weeks host Graham Kemp, VK4BB, at the Q News studios in the city of Brisbane. And our first story as you might expect has to do with WRC 2003.

**

WRC FALLOUT: S.25 AND A CODEFREE USA

The now concluded World Radiocommunications Conference may have rule that Morse Code is no longer a world standard for getting a high frequency ham license, but don’t expect it to disappear very quickly in the USA. That’s because there’s lots to be done by Congress and the FCC before any action can or will be taken. Our team coverage starts here:

--

I’m Bruce Tennant, K6PZW in Los Angeles.

The International Telecommunication Union has dropped the international requirement that amateurs operating below 30 MHz must first pass a Morse code exam. According to the CQ website, this was among several actions related to amateur radio taken by the World Radiocommunication Conference and reported by the International Amateur Radio Union. The change took effect on July 5.

According to the IARU, the new language of International Radio Regulation Article 25.5 now reads: "Administrations shall determine whether or not a person seeking a license to operate an amateur station shall demonstrate the ability to send and receive texts in Morse code signals."

This leaves the question of requiring a code test optional for each government licensing authority. According to an IARU explanation, several countries still

feel the code is important as a license requirement and wanted to be sure that any country dropping it did so via what it called a positive decision not to require Morse.

In the United States, FCC rules continue to require passage of a 5 word-per-minute code test for access to the amateur bands below 30 MHz, although it is widely expected that opponents of the code requirement will quickly file petitions with the FCC to drop it.

How long will it take? Amateur Radio Newsline's David Black, KB4KCH, has that part of the story from our South East bureau in Birmingham Alabama.

--

Nobody can be quite certain when or even if the Morse requirement will disappear in the United States, but here's the way it has to play out thanks to the way our government works.

Since the agreements reached at WRC '03 are essentially an international treaty, the document has to be ratified by the United States Senate. Depending on their workload, that could happen before years end or it could be put off into the 2004 session or even beyond.

Senate approval has to take place can the FCC begin the process under the Administrative Proceedures Act and issue a Notice of Inquiry. A Notice of Inquirey or N-O-I is the first step in the rule making process to make any change and gives the general public a chance to voice its opinion. And by public we mean every American. Not just ham radio operators.

If there is enough interest shown in going ahead then a Notice of Proposed Rule making will be issued that again invites public comment. This will be followed by another time period for reply comments by those who might have arguments to counter what some initial commenters have to say. Then matter goes to the staff to prepare a Report and Order or Memorandum, Order and Opinion that is circulated to the five Commissioners who run the agency. If they approve, then the change become law on a date specified in the document.

So once again the rhetoric question of how long? Here's our guess. About two years minimum from the time the Senate ratifies the accords, but only if the FCC decides to proceed immediately there after.

Why two years? Well as Fred Maia W5YI of the NCVEC pointed out to us, since Novice Enhancement some two decades ago, just about every major change in the structure of ham radio has taken about two years. Fred is a pretty good Washington watcher and his guess is 2005 at the earliest. But for now, we will all have to just wait and see.

For the Amateur Radio Newsline,. I'm David Black, KB4KCH, reporting. Graham..

--

As we go to air, the ARRL Board of Directors is meeting to discuss the WRC '03 agreement and its impact on the U-S Amateur Service. Next week the

people who give ham radio tests -- the VEC's will be meeting with the FCC to do the same. (IARU, ARRL, CQ, FCC, ARNewsline(tm))

**

WRC FALLOUT: SWITZERLAND GOES 100% NO-CODE

Meantime, Switzerland may be the first country in the world to take advantage of the revised Radio Regulations. According to the website of the Swiss national amateur radio society, the licensing authority there will be writing to all Swiss CEPT Class 2 amateurs to give them "provisional authorization" to immediately start using the High Frequency bands.

Meantime the Radio Society of Great Britain says that nations Radiocommunications Agency has already stated that it will bring in code-free High Frequency licences as soon as it is practical to do so. An announcement will be made as soon as permission is given for United Kingdom Full and Intermediate Class B amateurs to start using the H-F bands. (RSGB)

**

WRC 2003 FALLOUT: IMPROVED EMERGENCY COMMS - WORLDWIDE

Ham radio emergency communications also got a boost at WRC '03. Jeramy Boot, G4NJH, is in Nottingham England with more:

--

Paul Gaskell, G4MWO, the RSGB Radio Communications Voluntary Services National Co-ordinator, has pointed out the enhancements to amateur radio emergency communications that have come about due to the revision of Article 25 of the ITU Radio Regulations.

Article 25.3 now reads: "Amateur stations may be used for transmitting international communications on behalf of third parties only in the case of an emergency or disaster relief. An administration may determine the applicability of this provision to amateur stations under its jurisdiction."

This is a notable change from the old wording, which was: "It is absolutely forbidden for amateur stations to be used for transmitting international communications on behalf of third parties."

Paul says, "A completely new regulation, Article 25.9A, has been approved, a provision which needs no explanation: It reads: 'Administrations are encouraged to take the necessary steps to allow amateur stations to prepare for and meet communication needs in support of disaster relief.'"

It is hoped that administrations will make regulations that facilitate amateurs preparing for emergency situations and providing communications in emergencies and for disaster relief. This was an important IARU objective.

Jeramy Boot, G4NJH

--

Reports from the 2003 World Radio Communications Conference and its impact on Amateur Radio can be found on the IARU website. Its in cyberspace at www.iaru.org. (RSGB)

THE WAR ON TERROR: FCC ESTABLISHES OFFICE OF HOMELAND SECURITY

The FCC has taken another important step in helping to fight the war on terrorism. This as the agency names James Dailey as Director of the its newly established Office of Homeland Security.

Operating under the Enforcement Bureau umbrella the FCC Office of Homeland Security will deal with many emergency related issues including those involving Amateur Radio. It will also oversee the establishment of an Emergency Relocation Board or E-R-B. The E-R-B will deal with the evacuation of FCC headquarters with little or no advance notice as well as overseeing the relocation of selected FCC staff members. More is on the web at: http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-03-167A1.doc and http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-236436A1.doc (CGC Communicator)

**

RADIO LAW: AB-1228 SIGNED BY GOVERNOR

California hams now have their own PRB-1 “like” protection. This as Governor Gray Davis signs Assembly Bill 1228 on Monday, April 14 th.

Assemblyman Bob Dutton and his staff shepherded the measure through the Local Government Committees and the floors of both houses of the legislature. It eventually passed without a single dissenting vote. The new law officially recognizes the doctrine of Federal preemption as outlined in PRB-1 over Amateur Radio antennas and their support structures as now being California state law.

In his cover letter to the California Legislature, Governor Davis took time to acknowledge the numerous Californians who are licensed amateur radio operators. He said that each year these volunteers give thousands of hours of service to the state and local governments. He added that since the September 11, 2001 attack on America, the state has also have come to rely on them and appreciate their commitment to the security and well being of all those living in the state.

California is the 20th state in the nation to adopt PRB-1 like ham radio anenna legislation. (ARRL SW Div. Bulletin)

**
RESCUE RADIO: RACES VS. FIRES ON THE 4TH
Radio Amateur Civil Emergency Service volunteers acted as dispatchers for the Huntington Beach, California, Fire Operating Center over the July 4th holiday weekend. Operating from the city's Central Net Training Center, eleven members of the towns own Radio Amateur Civil Emergency Service took incoming fireworks related calls from the public, verified addresses, and dispatched the appropriate fire patrol arson investigator teams.
But thats not all. Two communications volunteers were also assigned as spotters on the roof of City Hall. Two other hams got the experience of a lifetime when they lucked out and were attached to the Huntington Beach Police Department eye-in-the-sky helicopter.
Equipped with digital cameras interfaced to two-way ham radio gear, the field team transmitted live slow-scan television images from their lookout locations to the Fire Operating Center and the Huntington Beach Police Department sub-station command post. Glorria Morrison, who is the city's Emergency Services Coordinator said that everyone is proud to have such an extensive network of dedicated and skilled communications volunteers in Huntington Beach. (KH6WZ)
**

RESCUE RADIO: VARACES PULLS OUT OF VA STATE EOC

Meantime, a big change in emergency communications support has taken place in the state of Virginia. Amateur Radio Newsline's Don Wilbanks, AE5DW, has the rest of the story:

--
The tug of war between the independent VARACES Incorporated and the ARRL affiliated Virgina state ARES and RACES group has tipped in favor of the ARRL group. This, according to the latest Repeater Journal that reports VARACES State Emergency Officer Tony Amato, KR4UQ, annouced in March that he and other officers were withdrawing support of operations at the state Emergency Operations Center in the city of Richmond.

VARACES had been providing staffing for the E-O-C since 2001. This following its split from the ARRL after the League's Executive Committee removed Lynn Gahagan, AF4CD, from his post as Virginia Section Manager. Amato, who had been Gahagan's S-E-C cited difficulty in working with the states Department of Emergency Management Operations Director Fred Vincent. Amato claimed that Vincent would not make a clear choice between his group and the ARRL. For his part, Vincent had stated a desire to work with volunteers from both ham radio groups.

For the Amateur Radio Newsline, I'm Don Wilbanks, AE5DW, reporting.

--

Those leaving have been replaced by a ham radio group organized by the local Richmond Amateur Radio Club. (Repeater Journal)

**

OMARC 2003 TECH CLASSES IN SEPTEMBER

Steve Hajducek, N2CKH, says that the The Ocean-Monmouth Amateur Radio Club of New Jersey will again sponsor Amateur Radio Technician theory classes this fall. Classses beginTuesday, September 16th at 6:00pm and will continue through November. All training and testing will be held at the InfoAge Center in Monmouth County, New Jersey. For more information and directions go to www.qsl.net/n2mo on the World Wide Web. (OMARC)

**

NEW FOR HAMS: GLOBAL OVERLAY MAPPER

Tim Makins, EI8IC, in County Roscommon Ireland says that what is perhaps the most comprehensive set of world prefix maps ever assembeled is now freely available. This, in the demonstration version in his new Global Overlay Mapper software.

Makins says that Global Overlay Mapper represents a new concept in the field of maps for radio amateurs. That the software is packed full of features for all Amateur Radio enthusiasts, including seven Continental maps, 27 Sub Continental Maps, country outlines, 2204 maps of major cities C-Q zones, ITU zones, time zones and much more.

The on-line demo-version comes with with two fully featured maps to view. Online purchasing of the whole package is availasble in four major currencies. Download for use on your own computer and try it at www.mapability.com or www.qsl.net/ei8ic (EI8IC)

**

YOUTH RECRUITMENT: SPECIAL OFFER FROM HAMTESTONLINE.COM

The HamTestOnline website has announced its new Youth in Amateur Radio program, which gives eligible school, scouting and youth amateur radio clubs a 50% discount on website subscriptions for students 18 and under.

HamTestOnline says that its offering this discount to support activities aimed at bringing kids into amateur radio such as the ARRL's The Big Project. For more information on the HamTestOnlineT website's Youth in Amateur Radio program, visit www.hamtestonline.com or send an email to K1RV@hamtestonline.com (Press release)

**

FOR YOUR READING PLEASURE: UNDERSTANDING, BUILDING AND USING BALUNS AND UNUNS FROM CQ

If you're interested in how antennas work but don't know an unun from an onion, Understanding, Building & Using Baluns & Ununs from CQ Magazine should be part of your ham radio library.

The new book by Jerry Sevick, W2FMI, is the successor to his earlier work, Building & Using Baluns & Ununs. The new edition includes new tutorial material, designs and explanations of how and why they work. And like its predecessor, this book provides a unique opportunity to learn about the application of these devices to dipoles, Yagis, log periodics, Beverages,

antenna tuners and countless others.

Interested? You can find out more and place your advance order on line at www.cq-amateur-radio.com. Orders may also be placed by phone -- Monday through Friday -- 9 a.m. to 5 p.m. Eastern time at 1-800-853-9797. (CQ)

5 MHZ FOLLOW-UP: OPERATING TRENDS DEVELOP

A follow-up now on what's taking place on the new domestic United States 5 MHz allocation. As reported last week, opening night on July 3rd saw many stations making rapid contacts and cooperating together for an enjoyable operating experience. Now, according to noted High Frequency back-pack operator Bonnie Crystal, KQ6XA, the novelty of the 5 MHz channels has settled down to a usable level for calling and QSO's.

Writing to the q-r-zed dot com website Crystal notes that 5 MHz daytime propagation out to 250 miles is good, although summer noise limits the comfort level when working the 50 Watt domestic stations. Nights bring good D-X and regional propagation, but lightning storms tend to make it harsh in some areas.

But her most important observation is that of a very positive trend. KQ6XA says that hams still are acting like they are on their first date, treating the new channels appropriately and showing off their best operating habits. She says that they are observing the kind of brevity in operating procedures commonly used on a high-level VHF repeater or regional linked F-M system.

Crystal adds her hope that in the future 5 MHz will continue to be an example of the best ham radio good operating techniques and behavior. From listening on the air, many others appear to agree. (qrz.com, ARNewsline (tm))

**

INTERNATIONAL - AUSTRALIA: 5TH ANNUAL IARU REGION 3 ARDF GAMES ANNOUNCED

The IARU Region 3 Amateur Radio Direction Finding Championships will be held Friday, November 28th to Wednesday, December 3rd in Ballarat Australia.

Ballarat is a large provincial city in the state of Victoria. The Victorian ARDF Group, which is organizing the event says that it is expecting up to 100 participants from member societies in IARU Region 3 including Japan, Korea, China, New Zealand, and Australia. Guest competitors from other IARU Regions are also invited to attend in the world-wide Friendship categories.

This years championships are hosted by the Wireless Institute of Australia, with the WIA Victorian Division sponsoring this important event. Full details including competitor and volunteer registration forms can be found in cyberspace at www.ardf.org.au (WIA)

**

AWARDS: WORK A COLORADO MOUNTAIN

Two new awards are now available for ham radio contacts to and from the 14,000-foot mountains of Colorado. The Summit Award is earned by making contact with 10 or more stations operating from the peaks. The companion Pinnacle Award recognizes operation from 14,000 foot summits, requiring radio operation from 5
or more of the peaks.

Award recipients will receive an attractive, colorful certificate with name, call sign and the number of peaks worked or activated on it. A $5 fee is required to cover the cost of the certificate and any associated expenses.

To get yours, first hold the QSO’s and then take your web browser to www.Colorado14erEvent.org. Questions should be directed to Paul Ermisch KB0LUR by e-mail to awards@colorado14erevent.org. And colorado14erevent is all one word. (K0NR)

**

DX

In DX, keep an ear open for GM3PPG stroke P to be active on 160 to 10 meter S-S-B from South Uist through August 8th, including the RSGB IOTA Contest on the 26th and 27th of July. The island counts as EU-010 for the RSGB Istands on the Air awards program. (GB2RS)

And R1PQ will be on the air from the Novaya Zemlya Archipelago through the 25th of July. Activity will be on 40, 20, 15 and 10 meters using CW, SSB, PSK and RTTY. The operation commemorates the British, Russian and American polar convoys between 1941 and 1944 and will have two stations active 24 hours a day. (GB2RS)

**

THAT FINAL ITEM: 73 TO THE W5YI REPORT

And finally this week we pause to bid farewell to a competitor and a friend. This, with word that the W5YI Report ham radio newsletter has ceased publication with it’s July 15th issue. Bill Pasternak, WA6ITF spoke with Fred Maia whose call sign appeared on the famed publication and they reminisced about the past:

--

The W5YI Report was the last of the paper ham radio newsletters delivered by the postal system. At one time there were three. The very first was H-R Report from Ham Radio magazine in 1974. It was eventually taken over by Burt Hicks, WB6MQV and renamed the Westlink Report. Hicks ran it for 13 years

before closing down in January of 1995.

The ARRL Letter came into being in 1981 as a public version of the previously private ARRL Directors Letter. It initially dealt only with matters of interest to League members, but over the years has developed into a high quality publication covering every aspect of the hobby with items of interest to members and non-members alike.

W5YI Report was started by Fred Maia, W5YI in the late 1970's. This, as an information provider to the Richardson Wireless Klub near Dallas Texas. Other hams who saw it asked Fred to make it available to them:

--
Audio only at www.arnewsline.org
--

Initially Fred did not charge for those who supplied him with self addressed stamped envelopes. Eventually his subscription list grew to a point where Fred had thousands of envelopes in his home and the numbers were getting out of hand. So he decided to simplify matters by converting to a paid subscription operation.

--
Audio only at www.arnewsline.org
--

And as soon as word got out that Fred was accepting subscriptions, they came pouring in. And the rest -- as they say -- is history.

In 2000, Fred sold his company that included the newsletter, but agreed to stay on for three more years with the W5YI Report. He set this summer for his departure. July 15th was the publication date he selected and that's now past:

--
Audio only at www.arnewsline.org
--

If you are a paid subscriber to the W5YI Report, fear not. Fred has you covered. He has arranged for the remainder of your subscription to be covered by C-Q Magazine based on the value of the remaining portion of your subscription. And if you already get C-Q, your subscription will be extended by the appropriate number of issues.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, with my longtime ham radio friend Fred Maia, W5YI.

--

And what about Fred? He is not going away by a long shot. To find out what he has planned for his own future and his thoughts on the future of ham radio, be sure to tune into this weeks RAIN Report. Its on-line in streaming audio right now at www.rainreport.com and on the phone at 847-827-7246

**

NEWSCAST CLOSE

With thanks to Alan Labs, Amateur News Weekly, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline @arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937, Arcadia, California 91066.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I’m Graham Kemp, VK4BB, down-under in Australia saying 73 and we thank you for listening."

Get a CCW permit.

Nah, thanks. As far as self-protection goes, I took many years of martial arts training, and am not afraid to go where and when I want to (within reason, of course).

The state I live in just passed a conceal and carry law. Now, many people are pushing for its repeal, and most businesses have effectively banned anyone from carrying weapons on premises anyway... all they have to do is put up a big sign (in certain typeface, and which conforms to a particular size in square inches) that says "Guns are banned in these premises", and no one with guns can enter. After the C&C law was passed, many businesses quickly rushed to have the signs printed up and displayed prominently by their points of entrance.

After he took an early retirement from ironworking due to a back injury, my dad became a gunsmith. As kids, my younger brother and I understood that any guns which were in the house were not to be touched or even breathed near, and they were always locked away in safes. Both of us had to take firearm safety training as teenagers, but I never got interested in hunting or sport shooting.

I really hate to have to remain anonymous, but spammers have utterly taken control of the inboxes of many people, and I only get an average of one or two spam-mails per day. Lately, most of them have been from the 419 scammers in Nigeria, Cote d'Ivoire and Togo... I just pass 'em on to the 419 investigation section of the U.S. Treasury, though I'm not sure how much good that's doing to keep the frauds at bay.

This is off-topic, but if you want to have a really good laugh, find out how one savvy fellow with a great sense of humor (and, apparently, a lot of time his hands) gets even with spammers... you'll bust a gut reading some of his replies to spammers, especially his ongoing dialogues with some doofus Nigerian frauds who weren't able to tell that he was stringing them along... LOL!

I tell them all that I am interested, and ask them to call me at
a number I give them, to discuss it further. I give them the local
WWV number and have had caught quite a few that way. They call it
several times and wonder why they can't have a conversation with the
person who answers the 'phone.

Works for me, anyway - of course, you could substitute the local FBI
number or anything else that appeals.

Most due to crappy power lines and insulators. Now add BPL with wideband
digital signals and you have a notion of how it will sound.

I have been working with Alabama power for almost 5 years now. Including
the ARRL and the FCC on their ass. And its still not fixed. Wait till
BPL is deployed.

Never mind France. USA have fairly buggered up my chances of getting P5.

Yea, working P5 is a lot more fucking important than a nuke in Los
Angeles.

>put some false gain numbers on the antenna?

They did years ago, definetely, but maybe they have learned a bit..

>If a antenne does not do what it is expect to do
>we can claim the money back.

I never would buy a diamond antenna if there are better alternatives
available, and in most cases there are!

>Do you realy think diamond would take that risk?

Yes, because many radi amateurs do not realize that the antenna does
not what it should...

>Why do you think diamond has verry expensive
>measure equipment?

At least they must get their antennae to work. But I also wonder what
they have this for?! Even several antennae from same type and same
production lot differ significantly!!

1558. The myth that BPL is a solution for rural broadband

Newsgroup: rec.radio.amateur.dx
Date: 2003-07-20 15:43:52 UTC
From: robkemp90210@hotmail.com
Message-ID: <6114e4af.0307200743.77d5e419@posting.google.com>
Source record: 9792

The claim that BPL is good for rural deployment is yet another myth propagated by the BPL lobbyists. In essence it is bait and switch. The BPL strategy is to get the FCC to allow the high levels of interference / pollution as the FCC is focused on getting broadband to rural communities that don't have it.

In reality, if the BPL lobbyists succeed, they will immediately focus on the wealthy suburban markets that are profitable (and already have cable and DSL) and ignore the rural areas.

DSL can work out to about ~ 16,000 feet from the central office. BPL can only go 2,000 feet from the BPL equivalent of a DSLAM, then BPL needs an expensive repeater installed by a linesman trained to work with 11,000 volt cables. So for a 16,000 foot run 8 BPL repeaters are needed.
At the customer's pole transformer a bridge will need to be installed to couple the signals from the 11,000 volt line to the 110 volt line (imagine what would happen if the bridge failed and your sockets had 11,000 volts!!).

However the math is worked, there is no way they can implement this vast array of expensive equipment in rural areas with any hope of meeting the alleged pricing.

The existing DSL broadband technology is proven and could be provided to almost everyone who has a phone, the barriers are political not technical. The solution to universal broadband lies in ensuring the phone companies serve all of their customers equally. BPL is a broken and polluting technology that is a pure distraction to the objective of universal broadband.

While I certainly don't want to see BPL implemented, I must question
your statements about the power companies' technical requirements to
deploy BPL to rural customers.

Can you please provide official sources for the technical information
you posted?

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

THE NODXA "Radio For Apollo" PROJECT UPDATE (by Editor Tedd, KB8NW).
Let me first say "HOW I AM IMPRESSED" with the DX community. Ten minutes after last week's bulletin was released, pledges were coming in quickly. In 24 hours, close to 1000 USD were pledged with three associations stating

they would contribute something. Some individuals also stated they would donate more, if needed. The members of NODXA say "THANK YOU". However, the NODXA project is now on hold. Something is in the works and currently can not be publicized just yet. Details are forthcoming. Monk Apollo is aware of the ham community's efforts to help put him back on the air. He is also very grateful and prays for the ham community. Please stay tuned for updates. Once again, I thank the DX community.....
73 de Tedd KB8NW (President of NODXA and Editor of the OPDX)

3B8, MAURITIUS. Mart, DL6UAA, informs OPDX that Jacky, 3B8CF, is now active on RTTY everyday (except weekends) between 1300-1430z on 15 meters (around 21083-21084 kHz). He has repaired his old TONO-7000 and is now active. NA stations try 0300z on 14084 kHz (That's the time before he goes to work).

3C0, ANNOBON ISLAND (Update). Operators Franz/DJ9ZB/3C0F, Elmo/EA5BYP/3C0A, Victor/EA5FO/3C0R and Vicente/EA5YN/3C0V will be active from Annobon Island, between September 27th and October 10th. Activity will be on all modes/bands CW, SSB, RTTY, PSK, some SSTV and 160-6 meters. They hope to have at least two stations on the air 24 hours a day. Mounting this DXpedition is an expensive operation for operators. Any donations to help the operators, as small as it may be, will be gratefully appreciated and can be sent via the DX Club Tabarca Island, c/o President Elmo EA5BYP, P.O. Box 3097, 03080 Alicante, Spain. E-mail is: cayuco@telefonica.net Any additional donations included with your QSL card requests will be much appreciated. They would like to say thanks in advance. QSL via DJ9ZB.

7P8, LESOTHO (Update/Now Active). The Lone Star DX Association and the Texas DX Society's 7P8 DXpedition is now active until July 25th. The team includes: Charles Frost, K5LBU/7P8CF; Igor Zdorov of Minneapolis, MN, W0IZ/7P8IZ; Dave Anderson of Ashville, NC, K4SV/7P8DA; Madison Jones of Houston, TX, W5MJ/7P8MJ; Neil King of Port Coquitlam, British Columbia, Canada VA7DX/7P8NK; Tom Anderson of Colleyville, TX, WW5L/7P8TA; and Elizabeth White of Missouri City, TX, KA2UCA/7P8EW. Operators K4SV and VA7DX will also be operating from 3DA after 7P8. Their callsigns will be 3DA0SV for Dave Anderson/K4SV and 3DA0WC for Neil King/VA7DX. Larry Alkoff, N2LA, and his XYL Karen, K2DXV, of Austin who had joined the team withdrew from the DXpedition because of construction on their new home near Austin. Activity will be on all bands/modes. QSL via their home callsigns. They now have two Web pages for DXers to monitor updates for the DXpedition and on-line logs search. The web pages are:
http://www.k4sv.com/lesotho.html
http://www.amsatnet.com/7p8.html
To help pay shipping expenses of donated equipment, the team is selling a commemorative T-shirt like the one the team will be wearing on its QSL card. Short sleeve shirts in sizes Medium through X-Large are 20 USD and a limited number of long sleeve shirt in XXL and XL are aviable at 25 USD. Stateside and Canadaian postage is included in the cost. Add 5 USD for DX airmail delivery. Order through Frost or Tom Anderson via their callbook addresses.

9A, CROATIA (Croatian Island and IOTA Activity). Members from Radio club "Josipovac" (9A3QB, 9A3SO, 9A3IQ, 9A7DCO, 9A7BFR, ...) will participate in IOTA contest under 9A6K, from the Island of Kakan (EU-170). Before and after contest (on July 24-31st), they plan to activate (under 9A6K/p), the next following Croatian IOCA islands (mainly EU-170):
- KUKULJAR, CI-231, LH E3224* - PRCEVAC MALI, CI-329
- BABULJAK, CI-495 - KRALJAK, CI-328
- VODNJAK, CI-494 - DUPINICI, CI-327
- BISAGA, CI-459 (NO IOTA) - KAMESNJAK MALI, CI-325
- BOROVNIK, CI-254, (NO IOTA) - KAMESNJAK VELI, CI-326
- LJUTAC, CI-255 (NO IOTA) - PRISNJAK, CI-374 (NO IOTA), LH E3202*
- BAVLJENAC, CI-246 - MURTER, CI-074 (NO IOTA)
QSL via 9A3QB, Mirko (via bureau).

C6, BAHAMAS. Ian, N8IK, will be active as C6AMK Coco Cay, Bahamas, August 8-9th. Activity will be 40 meters CW only. QSL via N8IK.

CY9, ST. PAUL ISLAND. Operators Robert/N0RN, Vance/N5VL, Igor/W0IZ, Joe/KO4RR, Andrea/K5AAH (YL), Alan/K5AB and Dale/VE7SV will be active this week as CY9A from July 24th to August 2nd. Their announced suggested frequencies are:
SSB - 7055/T, 7240/R, 14195, 14295, 14260, 18140, 21295, 21260, 24140, 28395 and 28460 kHz
RTTY - 14083, 21083 and 28083 kHz
CW - 1826.5, 3505, 7005, 10105, 14025, 18075, 21025, 24894, 28025 and 50106.6 kHz
QSL via N5VL. For updates, visit the Web page at:
http://www.hometown.aol.com/vlepierre/myhomepage/index.html

DX RENTALS.....
SUPERSTATION RENTAL (PEI DX Lodge). Robby/VY2SS and Ken/K6LA/VY2TT are pleased to announce the opening of the Prince Edward Island (PEI) DX Lodge - Rental Superstation. Check this out at:
http://www.peidxlodge.com

Charles Harpole, HS0ZCW, reports that he will have within the next 6 to 8 months a ham shack rental in Bangkok, Thailand. It is a single room air conditioned condo with American style bath on the top (14th) floor of a large condo building in north-central Bangkok, about 20 minutes from the airport. Automobile parking all around the condo. There are plenty of taxis. There is a very large food court and other shops as a part of the complex. The radio is TS-50S with separate memory keyer, Bencher, Heil, and IBM laptop, with an all band wire antenna for now. Bringing your transmitter into Thailand is not legal without declaring it upon arrival and waiting a month or more for approval of it. Operating licenses can be obtained in advance by writing (for citizens of USA, UK, and a few other countries) via recripocal agreements. Contact Charles directly for more details if you are planning a stop-over in Bangkok in the future. His E-mail address is: k4vud@hotmail.com

FO, FRENCH POLYNESIA. Operators Barry/ZS1FJ/G4MFW/ZL1MFW, Phil/G3SWH and Deon/ZS1ZL continue to be active for the rest of the week (July 26th) as FO/G4MFW and FO/G35WH (Yes, FO/G"35"WH. It seems the FO authorities misread

the "S" for a "5" on Phil's license.). Remember, QSL FO/G4MFW to ZS1FJ and FO/G35WH to G3SWH.

GJ2/MJ0, JERSEY. Look for Rich, K2WR, as GJ2A in the RSGB IOTA Contest (July 26-27th) as a Single-Op/High Power/Mixed/24h/Island entry. Also, look for him to use GJ2A again in the CQ World Wide DX CW Contest (November 29-30th) as a Single-Op/All Band/High Power entry. QSL both operations via GJ3DVC or GJ Bureau. Look for some activity outside of the contest (before and after) as MJ0AWR, mainly on CW. QSL MJ0AWR to K2WR direct or via W2 Bureau.

HA5, HUNGARY. Robert, PA3GEO, will be active as HA5ORP from July 28th through August 13th. Activity will be on all HF bands on CW/SSB. He will use mobile whip antennas and also a wire openline dipole. His radio will be a FT-757 GX-II w/100 watts. QSL via PA3GEO to the QSL Bureau.

HI3, DOMINICAN REPUBLIC. Operators ON4IQ, ON4QX, HI8ROX and HI3TEJ will be active as HI3/ON4IQ in the RSGB IOTA Contest (July 26-27th) as a Multi-One entry (IOTA NA-096). QSL via ON4IQ.

IOTA NEWS (Remember, the RSGB IOTA Contest is this weekend!).....
CONTEST. Ric, DL2VFR, reports that 78 stations are listed so far for the contest on the Web page at: http://www.iota-post.com
German participants are:
EU-042 Sylt Island. DJ5DT/p via bureau
EU-042 Pellworm DL4OK/p via bureau
EU-057 Greifswalder Oie DL0HGW/p via bureau
EU-057 Ruegen DF3UFW/p via bureau
EU-128 Fehmarn DJ7AO via bureau
EU-128 Fehmarn DL5KUA via bureau
EU-129 Usedom DL0KWH/p via bureau

AF-036. Members of URE and the Armed Forces Radio club will be on Chafarinas Islands July 23-28th. They will be participating in the IOTA Contest, and outside the contest they will be on the air on all bands from 80-2 meters on SSB, CW and RTTY. The team members are: EA4BT, EA7AAW, EA7JB, EA7TL, EA9NP and EB4EPJ. The callsign to be used on HF is EG9IC, and on 6 meters they will use EH9IC. A online log search will be available after the DXpedition at: http://www.ure.es
QSL via EA4URE.

AS-NEW. There has been an announcement that a new IOTA will be activated in October this year. It will be from Vietnam (3W) and the last new island from 3W-land. The callsign to be used is XV3C. More details are forthcoming.

AS-072. Look for Rich, 9M2/G4ZFE/p, to be active from Pulau Pangkor, Western Malaysia, in the RSGB IOTA Contest (July 26-27th) as a Single-OP/CW/Low Power entry. QSL via G4ZFE (direct preferred).

AS-136. Students from the amateur radio club station at Shanghai Jiaotong University (BY4AJT) will be active as BI4HS from Hengsha Island, July 25-28th. Look for them in the IOTA Contest. Suggested frequencies are (+/-):
SSB - 7050, 14260, 21260, 28460 kHz
CW - 7025, 14030, 21030, 28030 kHz

EU-001. Operators SV5FRB, SV5FRD, SV5FRP and the Scouts amateurs from Pserimos Island (only 17 people are permanent habitants) will be active as J45FRE in the RSGB IOTA Contest (July 26-27th) as a Multi-Op/DXpedition entry. QSL via SV5FRD.

EU-016. Look for S50R and S50K to be active from the Island of Vis (Croatia) in the RSGB IOTA Contest (July 26-27th). QSL via S50R. For more info, visit: http://lea.hamradio.si/~s50r/

EU-038. Look for DJ1YFK to be active as PA/DJ1YFK/P from Texel Island during the RSGB IOTA Contest (July 26-27th) as a Single-Op/All Band/CW/12h entry. QSL via DJ1YFK, 100% via the Bureau.

EU-052. Kostas, SV1DPI, will be active as SV1DPI/p from Zante Island, July 25th to August 3rd. He is going there for a vacation, but will try to be active some hours and participate in the IOTA Contest. QSL preferable via bureau.

EU-057. Look for DL0HGW/p on Greifswalder Oie (GIA O-012, WLH-0114) to be active in the IOTA Contest. QSL via bureau. For more details: http://www.radiosport.de

EU-070. Look for Christian, F8HJV, to be active as F8HJV/p from Levant Island (DIFM ME012), from July 25th to the end of August. His frequencies and mode: mainly 40 and 20 meters SSB. This will be a vacationning style operation, but Christian will enter a little bit in the IOTA Contest. Go easy on Christian, he is not used to pile-ups. QSL via his home callsign.

EU-088. Operators OZ2TF, OZ7KDJ and OZ9V will activate Anholt Island (Reference Number for the Dansk Island Award NK-001) during the RSGB IOTA Contest (July 26-27th). Activity will be on 80-10 meters CW/SSB. Callsign will be OZ8MW/P.

EU-091. Members from the Salento DX Team (A.R.I. Sezione di Lecce) will activate Isola Grande (I.I.A. LE-001) as IZ7AUH/p in the IOTA Contest as a Multi-Op entry. Operators are: Frank/IZ7AUH, Alfredo/IK7JWX, Elvira/IV3FSG, Michele/IK7FPX, Angelo/IZ7CTE (CW) and Enzo/I7PXV (CW). QSL via home callsign, bureau or direct. The operators outside of the IOTA Contest will be active also on 6 meters (JN80WG) and on the WARC bands.

EU-114. Look for GU8D on Guernsey Island to be active in the IOTA Contest. QSL via G3LZQ.

EU-137. Operators SM7BHM and SM7GXR will be active as SK7A/P from
Lindoe Island in the RSGB IOTA Contest (July 26-27th) as
a SSB entry. QSL via SK7BQ.

EU-146. Four Dutch amateurs will be active as PA6Z from the Island
of Goeree during the RSGB IOTA Contest (July 26-27th). PA6Z
will be active on 80-10 meters on SSB only. QSL is via PA1KW:
Bert v. Holst, Ien Dalessingel 357, 7207 LJ Zutphen,
The Netherlands.

EU-146. For the third year in a row PI4HQ will be active in the IOTA
Contest. The original group with PA7BT, ON4IA, ON5UM, ON6CC and
ON6NL got a lot of support and will activate Schouwen Island.
On the days prior to the contest the crew will be active under
their own callsign/PA. They will enter the contest as a
Multi/Single station. They hope to be in the top-ten again
and hope to improve their last year's 8th position! For some
pictures of their last year's trip, visit the Web page at:
http://www.qsl.net/on5ll
QSL is OK via the bureau or to Peter, PA3CAL.

EU-149. Operators Jaak/ES1FB and Oleg/ES1RA will be active from Rammu
Island, July 25-27th, as ES1FB/2 and ES1RA/2. QSL via their
home callsigns.

EU-174. Panos, SV8DTL, will be active in the IOTA Contest from
Thasos Island.

EU-178. The team of ES2QH/Aarne, ES2NA/Andy, ES1DW/Tom, ES2RJ/Tom,
ES2EZ/Jerry and ES2TGO/Harry will be active as ES2WX from
the small Island of Kihnu, July 25th through August 4th.
Activity will include the RSGB IOTA Contest and the Estonian
Open Field Day. Operations will be on HF (for IOTA Contest
and VUSHF skeds), 50, 144, 432 and 1296 MHz. QSL VUSHF QSOs
via ES2RJ and HF QSO via ES2NA.

NA-067. Jon, WB8YJF, will be active from Ocracoke Island, NC, (USI
NC001S) as WB8YJF/NA67 from July 20-27th. This will include
the IOTA Contest. Activity will be on CW, RTTY, and some SSB.
QSL via direct if possible (FAST turnaround!).

NA-127. John, VE1JS, will be active from Brier Island, in Southwest
Nova Scotia during the IOTA contest July 26-27th. QSL direct
to: John Scott, General Delivery, Sandy Cove, NS, Canada B0V 1E0
or via the VE1 Bureau. No other QSL routes will work. All cards
will be answered in the same way as they are received.

NA-128. Nenad, VE3EXY, will once again head back to Orleans Island.
This time it will be for the IOTA contest. He will be there
from July 24th to July 26th (1600z) using the callsign
CK2/VE3EXY/P. Activity will be on the contest frequencies
and no low bands. This will be your last chance to work
him from this island because he will not go there any
time soon. QSL via VE3EXY. For those who are interested in

the Canadian Islands Award, Orleans Island has the CISA reference number QC007. QSL cards are already printed, and the CISA number is on his QSL card.

NA-140. Operators K3PFW, W3PP, W2GJ, N3PT, KW3Z, WV8RS, KD3IH, N3WYN, KB3HTA and KB3HTF will be active as W3TBG from the Smith Island during the RSGB IOTA Contest (July 26-27th) as a Multi-Op/ High Power entry. They will be active from the fire station using a beam and dipole antennas. QSL via W3TBG.

LIGHTHOUSE ACTIVITY.....
Ray Knuth, KB8ZYY, is expected to be active from Ausable Pierhead Lighthouse (USA 929) during the lighthouse weekend (August 16-17th). The lighthouse is in Ausable Township (Iosco County), Michigan, at the mouth of the Ausable River. Activity will be on CW/SSB on the suggested frequencies for the lighthouse event. QSL to KB8ZYY with a SASE.

Operators EA6LP/Juan, EA6YW/Gori, EA6DD/Biel and DK4TP/Herbert will activate Cap Salinas Lighthouse (BAL-070) as ED6LGH from the southern most part of Mallorca Island (EU-004), August 15-17th. QSL via bureau or EA6LP.

MD4, ISLE OF MAN. Once again MD4K will be active in the 2003 IOTA Contest. Operators this year are G0HSS, G1GEY, G3NKC, G4MJS, G4XUM and M0BEW, gratefully assisted by GD4GNH and GD0TEP. Please check out their Web page at: http://www.md4k.com
QSL cards can be sent direct or via bureau to G3NKC (Chestnut House, 510 Crewe Rd, Wistaston, Crewe. CW2 6PS); or requested on line through the Web page (no card necessary!)

P4, ARUBA. By the time you read this, Colin, KU5B, will be active as KU5B/P4 or P40CJ now through July 24th. He will be operating from his hotel and various contest locations. Equipment used will be a Yaesu FT-840 w/100 watts into a dipole at the hotel. Activity will be on 10, 15, 20, and 40 meters both SSB and CW, with a main emphasis on CW. QSL via KU5B with SASE. His Web site is at: http://www.qsl.net/ku5b

QSL INFO AND NEWS.....
4U1UN QSLS. Your editor saw Jerry, WB8LFO, over the past weekend and asked him about the QSL cards and logs for 4U1UN. Jerry told your editor he is in the process of moving to Flordia and that "ALL" logs (1986-1996) have been returned to the UN. All QSL requests for those years should be QSLed via the following address. DO NOT send QSL cards to WB8LFO, only to: Box 3873, Grand Central Station New York, NY 10163 USA.

Patrick, WD9EWK, informs OPDX that he is the QSL Manager for several stations, in addition to activity with his own personal callsigns WD9EWK and VA7EWK. Here is a current list of the stations who have WD9EWK for their QSL route:
4A2Q (3-4 May 2003 only), AY8XW (2002 only), KG6OJZ, L20E (say

"Lima-Two-Zero-Echo"), LU3XQ, LU5ER, LU5EVK, LU5XPZ, LU6XQ, LU7JA, LU9XT, W9K (August 2002 only), XE2BOA, XE2BSS, XE2TG, XE2TPJ, and XE2VAS.
Patrick has received the 4A2Q QSL cards from the printer over the past weekend and mailed out the first batch of those cards - going to hams in the USA and Mexico, July 14th. The cards are the folding type, similar to those used on other DXpeditions in the recent past. More 4A2Q cards, going to XE hams, will be mailed from a Mexican post office on July 18th. Those who sent a card for 4A2Q without an SASE or something for paying the return postage will get a card shortly, now that he has some spare "green stamps". There is more information about 4A2Q on the Web page at: http://www.qsl.net/4a2q/
Marco XE2TG, of Hermosillo in the Mexican state of Sonora (south of the US state of Arizona, or for grid hunters DL49), has accepted Patrick's offer to be his QSL Manager. Marco enjoys CW, and especially enjoys operating on 6m and 160m. He was one of the operators at 4A2Q, doing CW from there. Patrick has his 2003 logs through last week, and he will receive updates from him regularly. If you need a QSO confirmed from previous years - or even with his previous callsign, XE2TSG - he can do that as well. Patrick can receive cards through the QSL bureau system, or directly at (the same address as on QRZ.com, Buckmaster, and the FCC database): Patrick Stoddard, 6938 W. Palo Verde Drive, Glendale, AZ 85303-4405 USA. He maintains a Web page with his QSL Manager information at: http://www.qsl.net/wd9ewk/qsl-mgr.html

TZ, MALI (Update).The intenrational team going to Bamako, Mali, August 12-22nd, have announced that their callsign for the operation will be TZ6RD. The QSL Manager will be EA4URE the Spanish National Bureau. Currently, operators confirm are: XE1L, N6TQS, I8NHJ, EA5RM, EA5RD, EA5KY and EA5XX.

VP2M, MONTSERRAT. Three members of the Florida DXpedition Group (FDXPG), Bob/K9MDO/VP2MDO, William/N2WB/VP2MWB, and Bill/W4WX/VP2MHX will be on Montserrat July 22-29th. They each will have their own station set up and will operate most bands and modes. QSL VP2MDO and VP2MHX via their home callsigns and VP2MWB via N2OO only. Please send SASE if you want direct reply.

VP2V, BRITISH VIRGIN ISLANDS. Mike Foster who used to have the callsign VP2V/7Q7FM now has the new callsign VP2VFM. He was heard this week on 14200 kHz at 0102z. QSL is ONLY DIRECT to G0IAS (with return postage please).

VP6, PITCAIRN ISLAND. Lyle Burgoyne, VP6LJ, is back on the island. He used to serve as priest on the island for two years in the mid 90's. He is expected to be there for at least one year. Over the past fews weeks, he has been active on 20 meters SSB. Watch 14190, 14245 and 14268 kHz after 0500z (sometimes earlier).

W0DXCC 2003 CONVENTION. The doors of the Bloomington, Minnesota, Holiday Inn on Highway 35W and 94th Street will open to Amateur radio operators with DX in mind on October 18th at 8 AM. Well-known W0-DX speakers will be

featured! CQ Hall of Fame Inductee and "Mr. W0DXCC 2002" Glenn Johnson, W0GJ, will speak on his experiences with four-square antennas and will offer us the latest news from Bhutan, and Ralph Fedor, K0IR, will present a seminar on his DXpeditions to various rare and very rare Antarctic DX Entities. Radio City, Mounds View, will present a fascinating demo comparing today's top radios and Timewave Technology will demonstrate the art of digital signal processing technology. Other outstanding speakers already booked for the Convention include K9LA, Carl Leutzelschwab with an intriguing talk on the challenges of W0-land propagation and W0IZ, Igor Zdorov, with a presentation on his DXpedition exploits to rare African and Asian DX Entities. "We are adding more great speakers and will be releasing the information shortly", Chairman Lou Sica, AC0X, reports. The Convention will conclude with a 7PM Banquet at the Holiday Inn with a Keynote Speaker. Details for the Convention can be requested by E-mailing < w0dxcc@w0dxcc.com > or sending a self-addressed stamped envelope to: W0DXCC 2003, PO Box 390633, Minneapolis, Minnesota 55439-0633. Information is also available on the W0DXCC 2003 home page at: http://www.w0dxcc.com

XU, CAMBODIA (An IOTA and possibly XW!). Jaak, ES1FB, reports he will go to Shianoukville, Cambodia, from October 19-28th. His callsign will be XU7ACE, and he plans to be active in the CQ WW DX SSB Contest as a Single-Op/All Band entry. He also plans to be active as XU7ACV from Koh Poah Island (IOTA AS-133), October 21-23rd. Plans also include a trip to Vientienne, Laos, October 30th through November 4th. Possible callsign is XW1FB (?). QSL all operations to his home callsign ES1FB. For updates and a log search, visit the Web page at: http://www.hot.ee/xu7ace> www.hot.ee/xu7ace

XZ, MYANMAR. Sigi, DL7DF, reports, "We actually had a special target in Africa for our 2003 DXpedition, however we ran into trouble getting the license. But we will go to another country instead - Myanmar, XZ. Myanmar is not amongst the top 10 of the most needed DXCC entities anymore but we hope for a success anyway." Operators DL7BO, DL7UFR, DL7DF, DL7KL, DJ6TF, DK1BT, DL4WK and plus two of their XYLs are planning to be active as XZ7A between September 30th and October 17th. They will have four stations active from two different operating places. One of the places is in the capitol, the other one in a sea village. The location in the capitol is very promising because they will be using a roof on a 25m high building. Their planned activity will be on 160-6 meters, CW, SSB, RTTY, PSK31 and SSTV. They will have two linears, beams, a Titanex V80 vertical, a R7 plus a 6m yagi. On this operation they will be emphasizing the low bands because the last activity was in 1998 and 2000. Pilots will once again be Bernd/DF3CB and Floyd/N5FG. Updated news, online logs and pictures, will be available during the DXpedition at: http://www.qsl.net/dl7df/

YJ, VANUATU (Update to OPDX.617). Trent, VK4TI, informs OPDX that the team who will be active as YJ0X in the CQ World Wide DX SSB Contest, intends to be in YJ8-land roughly 4 days prior and two days after the contest. They intend to leave the antenna at the site for future operators. He also mentions Les, VK3WA, is an excellent CW op, and they have had requests for RTTY. Their main focus was for the CQWW Contest as well as sightseeing. However, it does look like Vanuatu is a bit more needed

than they thought by judging by the E-mails received here since the
posting of their operation. QSL via VK4TI, using the QRZ.com address.

I think that I need a little help with this one.

Would you like to put a little more meat on your comment. Remember that I am living in Britain and we have had a fair bit of terrorist activity here over the last 3 or 4 hundred years. I think that you are a wee bit new to this!

Bill

I have several friends in the "corn & wheat belt" of
Iowa and Nebraska. (I broker farm equipment)
All of them have internet access, either via traditonal
dialup or some who have DSL via telco fibre taps
in the trunks that run btwn the cities. Wireless BPL
would not be a seller. (one enterprising customer
in Ohio I know has set up his own wireless LAN that
covers a good chunk of his 4000 acre farm. He can
surf the web on his laptop while inside the cab of
his aftermarket A/C equipped John Deere 9000
Series Combine

Very true! Suburban customer and the VERY lucrative
College Campus market(s) are the real target
of this technology.

The problem is there is one person at the FCC who
has known connections and investments into numerous
telecom corporations. His name is Michael Powell.
Get the big picture? Powell is to the FCC, what Murdoc
is to mass media.....

For an example of what I mean, go to the link below for more info :

Bill, I consider a nuclear detonation in LA to be a tad more severe
than "terrorist activity"!

The passive attitude of, "what will be, will be" is BS. The europeans
did that with Hitler and it took a lot of resources to counter the
laxity.

Eu's are doing it again. Well, it may suit you but it sure don't suit
me (and most here in the colonies).

All utility repair maintainers ("linesmen") must be trained and
qualified to work with primary voltages (11,000 V in your example).
There are special tools ("hot sticks") which they use daily to work
such open lines live, and they have no hesitation to pull the fuses
and work them "cold" if need be. Even after they pull the fuses and
ground the lines, they still use the "hot sticks" which are designed
specifically for the hardware in use.

Transmission voltages (34 KV and up) are something else. Those are
never worked hot.

(As the Portland General Electric channel on my scanner chatters in
the background.)

But you are 100% on point as to what is needed and what the
utilities are liable to do.

Hi Stephen -- Using Pathfinder URL:
http://www.qsl.net/pathfinder/WebClient/

The QSL Manager for 8Q7LC comes up in two places.

Rather than me quote it, I will let you find it on Pathfinder.

Kinda like teaching one how to fish rather than giving free fish.

You will find Pathfinder a great help in finding QSL info as well as NG3K
fine site --- URL:
http://www.ng3k.com/Misc/adxo.html

RK,

Don't know if this is really about Shortwave; may be the interference
that it can cause to Shortwave reception.

But if you have your facts right then BPL would do little for our
rural communities but would do some major harm to radio reception in
Urban Areas.

Oh Goody. Turn that info over to the FCC Inspector General and the U S Attorney General, because it is a violation of Federal law to be so involved and/or he is perjuring himself on the required annual Financial Disclosure form.

Because we had to sell my then-wife's AT&T stock when I joined the FCC as a field engineer, I have no sympathy for someone else who tries to slide by without such divestiture....if in fact it is happening.

You do have solid proof of that, right?

I have a video of a crew working on a 'hot' transmission line of several hundred thousand volts, using a helicopter. They don't shut down the big lines unless it's absolutely necessary.

I read this somewhere and I can't remember where now, that these following calls are now accepted at the ARRL DXcc for a country that was not East Timor. It was something like Timor L..... I cant remember.

"4W1BK (Effective 22 May 2003) 4W3CW (Effective 16 May
> 2003)4W3AN
> (Effective 19 May 2003) 4W3DX (Effective 22 May 2003)"

Is there another new DXCC country in the Timor islands. Or is this the same as East Timor.

<< Most due to crappy power lines and insulators. Now add BPL with wideband digital signals and you have a notion of how it will sound.
I have been working with Alabama power for almost 5 years now. Including the ARRL and the FCC on their ass. And its still not fixed. Wait till BPL is deployed. Dan/W4NTI >>

Exactly right. 4 mo ago....found an arcing connection on a powerpole 2 mi. from the house...humid days, you could see the arc...called 4 times to the power folks....still could pick up the arc S9+ on humid days even after they had "repaired" it 3 weeks later. Finally, the failing insulator burned thru or physically failed (I wasn't there that day) and they replaced the entire assembly on that pole. Amazing what you can hear when the spark gap transmitter (heh..."beacon?") shuts down! Now, if someone had been STEALING electricity, they'd have been out 30 seconds later. Hmmmmm.......maybe that is what I should say next time I've got an arcing line.

Remember the UPS-220-222 MHz fiasco? FCC granted UPS that frequency range THEN UPS found it to be useless for their purposes. We still didn't get it back. Hams in Calif had set up the Condor net covering the state on 222 - all gone!

Maybe two dozen hams in Star Valley. 10K-foot mtns on east side;
9K-foot mtns on west. Virtually no HF workings here. Everybody on 2M
with repeater at north end at 8900-feet linked westward to Oregon and
southward to Henderson, Nevada through Snowbird Links. Repeater at
south end is 1,200-feet AGL for valley traffic. Another repeater in
Jackson Hole for traffic there with some of us able to access it.
Everyone else on the Internet for 'Round-the-world communications!'

Drat. My DER-325 was scrapped out in Hong Kong. Would have loved to
have the GRC radio system on board. Maybe the fore and aft masts, too.
16 dipole elements on forward radar mast operating on 220 MHz with 300+
mile range would have been cat's meow for long distance work and on a
measly 300 kilowatts!!

voltages up to at least 765kv are worked hot in the states. there is a
helicopter company that specializes in this kind of work so that those lines
don't have to be shut down to do repairs. lower voltages like 115kv and
69kv are worked hot with fiberglass 'hot sticks'.

Amateur Urban Myth Number 1. UPS never applied for, and were
never granted, a license to operate a system on 220 MHz. The push
to "develop" that band was made by "Tio Carlos" Roberts, an ex-FCC
"fair haired boy" engineer who had stayed with the agency long
enough to talk them into giving him a grant to pursue a Master's
degree in Communications Engineering on a non-competitive basis - I
would have loved to get considered for that grant but I was not of
Hispanic heritage - and then dickered around as a rather ineffective
Bureau Chief until "the industry" waved money in front of him.

The ACSB equipment that he was hawking never worked, and UPS got
tired to waiting and went to The Big Emm and bought the existing
800 MHz system.

>We still didn't get it back.

By that time, other nation-wide entities (including the American Red
Cross) had applied for and were granted licenses for more conventional
(FM) networks nationwide.

The ARRL did appeal the takeaway through the courts but the courts
did not reverse the Commission.

>Hams in Calif had set up the Condor net covering
>the state on 222 - all gone!

222 and above is still there.

As is the Condor Connection. The repeaters are all in the 222-225
band. My understanding is that the inter-repeater links are all on
440 these days. One or two of the repeaters are down at the moment,
but most of them are up and working.

Most of the 222-225 repeater frequency allocations here in the SF Bay
area seem to be occupied by active repeaters. Some of them are
standalone, but at least half seem to be crosslinked to local 2-meter
repeaters.

Yes, most colleges (if not all) already have T-1 or T-3 lines which are networked through every building. I seriously doubt they would ever consider BPL technology because it would be a net loss of something on the order of 70% of their current bandwidth. Each student has more or less the equivalent of something like 5% of the total bandwidth available via BPL.. (these are only guesstimates, but they are based upon figures I have seen posted about BPL's bandwidth, it starts getting down to dial-up levels by the time it's been distributed to 2,000 users..)

1584. Isotron Limited Space Antennas

Ed,

In reply to your question on the technical requirements, (apologies in advance for the verbose response but would like to ensure that the implementation difference between European PLC/PLT and our BPL is understood by everyone).

In Europe BPL (PLC/PLT) is connected to the 220V (European voltage) at the transformer that feeds 100~200 homes. Typically backhaul from the transformer is a dedicated data line. European power lines are underground and the emission limits are lower (NB30) but there are still major interference problems. At NB30 emission limits PLC/PLT is good for about 900 feet.

Here in the U.S. our power system architecture is different with a transformer for 4~6 homes in the suburbs, in rural areas many homes will have individual transformers as the houses are far apart.

BPL is transmitted down (and emitted from) the 11KV medium voltage lines that go to the house transformers. 11KV lines have significant attenuation (and radiation) at HF.

The repeater issue has been "swept under carpet" as they are expensive and need a truck roll to install. The BPL lobby's focus has been to persuade the world that every socket magically becomes an Internet connection.

For details on a typical BPL repeater check;
http://www.amperion.com/products.asp

There are no details on specific repeater distances at the Amperion site, just a vague comment about data rates and latency. Latency will cause problems for VoIP and gamers (the ping numbers will be bad).

It is clear from the Amperion information that these repeaters are complex as they decode the data. Presume that power is somehow picked off the 11KV line.

The source for the 2,000 feet is here;
http://www2.arrl.org/news/features/2003/06/01/1/
"According to industry sources, data rates of up to 20 MB/s are possible for distances of up to 2,000 feet, and of up to 3 MB/s for distances of up to 4,000 feet."

The ARRL comments are for raw data rates under very ideal conditions, actual download speed shared by all customers will be about 35% of the raw data rate. The BPL systems both in Europe and the U.S. have symmetrical upload/download speeds which is puzzling, as would expect users to care more about download speeds.

If the FCC raises the emission limits, then the repeater distance will be greater. Suspect if they don't, the BPL operators will still turn up the power anyway and wait for complaints

Watched an interesting program while ago on tlc or discovery about
electrocutions, power line workers in special helicopter were checking
lines
for bad insulators/leaks and were working on one section when the linesman
got electrocuted. Even with all safety equipment in use, he was knocked
out,
lost several teeth but survived.

Even with the power off these hv lines, there is some level of residual
power there
perhaps from static, the program did not get into details.

I would like to see how those cell antenna are installed on top of these
power towers.
Guess they use special crane to do it.

It would seem that the use of repeaters on the HV lines would require the
power line to be broken into isolated sections (RF-wise) where the repeaters
are located, with the 60Hz bypassed around the repeater. This can't be good
for reliable electric service.

if they are not properly grounded they can build up a static charge just from wind or passing clouds(thunderstorms or clouds that are building a charge separation even though they haven't actually caused lightning yet). they can also get charged by induced voltages from nearby energized lines, where the line you are working on runs parallel to another energized line it acts like a huge one turn transformer and if not grounded it can build up quite a high voltage.

>
> I would like to see how those cell antenna are installed on top of these
> power towers.
> Guess they use special crane to do it.

crane, helicopter, carry it up on your back, whatever it takes they get them up there... providing grounding and isolation at the base of the tower is the bigger problem. the control shack they connect to requires both AC power and usually a connection to a land based phone network. both of these need extra protection because if the hv line flashes over an insulator due to a fault or lightning the voltage at the base of the structure can get quite high, this can flash back over to the low voltage line and phone lines and get back into those systems. phone lines are easiest to protect by using fiber optics but power is another problem. One utility engineer i talked to at a lightning protection meeting described how a fault like that got into the distribution lines and blew the service drops off several houses down the road causing all sorts of collateral damage.

The power companies have already been using power line carrier repeaters
for many, many years. The repeaters are the bypass, not vice versa.

Same place. Timor Leste (apparently Portuguese for East Timor) is the official name, now that it is independent instead of under U.N. administration.

NC State University here in Raleigh has wired the entire residential campus,
RESNET, along
with the entire campus. A story in the paper reported that they ran enough
cable, including optical,
to go from Raleigh to Florida and back !

I think this bpl is a ploy to trash the bands so they can sell them off to
highest bidders
once the tv stations move to digital and leave the hf bands.

There is no broadcast television in the HF bands. Channel 2 is 54-60 MHz,
low VHF... but that part of the band (up through channel 5) is also within
the scope of BPL frequencies..

How limited is your space. Do you have at least one tree.
I have used wires on 160m in a small backyard that have worked very well.
How much is an Isotron these days.

I know I didnt answer your question because I have not used one, I was just thinking of an alternative for you.

It would be very difficult to achieve sufficient input to output
isolation to repeat on frequency so either do time division (lots of
latency) or translate to another band (most likely).

Guess these repeater units would be very vulnerable to any non
linearity that causes I.M. or harmonics from the output to occur at
the input frequency.

The more I think about this, the more convinced that the BPL lobbyists
have excellent P.R. and are first division bull shit merchants but are
totally and utterly clueless when it comes to R.F.

Expect a few systems to be deployed before the money folks from Wall
Street realize that BPL won't work. Trouble is that a few badly
maintained systems could trash the whole of H.F. during the next
sunspot maximum. Reminds me of the pager transmitter on the next hill
to me, wakes up once to twice a day and overloads my 2M equipment.

"Timor Leste" is Portuguese for "East Timor". Nothing has changed here
except that some people are using the local name for the country to try
to make a case that it's a new entity. The name change is a red herring.
(Otherwise, I'll put in an application for new entity status for Germany
saying it's changed it's name to Deutschland.)

Hey Phil,

Don't have one yet myself, but I've been considering picking one up
due to the antenna restrictions I chose to live under. Here are the
opinions of some folks that seem quite happy with the Isotron
antennas:

http://www.eham.net/reviews/detail/311

If you do in fact buy one, let us know how it works out for you.

Cheers,

Six Meters (50 MHz) Stories

Pat W5OZI made it into Japan tonight from Texas. The guys on the dxers.info chat were saying that the contact most likely was 5 hop sporadic E due to the band conditions and the numbers seem to support that theory. (Hopping over water helps)

Long Es distances! W5OZI (EM00cl) - JG2BRI (PM74aa) = 10,888 km (if grids correct): maybe longest ever Es. de W3EP

Six Meters was quiet all day here in Southern California, then at around 0000 UTC, a SE Kansas station came through on 50.125 MHz. Then two more SE KS stations were contacted, 10 minutes later -- all was quiet again. The KS stations were within about a 75 mile radius. Pipeline ??

Hours later an Alaskan station was contacted. About 2200 miles

---

1515 UTC (8:00 AM PDT) Two stations were contacted from So. Calif to Western New York. About 2500 miles

---

Except for the TX to JA contact, common enough I suspect, but just a heads up that the Magic Band is open from time to time

Ah The Magic Band - Listen 50.125 MHz

For anyone that wants to save their radio waves from an RF intrusion
of the greedy type, read on.

This is much more important then the CW issue.
This is a real problem in the making for ALL RADIO USERS!!!

Write your congressperson, write the chairman of the FCC, write letters
to the editors. Speak loudly. Speak often against BPL. Do not take this
issue lightly. Do not assume someone else will do it for you.

Our radio waves are in JEOPARDY!!!

Talk about irony... if BPL goes through, there's a good chance that only CW
will be able to punch through it... : |

Just make sure to key your elements on their carrier frequencies.

That makes no sense at all... What is 'key your elements' ?

Do you mean to set your carrier frequency to the carrier frequencies of the
interfering BPL signal? If so say so.

"elements" as in the individual di's and dah's the make up each character.

I've been looking at the .gif from Texas Star, and have already learned
to copy a few characters. The first one I learned is "3". All the calls
here have it. Also "k" and a few more in my call.

dah-di-dah dah-dah-di-dah?

I figured with my musical background, it would be easy. I just don't like
you guys trying to force feed it to us. It won't look good on your shoes. <:

1614. 6M TX to JA Update

Newsgroup: rec.radio.amateur.dx
Date: 2003-07-25 14:07:54 UTC
From: Voice In The Wilderness <VITW@dontbother.com>
Message-ID: <%QaUa.11474$ff.8938@fed1read01>
Source record: 9648

Pat Rose, W5OZI said on July 24, from 0046 to 0052z, he worked five Japanese stations on 6-meters. Pat said that in 18 years on 6-meters he has never had E-layer propagation to Japan from his home in Junction, Texas, about 120 miles west of Austin. Pat says the approximate distance to the Japanese stations is over 10,300 km, or 6,400 miles, and believes it took six hops off the ionosphere.

Scanning 17meters this morning I thought I had ran across some good dx.
Nn2x/a9 was calling cq dx stateside. I was disappointed a few minutes later
to hear that he was actually operating a radio and antenna in Boston via a
satellite and internet link from Bahrain. Boston is not quite what I would
call dx.I am glad that he did explain the situation, saved me the time
involved in making a useless contact .

This is a prime example of why so many "OT's" have had it with
ham radio. Ham radio used to be about communications. Now it's
about post cards.

No post card, no sense in making a contact. Wonderful.

Other hams who can't produce post cards are "useless". Terrific.

I hope you remember to tell your wife to bury you with your
shoebox full of post cards.

W5 is not what I'd call DX either. No wonder nobody will TALK to
you on the radio.

73, Jim KH2D

Um no Jim.

It was about someone claiming to be transmitting from Bahrain,
when he was actually transmitting from Boston. Fake station ID.

i.e. he was a pirate.

Kind of like your callsign :-)

First off no one is forcing you to do CW. If you don't want to do it...then
dont. On the other hand many of you non cw types are forcing the rest of us
to lose CW. So who is doing what to whom???

As for the music and CW. Correct. Makes it much easier. Its the rhythm
that does it.

Tap your foot to a 4 x 1 cadence. Then tap your finger on the desk in
sequence with it. Tape it three times and you have a "S" tape it four
times you have a "H" tape it five times you have a "5".

Now do this. Keeping the foot going. Send a "V" di di dit dah.
Keep in cadence. See the rhythm ? great ain't it ?

What? "many of you non cw types are forcing the rest of us
to lose CW"

If the CW requirement is gone you can still do CW.

Who is forcing who? Is someone being forced when CW is a
requirement, or is someone being forced when someone else
believes that the CW requirement should be dropped?

1621. Re: CORRECTION!!!

Newsgroup: rec.radio.amateur.dx

your premise is flawed because you do not take into
consideration the entirety of ham radio. ham radio is
what it is because it is filled with a rich texture of history
and experience. Like the Kentucky Derby and
Wimbleton , for example. There are plenty of horse
races and tennis tournaments , but only one " ham radio.
(is this too complicated for you ??) The first attempt at a
codeless radio license resulted in Citizen's Band. Popular
in the '70s but wasted away to what it is now ... and include
the newer citizen's bands into this too. This , plus many people
are frequently too LAZY (or poorly motivated < yourself perhaps >
to continue the rich tradition of morse in HR) and eliminating the
morse requirement would " definitely " force the eventual end of
CW on the bands.
There are PLENTY of non morse opportunities , currently , in ham
radio (too many for my tastes) .... taking away the morse
requirement completely , would mean the end of the rich tradition of
hamming and rob everyone (that comes after) of the history and rich
experiences that morse can bring. (ever heard of " wolf hung ???
I doubt it ...!! understanding the spirit of woulf hung resolves it
all)
Ham radio without morse is NOT REAL hamradio ... it's " radio "
minus it's rich history and texture of life.

there I said that ......

dusty
k4nlz

morse is joyous and something EVERY serious ham radio enthusiast
should learn the love (of radio) with-in . the ethereal bliss of
morse communication " cannot " be merely spoken of , it must be "
personally " (internally) experienced to be fully appreciated.
traditional " ham radio " is NOT really ham radio without it. if
you have experienced this bliss personally , you understand
completely , if NOT ... you do not fully appreciate ALL that ham
radio offers. either you " have , or you are still not " there "
yet. there is FAR more to morse than many people appreciate or
understand ... I highly recommend that you experience it for yourself,
completely , ... then YOU will understand also. (and be MUCH
richer for the experience)

just completed my first 20m stateside QSO...

... with W1EVT logged between 0011 and 0018 UTC. I was 579 (40 watts into a
quarterwave vertical) he was 599, his name was Clem, his QTH Boston......

and the mode? - A1A (CW) of course at about 14wpm, not bad for a "no-coder"

> the scope of BPL frequencies..

But the motive still holds. Have you noticed that the ARRL is
collaborating w/the bpl providers to place the interference on SW bands,
where it will have 'optimum' impact on AM transmissions, rather than
placing it on VHF bands, such as 6 metres, or the FM broadcast band,
where the interference would have less of an effect, in relative terms?

Obviously, such a strategy will help to clear out the low-rent tenants
currently cluttering the U.S. SW spectrum, so it can be gentrified for
a better class of paying customers. On the ARRL website there's an
article of one use for BPL which explains why they aren't designing
asymmetry into it: the ability to hook appliances into the web. You've
probably heard of Coke machines hooked up to the internet. Imagine
a frige that can read the RFId tags of products inside it, and can
transmit that data to your local Safeway. They wouldn't want to
restrict uploads for those kinds of uses.

There are also trucking companies that want to get exclusive use of
HF spectrum to track their shipments.

Great. If you could now only work in Roswell, grassy knoll, Elvis, moon landing hoax, the CIA and the Jews, you'd have it made.

BPL is bad enough without idiotic conspiracy theories.

You must be a lifetime member of ARRL, eh? And you would snip the
reference to the article at ARRL's site on other uses for bpl,
giving details on how it is collaborating in the bpl effort, eh?
It 's typical of scum like you to make such an attack, since you are
too lazy to look up the fact that there was a coke machine on the net,
the 1st one in Pittsburg. Glenn Hauser had a report on a trucking
company testing HF tracking (or perhaps a reference to Kim's show,
when it was still on VOA). It's nice of the scum at ARRL to give
free consulting services to those who have more than enough time &
money at hand to trash the SWL bands.

I understand your point, Larry. You stated it very clearly.

The guy was "not DX" hence he was "useless",
and it was a "waste of your time" to talk to him.

Never mind he's a ham. Never mind he's a person. Never
mind he might be an interesting person to talk to. He's
"not DX" so we shouldn't waste our time with him. I guess
that means that anybody who's not "DX" doesn't need a
radio. Maybe that's why so many people are getting rid of
them.

Maybe you missed my point. My point is that your attitude
is one of the prime reasons why ham radio is going down
the crapper.

Explain the no pirate concept to Hank, he missed that the
first time around.

And thank you for not considering me DX, it will make me
sleep better tonite knowing that you'll never call me on the
radio simply because you need a post card from Florida.

Not a thing....but do you consider the campaign run by No Code International
a exercise in free speech, or a attack on the Morse testing requirement? I
consider it an attack. Which has NOTHING AT ALL to do with Free Speech.

I'm a Libertarian. Libertarians believe in the least amount of governmental
intrusion and control as is necessary. For instance, Libertarians are against
seat belt laws, motorcycle helmet laws, and I assume also against unnecessary
governmental requirements like a driver's test using a stick shift and Morse
code. I suspect that the new hams who learn Morse code because they want to
will be better members of the ham community than the ones who learned Morse
code because they had to even though they hated the idea of being forced to.
I suspect they will certainly not bitch about Morse code testing 24/7.

Yes.

or a attack on the Morse testing requirement?

Yes.

In the back of your mind, you realize that the usefulness of CW is low
enough that the majority of people will never bother to learn it if not
forced to do so. CW, as a requirement, will be dropped. We will then see
what value peopls put on it.

And you would completely and intentionally misinterpret the ARRL's
anti-BPL position as the opposite, implying they actually "collaborate"
with the BPL industry in some huge conspiracy that is clear only if one
wears an aluminum foil hat.

> It 's typical of scum like you to make such an attack, since you are
> too lazy to look up the fact that there was a coke machine on the net,
> the 1st one in Pittsburg.

It is typical of a conspiracy theory nut like you to invent all kinds of
government conspiracies that have no basis whatsoever in reality except
for people who buy a shack in Montana and arm themselves to the teeth
for that inevitable day when the UN-based world government (ATF and IRS
included) tries to knock down their door and suppress their "God" given
freedom to be stupid.

> Glenn Hauser had a report on a trucking
> company testing HF tracking (or perhaps a reference to Kim's show,

Glenn Hauser, Kim, Hewey and Dewey, Ben and Jerry, who the hell cares?
Your so-called ground-breaking earth-shattering Pittsburg (sic) Coke
machine is a red herring. Internet appliances concept has been around
for years. You have yet to show just how is "ARRL collaborating w/the
bpl providers to place the interference on SW bands".
You have yet to show just how "such a strategy will help to clear out
the low-rent tenants currently cluttering the U.S. SW spectrum, so it
can be gentrified for a better class of paying customers". Who are these
phantom paying customers who are taking over SW? Trucking companies? Do
these trucking companies have a secret anti-BPL filter that they will
deploy once they take over SW? Another conspiracy?
When you attempt to quote "an article on the ARRL website", it is a

common practice to provide a link so that people can read it themselves, instead of relying on your interpretation of "asymmetry".
You also have to show just how is the ARRL collaborating with the BPL industry in the rest of the world, because there, too, is the BPL placed directly across the SW spectrum. Could it be that this is the optimum spectrum for data transmission over the power grid that is not designed to transmit data? Naaaaah, it must be a (world-wide) conspiracy!!! And the ARRL is in on it!!!

In short, your post is a typical example of a conspiracy nut and it does nothing constructive to help with the anti-BPL effort. On the contrary, it completely muddies the issue while providing the pro-BPL people with the ammunition to label hams as lunatics.

So take your anti-ARRL paranoia to your Freemen CB meeting in your Montana shack and leave it there.

And this has to do with rec.radio.shortwave in just what manner?

In the 1960's - in Germany - I met a number of Germans who felt as is they
had "lost" a war.

My next visit - about 3 years in the early 1980's - the Germans I met were
younger and had never lost a war.

The main thing that they had in common was that every one of them seemed to
be good and decent persons.

Germans have never struck me as losers or winners and US citizens have never
struck me as losers or winners.

I think it might be a mistake to do anything where some of us would be losers
and the others be winners without a very, very good reason.

I hope we've outgrown that.

Both of 'em actually.

> Bye bye ham radio in the US.

Don't put that in the bank. I've seen some analyses of BPL economics,
beyond dismal. Breakeven point for recovering the initial investments
is projected to be ten years out. How do you suppose Wall Street will
react to that when that black cat gets out of the bag? Power utility
mangements have to be among the worst of all possible types to
shepherd anything hi-tech comms, they're still wrapped around steam
engines.

Check out how their brethern in the oil industry, Exxon in particular
shot itself in the foot when they got the bright idea to get into the
Qyx memory typwriter business. MBA candidates are still writing case
study theses on that disaster.

If BPL is approved in the U.S. I expect it to roll over and die almost
on the spot like it has in Germany. Or it won't be allowed in the
first place per the the Japanese example and for the same reasons.

I'm not losing a bit of sleep over the prospect of BPL wiping out HF
radio.

Yeah -- well I know of cases where folks were stalked, others received threatening phone calls, etc.

One YL here received dozens of obscene phone calls after her number was posted on the web. Had to change her phone number.

Oh yeah you can take legal recourse if you wish and want to spend the time, money, and agony --- "forget it" as they say in New York and remain ANON on a wide open forum, say I.

Beware

Maybe not in Berlin but happens here in USA.
Sad but true.

ANON out of necessity -- as I have been attacked by the nuts big time (long story)
Elmer in Nevada

Seems to me that HF radio wiping out BPL is a more probable scenario :-)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, AA1AC, K1XN & GoList, NC1L, K2FF, K2KW, NG3K, W3UR & The Daily DX, K4HB, N4AA & QRZ DX, W4NF, K8MR, K8YSE, WD8MGQ, WT8R, W9VA, 9A6AA, BD5RV/4, DL/VE3ZIK & Contesting.info, DL1EK/DL7VOA & DX Newsletter, DL2VFR & IOTA-Post, F5NQL & UFT, F8BBL, FJ5DX & La Gazette du DX, G4EDG, G4KGT, GM4SUC, GW0VSW, I1JQJ & IK1ADH - 425 DX News, JI3DST, JI6KVR & JA-IOTA Islands News, LA2IJ, LA5YJ, RSGB Web Page, TA3YJ, UR5WCW, VA3RJ & ICPO and YV1DIG for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 20th/July, through Sunday, 27th/July there were 211 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3V, 3W, 3X, 4J, 4L, 4S, 4U1I, 4X, 5B, 5H, 5R, 5V, 5W, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9V, 9Y, A3, A4, A6, A7, AP, BV, BY, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, CY9, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, ER, ES, EU, EX, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HI, HK, HK0/a, HL, HP, HR, HS, HZ, I, IS, J6, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, S0, S2, S5, SM, SP, ST, SU, SV, SV5, SV9, T5, T7, T8, T9, TA, TF, TG, TI, TK, TR, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, VE, VK, VK9N, VP2E, VP2M, VP5, VP6, VP8, VP8/o, VP9, VQ9, VR, VU, XE, XT, XU, YA, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

3B9, RODRIGUES ISLAND. Guy, FR5ZL, is a new operator on the island as 3B9ZL. He will be there for about the next three weeks. His activity has been on 15 and 20 meters CW/SSB. Watch around 21022 and 21275 kHz after 1100z and around 14017 and 14190 kHz 0230z. QSL via FR5ZL. Meanwhile,

Robert, 3B9FR, (ed. NOW a NODXA member!) continues to be active on 20 meters CW around 14024-25 kHz usually after 0300z and sometimes after 1100z.

CY9, ST. PAUL ISLAND. CY9A is now active until August 2nd. Please refer to OPDX.619 for the suggested operating frequencies (+/- 5 kHz). QSL via N5VL.

DX HOLIDAY WEBSITE. Kenny, K2KW, reports that the "DX Holiday Website" has been updated. The Web site lists information on where to operate overseas. Categories included are: Rent-a-QTH, Ham Friendly Locations, Club Stations and general information. The recent updates include:
New Rent-a-QTHs in PJ2, 9M8, ZP, PEI (VE)
Recent Rent-a-QTHs in HC8, ZK1, YL, G.
It also includes new Ham friendly locations or information updates in:
NA - 6Y, C6, FM, FS, HR and VP2V OC - W, H4, H40, KH6, KH8, P2 and ZK1/s
SA - P4 and PJ2 AS - 1S/9M0 and BV
EU - 9H, CU, DL, SM and TA AF - 3B8, 3DA, 7P, 7Q, A22, C5, C9, CT3 and S9
There's also great DXpedition Reference material in the "DXpedition Resources" section. The Web page's URL is: http://www.dxholiday.com
Kenny, K2KW, would like to thank the many who contributed the new information and patiently waited for this new update.

DXCC NEWS.....
Bill Moore, NC1L, ARRL DXCC Manager, wants to remind everyone that once again, the deadline for submitting applications for the 2003 DXCC Annual List is rapidly approaching. Applications must be postmarked September 30, 2003.

Bill Moore, NC1L, ARRL DXCC Manager, reports that the following are approved for DXCC credit:
Guinea - 3XY1L (1/Jan/2003 - 31/Dec/2003)
Guinea - 3XD02 (19/Mar/2003 - 31/Apr/2003)
Sudan - ST2CF (17/Mar/2003 - 2/Apr/2003)
Guinea-Bissau - J5UCW and J5UDX (8/Mar/2003 - 6/Apr/2003)
Afghanistan - YA/N4SIX (Ongoing)
Angola - D2CR (1/Jan/2003 - 31/Dec/2003)
Uganda - 5X2A (24/Jun/2002 - 1/Jul/2003)

FP, ST. PIERRE AND MIQUELON. By the time you read this, look for Paul, FP/K9OT, and Peg, FP/KB9LIE (YL), to be active from Miquelon (NA-032). They will be on the air from now through August 5th. Activity will be on CW/SSB on 160-6 meters (emphasis on 40, 30, 17, and 12 meters). On 6 meters they will have a breakable beacon around 50.120 MHz. They will run 100 watts to a variety of antennas: wire, inverted-L, and 6 meter beam w/Armstrong rotor. Paul and Peg will be looking for station who are QRP, mobile, and VK/ZL/JA/JT/Oceania in particular. FP/K9OT will participate in the CW NA QSO Party. QSL via their home callsign, bureau or direct. Their web site is: http://www.mhtc.net/~k9ot

IOTA NEWS.....
AS-147. Takeshi "TAKE", JI3DST, was active this past weekend as JI3DST/8 in the IOTA Contest from Okushiri Island (Okushiri-cho Okushiri-gun Hokkaidou) and will continue to be active until 0000z, August 3rd. Activity will be on 40/17/15/12/10/6 meters SSB. QSL via the Bureau ONLY.

EU-004. Steve, DJ7AO, has activated Mallorca Island instead of Fehmarn Island (EU-128) this past weekend for the IOTA Contest. He will be active until August 4th as EA6/DJ7AO. He will also activate some lighthouses. Activity will be mainly 20 meters CW/SSB. For more details on past and present lighthouse activations, please visit the Web site at: http://e09.de

EU-170. Milan, 9A5DJ (OK1DJG), and Lada, 9A5LO (OK1LO), will activate the Island of Pasman (CI-085) until August 8th. Activity will be on HF, 6 and 2 meters, mainly CW. Maybe they will activate some other Croatian islands around Pasman Island.

OC-133. Members of the Kinabalu Amateur Radio Transmitting Society (operators 9M6KM and 9M6KTC) will be active August 16-17th from Tiga Islands. The name, TIGA ISLAND (Malaysia name PULAU TIGA) is about 40 miles from Cotakinapal, Borneo Island, Saba State. Look for activity on 15 and 20 meters. QSL via the address on QRZ.com.

JX, JAN MAYEN (Update to OPDX.617). Ove, LA2IJ, informs OPDX that he is sorry to report his JX2IJ operation is delayed. Flights to JX-land on Thursday were cancelled due to thick fog, and Friday was not better. The next possibility is Wednesday (July 30th) if weather permits. He will possibly follow that flight. Length of his stay is not known - max 6 days.

KH9, WAKE ISLAND. By the time you read this, Jake, N6XIV/KH9, should once again be active from Wake Island beginning on or about July 26th (if all goes as planned). His visit will run approximately four weeks, and this will be his last KH9 work assignment for 2003. Jake will operate whenever possible during his very limited spare time. Just a reminder, he operates SSB only. QSLs go via K2FF direct or bureau. LAST MINUTE UPDATE (before going to print): Glenn, K2FF, informs OPDX that "Jake came up at 0830z on July 27th on 7.254 using a home-brew 40m vertical and had a nice QSO with K2FF and W6FRH. He reports that the C3SS tribander has some element damage and he's trying to get some parts shipped to Wake in a week or two. If this does not work out then he will continue to use the 40m vertical and a long wire for other bands. Operating times will be as usual with a start time around 0730z and lasting for a few hours. Again he hopes to be on the island for four to six weeks and this will be his last KH9 trip for 2003."

INTERNATIONAL LIGHTHOUSE/SHIP WEEKEND 2003. Mike, GM4SUC, reminds everyone that there are only three weeks to go before the International Lighthouse/ Ship Weekend takes place (starts at 0001z Saturday, August 16th and ends 2359z Sunday, August 17th). There are just over 250 stations in 34 countries

confirming their participation in the event. The list of these stations can be found at: http://lighthouses.net.au/illw/2003.htm
Mike states, "If you have notified us of your participation would you please check that the details are correct." Full rules and details of the weekend event can be found at: http://lighthouses.net.au/illw/index.html

OHIO QSO PARTY. It's less than one month away for the 2003 Ohio QSO Party (OQP). The OQP runs from 1600z Saturday, August 23rd, to 0400z August 24th. Full details, including rules, planned operations, past scores, records, software, operating aids, awards, etc., are available at the OQP website at: http://www.mrrc.net/oqp
You can also sign up there for the the latest news via the OQP E-mail reflector. Remember, 2003 is Ohio's Bicentennial, celebrating 200 years of statehood. We hope you'll join us in celebrating on August 23rd, whether from Ohio or elsewhere, in one of the best state QSO parties.

QSL INFO AND NEWS.....
Members of the F6KNL Radio Club of Cenon (REF33), operators F8BBL, F1DHX, F0DVX and F0ECL, were active from Margaux Island (DIFM: AT-102). QSL via F8BBL Bureau or direct.

Steve, G4EDG, informs OPDX that direct QSLs for his ZL4/G4EDG (OC-203) operation were mailed July 24th. All bureau cards will be processed as they arrive.

Nilay, TA3YJ, informs OPDX that QSL cards of TA3YJ, TA3YJ/0, TA3YJ/3, TA3YJ/4, TA3YJ/LH, SV1/TA3YJ, LZ2/TA3YJ, TA3J, TA3J/0, TA3J/1, TA3J/3, TA3J/4, TA3J/LH, SV1/TA3J, LZ1/TA3J, LZ2/TA3J, YM3BU, YM3ATA, YM3SV, YM75TA, YM21TA, YM3LZ/WPX2000 and YM3LZ/WAE2000 were sent to the QSL Bureaus of Cyprus, Algeria, Croatia, Malta, Kuwait, Oman, Chile, Portugal, Uruguay, Germany, Spain, Ireland, Moldova, Tajikistan, France, United Kingdom, Liechtenstein, Ecuador, Colombia, Republic Of Korea (South Korea), Panama, Italy, Japan, Luxembourg, Czech Republic, Belgium, Denmark, Netherlands, Brazil, Russia, Slovenia, Poland, San Marino, Bosnia & Herzegovina, Cote D'Ivoire, Ukraine, Australia (VK2, VK3, VK4, VK5 and VK7), Mexico, Latvia, Romania, Venezuela, New Zealand direct July 25th.

POSTAL RATES INCREASED (VE and CX). The cost of DXing is going up again. It was announced that postal rates will go up in Canada and Uruguay. Hal, K4HB, provides the following info:
For Canada: Effective January 12, 2004, Canada will increase its rates as follows:
Canada to Canada will increase from .48 to .49
Canada to the US will increase from .65 to .80
Canada to all other countries will increase from 1.25 to 1.40

As of July 25, 2003, 1 USD = 1.38 CAD. Unless the USD picks up on the foreign exchange between now and January 2004, 1 USD will be a little short for sufficient postage from Canada to countries other than the US.
http://www.canadapost.ca/personal/corporate/about/newsroom/pr/default-

e.asp?prid=924

For Uruguay: This country increased its rates on July 1, 2003. Postage to the US and other countries went from 24 pesos to 36 pesos. (Don't know about the rate to other SA countries) The present exchange rate is 1USD = 27 Pesos, so 1USD is not enough for return postage anymore.

Hal, K4HB, states, "The 'Foreign Postage Rates' Web page has been updated with this information. Thanks to Pierre, VE2PIJ, and Bill Plum for passing this on to us."

RSGB IOTA Contest (Late listings)

QSL 90CI via HA3KNA. Activity was from Island of Sveti Nikola (EU-110 and CI-118). Operators were: HA1AG, HA3OV, HA3NU, HA6OI, HA1TX and 9A6AA.

QSL BI5P via direct or via bureau to BA4RD (P.O.Box 538 Nanjing, China). Activity was from Pingtan Island (AS-138). Operators were: BA4TA, BD4RS, BD5RV, BA5RX, BD5RT and some other BY5s. More details can be obtained on the JSDXC's Web site at: http://www.jsdxc.org

QSL HP1XVH (Guenter) via N0JT. Activity was from Contadora Island (NA-072).

QSL HS0EHF/p via HS0EHF. Activity was from Si Chang Island (AS-107).

QSL IB0P via I5JHW. Activity was from Ponza Island (EU-045 and IIA LT-0010). Operators were: I5JHW, I5NSR, I5OYY, I5UKS, IK5FTQ, IK5ZTW, I5HLK and SWL Francesco.

QSL IQ2CJ/3 via the Bureau. Activity was from Pallestrina Island (IOTA EU-131 and IIA VE033). Operators were: IK2JUB, IK2NCJ, IK2FIL, IW2HAJ and IW2JOD.

QSL KB4CRT/4 via home address. Activity was from Key West, Fla (NA-062).

QSL MD0BJM/M via direct or RSGB. Activity was from the Isle of Man (EU-116).

QSL OH0Y via OH6YF. Activity was from Aland Island (EU-002). Operator was Harry, OH6YF, celebrating 20 years (1983-2003) of HAM radio.

QSL F/ON5MF/P via ON5MF, direct or by the bureau is OK. Activity was from Ile Sainte-Marguerite (EU-058). Operators were: ON5MF and ON6NN.

Tony, TK5XN, active in the IOTA Contest, was from Corsica (EU-014, DIFM TK-01). QSL via Paul, F2YT.

Jack, W4NF, activated Hatteras/Pea Island, NC (NA-067). QSL via his home callsign.

QSL VY2TT via K6LA. Activity was from Prince Edward Island (NA-029). Operator was Ken, K6LA.

QSL K9AJ/VY0 via home callsign. Operator Mike was active from Southampton Island (NA-007). ADDED NOTE: Jim/K9PPY/VY0 and Mike/K9AJ/VY0 made over 5,000 QSOs from NA-225. Mike, K9AJ, was not able to be active from NA-009.

QSL YW6P (IOTA Contest) via EA7JX. QSL YV5JBI/P (outside contest) via YV5JBI. Activity was from Piritu Afuera Island.

SPECIAL EVENT. Look for special event station EN3WLL now through August 3rd from Lviv, Ukraine, to commemorate the Polish scientist Ignacy Lukasiewicz (who was the first-ever to use a kerosene lamp for the first time during the medical operation on July 31, 1853, in Lviv). QSL via UR4WXQ to the bureau or direct to: P.O.Box 7072, Lviv 79018, Ukraine.

SPECIAL EVENT. Operators Jack/G0FQN, Mark/G1PIE/M3PIE, and Pam/2E1HQY will be active next Saturday, August 2nd, as GB2SCL from Ribblehead Station on the Settle and Carlisle Line. This activity will commemorate the 35th anniversary of the withdrawal of the steam train by the British Railways. ADDED NOTE: A steam train will be driven through the station while the team is operating.

SPECIAL EVENT. John Hughes/G4KGT and G4PSG, Station Manager, Prestwood Scout Group Amateur Radio Club, informs OPDX that the RSGB Mobile Demonstration Vehicle, GB4FUN, will be present at WINGS2003, August 2-9th, at Windsor Great Park, Berkshire, England. There will be world-wide representation by over 3000 Guides and Scouts. The Amateur Radio Station callsign GB4FUN will be active from 1400 BST Sunday, August 3rd, with daily sessions thereafter 0930 to 1230 and 1400 to 1700, for demonstration purposes and for greetings messages to be passed (subject to existing bi-lateral agreements). Please listen around the usual Scout SSB frequencies. It is hoped that further activity will take place outside the session times.

SPECIAL EVENT. Look for special event station GB90RSGB to be on the air from RSGB HQ in Potters Bar now through August 9th, to celebrate the 90th anniversary of the formation of the Society. Activity will mainly be on the HF bands, CW and SSB, but with some digital modes and VHF operations. Also, you may have heard over the past weekend some stations signing GB90RSGB/number (ex. GB90RSGB/32). These station were also celebrating the RSGB anniversary and were involved in what was called "Party in the Park". The numbers at the end of GB90RSGB represents the RSGB district number the station was in. Some 58 stations were expected to be on. A special 90th anniversary award is available for those making contact with or monitoring any GB90RSGB stations. Details can be found at: http://www.rsgb.org/rsgb90/award.htm

TI5, COSTA RICA. Operators Harry/AC8G, Ron/WA8LOW, W8ILC/Ron, Brian/KA7KUZ, Kecko/TI5KD, Tony/VE3RZ, Jorge/CX6VM, Ed/K1EP, Tom/ZP5AZL, Juan/ZP5MAL, Dale/N3BNA and Dave/WT8R, will be manning the TI5N Contest station as a Multi-Multi entry in the CQWW SSB Contest, October 25-26th. QSL TI5N via W3HNK. For a day or two before and after the contest, the individual operators will be on using TI5/own-callsign as time permits. Expect a higher level of CW and other non SSB modes on the contest bands due

to the large SSB volume in the contest. Attention will also be directed to 6 meters and the WARC bands using various modes. QSLs for the individual QSOs should go to the callbook address unless advised otherwise. IMPORTANT: Do not mix the contest QSL with ones for the individual contacts.

TS7, TUNISIA (Large IOTA Op). About 17 OMs and 3 XYLs will operate from Kerkennah Islands (IOTA AF-073) from November 19th to December 1st. Their activity will include the CQ World Wide DX CW Contest (November 29-30th) as a Multi-2 entry using the callsign TS7N. During their time there, they plan to have five active stations on all modes and on 160-6 meters. Operators mentioned are: 9K2RR, JH4RHF, DK1BT, DJ9CB, DJ7IK, DK7YY, DL3KDV, DF2SS and possibly more. QSL via DL9USA. More information is forthcoming, and an online Web page will be available in August at: http://www.qsl.net/ts7n

USI ACTIVITY. Look for NODXA member Byron, KF8UN, to be active from Tappan Lake Island (USI OH-New) between August 9-10th. Activity will be on all bands 80-6 meters. QSL via the address on QRZ.com.

VP9, BERMUDA. Mark, AA1AC, will operate as AA1AC/VP9 from the Hamilton Parish, Bermuda, during August 10-13th. No other details were provided. QSL via home call.

W9DXCC 2003. The Northern Illinois DX Association is pleased to announce the 51th annual W9DXCC convention at Rolling Meadows (a NW suburb of Chicago) Illinois on September 19-20th. This will be the 50th anniversary of the first W9DXCC initiated by Bob Baird, W9NN, and held in Chicago in 1953. Their banquet speaker will be Dave Sumner, K1ZZ, ARRL CEO. Dave's topic will be the recently completed World Radio Conference 2003 from the DX'ers perspective. Dave is also Secretary of the International Amateur Radio Union, and has been instrumental in acquiring new frequencies for amateurs, as well as protecting current allocations. The complete W9DXCC schedule, and on-line registration is available at the W9DXCC website at:
http://www.w9dxcc.com
Contact W9VA for info and questions via E-mail at: w9va@aol.com

XU, CAMBODIA. Hugo, LA5YJ (ex-9N7YJ), informs OPDX that he will be active as XU7ACW at least until September 9th. He was heard this past week on 40/30/20/17 meters CW. Watch 7006, 10105 and 18075 kHz after 1330z, and 14030 kHz after 1830z. QSL to LA5YJ with a SAE and please 1 IRC (If not available, 2 USD or equivalent). Postage from LA is 1.50 USD.

ZB2, GIBRALTAR. Carl, GW0VSW, will be one of four Sea Cadet Instructors training in Gibraltar between August 15-29th. He will operate mainly QRP (Some QRO operation may be possible) using an FT-817 and dipoles on all bands CW/SSB as ZB2/GW0VSW/p. However, Sea Cadet/Naval training must take priority, so expected times of operation will be early morning and late evening around 0500z and 2100z. Suggested frequencies are: 7030, 7055, 10106, 14060 and 14255 kHz. QSL is OK via his homecall.

Excerpts and distribution of The OPDX Bulletin are granted as long as
KB8NW/OPDX/BARF80 receive credit. To contribute DX info, call BARF-80 BBS
online at 440-237-8208 28.8k/14400/9600/2400/1200 and leave a message with
the Sysop or send via InterNet Mail to:
kb8nw@barf80.nshore.org - OR - kb8nw@arrl.net
Use the VOICE or FAX answering machine at 440-237-8208 which shares the
same phone line as BARF-80 BBS using a data/fax/phone switch. To access:
1) Dial Number. 2) Wait for first ring (the second ring should be a false
ring from the fax/data switch box) and then dial four quick ones ("1111").
(NOTE: Some FAX machines that send single "BEEPS" every second will not
have to do this step.) 3) The phone will pick up and after the "BEEP"
leave your voice message or FAX.

> IOTA NEWS.....................
> AS-147. Takeshi "TAKE", JI3DST, was active this past weekend as
> JI3DST/8 in the IOTA Contest from Okushiri Island
(Okushiri-cho
> Okushiri-gun Hokkaidou) and will continue to be active until
> 0000z, August 3rd. Activity will be on 40/17/15/12/10/6 meters
> SSB. QSL via the Bureau ONLY.
>
> EU-004. Steve, DJ7AO, has activated Mallorca Island instead of Fehmarn
> Island (EU-128) this past weekend for the IOTA Contest. He
> will be active until August 4th as EA6/DJ7AO. He will also
> activate some lighthouses. Activity will be mainly 20 meters
> CW/SSB. For more details on past and present lighthouse
> activations, please visit the Web site at: http://e09.de
>
> EU-170. Milan, 9A5DJ (OK1DJG), and Lada, 9A5LO (OK1LO), will activate
> the Island of Pasman (CI-085) until August 8th. Activity
> will be on HF, 6 and 2 meters, mainly CW. Maybe they will
> activate some other Croatian islands around Pasman Island.
>
> OC-133. Members of the Kinabalu Amateur Radio Transmitting Society
> (operators 9M6KM and 9M6KTC) will be active August 16-17th
> from Tiga Islands. The name, TIGA ISLAND (Malaysia name PULAU
> TIGA) is about 40 miles from Cotakinapal, Borneo Island, Saba
> State. Look for activity on 15 and 20 meters. QSL via the
> address on QRZ.com.
>
> JX, JAN MAYEN (Update to OPDX.617). Ove, LA2IJ, informs OPDX that he is
> sorry to report his JX2IJ operation is delayed. Flights to JX-land on
> Thursday were cancelled due to thick fog, and Friday was not better. The
> next possibility is Wednesday (July 30th) if weather permits. He will
> possibly follow that flight. Length of his stay is not known - max 6
> days.
>
> KH9, WAKE ISLAND. By the time you read this, Jake, N6XIV/KH9, should once

> again be active from Wake Island beginning on or about July 26th (if all
> goes as planned). His visit will run approximately four weeks, and this
> will be his last KH9 work assignment for 2003. Jake will operate whenever
> possible during his very limited spare time. Just a reminder, he operates
> SSB only. QSLs go via K2FF direct or bureau. LAST MINUTE UPDATE (before
> going to print): Glenn, K2FF, informs OPDX that "Jake came up at 0830z
> on July 27th on 7.254 using a home-brew 40m vertical and had a nice QSO
> with K2FF and W6FRH. He reports that the C3SS tribander has some element
> damage and he's trying to get some parts shipped to Wake in a week or two.
> If this does not work out then he will continue to use the 40m vertical
> and a long wire for other bands. Operating times will be as usual with a
> start time around 0730z and lasting for a few hours. Again he hopes to be
> on the island for four to six weeks and this will be his last KH9 trip
> for 2003."
>
> INTERNATIONAL LIGHTHOUSE/SHIP WEEKEND 2003. Mike, GM4SUC, reminds everyone
> that there are only three weeks to go before the International Lighthouse/
> Ship Weekend takes place (starts at 0001z Saturday, August 16th and ends
> 2359z Sunday, August 17th). There are just over 250 stations in 34
countries
> confirming their participation in the event. The list of these stations
> can be found at: http://lighthouses.net.au/illw/2003.htm
> Mike states, "If you have notified us of your participation would you
> please check that the details are correct." Full rules and details of the
> weekend event can be found at: http://lighthouses.net.au/illw/index.html
>
> OHIO QSO PARTY. It's less than one month away for the 2003 Ohio QSO Party
> (OQP). The OQP runs from 1600z Saturday, August 23rd, to 0400z August
24th.
> Full details, including rules, planned operations, past scores, records,
> software, operating aids, awards, etc., are available at the OQP website
> at: http://www.mrrc.net/oqp
> You can also sign up there for the the latest news via the OQP E-mail
> reflector. Remember, 2003 is Ohio's Bicentennial, celebrating 200 years
> of statehood. We hope you'll join us in celebrating on August 23rd,
> whether from Ohio or elsewhere, in one of the best state QSO parties.
>
> QSL INFO AND NEWS.....................
> Members of the F6KNL Radio Club of Cenon (REF33), operators F8BBL,
> F1DHX, F0DVX and F0ECL, were active from Margaux Island (DIFM: AT-102).
> QSL via F8BBL Bureau or direct.
>
> Steve, G4EDG, informs OPDX that direct QSLs for his ZL4/G4EDG (OC-203)
> operation were mailed July 24th. All bureau cards will be processed as
> they arrive.
>
> Nilay, TA3YJ, informs OPDX that QSL cards of TA3YJ, TA3YJ/0, TA3YJ/3,
> TA3YJ/4, TA3YJ/LH, SV1/TA3YJ, LZ2/TA3YJ, TA3J, TA3J/0, TA3J/1, TA3J/3,
> TA3J/4, TA3J/LH, SV1/TA3J, LZ1/TA3J, LZ2/TA3J, YM3BU, YM3ATA, YM3SV,
> YM75TA, YM21TA, YM3LZ/WPX2000 and YM3LZ/WAE2000 were sent to the QSL

> Bureaus of Cyprus, Algeria, Croatia, Malta, Kuwait, Oman, Chile,

> July 25th.
>
> POSTAL RATES INCREASED (VE and CX). The cost of DXing is going up
> again. It was announced that postal rates will go up in Canada and
> Uruguay. Hal, K4HB, provides the following info:
> For Canada: Effective January 12, 2004, Canada will increase its
> rates as follows:
> Canada to Canada will increase from .48 to .49
> Canada to the US will increase from .65 to .80
> Canada to all other countries will increase from 1.25 to 1.40
>
> As of July 25, 2003, 1 USD = 1.38 CAD. Unless the USD picks up on
> the foreign exchange between now and January 2004, 1 USD will be a
> little short for sufficient postage from Canada to countries other
> than the US.
> http://www.canadapost.ca/personal/corporate/about/newsroom/pr/default-
> e.asp?prid=924
>
> For Uruguay: This country increased its rates on July 1, 2003.
Postage
> to the US and other countries went from 24 pesos to 36 pesos. (Don't
> know about the rate to other SA countries) The present exchange rate
> is 1USD = 27 Pesos, so 1USD is not enough for return postage anymore.
>
> Hal, K4HB, states, "The 'Foreign Postage Rates' Web page has been
> updated with this information. Thanks to Pierre, VE2PIJ, and Bill
> Plum for passing this on to us."
>
> _____
> RSGB IOTA Contest (Late listings)
> ---------------------------------
> QSL 90CI via HA3KNA. Activity was from Island of Sveti Nikola (EU-110
> and CI-118). Operators were: HA1AG, HA3OV, HA3NU, HA6OI, HA1TX and
> 9A6AA.
>
> QSL BI5P via direct or via bureau to BA4RD (P.O.Box 538 Nanjing,
China).
> Activity was from Pingtan Island (AS-138). Operators were: BA4TA,
BD4RS,
> BD5RV, BA5RX, BD5RT and some other BY5s. More details can be obtained
> on the JSDXC's Web site at: http://www.jsdxc.org

>

> (NA-072).
>
> QSL HS0EHF/p via HS0EHF. Activity was from Si Chang Island (AS-107).
>
> QSL IB0P via I5JHW. Activity was from Ponza Island (EU-045 and IIA
> LT-0010). Operators were: I5JHW, I5NSR, I5OYY, I5UKS, IK5FTQ, IK5ZTW,
> I5HLK and SWL Francesco.
>
> QSL IQ2CJ/3 via the Bureau. Activity was from Pallestrina Island
> (IOTA EU-131 and IIA VE033). Operators were: IK2JUB, IK2NCJ, IK2FIL,
> IW2HAJ and IW2JOD.
>
> QSL KB4CRT/4 via home address. Activity was from Key West, Fla
(NA-062).
>
> QSL MD0BJM/M via direct or RSGB. Activity was from the Isle of Man
> (EU-116).
>
> QSL OH0Y via OH6YF. Activity was from Aland Island (EU-002). Operator
> was Harry, OH6YF, celebrating 20 years (1983-2003) of HAM radio.
>
> QSL F/ON5MF/P via ON5MF, direct or by the bureau is OK. Activity was
> from Ile Sainte-Marguerite (EU-058). Operators were: ON5MF and ON6NN.
>
> Tony, TK5XN, active in the IOTA Contest, was from Corsica (EU-014,
> DIFM TK-01). QSL via Paul, F2YT.
>
> Jack, W4NF, activated Hatteras/Pea Island, NC (NA-067). QSL via his
> home callsign.
>
> QSL VY2TT via K6LA. Activity was from Prince Edward Island (NA-029).
> Operator was Ken, K6LA.
>
> QSL K9AJ/VY0 via home callsign. Operator Mike was active from
Southampton
> Island (NA-007). ADDED NOTE: Jim/K9PPY/VY0 and Mike/K9AJ/VY0 made over
> 5,000 QSOs from NA-225. Mike, K9AJ, was not able to be active from
> NA-009.
>
> QSL YW6P (IOTA Contest) via EA7JX. QSL YV5JBI/P (outside contest) via
> YV5JBI. Activity was from Piritu Afuera Island.
>
> SPECIAL EVENT. Look for special event station EN3WLL now through August
> 3rd from Lviv, Ukraine, to commemorate the Polish scientist Ignacy
> Lukasiewicz (who was the first-ever to use a kerosene lamp for the first
> time during the medical operation on July 31, 1853, in Lviv). QSL via
> UR4WXQ to the bureau or direct to: P.O.Box 7072, Lviv 79018, Ukraine.
>

> SPECIAL EVENT. Operators Jack/G0FQN, Mark/G1PIE/M3PIE, and Pam/2E1HQY
> will be active next Saturday, August 2nd, as GB2SCL from Ribblehead
> Station on the Settle and Carlisle Line. This activity will commemorate
> the 35th anniversary of the withdrawal of the steam train by the British
> Railways. ADDED NOTE: A steam train will be driven through the station
> while the team is operating.
>
> SPECIAL EVENT. John Hughes/G4KGT and G4PSG, Station Manager, Prestwood
> Scout Group Amateur Radio Club, informs OPDX that the RSGB Mobile
> Demonstration Vehicle, GB4FUN, will be present at WINGS2003, August 2-9th,
> at Windsor Great Park, Berkshire, England. There will be world-wide
> representation by over 3000 Guides and Scouts. The Amateur Radio Station
> callsign GB4FUN will be active from 1400 BST Sunday, August 3rd, with
> daily sessions thereafter 0930 to 1230 and 1400 to 1700, for demonstration
> purposes and for greetings messages to be passed (subject to existing
> bi-lateral agreements). Please listen around the usual Scout SSB
> frequencies. It is hoped that further activity will take place outside
> the session times.
>
> SPECIAL EVENT. Look for special event station GB90RSGB to be on the air
> from RSGB HQ in Potters Bar now through August 9th, to celebrate the 90th
> anniversary of the formation of the Society. Activity will mainly be on
> the HF bands, CW and SSB, but with some digital modes and VHF operations.
> Also, you may have heard over the past weekend some stations signing
> GB90RSGB/number (ex. GB90RSGB/32). These station were also celebrating
> the RSGB anniversary and were involved in what was called "Party in the
> Park". The numbers at the end of GB90RSGB represents the RSGB district
> number the station was in. Some 58 stations were expected to be on. A
> special 90th anniversary award is available for those making contact with
> or monitoring any GB90RSGB stations. Details can be found at:
> http://www.rsgb.org/rsgb90/award.htm
>
> TI5, COSTA RICA. Operators Harry/AC8G, Ron/WA8LOW, W8ILC/Ron,
Brian/KA7KUZ,
> Kecko/TI5KD, Tony/VE3RZ, Jorge/CX6VM, Ed/K1EP, Tom/ZP5AZL, Juan/ZP5MAL,
> Dale/N3BNA and Dave/WT8R, will be manning the TI5N Contest station as a
> Multi-Multi entry in the CQWW SSB Contest, October 25-26th. QSL TI5N via
> W3HNK. For a day or two before and after the contest, the individual
> operators will be on using TI5/own-callsign as time permits. Expect a
> higher level of CW and other non SSB modes on the contest bands due
> to the large SSB volume in the contest. Attention will also be directed

What will probably happen, given that BPL takes off, is that Amateur
interference to BPL users will cause enough uproar for the FCC
to impose quiet hours or power limits on hams.
Money talks, hams will walk. Licensed
service or not.

1650. Amateur Radio Operators in the South Pacific

Newsgroup: rec.radio.amateur.dx
Date: 2003-07-28 05:14:49 UTC
From: ausradio@volcanomail.com
Message-ID: <26c28518.0307272114.52f09a62@posting.google.com>
Source record: 9584

A question for those in contact with radio amateurs in the south pacific islands.

Does anyone have any contact with radio amatuers in the south pacific islands who might have a GPS unit & who might be able to take some latitude/longitude (& maybe height ASL) readings for me on some FM broadcast band transmitter tower sites in any of the below listed nations. This info seams to be largely unavailable in the smaller islands.

Countries that I am interested in are:

Tonga
Vanuatu
Solomon Islands
Western Samoa
Niue
Nauru
Wallis & Futuna Island
New Caledonia
French Polynesia
Norfolk Island
Parts of PNG

The GPS info would be used to establish exact distance & azimuth stats & info for dxers from their QTH.

Anyhelp would be VERY highly appreciated.

Contact Ian at this e-mail address ONLY below:

too44hungry@hot44mail.44com

(please remove ALL the 44 numbers in the e-mail address to reply, my partial defence against spam....thank you)

Hope to hear from someone?

Ian

webcam online (in my shack) 28-07-2003.

Hello All,

I've installed a webcam in my shack, and you
can see my shortwave receiver.
We are listen to you (see the freq. display).
Sorry I can not transmit cause my license does
not allow to transmit on HF.

I will publish the stations (I've heard) on my website.

My countrie is Holland (JO33AD).

Have anyone a good idea to put the audio also
online?
Wich software do I need?
Can I do that with my receiver-speaker output to
the line-in from my soundcard?
It's a littlebit the same idea like the police scanners
online (live).
It would be nice when amateurs (from a long distance) can
hear them selves back on inet (when you transmit).

http://www.qsl.net/pd0rkc

73's Cor (PD0RKC).

Yes this has been done before quite a number of years back. A guy in Finland was one of the first with a remote control receiver. You could log on and tune the freq, it also had audio output. Do a web search for "Java Radio" I think.

Yeah but..... Remember Iridium?? Not 'zactly a gallopin' bizzness plan but
they got the spectrum and the $$$ backing to toss up something like $22bil
worth of hardware into the sky before reality struck. All very "high tech" and thus highly
desirable to the
regulators who get stars in their eyes and froth at the mouth at the very mention of the
name Carl
Stevenson...And if Bill Gates

and a couple other Guru level geeks climb on board this train's REALLY rollin'......

I sure wouldn't ignore the threat of BPL just because it stinks from almost every viewpoint except that it's
highly desireable as a high tech solution to
a percieved-but-not-necessarily-existant problem. Commisar Powell really
thinks it's THE solution to getting everyone in the world wired.....That alone is trumps tons of logic.

Dick

Don't know if anyone has considered this, but if the BPL lines are going to radiate intereference, would it not stand to reason that the lines would be (not by choice) accepting outside RFI sources???

Just a thought on the issue,

Yes you can feed audio, i would reccomend you use an opto-isolator or 1:1 trasnformer from the audio out of your radio into the line in on your soundcard (be carefull and check line levels).
The software you can use to broadcast is shoutcast, this will encode the audio into MP3 format to be streamed from any MP3 capable decoder (such as Winamp or Mediapalyer). There is a slight lag of a few seconds (slowly creeps up to 30seconds or so).
You need 1) the client software (a plugin for winamp) and 2) the server software. You can stream from 56k at a low bitrate which is fine for voice. Broadband would be required for multiple listeners though. If you have a dynamic IP address you will also need a way to update a static domain for listeners to point their player to - this can be done at http://www.dyndns.org

the software for streaming is at http://www.shoutcast.com

hope this helps

Correct... and there have been some very pithy statements concerning
this issue submitted to the FCC.

A few I've seen (from the ARRL and others):

- The FCC recently turned down the request for an amateur very-low-
frequency band, on the basis of concerns voiced by the power
companies. The power companies asserted that their existing
power-line-control equipment (which uses VLF signals on the lines)
would not be able to tolerate even the level of EMI induced by an
amateur transmitter running just a few watts of power, on
frequencies where neither the amateur antennas or the power lines
are likely to be acting as efficient radiators/acceptors.

Now, BPL is being proposed... and its proponents are asserting (or
assuming) that BPL can operate effectively even in the presence of
much higher HF interference levels, generated by amateur
transmitters running at legal-maximum power, on frequencies where
the antennas and power lines will be much more efficient.

As the ARRL comment put it, "You can't have it both ways."

- Voltage levels induced by amateur-radio and other licensed
transmitters will likely be high enough to saturate the RF front
end circuitry, and the digitzers, used in BPL modems built to
typical consumer-electronics standards. This could very easily
result in loss of BPL connectivity over a fairly significant area
around each licensed transmitter station, whenever the transmitter
keyed up.

- Getting the BPL signals through, or around, the existing low-pass
filtration created by powerline transformers will require
installing high-pass bypass circuitry. This circuitry will
necessarily couple RF noise on the lines just as efficiently as BPL
signals, and will allow RF noise (e.g. triac switching noise, motor
commutator noise, etc.) to travel on the lines quite a bit further
than it does today.

One of the technologies we have ignored in the BPL discussion is the use of coherent detection in the BPL circuitry. It provides very high common mode rejection. For example, high rejection to amateur and commercial HF/VHF transmissions, and high signal to noise integrity on the desired frequencies.

Coherent detection can very easily pull a signal out from under the noise level. For example, I have used systems where the signal can be 20 dB below the noise and still be recovered.

It may just be possible that interference TO the BPL system will not be severe, but interference FROM the BPL system ... well that has been discussed.

My understanding is that the BPL systems being proposed, use various spread-spectrum techniques - I believe they're based on discrete-multitone / orthogonal frequency division multiplexing modulations, similar to what's used for most ADSL systems these days. There won't be a single carrier frequency... there will be dozens or hundreds in use in any given transmission.

That's how they can get a lot of bandwidth over the wires, provide some resistance to narrow-band interference, and still manage to keep the radiated energy in any given band-slice to within the FCC emissions limits.

>Coherent detection can very easily pull a signal out from under the

That works nicely with narrowband signals, and at low data rates.

Doesn't seem to me that it will work at all well with wideband multi-carrier systems such as DMT, operating at high data rates.

Also, achieving high common-mode rejection is nice, but since power lines are a long way from being electrically-balanced at HF/VHF frequencies, there's going to be a whole howling lot of differential-mode signal on the lines any time a licensed transmitter keys up in the neighborhood.

Also, getting good common-mode rejection (for coherent detection or otherwise) requires that you have adequate dynamic range and resolution in your front-end electronics... if the interference saturates the receiver chain at any point _before_ the common-mode portion of the signal is eliminated, you're screwed. That's one of the problems one commenter discussed on the FCC page.

Greetings,

Abuse of the Bandplan, what bandplan?

That is something that was invented by a magazine publishing company,
The Radio Society Of Great Britain Limited. The licensing authority
recognises NO "bandplan", please read the BR68, learn how to spell
'FREQUENCY', and try not to make such a display of cuntishness in
future.

Misguided though he undoubtedly is, I notice that Ignatio is from
Italy. Thus if he has a bandplan to enforce, maybe it is an Italian
invention? It is also not entirely true that the licencing authority
in the UK recognises no band plan since BR68 list band plans - perhaps
you have never read BR68?

The use of some bands is done by gentlemens agreement but perhaps you
would exclude yourself from any conventional definition of a
gentleman?

Sorry you feel that way. We owe our ham radio to the ARRL -
they're all we have, all we ever have had, or will have.
Do you think the local CB club is going to look out for our
interests?

The ARRL has to cater to a lot of concerns, whether your operation
is with PSK31 or CW and link coupling.

A little OT, but I worry because we're losing the young interests
to the internet. If you're old enough to recall hearing the novice
bands come alive after 3PM when school let out, you'll know what I mean.

You probably mean "gentleman's agreement". How can one be assumed to
adhere to such agreements if he even doesn't even know how to write
correctly in his native language?

Hi, I'm still kind of a newbie to the hobby. I curently am
experiementing with different Shortwave/Ham receivers....(inexpensive,
older receivers, do to my budget. I currently have an old FRG-7, and
DX-160...as my shack... I would love to purchase a Kenwood R-300 or
QR-666 (don't make fun, I like playing with these old guys) If
someone has one sitting under a pile of old radio parts, that they
wouldn't mind parting with...I'd luv to hear from you and we could
work out a price. =) If you have one let me know. *drop me and
e-mail or whatever*

In Washington, power speaks. But numbers are needed for that power. Take the NRA. Membership is around 4 million, and they have the power to represent their membership in DC. Not every gun owner is happy with all their decisions, BUT- the NRA IS their voice in DC, and members have the power to alter that voice, if they wish to.
The ARRL is our ONLY link to Washington. There are, what, around 500,000 licensed hams in this country? That's a small number...we need to band together to be heard. The NRA, at 4 million, speaks for 80+ million gun owners. The League, as mossbound as it is, speaks for us.
If you don't like what the League is doing, WORK TO CHANGE IT!!! Run for office in your local club (you DO belong to a local club, right?). Heck, run for a League position. MAKE YOUR VOICE HEARD! DON'T SIT THERE AND WHINE ABOUT IT!!!!
Keep in mind what Benjamin Franklin said as they were signing the Declaration of Independence in Philadelphia in 1776: "We must hang together, or surely we will all hang separately." We hams had blessed well better hang together, or we're toast.

"Stupidity is always more interesting than dullness."

TNXS and GUD DX de Tedd KB8NW

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 27th/July, through Sunday, 3rd/August there were 209 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 3X, 4J, 4L, 4S, 4U1I, 4X, 5B, 5H, 5R, 5V, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9V, 9Y, A4, A6, A7, AP, BV, BY, C3, C6, CE, CE0A, CE9, CM, CN, CP, CT, CT3, CU, CX, CY9, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, ER, ES, ET, EU, EX, EZ, F, FG, FJ, FK, FM, FO, FP, FR, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HI, HK, HK0/a, HL, HP, HR, HS, HZ, I, IS, J3, J5, J6, JA, JD/m, JD/o, JT, JY, K, KG4, KH0, KH2, KH6, KH8, KH9, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PY, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T5, T7, T8, T9, TA, TF, TG, TI, TK, TN, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, VE, VK, VK9N, VP2E, VP2M, VP2V, VP5, VP6, VP8/h, VP9, VQ9, VR, VU, XE, XT, XU, YA, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

3XY, GUINEA. Leo, 3XY1L, continues to be active. This past week he was mainly on 15 meters usually between 21280-21285 kHz (sometimes lower around 21208 kHz) as early as 1230z and as late as 1900z. He has also been heard on 7060 kHz after 2100z. QSL via UY5XE.

5H, TANZANIA (Help Needed). Paul/K1XM (5H1F) and Charlotte/KQ1F will be active and will try to have many radio club students at Dar es Salaam Institute of Technology (DIT) join them in this year's CQWW SSB Contest as 5I3A. They will be a Multi-Multi entry. Charlotte and Paul will arrive a few days early, set up stations, and start educating students as they have time. Paul figures they will need to teach a bit of geography, propagation, operating, contest rules, how to use the contesting software, strategy, pile-up handling, phonetics, etc.... They will have three radios with them. They will bring extra headphones and splitters, so they can operate with the students listening and then swap off and have a student operate while they listen. However, Paul is looking for other "stuff" and some ideas. They don't have enough headsets. Does anyone have a Heil headset they are interested in selling? This is a good opportunity to buy a new Proset + and unload your old set. They could also use a stand-alone voice keyer or two. He is also in need of some ideas for antennas. The existing log periodic is a good start, but he needs enough for six bands and three radios. Any aluminum must fit in a 4' golf club carrying case. He thinks they will be using the top of a building. Rotators are probably too heavy. If someone is interested in joining this operation, that is a possibility. The safari opportunities in Tanzania are incredible. Check out the following Web page to see some of the photos Paul and Charlotte took during their 2001 operation. They plan to leave the antennas and enough accessories that the TS-140S can be used as a contest station. Paul states, "There are a group of college students who were enthusiastic enough that they got licenses. They are young and learn fast. If our operation is succesful we hope that the DIT club will continue to operate in contests and the members will be comfortable getting on the air." If you can help Paul out with accessories/antennas, send an E-mail to: youngp@hp.com

5W, SAMOA. By the time you read this, look for operators 9A6XX, M0GMT, K9YO, N1SNB and 9K2RR to be active from now through August 14th. Their callsigns were not yet known as this was being typed. They will have two stations active with activity on 160-6 meters, SSB, CW, RTTY and PSK31. QSL via N1SNB.

7Q, MALAWI. Nick, G4FAL, will be on a family holiday and will be active during short periods as 7Q7NT from Blantyre, August 13-30th. Most of his activity will be mainly on 20 and 15 meters CW/SSB.

8Q, MALDIVES. Uwe, DJ9HX, will be active as 8Q7HX from Lhaviyani Atoll, now through August 16th. Activity will be on 40-10 meters. QSL via his home callsign. E-mail requests for bureau cards are welcome by sending QSO info to: dj9hx@darc.de

BQ9P, PRATAS ISLAND. The Chinese Taipei Amateur Radio League (CTARL) is planning to head back to Pratas Island in coming October. Paul, BV4FH, reports that they need 4 experienced foreign operator for this DXpedition. If anyone is interested, please contact Paul, BV4FH, as soon as possible for more details and freight schedule arrangements for Pratas Island. His E-mail address is: bv4fh@ms2.hinet.net

CO0, CUBA (Special Event). Look for special event station CO0R to be on the air from Santiago de Cuba City, August 9-10th, to celebrate the 150th anniversary of the birth of Cuban national hero Jose Marti. Activity will be on CW, SSB and digital modes (bands of activity were not provided). All QSLs will be sent automtically via bureau.

FG, GUADELOUPE. A group of Spanish operators will be active from here between September 23rd and October 9th. Activity will include an entry in the CQWW RTTY Contest. Before and after the contest, operators will be on SSB/RTTY/PSK31/SSTV. Operators will be EB2DTP, EA2RU and EA2RY. Look for them to sign homecall/FG or FG/homecall. QSL via EA2RY.

IOTA NEWS.....
EU-030. Ric, DL2VFR, will be active as OZ/DL2VFR from Bornholm Island (BO-001 for the Danish Islands Award) between now and August 15th. Activity will be mainly CW on the HF bands with some SSB and 6 meters. QSL via his home callsign, direct or bureau.

EU-123. Derek/GM0HLV and Chris/GM3WOJ will be active as GS2MP/P on Saturday/Sunday, August 16-17th, from the Island of Stroma, off the coast of Orkney (58.7N, 3.1W; IOSA ref. SC02, and Scotia ref. DI34). Operation will be from the Stroma Lighthouse (SCO228) to coincide with the Lighthouses weekend. Activity will be on 80-10 meters SSB/CW, including the WARC bands, with 2 separate stations active. No skeds or lists or "last two" callers please. QSL via N3SL.

EU-166. Operators IK8PGM/9, IT9EJE/P, IT9EJW/P, IT9HLN/P and IW9HDS/P were expected to be active this past weekend from Pietra di Patti (IIA ME-030). However, due to bad weather conditions this operations has been rescheduled for August 9-10th. Operator IW9HDS/P is expected to be on AO-40 and other satellites. The team was also try to activate IT9FCC/P from Scoglio di Patti (EU-166, new one for the Italian Islands Award: ME-038). The Web page for this operation is at:
http://www.printed.it/patti.html
QSLs are via IT9EJW: Alfio Bonanno. P. O. Box 18 - 95028, Valverde (CT), Italy (or via bureau).

JW, SVALBARD. Operators LA7QI and LA8AW will operate from Spitsbergen as JW7QI and JW8AW, respectively, from September 16-22nd. Also, look for them to be in the SAC CW Contest as JW8D. QSLs for JW7QI and JW8D are via LA7QI and JW8AW via LA8AW, bureau or direct. Remember, that SASE requires 2 USD or 1 IRC (new).

JX, JAN MAYEN (Update/Op Cancelled!). Ove, LA2IJ, informs OPDX that he is sorry to announce that his trip to JX-land has been cancelled because of transportation problems. The plane has not been able to land at Jan Mayen airfield the last two weeks due to thick fog. He states, "I did see the island quite well on Thursday, but the plane could not come down... It is almost sure that I will not go to JX this year, but hope to be able to go next year." Ove also states that there are only eight (8) flights going to Jan Mayen during one year. His possible next trip will be announced when plans are final. Ove's visit to JX is not a DXpedition; he has work to do and only operates ham radio in his spare time.

KG4, GUANTANAMO BAY. Cory/N1WON and David/WA4ET will be active as KG4CM and KG4DP, respectively, from Guantanamo Bay, Cuba (NA-015), from August 14-21st. Activity will be 80-6 meters, SSB, RTTY and PSK. Please QSL KG4CM to N5FTR and KG4DP to WA4ET. Reminder: Please do not send cards for this event to the bureau. There is no KG4 bureau for Guantanamo Bay. Please QSL as directed to receive QSL cards.

KH9, WAKE ISLAND. Jake, N6XIV/KH9, was quite active this past weekend on 40 meters. He used several frequencies (7085, 7227-28, 7231 and 7243 kHz) between 7000-0845z. QSL via K2FF.

LIGHTHOUSE ACTIVITY.....
Operators from Gainesville, FL, area ham clubs and the University of Florida will activate the Cedar Key Lighthouse (WLH# 2741, USA #745) on Seahorse Key (IOTA NA-076) in Levy County using the call W4L during the International Lighthouse/Lightship weekend, August 16-17th. There will be SSB/CW activity mainly on the HF bands with a possibility of some 6 meters. This is only the second time that a radio operation has been allowed from the Cedar Key lighthouse at Seahorse Key which is a closed wildlife sanctuary. QSL via W4DFU: University of Florida, Box J-12 JHMHC, Gainesville, FL 32610 USA.

Look for Dov, 4Z4DX, to be active during the International Lighthouse/ Lightship Weekend (August 16-17th) as 4Z4DX/LH from Jaffa Lighthouse (ARLHS ISR-005, Grid Loc. KM72). QSL via his home callsign (QRZ.com).

MOUNTAIN POLAR RADIO EXPEDITION. The Russian Robinson Club (RRC) plans to be active as R3RRC/9 from August 14-25th, from the Polar Ural Mountains (RM-02-01 for Russian Mountains Award). Their activity will be on HF and VHF bands. For more information regarding Russian Mountains Award, please visit the Web page (in Russian) at:
http://www.hamradio.ru/rrc/AWARDS/rma.htm
QSL via UA3SGV: Andy Blinushov, P.B. 180, Ryazan-35, Russia, 390035.

PACIFIC OPERATION (H44/H40/P29). Dan, JA1PBV, will be active as H44V from Guadalcanal (OC-047), Solomon Islands, between August 5-9th. He will team up with Kazuo, P29KM, as H40V from Temotu Province (OC-100), August 11-16th. Dan will also sign P29SI from Port Moresby, Papua New Guinea (OC-034) before going back to Japan around August 20th.

QSL INFO AND NEWS.....
QSL 5B4AGM via RW3RN (only for 2003 IOTA Contest). RW3RN's address

is: Alex Kuznetsov, Box 57, Tambov-23, 392023 Russia.

A photo gallery of the recent CS4B IOTA DXpedition to EU-040 is now available at: http://www3.ocn.ne.jp/~iota/newpage63.htm

Information, pictures and logs of the IL7M EU-050 operation are now available at: http://www.mdxc.org/il7m/index.htm

Nilay, TA3YJ, informs OPDX that she has sent out QSL cards for TA3YJ, TA3YJ/0, TA3YJ/3, TA3YJ/4, TA3YJ/LH, SV1/TA3YJ, LZ2/TA3YJ, TA3J, TA3J/0, TA3J/1, TA3J/3, TA3J/4, TA3J/LH, SV1/TA3J, LZ1/TA3J, LZ2/TA3J, YM3BU, YM3ATA, YM3SV, YM75TA, YM21TA, YM3LZ/WPX2000 and YM3LZ/WAE2000 to the QSL Bureaus of Austria, Belarus, Canada (RAC National Incoming QSL Bureau), Denmark, Finland, Georgia, Greece, Israel, Hungary, Lithuania, Norway, Poland, Serbia & Montenegro, Slovakia, Sweden, Switzerland and U.S.A. (W1, W2,W3, W4, WA4, W5, W6, W7, W8, W9, W0, KH6, Alaska, Puerto Rico and US Virgin Islands) direct July 29th.

SV5, DODECANESE. Uli, DJ9XB, will be active as J45XB in the CQ/RJ Worldwide DX RTTY Contest (September 27-28th) as a Single-Op/Single Band (15m) entry. QSL via DJ9XB.

T33, BANABA ISLAND (Update). An international team of 20 operators will be active as T33C during the first two weeks of April 2004 (April 4-16th). They will have 6 HF stations on the air (3 CW and 3 SSB), plus a separate 6 meter/AO-40 and separate HF digital mode station. Activity will be on 160-6 meters, satellite, CW, SSB, RTTY, PSK and some SSTV. They have arranged a suitable vessel named "Te Toobe" to take the equipment and them safely to and from Banaba Island (a 2 day trip from Tarawa, Kiribati). The T33C license and landing permission has been granted. Operators are: Frank/DL4KQ, Greg/DF2IC, Bernd/DL5OAB, Rob/PA5ET, Ronald/PA3EWP, Alan/AD6E, Bill/AK0A, Richard/N6KT, Flo/F5CWU, Bob/N4CD, Eugene/RK3AD, Tom/GM4FDM, Hrane/YT1AD, Krassimir/K1LZ, Doug/N6TQS, Jeff/K1ZM, Vojislav, Will/K6ND and Andrea/IK1PMR. QSL Manager will be Rob Snieder, PA5ET. Some of the team members will arrive early and enter the CQ WPX SSB Contest from T30-land in March 2004. For updates, visit the Web page at: http://www.dx-pedition.de/banaba2004
Contributions may be made to the "Island DXpedition" fund via:
1) Bob Voss, N4CD, 3133 Charring Cross, Plano, TX 75025 USA
2) Flo Moudar, F5CWU, 25 Rue Du Castel Salis, 37100 Tours, France
3) Via wire-transfer, ask Flo, F5CWU at: f5cwu@qsl.net
4) Individual contributions can be done using PAYPAL:
Account: pa5et@muurkrant.com

V4, ST. KITTS AND NEVIS. Joe, VE3BW, will be active as V47CA from St. Kitts (NA-104) between October 18-26th. His activity will include an entry in the CQWW SSB Contest (Oct 25-26th). QSL via VE3BW, using the address on QRZ.com.

VP5, TURKS AND CAICOS ISLANDS. Matt, IK2SGC, will be active as VP5/IK2SGC from North Caicos Island from August 9-19th. Activity will be on 160-10 meters SSB and 6 meters. QSL via the bureau.

YI, IRAQ. Steve, OM3JW, informs OPDX that his son Mike, OM2DX, has obtained from the Iraqi PTT (thanks to Fred Matos, W3ICM) his personal callsign YI/OM2DX and the special callsign YI2X only for contests. He will be active for the next three years from the Slovak Ambassy in Baghdad. Mike has with him two transceivers: TS-850SAT and IC-706. Also, a power amplifier, L4B, is on the way to Baghdad. He is currently only using 100 watts and a FD4 antenna. Mike has also erected a 20m high vertical for 80 and 160 meters and a 8 element LP for 20-10 meters. He will be active on CW/SSB/RTTY/PSK31 on 160-6 meters. He was heard over the past week on 40/30/17 meters CW between 1345-1800z. QSL for both callsigns (also his activity as YI1BGD) is via his father OM3JW.

YI, IRAQ. Plenty of activity from here over the last week. Willie, YI/KV4EB, provided some SSB QSOs on 17 meters and some SSTV pictures on 20/15 meters. Activity is on at various times. QSL via K0JN. Operator Abel, YI/KC0LEK, near Baghdad was active mainly on 15 meters SSB (between 21250-21302 kHz), again at various times. Also, active was YI/AD8DY, YI/NG5L, YI/SM7WZA, YI1EM and YI1BGD.

Z3100, MACEDONIA (Special Activity). Look for stations from this country to be active using the special prefix "Z3100" during the month of August to celebrate 100 years of Macedonia. Here is a list of some of the operators that will be active: Z3100A (Z31A), Z3100B (Z31B), Z3100C (Z32UC), Z3100D (Z32DY), Z3100E (Z32AU), Z3100F (Z33F), Z3100G (Z33A), Z3100I (Z31CZ), Z3100K (Z34M), Z3100M (Z35M), Z3100O (Z36A), Z3100R (Z33AA), Z3100S (Z32ZM), Z3100T (Z31CQ), Z3100W (Z35W), Z3100X (Z32XX), Z3100Z (Z33Z), Z3100IL (Z37M), Z3100KR (Z32BF) and Z3100MK (Z37FAD).

ZF, CAYMAN ISLAND. Steve, K8FFO, will be active as ZF2FF from Grand Cayman (NA-016), August 5-11th. Activity will be on 20 and 17 meters CW/SSB. QSL via his home callsign.

It's clear you are another DONKEY which use dx's windows for chatting
and discuss about bullshit; hams like myself do not expect that a
DONKEY do accept or not a BandPlan. You are a DOnkey, you'll stay in
this status till the end of your days.
Thanks for the grammar's analisys. You can't also figure out which is
a keyboard typewriting from a grammar's mistake. DONKEY!

And also the other which noticed my "nationality" is a Donkey. I'am
Spanish. The bandplan's destroyer is an Italian's Donkey.

Ignacio

Y'know... I wonder if all the "windows" are getting out of hand?? They start as a good thing - certainly I wouldn't want people routinely working SSB on 14.010, and a valid argument can be made for a window on 160. (an argument can also be made against it, and I'm not going to wade into that one!)

Seems every time I get on the air, I'm running afoul of someone's special window. "No SSB in the AM window". "Hey, you're on the WAS net frequency". "NO CW ON 7080 THIS IS RTTY BAND". "tweedletweedle" (oops, I forgot you can't use SSB on 14.230)

Indeed, we've reached the point that some hams would rather another ham shut off his rig and watch TV than let him operate on a *completely empty* frequency for a purpose other than that anointed by the users who are(n't) there.

We're rapidly approaching the point where the entire band is reserved for special purposes & modes. If you just want to call CQ and chat with whoever answers - well, I guess you'd better get into 2m FM because that's going to be the only place you won't get run off by the band police.
==========
I suppose "DX Windows" are the latest extension of the "cluster mentality". People don't want to have to look for the DX - they want to be told where it is. With a DX window you don't even need to be told - you know the DX will be on 14.195.

Comment On This News Group

There is a lot of good stuff here, but also an incredible amount of junk.

Another place to reasonably discuss Amateur Radio is at the Yahoo Groups.

http://groups.yahoo.com/

Search for "Amateur Radio" get over 1200 places to discuss your interests, mostly without flames, insults, off-topics, false information, and the stupidity that is prevalent here.

Lots of Elmers have left here and are now on Yahoo Groups.

Just FYI

1703. EP2MD (1997) QSL?

Newsgroup: rec.radio.amateur.dx
Date: 2003-08-04 15:14:47 UTC
From: Doug Smith W9WI <w9wi@invalid.invalid>
Message-ID: <3F2E7866.3040909@invalid.invalid>
Source record: 9537

Going back through my records, I find I have a August 1997 QSO with EP2MD that I never found a QSL route for.

Googling for EP2MD returns only an entry in a list of former Iranian licensees which indicates his manager was OD5GH in 1978. A search for OD5GH only returns the same list.

(not that I expect the same manager to be valid 25 years later! - in any case this list contains many Americans as holding Iranian licenses, I've my doubts the 1978 EP2MD is the same one I worked in 1997)

Any ideas?

Isn't this nice?? From the Yahoo Amateur Radio DX Group

An email list for the discussion of DX related Amateur Radio subjects.
Membership approval is required to avoid signup by spammers. If your email
address does not indicate a callsign please email the owner a few words
describing and confirming an interest in amateur radio DX.

dx-list-owner@yahoogroups.com

No commercial advertising. Limited private sales allowed.
No profanity. No derogatory comments.
No personal attacks. Attack the subject, not the messenger.

Repeated messages not containing DX or amateur radio related content will
result in the sender being moderated or removed from the list.

Opinions about subjects welcome. Opinions about other list members are not.
If you are looking for other hams to argue with this isn't the place.

The Moderator comment ----- YES!

The Yahoo Group for Dx has 832 members !
A lot more than here it would appear.

It is moderated and requires a lot of hassle to join and there is some
popups as you read messages -- BUT wow is it worth it -- some really great
posts there about Amateur Radio DXing AND ONLY DXING!

Bye - gotta go and check in to Yahoo Groups for DXing

Yeah I know about the door hitting me on the way out - so don't bother with
the flames.

The Amateur's Code

The Amateur's Code was written by Paul Segal, W9EEA, in 1928:

The Radio Amateur is:

CONSIDERATE . . . never knowingly operates in such a way as to lessen the pleasure of others

LOYAL . . . offers loyalty, encouragement and support to other amateurs, local clubs, and the American Radio Relay League, through which Amateur Radio in the United States is represented nationally and internationally. **

PROGRESSIVE . . . with knowledge abreast of science, a well-built and efficient station and operation above reproach.

FRIENDLY . . . slow and patient operating when requested; friendly advice and counsel to the beginner; kindly assistance, cooperation and consideration for the interests of others. These are the hallmarks of the Amateur spirit.

BALANCED . . . radio is an avocation, never interfering with duties owed to family, job, school, or community.

PATRIOTIC . . . station and skill always ready for service to country and community.

** In 1928, the ARRL was probably the only significant national radio club in the world. Today, almost every country has their own. The intent of this point is loyalty to your own national radio club, which represents your respective country.

I notice on my ICOM band plan chart that 28.4 MHz is a designated calling frequency in the 10 meter band. What are the customary calling frequencies for voice and CW on the other bands? I recently upgraded to Extra but have seldom used my HF privileges over the past 6 years.

Hello All,

Kenwood has made a new transceiver.

It has HF & 50Mhz.

There are two models: 100 watt & 200 watt.
The 100 watt model has a built in antenna tuner.

A picture, and information is to see at:

http://www.qsl.net/pd0rkc

73's Cor (PD0RKC).

Amateur Radio Newsline™ Report 1355 – August 1 2003

A NOTE TO THOSE WHO ONLY “READ” AMATEUR RADIO NEWSLINE(tm)

For those of you who only know of the Amateur Radio Newsline (tm) as a text newsletter we would like to invite you to listen to the audio version. This Amateur Radio Newsline (tm) script is actually written for the “spoken word.” It is recorded each by professional broadcasters and is available for private listening or rebroadcast over your repeater. Two methods of delivery are available: FTP MP3 or dial-in telephone. Please visit our website at http://www.arnewsline.org for a list of telephone numbers (you have to pay your own long distance charges) and links to our voice newscast. On site free FTP Downloads are available at our site by clicking on the newscast number at the top of the page.

de
The Newsline Production Team

Amateur Radio Newsline report number 1355 with a release date of Friday, August 1 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. Amateur Radio helps solve a murder by tracking down one of its own. Get to know about the ham radio heroes involved in the hunt for a cop killer on Amateur Radio Newsline report number 1355 coming your way right now.

(Billboard Cart Here)

**

ENFORCEMENT OF A DIFFERENT KIND: AMATEUR RADIO HELPS HUNT HAM WHO KILLED MICHIGAN COP

Hams in Michigan were called on to help track down a cop killer after what should have been a routine arrest became a grusome homicide scene. It happened on July 6th. Amateur Radio Newsline’s David Black, KB4KCH, is here with the rest of the story:

--

Never in Michigan's ham radio history has there been a case like Scott Woodring's. It began July 6th. That's when Woodring, KC8JNG, a member of the

Christian Identity movement and described as a survivalist, shot and killed a Michigan state police officer. It happened while Woodring was being arrested for solicitation of a minor.

A stand-off ensues and lasts nearly a day. During a law enforcement shift change, Woodring manages to escape, triggering an extensive manhunt throughout western lower Michigan. That's when ham radio operators became involved, since it was suspected that Woodring had been using amateur radio equipment to communicate with other members of his group.

James Wades, WB8SIW, is Michigan's RACES Officer and Section Emergency Coordinator:

--

Wades: “I directed the EC for Newago Co. to establish an intercept peratio in the area and monitor seldom used frequencies in and about he VHF 2 meter band. And, additionally, we sent out a broadcast nouncemnt to selected areas to selected area RACES members thrughout Michigan, essentially asking them to listen for conversations between Mr. Wodring and whomever else he might speak with.”

--

That paid off. A ham in Holton, Michigan reported monitoring Woodring and another operator talking on the air. The intercept was reported to state police they then asked government agencies including the FCC to provide direction finding assistance to find Woodring. But it was a Friday night and police couldn't get any response from the federal agencies. So Wades says investigators turned to radio amateurs for help:

--

Wades: “We deployed amateur radio teams from several counties in the area, and had pretty much a continuous radio direction finding occurring throughout the weekend, with teams from from Kent, Ottawa and Musquogen Counties. We also had teams on standby in Kalamazoo County as well as the Civil Air Patrol team – which weren’t utilized, but it was reassuring to know that they were there”

--

Hams and the police knew the general area where Woodring was believed to be hiding. Wades says it was an eyewitness who ultimately led to Woodring being found:

--

Wades: “Mr. Woodring was discovered through a tip from a citizen who saw him essentially taking shelter in a non working vehicle. When Michigan state police officers approached, he leveled an assault rifle at them and he was subsequently shot to death when he refused t comply with orders or lower the rifle.”

--

Wades says police were hesitant at first to work with radio amateurs. But he says the hams' efforts made a powerful and positive impact with law enforcement agencies.

--

Wades: “When all was said and done the feedback has been incredabally positive. Tremendously good comments about the professionalism and the skills of the radio amateurs involved. And basically I think that they were somewhat – almost shocked at the capabilities and the skill level of our ARES and RACES members in Michigan, which, of course was highly complimentary”

--

Around 40 radio amateurs took part in the effort to help find Woodring. Wades says the hams involved coordinated their work with police carefully, even establishing a dress code for hams reporting on scene with investigators. The professionalism Michigan hams showed has given law officers a new appreciation for the kind of help radio amateurs can provide when it's needed.

From Birmingham Alabama, I’m avid Black, KB4KCH, reporting for the Amateur Radio Newsline.

--

In all, RACES members provided 494 staff-hours to the man hunt. Most of this was contributed during the 36-hour period when radio direction finding activites to locate Woodring were being conducted. (ARNewsline(tm) from lead provided at www.qrz.com)

**

THE FIGHT FOR OUR SPECTRUM: HAM RADO VS. BPL

If you think that the term Broadband Over Powerlines and its acronym BPL will never afect you, guess again. BPL could effectively spell and end to ham radio as we know it. This, if it is ever approved by the FCC and popularized across our nation.

Just how real is the chalange to the survival of the Amateur Radio Service? ARRL Southwestern Division Director Art Goddard, W6XD, gave some graphic details at last weeks Fort Tuthill Hamfest in Arizona based on test data collected by Ed Hare, W1RFI, of the ARRL Lab:

--

Goddard: “If you are an engineer, anywhere from 33 to 63 decibels increase in the noise level thatr you will see at your reciever due to BPL run in the power lines in your neighborhod. If you are into S-Meter readings, thats somewhere between an S-6 and 10 over S-9.”

--

For those unaware, Broadband over Powerlines is a scheme to give consumers and businesses high speed Internet connections using the existing power distribution grid. This would put the power providers in the position of also being broadband internet providers as well. The problem is that powerlines are not shielded. They will act as much like giant antennas as they will a closed carrier of the broadband connection. In other words, whatever is on the power lines will be radiated and heard by your ham band reciever. And Art Goddard says that the Broadband Over Powerline signals will occupy the spectrum from 2 through 80 MHz, meaning every band from 75 meters through 6 meters will be affected.

According to Goddard, BPL has the backing of the White House which views the increased use of unlicensed devices as being good for the U-S economy. He also notes that the FCC – which is supposed to be neutral and regulating in the public interest, is – in this case -- actng like cheerleaders for the proposed service.

Goddard says that this is an issue that the ARRL is keeping a very close eye on. He also indicates that the League may soon be asking ham radio operators to lend their voice in opposition to BPL. (ARNewsline(tm))

**

RESTRUCTURING: NCVEC FILES TO END CW TESTING IN THE USA

The National Conference of Volunteer Examination Coordinators has filed a Petition for Rule Making before the FCC to end Morse testing in the United States. In its July 29th request, the NCVEC asks the FCC for an immediate end of CW testing of applicants.

The NCVEC request is based primarily on the action taken in Geneva at last months World Radiocommunications Conference. At that time, Morse testing as a world standard was abolished, leaving it to individual nations to decide whether or not to continue to administer CW exams.

The NCVEC petition concurs with the WRC findings. It notes an appearance that most of today’s radio amateurs want to communicate using voice. Because of this, the NCVEC says that it makes no sense from a regulatory standpoint to require hams to be Morse proficient when the greater majority of radio amateurs show no desire to use the mode. The petition also notes that the future of the hobby now encompasses many new modes that were undreamed of only a few short years ago. It adds that while manual telegraphy is a noble part of Amateur Radio’s past, it is no longer the services prime emission mode.

The NCVEC approach will still requires all applicants for an Amateur Service license or upgrade to pass the current written exams. Only Morse testing would be eliminated.

As we go to air no Rule Making designation has been assigned to this request by the FCC. The full text of the petition can be found on our website at www.arnewsline.org (ARNewsline(tm) from NCVEC release)

**

HAM RADIO TESTING: QPC RECALLS QUESTION

Also from the National Conference of Volunteer Examiners Coordinators word that its Question Pool Committee of has withdrawn question T5B04 from the Element 2 Question Pool. This, effective July 27th. This question is withdrawn due to the changes in Part 97 of the Amateur Service rules dealing with the new 60 Meter amateur allocation. (NCVEC)

(5 sec pause here)

**

HAM SPECTRUM: ARRL & CQ PRESENTS A PRIMER ON 5 MHZ

And speaking about 60 meters, want to know just about everything there is to know about how to operate legally in this new 5 MHz spot frequencies? Walk, run or drive to your news stand and buy a copy of the August issues of both QST and CQ Magazines. Then go home, settle down and read the articles titled 60 Meters Frequently Asked Questions by Rick Lindquist N1RL and Ed Hare W1RFI in QST and Getting Ready For 60 by Gordon West, WB6NOA. Both are a wealth of information on how to approach this rather specialized allocation and handily compliment one another. We asked Gordo to explain what readers will find in his:

--

West: “One of the things that my CQ Magazine article talked about was the Amateur frequencies And tuning in. There was allot of confusion about what exact frequency one uses for upper sideband on the 60 meter band. As long as everybody remembers that 60 meters – 5 MHz – point 5 -- all of the upper sideband frequencies end with point 5.”

--

And why did her write the article?

--

West: “When I first heard about the band it immediately came to mind as channelized operation that many new hams are not used to. Well, growing up on 10 meter FM as well as 6 meter FM, I knew what channelized operation was all about. And the key word is “sharing.” There’s no QSY'ing – at least not easily on the 60 meter band beyond the 5 channels, so its going to be up to all hams to sort of take turns in using this exciting 60 meter – 5 MHz band.”

--

Where Gordon takes the story telling approach, Lindquist and Hare present their material in pure Question and Answer form. A style of writing that computer

enthusiasts call a FAQ. That's an acronym for the words "Frequently Asked Questions" and the answers that they provide is fact filled, precise and right to the point.

Taken together, "60 Meters Frequently Asked Questions" and "Getting Ready for 60" are the most complete operating guide for the 5 MHz band penned to date. Hams contemplating operation on the five channels that make up the 60 meter allocation would be well advised to read both before hitting the transmit switch.

For more information about subscribing to CQ, visit www.cq-amateur-radio on the world wide web. You can join the ARRL, support its work and begin receiving QST by signing up at www.arrl.org. (ARNewsline(tm))

**

THE WAR ON TERROR: TWO HAMS KILLED IN IRAQ

Two recent casualties of the war in Iraq were amateur radio operators, one American and one from Sri Lanka. The ARRL Letter reports that Specialist Jon Fettig, KCZ0HSQ, of Dickinson, North Dakota, was killed in an ambush on July 22nd.

The following day, Nadisha Yassari Ranmuthu, 4S7NR, an International Red Cross aid worker, was killed and his Iraqi driver was wounded after their vehicle, marked with the Red Cross emblem, came under fire south of Baghdad. Ranmuthu was 37 and well-known in the Sri Lankin ham radio community. (ARRL)

**

ENFORCEMENT: HAM TOLD HE MUST RESPOND TO FCC QUERRY

A California ham has been told that he had better respond to an earlier FCC letter to him regarding a pair of uncoordinated repeaters that he allegedly operates. Otherwise it could cost him his ham ticket. The agency's Daryl Duckworth, NN0W, explains:

--

Duckworth: "The Enforcement Bureau has sent a warning letter to WA6SEK, Thomas De Lasaux, of Stockton California, concerning uncoordinated repeaters on 224.660 Mhz and 441.275 Mhz. There has been no response to a letter of May 5th where he had 20 days to reply. He is being afforded an additional 20 days to respond."

--

According to Duckwoth, if there was no resolution by July 25th, the agency planned to initiate enforcement action against WA6SEK's Amateur Service license. Its now past that date and we are awaiting word from the FCC as to wheter or not De Lasaux has filed the required reply. (FCC, RAIN)

**

ENFORCEMENT: TRUCKING COMPANY WARNED ABOUT UNLICENSED 10 METER OPERATION

Also receiving a letter from the FCC is the Tidewater Transit Company, Inc. of Kinston, North Carolina. This one warns the company to stop using the 10 meter ham band for its communications or face some rather severe consequences.

In his letter to Tidewather, the FCC's Riley Hollingsworth notes that information before the Commission indicates that a 2002 Volvo truck belonging to Tidewater and bearing North Carolina license plate LK 4130, was the source of radio transmissions on the Ten Meter Amateur Radio band on July 8th. This while it was driving on Interstate 20 near the city of Lexington, South Carolina.

The Letter warned Tidewater that continued unlicensed operation could bring with it a fine of up to $10,000. The owners of Tidewater Transit were also instructed to contact Hollingsworth to discuss the matter with him. (FCC)

**

RESCUE RADIO: HAMS TO THE RESCUE AS CELL PHONES FAIL

Interlinked emergency repeaters played a key role in providing communications during the recent Arizona wildfires.

As learned at last weekends Ft. Tuthill Hamfest, radio amateurs in Navajo County set up repeater links to allow contact between the Red Cross communications center and a number of evacuation sites. This, after it was found that cellular telephone coverage across the area was inadaquite.

The hams stepped in when the walkie-talkie feature of the cellular telephones failed to operate as advertised. The reason appears to have been the small number of relay sites available in the isolated areas where the fires were burning.

The hastilly assembled Amateur Radio relay system along with existing high level Amateur service repeaters are reported to have performed flawlessly. This made possible an ongoing exchange of vital evacuation information. (ARNewsline (tm) from information gathered at Ft. Tuthill Hamfest)

**

RESCUE RADIO: E-911 KIND OF ON HOLD

A lack of funding from cash-strapped state and local governments appears to be slowing the rollout of enhanced 911 services. And in some areas it has put the new wireless emergency phone location service on what appears to be an indefinite hold.

--
Under FCC regulations, wireless companies were required to respond to 911 center requests within six months by providing technology that can locate any individual on a given wireless phone networks who is using a phone equipped to gather information from the global positioning satellite system. This technology lets emergency operators locate cell phone users in need of assistance, but only one in ten emergency call centers has access to it.

But John Melcher, who is the president of the National Emergency Number Association says that moneys earmarked for Enhanced 911 are being spent on other needs. In a recent press statement Melcher charged that some states have diverted millions of dollars
in Enhanced 911 funds collected from consumers and have used the money to subsidize budget shortfalls. This says Melcher puts the public in danger, adding that moneys earmarked on customer billing for Enhanced 911 services should be spent only on Enhanced 911 and nothing else.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

The FCC set specific deadlines for implementing this new service back in 1966. To date, many providers have yet to meet that implementation goal. (Published news reports)

**

RESCUE RADIO: THE INTERNATIONAL AREN NET

Still with rescue radio and emergency communications news, word that the Irish Amateur Radio Emergency Network takes to the air for its regularly scheduled drill session the first Tuesday of each month. The net is at 21:45 local Ireland time. Thats pretty close to UTC, with the net operating on 7 point 043 Mhz on SSB. (Q-News)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

EMERGING TECHNOLOGY: WI-FI SPEED INCREASED 4X

The most widely used wireless local area network protocol, IEEE Standard 802.11, also known as Wi-Fi, was extended last month to make it four times faster. The CGC Communicator reports that the new standard, IEEE 802.11g transmits data at up to 54 Megabits per second. Thats up from 11 megabytes per second as was called for in Wi-Fi standard 802.11b. (CGC Communicator)

(DO NOT READ: CGC)

**

INTERNATIONAL - ASIA: NON HAMS INVADING THE 7, 10 AND 14 MHz HANDS

The increasing use of more frequencies on various ham radio bands by the Indonesians and other South East Asian non amateurs for their personal or business traffic, is becoming a very serious problem. Q-News reports that the

Indonesians are using the lower 40 kHz of 40 meters, and frequencies around 14 point 100 MHz in the 20 Meter band most of the time.

Nor have they spared the 10 MHz allocation. There unlicensed oprators are regularly heard in the 10.0 to 10.1 MHz segment which primarily carries international air traffic control communications.

Q-News notes that this is a very serious situation. One which could endanger the lives and safety of air travelers in ITU Region 3 and a situation that needs to be to be dealt with quickly at the highest levels of international diplomacy. (Q-News)

**

INTERNATIONAL - UK: BBC HELPS THE BLIND

The British Broadcasting Company is playing a crucial role in developing new radio equipment that could help increase number of visually-impaired people working at the organization. Across the UK, BBC local radio stations are converrting from analog to digital equipment. The digital equipment is designed to make life easy for full-sighted broadcast journalists, using a visual touch-screen system, which is why it needs to be adapted for visually-impaired people.

Now comes word that Claire Jennings, who is the the BBC’s Disability Advisor for Technology, has been working alongside technology company Calrec. This, to design a digital radio broadcast mixing console that is user-friendly for visually-impaired radio producers

The BBC has spent the past few months working with Calrec to adapt the broadcast desk and with BBC Technology to extend the touch-screen control system so that it can convert text into speech and be controlled using a standard keyboard. As well as controlling sources to faders on the Calrec, the BBC system can control most other hardware in a similar manner.

The entire story may be found in cyberspace www.bbctechnology.com/newsarchive4.htm. (Media Network)

**

SPACE: NASA TEAMS WITH LOCAL LIBRARIES TO DELIVER -- SPACE

NASA and the American Library Association have partnered to create a one-of-a-kind interactive space research exhibit. This, as part of a new program called NASA @ your library.

The unique exhibit will tour 120 public libraries in five regions across the nation for the next two years. It will feature special presentations specifically created to expose people of all ages to NASA research in the areas of health, home and transportation, agriculture and environment, and commerce.

The program was recently launched at the Enoch Pratt Free Library in Baltimore. NASA @ your library was created to inspire more participation at public libraries, raise awareness and encourage interest in science. (NASA)

**

CONTEST CALENDAR: FISTS C2C IN SEPTEMBER

Mark September 13th and 14th on your calendar for the third outing of the annual Fists Coast to Coast contest. This year the contest will run a full 24 hours beginning at 5 P.M. Pacific Daylight Time on September 13th and concluding at 5 P.M. on the 14th. That corresponds 0000 to 2400 UTC on September 14.

This year the rules are easier to understand and the sponsors say that there is the potential for higher scores due to the use of multipliers. The URL for rules and awards is complex and appears in the print edition of this report. If you have questions, please e-mail them to Paul Beringer NG7Z at fistsc2c@yahoo.com. On-line information is at www.tomochka.com/k7fff/fnw_c2c03.html. (FISTS)

**

DX

In D-X, word that two separate groups will be operating from Swaziland through the 3rd of August. K4SV and VA7DX will be active as 3DA0SV and 3DA0WC. Four South African operators will be on as 3DA0DX between the same dates. QSL each group as directed on the air. (GB2RS)

**

THAT FINAL ITEM: ARNEWSLINE TAKES YOU TO A HAM RADIO BALLON LAUNCH

And finally this week, take a listen to this:

--
“15,790 feet. Course 44 degrees moving at 10 miles an hour.”
--

That’s the report of one of the controllers tracking a high altitude ham radio balloon launch that took place Saturday, July 26th at the Fort Tuthill Hamfest just outside of Flagstaff Arizona.

The launch was sponsored by hams belonging to Arizona Near Space Research. Brian Bingham is a Physics teacher from Deer Valley High School in Glendale, Arizona, who came out to take part in the launch. He says that many of those assisting are also educators who want to bring space a bit closer to their classrooms:

--
Bingham: “Most of the people you see out here helping are that group and a group of Arizona high school teachers that are going to be taking on some of the balloon launches. They will have teams from their schools do balloon launches through the NASA Arizona Space Grant.”

--

Bingham, who was a radio amateur many years ago described the system being readied to be sent aloft:

--

Bingham: “You can see a small package down here. It was built by one of the teams from a workshop and contains temperature sensors, humidity sensors, a small still camera, solar cells all in something just a little over a pound in weight. It has telemetry equipment with GPS position via satellite and transmits it back so that we an track it on the ground and recover the equipment.”

--

And how high will it all go?

--

Bingham: The balloon will go up to somewhere in the neighborhood of 100,000 feet. The balloon will also swell to somewhere about forty feet in diameter before it finally bursts. And then the parachute will bring it back down to Earth.

--

Brian Bingham says that his students will soon be choosing a project of their own to launch to the edge of space on a future balloon flight. It will be another educational experience made possible through the cooperative efforts of NASA, the educational community and ham radio. (ARNewsline(tm))

You forgot to mention the "nets" on, for example, 20M SSB :-)

Almost impossible to call CQ anywhere without someone complaining
that you are "on a net frequency", "near a net frequency and causing QRM",
"on a frequency where there WILL be a net real soon", etc.

Had an interesting experience a year or so ago on the high end of 15M.
A bunch of us had been chit-chatting, or at least had used that frequency
to gather several times a day for several years. A group of hams decided
to establish a "net frequency" about 3 KHz higher. I'd have my receiver
on that "gee we might be here" frequency for hours some days, and never
hear anything ... including that "net" 3 KHz up. But just try and transmit!
2 or 3 of those "net" folks would jump all over you "I could hear your
splatter up on our net frequency and you gotta QSY right now!". If you
didn't QSY they would swear, play music, tune up, etc. We QSYed.

> We're rapidly approaching the point where the entire band is reserved
> for special purposes & modes. If you just want to call CQ and chat with
> whoever answers - well, I guess you'd better get into 2m FM because

Ten meters should be pretty good in this respect in a year or so :-)

Perhaps we could set aside some specific channels as "DX only".
Oh ... no ... wait ... that's a DX Window isn't it ...

Worked Jack, VY0/W2NTJ, on 14160 SSB at 23:08Z 5 Aug 03;
he's on NA-173, Long Island. He said it's a fairly rare
one to be active, if I understood him right. QSL via
VE3LYC, who has the op listed in his QRZ.com page.

I've never played with IOTA stuff but Jack was CQing
with no answers while I was driving to the local ham
club (Raleigh ARS, Raleigh NC) meeting--worked him
on the way and finished chatting in the parking lot.

Folks, forget all the petty arguments about CW testing, band plans, contesting vs ragchewing, the ARRL's policies.

Go to http://www.arrl.org/news/stories/2003/08/08/2/?nc=1// and check out the video about interference from BPL. The way things are going, this *is* going to happen.

Be *very* worried.

Hi,
This Charlton, on Long island (VE).
New IOTA have been added on my download column,
http://www.astrosurf.com/lombry/qsl-download.htm
They included deleted and new ones, as well as link to the reference website
(in this case RSGB I think)
Total is now 1192 islands (including some deleted and new without
references)

Another thought- Since the government in the US is somewhat worried about what the average joe can listen to on a $60 shortwave receiver, including opinions and views other than what they put forward, maybe they WANT the interference to be there to block these 'new ideas' from coming in to the US.

Message-ID: <17ww6j8ede85v$.wvhxm385qjzl.dlg@40tude.net>
Source record: 9462

Hi,

Starting August 4, 2003, Hams in The Netherlands may use new prefixes with shorter suffixes.

All prefixes from PA till PH are available now, suffixes may be 1 to 3 characters long.

On my site you can find a complete list of all Dutch prefixes, and a listing of all new callsign with the old callsign.

You can find all this on http://www.pg7v.net/english

Well lets stir it up.

When you work an exceptionally weak DX station, do u use ESP?
Is that Extra Sensory Perception or Expected Sensory Perception ??

Is the best filter between your ears ??

Can u really copy CW right down into the noise -- if so why??

Have you ever copied SSB right down into the noise ?? If not why not ??

Do you listen to DX on a Speaker. Are headphones better ??? Which ones --
Com Phones or Hi-Fi

Do you keep the RF Gain at Max?
Or advance the audio gain, then bring up the RF Gain control for APPARENT
improved S/N ratio. Huh how does that work??

Do you use fast AGC or Slow when DXing --- Why ???

Lets solve these and other DX secrets.

And let the rest of the world solve the political issues ON ANOTHER NEWS
GROUP

*** NO BULLETIN ***
*** SPECIAL NOTICE FROM THE EDITOR (by KB8NW): There will be "NO BULLETIN" for August 18th and (probably) 25th. Linda and I will be heading south, first to Tennesee to drop-off/move my daughter at Middle Tennesee State University (MTSU) and then off to Biloxi, Mississippi. I really need this break to rest up, and I hope that lying in the sun on the beach will help bring back some of my strength. However, PLEASE continue to send your DX info to me..... TNXS and GUD DX de Tedd KB8NW

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 3rd/August, through Sunday, 10th/August there were 209 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 3X, 4J, 4L, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9V, 9Y, A3, A4, A5, A6, A7, AP, BV, BY, C3, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D6, DL, DU, E3, E4, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FP, FR, FY, G, GI, GJ, GM, GU, GW, H4, H40, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HZ, I, IS, J3, J6, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KH9, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, S2, S5, SM, SP, ST, SU, SV, SV5, SV9, T32, T7, T9, TA, TF, TG, TI, TK, TR, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V4, V5, V7, VE, VK, VK9N, VP2M, VP5, VP8, VP8/h, VP8/o, VP9, VQ9, VR, VU, XE, XU, XZ, YA,

YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

4K, AZERBAIJAN. Axel, DL6KVA, now active as 4K0CW from Baku until August 17th, was heard this past week on 17 meters CW. Watch around 18075-80 kHz after 1130z. QSL via DL6KVA (Bureau OK).

7Q, MALAWI. Harry, G0JMU, will once again be back in Malawi from August 10th for about 2 months as 7Q7HB. Look for him to be very active on 30 meters. QSL direct to G0IAS with return postage please.

9Y, TRINIDAD AND TOBAGO. Look for DL1MGB to be active as 9Y4TBG in the WAEDC SSB Contest (September 13-14th) and the IARU Region 1 Field Day SSB Contest as a Single-Op. QSL via DL4MDO.

BQ9P, PRATAS ISLAND. The BQ9P 2003 Web site is now available at: http://www3.ocn.ne.jp/~iota/newpage64.htm

C5, THE GAMBIA. Holger/DL5XAT and Matthias/DL5OB will be active from here October 21st and November 2nd. Callsign(s) is/are not yet known, but they plan to be active in the CQ World Wide DX SSB Contest (October 25-26th) as a Multi-2 entry. QSL via DL5XAT. Outside of the contest, they will be active mainly on CW.

DU2, PHILIPPINES. Look for PA0CYW to be active as PA0CYW/DU2 in the CQ World Wide DX SSB Contest (October 25-26th) as a Single-Op/All Band entry. He will be active 5 days before and after the contest using the same callsign. QSL via his home callsign (Bureau is OK).

DXCC LISTING. The "ARRL Letter" reminds everyone: "DXCC Annual List deadline approaching: The ARRL DXCC Desk says the deadline to submit applications for the 2003 DXCC Annual List is rapidly approaching. Applications must be postmarked no later than September 30, 2003. For more information, contact DXCC Manager Bill More, NC1L, dxcc@arrl.org."

F6, FRANCE. A team of members from the F6KNL Radio Club of Cenon (REF33) will be active on Oiseaux Island (Arcachon Bay, Sud Ouest France) as F6KNL/p from Friday, August 15th (0800-1700 local time). Activity will be on 40/20/15/10/2 meters CW/SSB. QSL via Laurent, F8BBL, by the Bureau (100%) or direct. Reference numbers of island: DIFM - AT-028 and Grid SQ: IN94JQ.

H40, TEMOTU PROVINCE. Kazuo, P29KM, informs OPDX that on Saturday, August 9th, they (Dan - H40V and JA1PBV; Kazuo - H40H and P29KM) were in Honiara and will arrive at Lata, Temotu Province (H40) Sunday, August 10th, as long as their Solair flight is OK/on schedule. They will be there for one week, leaving Lata on August 17th. They are planning to operate CW, PSK3, RTTY, SSB, SSTV on 6-160(!) meter bands there. Their activity depends on location and the local power. As this was being typed, activity by H40H was on 18070 and 14014 kHz; H40V was on 10107 and 14083 kHz. QSL info is

via the address on www.QRZ.com.

IOTA MICROLITE TOUR 2003. Vincenzo, IZ0FKE, a member of the ARI Frascati DX Team (http://www.arifrascati.it) plans to activate the following islands and is calling the operation the "Microlite IOTA Tour". He will use a Yaesu FT100D and a short one G5RV antenna 40-10 meters (and possibly a simple monoband dipole for 20 meters). He will operate first as OH0/IZ0FKE from a cottage on the Baltic Sea from Aland Islands (EU-002 - Finstrom is the location - the first Italian operating from Aland Island) from August 16-23rd. He will then be active as OH1/IZ0FKE from a private home located on a small island in the Lansi-Suomi (Turku) Province Group (IOTA EU-096) from August 23-27th. Acvtivity will be mainly SSB, especially on 20/17/10 meters. QSL via IZ0FMA. Vincenzo will use a Photo Cellular Phone (largely used in Europe), so everyday he will post pictures on the 425dxn Web page. He will also use a cam-recorder to record some movies to post later online on his Web site at: http://www.iz0fke.com

IOTA NEWS.....
AS-060. Look for 6L0NJ/4 to be active from Choyal Island from August 15-17th. Activity will be on 160-6 meters, including the WARC bands, on SSB/CW/RTTY/PSK31. QSL Manager is DS4AEN. A log search will be availale at: http://www.dx.or.kr

AS-085. Operators Kim/HL1OYF, Kwon/HL1SRJ, Ryu/DS4NYE and possibly others will be active from Soan Island between August 14-17th. Activity will be barefoot on 40-10 meters CW/SSB into a vertical pharastic array. QSL via HL1OYF.

AS-101. Choon, E20HHK, will go to work in the south of Thailand. He will use E20HHK/P on Samui Island from August 14-17th. After his operation he will operate as E20HHK/8 in the SEANET Contest. QSL via E21EIC

KH7K, KURE ATOLL. Kimo Chun, KH7U, has informed OPDX that he is organizing a DXpedition to Kure Atoll. He states, "Kure is in demand within the top 20 or so around the world and even as high as number 2 in Europe by some accounts. We hope to provide many QSOs and cards to as many people as possible with special emphasis on Europe as they have the highest need. We are hoping to be on the air for two full weekends (in EU) and the intervening week. If possible, we will end with participation in the CQWW-SSB contest. Operation on other modes and bands during the contest is intended." Here are some of the details:
Team Leaders: Kimo Chun, KH7U, and Pat Guerin, NH6UY. Experienced operators - many from Kingman K5K trip.
Tentative operating period: Latter half of October 2003. With attempt at participation in CQWW-SSB.
Team size: Between 12 and 15.
Stations: 4 to 6 plus 6m. Most with linears. Icom will be providing equipment.
Antennas: Force 12 Vertical Dipole Arrays; HF Yagis; 2 Titanex V-160E Verticals; M2 6M Yagi.
Modes: CW/SSB/RTTY. Other modes under consideration.

Satellite: Under consideration.
Transportation: Air and Boat (still in negotiations).
QSL: A manager will be announced.
Web Page: Will announce if they have one. They will not likely have
"on-line" logs.
Target: The emphasis will be Europe but they will be working the world.
Call Sign: To be determined.

LIGHTHOUSE ACTIVITY.....
** Remember ****
** International Lighthouse/Lightship Weekend (ILLW), August 16-17th **

Cory/N1WON and David/WA4ET will be active as KG4LH, from Guantanamo Bay, Cuba (NA-015) and Windward Lighthouse (GTM-01), August 16/17th for the International Lighthouse Weekend. Activity will be on 80-6 meters SSB, RTTY and PSK, including 5 MHz USB. Please QSL KG4LH to N1WON or WA4ET, as listed in QRZ. Reminder: Please do not send cards for this event to the bureau. There is no KG4 bureau for Guantanamo Bay. Please QSL as directed to receive QSL cards.

Operators from Gainesville, FL, area ham clubs and the University of Florida will activate the Cedar Key Lighthouse (WLH# 2741, USA #745) on Seahorse Key (IOTA NA-076) in Levy County using the call W4L during the International Lighthouse/Lightship Weekend, August 16-17th. There will be SSB/CW activity mainly on the HF bands with a possibility of some 6 meters. This is only the second time that a radio operation has been allowed from the Cedar Key lighthouse at Seahorse Key which is a closed wildlife sanctuary. QSL via W4DFU: University of Florida, Box J-12 JHMHC, Gainesville, FL 32610 USA.

From Eagle Harbor, Michigan, look for the Eagle Harbor Lighthouse (USA-253) to be activated in the ILLW, August 15-16th, using the special 1x1 callsign, K8E. Modes of operation include HF/VHF, CW/SSB, FM Satellite and possible HF digital. Collectors of ARLHS numbers can get credit for three upon request: Eagle Harbor Lighthouse USA-253, Front Range Light USA-254 and Rear Range Light USA-255. QSL via bureau or direct to N8MR with #10 SASE. The Web page for this operation is available at: http://www.kc8nah.com/Interests/illw03.htm

Berkin, TA3J/4, will be active only on SSB on 40, 20, 15 and 10 meters from Antalya Bababurnu Lighthouse (TUR-???) (KM56JU) on August 16-17th for the International Lighthouse/Lightship Weekend. QSL via his home callsign, direct (SASE+New IRC only, no greenstamp please) or bureau. SWL QSL cards are OK. Further information is available at: http://www.qsl.net/ta3j

Look for VK3BV to be active from the Macquarie Lighthouse (ARLHS AUS-105, Grid Loc. QF56), Australia's first lighthouse. Activation will be between 0300-0700z on August 16th. QSL via QRZ.com.

Look for ZV7AA to be active on all bands and modes from Tamandare Lighthouse (ARLHS BRA-102, DFB PE-07) August 15-17th, including an

entry in the International Lighthouse/Lightship Weekend (August 16-17th). Activity will be on all bands 160-10 meter SSB, CW, RTTY and PSK31. QSL via PY7AA: P. O. Box 1043, 51001-970 Recife - PE, Brazil.

OFFICERS FOR 2003/2004. Members of the CDXC (Chiltern DX Club) - The UK DX Foundation held their annunal general meeting on July 19th and the following were elected to the 2003/2004 committee:
President: Neville Cheadle, G3NUG Committee Members:
Chairman : John Butcher, G3LAS Jim Kellaway, G3RTE
Secretary: Shaun Jarvis, M0BJL Mark Haynes, M0DXR
Treasurer: Nigel Cawthorne, G3TXF
Digest Editor: Martyn Phillips, G3RFX

CDXC contributes around 4,000 USD each year to DXpeditions and has supported 84 DXpeditions since 1992. The club also supports IREF in recognition of the interest in IOTA activities. There are now over 600 members. The CDXC web page can be found at: http://www.cdxc.co.uk

OJ0, MARKET REEF. The QLF DX Team will be active from Market Reef (EU-053) as OJ0LA between September 19-26th. This operation is good for the following Lighthouse Award's: ARLHS MAR-001 and WLH-0542. Operators are: LA5UKA, LA6MP, LA8AJA, LA8SDA and LA9VDA. Also, OH0RJ will join the group as OJ0RJ. They are expected to be active on all bands, CW/SSB/RTTY and will be looking especially for NA and JA stations. The plan is to be active in the SAC CW Contest with one station. Due to possible bad WX conditions in the fall, they might use an expensive helicopter. They need financial support for this. QSL for OJ0LA via LA9VDA. For direct cards please add SAE + 2 USD or 1 IRC. QSL OJ0RJ via OH0RJ, only direct. More info can be found on their homepage at: http://www.qsl.net/la8aja/oj0la/

PA-PH, NETHERLANDS (New Prefixes To Be Heard!). As of August 4th, we should begin to hear new prefixes on all bands from The Netherlands. JanJaap, PG7V, informs OPDX that all prefixes from PA-PH can be used now, choice of prefix and suffix is free. Suffix has to be 1-3 letters long. PD is novice (2m/70cm), PE and PH is VHF and higher. You can find a list of all Dutch prefixes on his Web site. He is also keeping a list of new callsigns, together with the former calls. You can find this on: http://www.pg7v.net/english

QSL INFO AND NEWS.....
4W1BK QSLS. Stu, WA2MOE, reports that all QSLs cards received by Saturday, August 2nd, have been answered and are in the mail.

Alex, RW3RN, reports that he made a mistake last week. QSL 5B4AGM via RW3RN (only for 2003 EU HF Championship QSOs, not the 2003 IOTA Contest). He is sorry for the mistake.

Carlos Nora, CT1END, reports that information and photographs of the recent activities by CS4B (EU-040, QSL via CS1GDX) and CS5F (EU-145, Lighthouse Cabo de Santa Maria, QSL via HB9CRV/CT3FN) were updated at the following Web pages: http://ct1end.netpower.pt
http://www.portal-dx.web.pt

The log for EG9IC is now available at the following Web pages:
http://WWW.URE.ES/hf/eadx/expediciones/chafarinas/log/log.htm
http://www.ure.es/hf/eadx/expediciones/chafarinas/chafarinas.htm

George, K8GG, has recently sent QSLs via the ARRL outgoing bureau to all non-US contacts from PJ2/K8GG (Jan 2003), and KP2/K8GG (Jan 2001). PJ9/K8GG QSLs for all non-US contacts were previously sent via the bureau. All direct QSLs with return postage were answered within a week of being received. There is no need to answer these bureau QSLs. U.S. stations needing a QSL card can send direct with SASE or use a forwarding service for these callsigns. The address is correct on all web sites such as Buckmaster, E-ham.net and QRZ.com. George still has logs for K8GG/VP2M (Oct 1986), K8GG/PA (Dec 1987 & Jan 1988), J3/K8GG (Jan-Feb 1990), VP2M/K8GG (Oct 1986) and P4/K8GG & P40GG (Jan-Feb 1994) and will answer direct and bureau QSL requests.

Nilay, TA3YJ, informs OPDX that she sent QSL cards for TA3YJ, TA3YJ/0, TA3YJ/3, TA3YJ/4, TA3YJ/LH, SV1/TA3YJ, LZ2/TA3YJ, TA3J, TA3J/0, TA3J/1, TA3J/3, TA3J/4, TA3J/LH, SV1/TA3J, LZ1/TA3J, LZ2/TA3J, YM3BU, YM3ATA, YM3SV, YM75TA, YM21TA, YM3LZ/WPX2000 and YM3LZ/WAE2000 to the QSL Bureaus of China, Iraq, Quatar, Sierra Leone, Tanzania, Uzbekistan direct on August 6th.

Alan, VK4AAR, informs OPDX, "I wish to advise that logs for the stations for which I am the manager are still open with the exception of YJ8AA. I have received information that many people have been sending QSLs via the bureau for these stations. It is only possible DIRECT. People can still send to me direct (PO Box 421, Gatton 4343, Australia with S.A.E. and greenstamp)."
DX stations VK4AAR manages are: C21RH, P29RH, KH2VM, V63PD, VI0ANARE, VK0MM, VU3RSB, ZK2JJ and ZK2PJ (Also, a couple of 4W in the near future).
IOTA stations VK4AAR manages are: VK6BM (OC-234), VK6BSI (OC-243), VK8AN/6 (OC-154), VK8AN/8 (OC-229), VK8AV/3 (OC-136) and VK8MI (OC-173).
Plus Australian mainland stations are: VK8AN, VK8DP, VK8RH and VK8XC.

The YI/KV4EB logs through the end of July (states Joe Nemecek, K0JN) are now online at: http://dx.qsl.net/logs/

SPECIAL EVENT. Look for special event station TM5GAP to be active from September 6-14th, from GAP/TALLARD airfield during the "World Parachuting Championship". Activity will be on the air on all HF bands, 6 meters and 2 meters. The Department of Hautes Alpes hams are awaiting for your QSO. Those who will be vacationning near this area are welcome to the station settled on the airfield. QSL per operator's instructions.

SRM 2003. The Scottish-Russian ARS introduces Scottish-Russian Marathon to encourage activity by all radio amateurs worldwide to contact areas of Scotland and Russia. This is purely an activity week and will enable participants to pursue the CAOSA Award Scheme, WAB Scotland Award Scheme, IOSA Award Scheme, SOTA Award Scheme, ARLHS Award Scheme, RDA Award Scheme, RRA Award Scheme, RIIA Award Scheme, RMA Award Scheme, RFFA Award Scheme,

RLHA Award Scheme, RABA Award Scheme, and provide an interest in contacting different areas of Scotland and Russia. The event is to be held on the full second week in August each year. The 2003 Marathon will start at 0000z on Monday, August 11th, and last until 2400z on Sunday, August 17th. Activity is encouraged on all HF bands by individual licensees and club stations or the use of a special event callsign from radio amateurs in Scotland and Russia. For more details on this SRM award and others, please contact: Jurij Phunkner, MMODFV, P.O. Box 7469, Glasgow, G42 0YD, Scotland, U.K. (E-mail: jurij@phunkner.freeserve.co.uk) or visit the following Web page at: http://www.qsl.net/mm0dfv/index.htm

T33, BANABA ISLAND (OOOPSS!! Correction). There are two corrections to last week's bulletin (OPDX.621). The most important one is the QSL Manager. Your editor misread the announcement, please note that the QSL Manager for the T33C operation is F5CWU and not PA5ET. Also, the vessel's name is "Te Taobe" and not "Te Toobe". Remember, the international team of 20 operators will be active as T33C during the first two weeks of April 2004 (April 4-16th). They will have 6 HF stations on the air (3 CW and 3 SSB), plus a separate 6 meter/AO-40 and separate HF digital mode station. Activity will be on 160-6 meters, satellite, CW, SSB, RTTY, PSK and some SSTV. For updates and more information, visit their Web page at: http://www.dx-pedition.de/banaba2004

TZ, MALI (Update). The TZ6RD Team announced that everything is "OK" for their operation this week. They also announced that Angel, EA1QF, President of URE (the Spanish National Bureau) and a very well known Dxpeditoner has joined their Mali 2003 team. They state he is a great SSB operator. The TZ6RD team is now confirmed and is expected to be active this week between August 12-21st from Bamako, Mali. The operators confirmed are: XE1L, N6TQS, EA1QF, EA5KM, EA5RD, EA5RM and EA5XX. They also announced their PILOT STATION will be Max, I8NHJ, and you can reach him at: i8nhj@pagus.it
The new and tiny light-weight Spanish-made amplifiers had been tested by EA5RM last week, and they seem to put out 400 watts. They are going to feed vertical, dipoles in this all bands, all modes operation. The QSL Manager will be EA4URE, the Spanish Bureau, and the online logs will be available on the WEB page: http://www.pagus.it/tz6rd

Z3100, MACEDONIA. Vlado, Z35M now signing Z3100M (QSL via his original callsign Z35M), wants to remind everyone that in celebration of 100 years of Macedonian statehood and 100 years since the Ilinden Uprising (August 2, 1903, against Othoman's slavery, and formation of Republic of Krushevo, the first Republic in the Blacans), Z3 stations will be active with the special event prefix "Z3100" between August 1-31st. Please refer to OPDX.621 for a list of stations.

ZK1/S, SOUTH COOK ISLANDS. "Team Vertical" is on the DX trail again. This time they are headed to Rarotonga, South Cook Islands (OC-013), and will be active between August 18-27th. Operators will be: Bill/K6KM (ZK1TOO), Mark/AG9A (ZK1KAT), Ralph/K9ZO (ZK1ZOO) and Kenny/K2KW (ZK1TTT). Activity is limited to 40-10 meters on CW/SSB. Two stations will be active when

snorkeling permits, using 2 x Elecraft K2/100, and Force 12 vertical antennas on the beach. The station is on the northeast side of the island, with water paths to all the major population centers. The team will make extra efforts to work Europeans, since ZK1/s is a difficult path for them. QSL all ops via Kappy, WA4WTG.

ZM4, NEW ZEALAND (Special Event). Look for ZM4A to be activated during the month of August by the Otago branch of the New Zealand Association of Radio Transmitters to celebrate its 75th anniversary. Activity so far has been on 14205 kHz (also 14219, and 14230 kHz SSTV) between 0330-0600z. QSL via bureau.

Excerpts and distribution of The OPDX Bulletin are granted as long as KB8NW/OPDX/BARF80 receive credit. To contribute DX info, call BARF-80 BBS online at 440-237-8208 28.8k/14400/9600/2400/1200 and leave a message with the Sysop or send via InterNet Mail to:
kb8nw@barf80.nshore.org - OR - kb8nw@arrl.net
Use the VOICE or FAX answering machine at 440-237-8208 which shares the same phone line as BARF-80 BBS using a data/fax/phone switch. To access: 1) Dial Number. 2) Wait for first ring (the second ring should be a false ring from the fax/data switch box) and then dial four quick ones ("1111"). (NOTE: Some FAX machines that send single "BEEPS" every second will not have to do this step.) 3) The phone will pick up and after the "BEEP" leave your voice message or FAX.

Keyboard In The Wilderness wrote:

> When you work an exceptionally weak DX station, do u use ESP?
> Is that Extra Sensory Perception or Expected Sensory Perception ??

What?

> Is the best filter between your ears ??

Yes. *After* you pass the signal through the 250-500 Hz second IF
crystal filter.

> Can u really copy CW right down into the noise -- if so why??

Because of the extremely narrow bandwidth of the signal. The lower the
information rate, the easier the copying. That's why CW gets through
where speech can't - speech requires more bandwidth due to the higher
information rate. Explained differently, CW transmits all the TX power
on one frequency, while SSB or AM disperses that same amount of power
throughout the entire bandwidth of the signal.

> Have you ever copied SSB right down into the noise ?? If not why not ??

Everything can be "copied right down into the noise". It depends on what
your definition of "right down into the noise" is.

> Do you listen to DX on a Speaker.

No. Waste of time.

> Are headphones better ???

Always.

> Which ones -- > Com Phones or Hi-Fi

The cheaper, the better. You definitely don't want hi-fi headphones
because they only contribute to the sound in the range outside of the
transmitted speech, i.e. above 3 kHz, which translates into noise.

> Do you keep the RF Gain at Max?

Normally, yes.

> Or advance the audio gain, then bring up the RF Gain control for APPARENT
> improved S/N ratio. Huh how does that work??

Depends on the signal that you're trying to copy, as well as on the
surrounding QRM and QRN.

> Do you use fast AGC or Slow when DXing --- Why ???

Neither. AGC is a dynamic compression which compresses all the signals into a much narrower dynamic audio range. That's great for strong signals and easy on the ears, but it completely obliterates the weak ones by "pumping" strong signals, QRM and QRN. You need to turn off AGC for dxing (and most of contesting), unless you only want to work strong signals. The drawback is that the full dynamic range is very hard on the ears because you get a full blast of S9+ signals interspersed with the barely audible ones.

<G>!

Depends to some degree on how you work your DX. 250Hz is too narrow for contesting but probably just about right for pileups.

>> Do you listen to DX on a Speaker.
> No. Waste of time.
>> Are headphones better ???

Disagreed.

IMHO the most important specification for headphones is physical comfort. Can you wear them for hours without hurting your ears?

My ears - and the filters in the rig (for which I've paid good money!) do a pretty good job of filtering out the noise.

I've generally found "communications" phones have an awful lot of ripple in the audio passband. They tend to sound "tinny" or "bassy" or otherwise unnatural. Not to mention they're usually heavy and uncomfortable.

I bought two pair of Labtec LVA-8322's at Dayton a couple of years ago. ($5 each if I remember properly) They're comfortable - sound good - they've got a boom mike (which keeps getting me great audio reports, people don't believe me when I tell them what I'm using for a mike!). One pair sits in the shack, the other I use for DXing the FM broadcast band. (1,200 stations in 42 states since 1994) Actually, right now I'm using them to listen to a They Might Be Giants CD... One of the better bargains I've found at Dayton.

>> Do you keep the RF Gain at Max?
> Normally, yes.
>
>> Or advance the audio gain, then bring up the RF Gain control for
>> APPARENT
>> improved S/N ratio. Huh how does that work??

I think it does work but only for strong signals. I've done that for
long ragchews with local stations, and it works nicely. Sounds almost
like VHF-FM quality. It's pretty hard to find the "sweet spot" when
working weak or QSB-laden signals though.

>> Do you use fast AGC or Slow when DXing --- Why ???

Well, of course. But that's not what he asked. I use those cheapo $3 headphones that I barely feel on my head. Yes, comfort is everything and that's one more reason why hi-fi headphones are out, because they simply have to squeeze your head for a high quality audio. I also tried Heil headphones once and couldn't believe some people have them on for 48 hours straight. I'd go insane.

> If I'm going to abuse my hearing, I use the Ramones.

The Ramones, huh? I hope you shaved off the Mohawk.

On average I've found hi-fi phones more comfortable than the
communications variety.

Used to wear Radio Shack PRO-40s until I got my hands on the Labtecs.
(latter having the advantage of the boom mike, so one can free both
hands for manipulating the equipment)

Agreed. And while audio quality is important, comfort is a lot more
important when you spend a couple of hours at the rig. In that respect the
Heil set and other "special" headphones are way too incomfortable and I
cannot discern any advantages over a good HiFi-set in terms of audio
reproduction.

My headphone of choice is the KOSS Porta Pro, which is a very leightweight,
foldable and yet stable headphone with excellent sound quality for any kind
of rig and you can wear it during a lonf contest weekend without suffering
from massive headaches. There is an extra set of rubber foam on the headband
that reduces pressure on one's ear and makes wearing these pure pleasure.

http://www.portabledvdstore.com/kosporpropor.html

I showed these to a couple of active hams, most of them CW ragchewers and
contesters, and by now roughly 30 hams I know have bought the set and are
super happy with it. All of them know the Heil headset and report that it is
vastly inferior in terms of comfort and audio quality.

The only letdown is the fact that you don't want to run a MM-SSB contest ;-)

Amateur Radio Newsline™ Report 1356 - August 8 2003

Amateur Radio Newsline report number 1356 with a release date of Friday, August 8 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T.

The ARRL tells the FCC to set R-F-I immunity standards for consumer electronic gear, the FCC says it won't decide the merits of a California frequency coordinators actions, and the price of a vanity call sign is going up again. These stories and more follow on Amateur Radio Newsline report number 1356 coming your way right now.

(Billboard Cart Here)

**

RADIO LAW: ARRL TELLS FCC TO SET INTERFERENCE REJECTION STANDARDS

The ARRL has told the FCC that improved interference standards for consumer electronic devices is among the most pressing needs being faced by the ham radio community. This, as the Commission considers the interference immunity performance of receivers. Amateur Radio Newsline's Bruce Tennant, K6PZW, has more:

--

The ARRL made its position known in comments July 21st in response to an FCC Notice of Inquiry titled Interference Immunity Performance Specifications for Radio Receivers. That probe was released last March as ET docket 03-65. In its filing the ARRL says that no receiver immunity standards are necessary or practical in the "essentially experimental" Amateur Service. Instead, says the ARRL, the real need for receiver immunity specifications is in the area of consumer electronics and the FCC must establish stronger interference rejection standards for such devices.

The ARRL's 21 page reply also recounted the recent history of efforts to come to grips with interference from RF sources, including amateur stations, to receivers used in other services, such as TV and radio broadcasting, and to consumer electronics. The ARRL suggested that the FCC mandate a standard for all consumer electronics or adopt a labeling or grading system. It also suggested that the FCC not rely exclusively on manufacturers to set standards as a way of lessening the problem.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

The politically powerful Electronic Industries Association which represents the manufacturers of consumer electronic gear is categorically opposed mandatory RFI immunity standards. (ARRL)

**

RADIO LAW: FCC REFUSES TO DECIDE ON MERITS OF COORDINATORS ACTIONS

The FCC has told the attorney for one side in a California coordination dispute that it will not offer any opinion on the actions of the local frequency coordinator. This most likely means that a rumored law suit in the mater may now proceed to court.

Attorney Ted Smith of Santa Rosa California had written to the FCC on July 3rd. In part, Smith asked for the Commission decide if the Northern Amateur Relay Council of California's revocation of the Sonoma County Repeater Association coordination status exceeded the coordinators authority under the organizations bylaws, policies, and procedures, or if the Commission consider such an issue a local matter.

But in his July 15th reply, FCC Special Counsel for Amateur Radio Enforcement Riley Hollingswoth states that the Commission does not anticipate making a such decision on the merits of Northern Amateur Relay Council of California's action. He also stated that the Commission considers coordination in the Amateur Radio Service a matter more appropriate for the parties to resolve among themselves locally, or by mediation, dispute resolution or in the local courts.

With the FCC declining not to take any stand in regard to the merits of the Northern Amateur Relay Council position in the dispute between the W6SON and KD6LSO repeaters, it appears as if the decision of the coordination council will stand unless a expected legal challenge goes ahead. Its also a sure bet that repeater coordinators across the nation will be keeping a very close eye on what happens in Northern California if this issue actually goes into court. (FCC, ARNewsline(tm))

**

RADIO RULES: VANITY FEES GOING UP IN SEPTEMBER

The cost of getting a vanity call sign is going up again this fall. This as the FCC announces that the the ten year license term fee for a vanity call will rise to $16.30 for as of September 9th.

The action to raise the fees comes in answer to petirtions from the ham community to eliminate the fee completely. But the FCC says it expects to collect close to $160,000 from 9800 Amateur Radio vanity call sign applicants during Fiscal Year 2003. That's up by almost $30,000 and 800 applications from Fiscal Year 2002.

Applicants for vanity callsigns will continue to pay the $14.50 fee until the new fee goes into effect in September. Further details on the FCC's position and its response to amateur requests to eliminate the fee can be found in cyberspace at www.arrl.org (ARRL, FCC)

**

RESTRUCTURING: NCVEC NO-CODE PROPOSAL GETS LITTLE AIR TALK TIME

The petition by the National Conference of Volunteer Examiner Coordinators to the FCC to end Morse testing in the United States is getting allot of discussion in cycerspace, but apparently very little on the air. Over the past week the Amateur Radio Newsline team has monitored the ham bands to try to gauge on-the air reaction and so far there does not seem to be very much at all. An occasional mention of the proposal is about all thats been heard over the past 7 days.

But the opposite is true in cyberspace where the NCVEC petition has become the hot topic of discussion in places like the rec.radio.policy newsgroup and on qrz.com. As far as we can tell, qrz.com com has the most interesting discussion of all. Most of the comments are well thought out with very little in the way of rhetoric. So far close to 350 hams have dropped by to add their voice to the discussion. To read what they have to say or add your thoughts, please take your web browser over to www.qrz.com and scroll down to the topic titled NCVEC files no code petition. (ARNewsline (tm))

**

Break 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the W8WKY repeater of the Silvercreek Amateur Radio Association serving Doylestown, Ohio.

(5 sec pause here)

**

HAM TESTS: GUNFIRE CAUSES HAM TEST CANCELLATION

I'm Bill Pasternak, WA6ITF, with a late breaking story. Dateline Ventura County California where gunplay has caused the cancellation of a ham radio test session slated for Sunday August 10th.

The exams we to be held at the East Valley Sheriff Station in the city of Thousand Oaks. The session was canceled following an incident earlier in the week where a disgruntled man drove up and attacked Ventura County sheriff's deputies with a gun. No one in the building was injured. The deputies responded and killed the attacker.

But as a result of her gunfire the community room where the ham radio tests are held was damaged. It's also considered as a part of the crime scene and is off limits to the public until further notice.

The Conejo Valley Amateur Radio Club is the group that sponsors the bi-monthly test sessions. It says that it hopes to resume its normal exam schedule in October. (AA6JR)

**

INTRUDER WATCH: MORE CB'ERS ON 10 METERS

Sunspots activity may be down but that's not keeping rogue CB'ers and other intruders off the 10 meter band and spectrum near-by. Q-News reports that while normal ham radio activity on the 21, 24 and 28 MHz bands is down, occasional openings of the 10 meter band shows a number of unlicensed long line fishing net beacons in operation. Also being heard is Citizens Band radio type traffic in the band. Q-News also says that CODAR pulse transmissions in the region 24.950 to 24.995 MHz are continuing and are sill unidentified. (Q-News)

**

RADIO LAW: UK HAMS OBJECT TO RADIO SHOW ON BPL

Last week we reported on the signal degradation that Amateurs in the United States will face if the FCC permits power companies to become suppliers of broadband Internet. But US hams are not alone. The United Kingdom's national ham radio society is angry at a report by the BBC that touts the system without telling the other side. They say the report is not fair and balanced. RSGB news reader Jeramy Boot, G4NJH, is here with the rest of the story:

--

The RSGB has contacted the BBC to point out its objections to an item on the BBC TV 6 o'clock News on Thursday the 24th of July. The item referred to the use of the electricity supply as a medium for Internet access. This is variously referred to as PLT, PLC or Powerline Communication.

The following is a quote from the e-mail sent to the BBC TV News: "The news item was unbalanced in that no mention was made to the very serious problems of radio interference inherent in Powerline technology. At the present time there is strong disagreement as to how much radio interference should be permitted. Needless to say radio interests, which besides ourselves, include the BBC and many other organisations are anxious that radio interference should be minimised."

The e-mail went on to point out the difference between the systems based on ADSL technology, which are currently being deployed in considerable numbers, and the proposed PLT systems.

Jeramy Boot, G4NJH.
--

At airtime, it is not known if BBC 6 plans a follow up report giving the negatives of BPL. An interesting article on Broadband Over Powerline communications is available by clicking the link marked "powerline communications" on the RSGB website at www.rsgb.org. (GB2RS)

**

RESTRUCTURING: DENMARK GIVES HAMS 70 MHZ

Amateurs in Denmark have been given permission to operate on the 70 MHz band. This, according to OZ2M who says that three frequencies are available at 70.025, 70.050 and 70.100mhz.

Individual applications have to be filed for the relevant frequencies and the maximum power is 25 watts, but there are no other restrictions. In other words, the 70 MHz allocation is available to all license classes in Denmark and all modes may be used. (UBE)

**

RESCUE RADIO: FIRES DAMAGES TWO REPEATER INTERTIES

Back here in the United States, Arizona wildfires have damaged two repeater newtworks. Blazes wiped out repeater relay links on Mount Lemmon, Arizona, for both the Zia Connection and the Cactus Intertie. Both are wide area linking networks. The fires occurred in mid July. (Repeater Owners Remailer)

**

RESCUE RADIO: ECHOLINK ASSISTS DURING HURRICANE CLAUDETTE

Traditional ham radio communications during Hurricane Claudette in Texas in July were augmented by an Echolink connection keeping key players in constant contact. According to the ARRL Letter, the Nacogdoches Amateur Radio Club used Echolink to tie together coastal repeaters, the National Hurricane Center, the National Weather Service, the Texas Department of Public Safety and most coastal emergency operating centers. Club spokesman Tim Lewallen, KD5ING, said that at the height of the storm, there was "almost constant" activity on the link, mostly between the National Hurricane Center and ham spotters providing real-time, first-hand reports. (ARRL)

**

ENFORCEMENT: $8,000 FINE AFFIRMED FOR FAILURE TO INSTALL EAS EQUIPMENT

The FCC has affirmed an $8,000 fine against WENA of Yauco, Puerto Rico. This for the stations failure to install Emergency Alert System equipment. The FCC says that Puerto Rico is a possession of the U.S., and is therefore governed by the it's Regulations and rules. The complete story is in cyberspace at: http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-03-2360A1.doc (CGC)

**

AT THE COMMISSION: FCC OFFERS FREE WiFi TO VISITORS

The FCC says that it will provide free wireless Internet access to visitors at its Washington, D.C. office, but there are a few caviats. Visitors must bring their own hardware and software and can use the service only in two specific locations. The FCC alao says that it won't provide any technical support. More is on-line at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-237306A1.doc (FCC)

**

RADIO POLITICS: PRINTER ERROR IN AMSAT BALLOTS

An error by AMSAT's printer has resulted in a reprinting and remailing of ballots for the amateur satellite organization's board of directors.

The CQ website reports that the mailing included biographies for candidates from a past election. As a result, the original white ballot cards sent out with the first mailing will not be counted. If you never mailed yours in simply disguard it.

Only the replacement yellow ballot cards sent in the second mailing will be accepted as valid votes by AMSAT members. These are due at AMSAT headquarters by September 15.

By the way, AMSAT is not ouut any money on this one. The printer bore the total cost of the reprinting and remailing. (ANS)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

NAMES IN THE NEWS: A WEB PAGE FOR NIKOLA TESLA HISTORIANS

In the world of electronics and telecommunications, inventor Nikola Tesla was one of the more mysterious of our early technological pioneers. His experiments and demonstrations caused some to believe he was a genius, while others had to wonder if he was engaged in witchcraft.

Much of what he wrote nearly a century ago still evades our understanding. If you're intrigued by the man and his specific visionary approaches to physics, you can visit his selected writings at www.tfcbooks.com/tesla/contents.htm (CGC)

**

NAMES IN THE NEWS: KA3HDO PROMOTED AT NASA

Amateur Radio on the International Space Station Chairman Frank Bauer, KA3HDO, has been promoted to the highest technical rank accorded a NASA scientist or engineer. Bauer, who works at NASA Goddard Space Flight Center in Maryland has been named as a Special Technical or S-T. This, in recognition of his record of exceptional technical achievement in the field of guidance, navigation and control.

KA3HDO's promotion came through in time for him to be appointed to the NASA deputy administrator's new blue ribbon panel on Alternatives to the Orbital

Space Plane. Bernard Seery, chief of the Mission Engineering and Systems Analysis Division in the Applied Engineering and Technology Directorate, said Bauer's new ST rank formally recognizes him as a lead guidance, navigation and control expert at the Agency level. (ANS)

**

HAM RADIO IN SPACE: AN ALL HAM CREW FOR ISS EDITION 8

The ARRL reports that both members of the recently-announced Expedition 8 crew for the International Space Station are hams. Astronaut Mike Foale, KB5UAC, will be the crew commander and science officer. Cosmonaut Alexander Kaleri, U8MIR, will be I-S-S flight engineer and commander of the Soyuz capsule used to transport the crew members to and from orbit.

Both Foale and Kaleri are veterans of the Mir space station. They'll be joined briefly by a third ham, Spain's Pedro Duque, licensed in the U.S. as KC5RGG, who will represent the European Space Agency. Duque will return to Earth with the departing Expedition 7 crew. The crew exchange is scheduled for mid-October. (ARRL)

**

INTERNATIONAL-UK: HAMS AT GASS 2003

Amateur Radio will be a part of a major science exhibition down-under. Q-News Graham Kemp. VK4BB, reports:

--

The Great Australian Science Show (GASS) will be held in conjunction with National Science Week at the Melbourne Museum, and amateur radio is to be on
display for three days.

WIA Victoria with the help of its member clubs are participating in the show, for three days from Saturday 16, Sunday 17, and Monday 18 of August. The Melbourne Museum is open from 10am to 5pm.

Displays of IRLP, Morse code, VHF Transceivers, Crystal sets, ARDF equipment, Satellite tracking software, Power Point Computer Displays and more are planned.

--

Again, those dates are August 16, 17 and 18 at the Melbourne Museum in Melbourne Australia. (Q-News)

**

ON THE AIR: UK HAM TO DO SUMMIT BACKPACK

On the air, word that Richard Newstead, G3CWI, is planning a long solo ham radio backpacking trip across the hills of South Wales this month. His objective is to activate 15 of the hills in the Brecon Beacons National

Park on 40-meter CW for the U-K's Summits on the Air award program.

The walk will be over 90 miles with a nearly 25,000 feet of ascent. In addition to the High Frequency radio gear, G3CWI will be carrying all his own food and camping equipment. The walk is expected to be completed by the 17th of August. (RSGB)

**

ON THE AIR: RUSSIAN POLAR MOUNTAIN EXPEDITION.

And speaking high locations, word that the Russian Robinson Club plans to be active as R3RRC/9 from August 14th to the 25th from the Polar Ural Mountains. Their operations will be on both the H-F and VHF bands. If you can read Russian, more information is available on the web page link you will find in this weeks print edition of the Amateur Radio Newsline report. More is on-line at www.hamradio.ru/rrc/AWARDS/rma.htm
QSL via UA3SGV: Andy Blinushov, P.B. 180, Ryazan-35, Russia, 390035. (OPDX)

**

DX

In D-X, word that M0GMT, and DJ9AO, are teaming up for an ambitious DXpedition to Cambodia running through the 18th of August. hey will use the callsign XU7ACT for normal operation and XU7ACU for the WAE CW Contest on August 9th and 10th. QSL's for both calls go via G3SWH. (GB2RS)

And N6XIV/KH9 is expected to be active again from Wake Island for about three weeks. This will be his last Wake Island work assignment for 2003. He operates on SSB only whenever possible during his very limited spare time. (GB2RS)

Lastly, word from Great Britain that nominations are being sought for the G5RP Trophy. This is an annual award to encourage newcomers to High Frequency D-X'ing and is awarded for making recent rapid progress in D-Xing, which only newcomers have the scope to do. Nominations should be sent to Colin Thomas, G3PSM, by e-mail to hf.chairman@rsgb.org.uk Nominations must be received by the 31st of August at the latest. (GB2RS)

**

THAT FINAL ITEM: THE NIGERERIAN SCAMMERS ARE AT IT AGAIN

And finally this week, theres another scam involving Nigeria and this one is targeting Amateur Radio. But this time a ham has outwhitted the alleged scammer. We have more in this report:

--

It all started about a month ago. That's when Jeff Novak, KB3DIV, of Lucinda, Pennsylvania, placed an ad on the QRZ dot com website to sell his Yaesu VX5 hand held. And in a follow-up posting to that website, Novak tells the story of what happened next.

KB3DIV says that he was soon contacted through e-mail by a person identifying himself as James Cruise. Cruise who stated he was from Africa and that he wanted to purchase the unit.

To make a long story short Cruise insisted that a contact here in the United States would send Novak a check for 4800 dollars. Cruise wanted Novak to deduct the purchase price of his HT along with shipping cost and send him a moneygram for the difference.

Soon, Novak received a bank draft for the 4800 dollars. Several phone messages were also left on Novak's cell phone from Cruise. These urged KB3DIV to quickly send him the difference and H-T.

But Novak became very suspicious. So he called the F.B.I. and explained what had transpired. They told KB3DIV that the supposed bank draft is a actually a credit card check and most likely already void. Also that the person calling himself James Cruise was most likely a scam artist. In other words, had he cashed it and sent Cruise the balance, the chances are that his bank would have dinged him for the amount of the bounced check and he would have been out his VX5 to boot.

But in this case the targeted victim was allot smarter than the alleged con artist. He asked the F.B.I. what to do. It advised Novak to destroy the check. He did, and also informed the person calling himself James Cruise that the deal was dead. And when it was all over, KB3DIV still had his VX5, and it was the person allegedly trying to scam him that was - proverbially -- left holding the bag.

For the Amateur Radio Newsline, I'm Mark Abramovich, NT3V, in Philadelphia.

--

Score one for a rather smart ham.

I didn't realize that 'pretty' was such an important factor in selecting
communications equipment. Maybe someone should publish some parameters
for those of us who are 'fashion challenged' so that we can learn to
include it along with sensitivity, selectivity, shape factor etc.

Price?? You've got to be kidding. They don't even have a model number available to
advertise
yet. But 200 watts sounds like fun though. You purchase the rig and pay through the nose,
spend hours drilling, running cables, shielding everything, and when you go for your first
test
of the transmitter, BANG! POW! You've just deployed all the airbags in your vehicle. Yep.
Sounds like fun it me. (I'm sure they'll have a disclaimer somewhere, in teeny, tiny print,

on
the inside case, in a foreign language). ;-)

I am interested in getting active on 222, mainly meteor scatter via FSK441 and

digital via JT44. Since my interests to date have bypassed this band, I am looking for either an SSB/CW transceiver or a transverter, a preamp, an amplifier and an antenna. I probably will not pursue it to the EME level, so I am not really looking for EME grade equipment.

If you have such equipment for sale, please state condition and price. Non-working but repairable is OK.

73,

Phil

Interesting. I've encountered and heard of numerous strange RFI problems
in mobiles; but never heard of airbags being triggered. Anyone have
anything to base this on? Can't help wondering why they don't go off
when vehicles pass through the high ERP beam from SWBC sites - one I can
think off offhand is the RCI site with a main highway passing alongside.
Not sure what the effective ERP is in the centre of the beam, but it
must be more than most Hams could create, even at 3 feet?

Nope. I've been running 100 watts for quite a while and never had a
problem with airbags electronic ignition or anything else. I wouldent
think another 100 watts would make that much difference, but then who

knows?

I used to run a TS-667V in a Jeep Wrangler TJ. I had to reset
the computer a few times by removing all the juice. I've also
had to do that with a semi-dead battery. Now I have a battery
switch on it, just turn it off for 30 seconds. The vehicle had
no problems with a TS-250. 55 watts on 2 meters does nothing.

This is what industrial designers do for a living.

Can you work the knobs easily, can you read the settings, are the keys too
small... etc..
It dosen't have to be ugly, and most "engineer" driven designs are.
I speak from experience, as an engineer who knows what's good looking, but
can't make it look good to save my life. :)

My current project www.mobilecommand.net had many hours of input from
industrial designers and expert plastics toolmakers. Source Design Group Ltd
did a fantastic job, IMNSHO.
http://www.sourcedesigngroup.com/

There are books to help the challenged engineer. "Turn Signals are the
facial expressions of automobiles"
http://www.jnd.org/TurnSignals/TS-TOC.html is a very good one, and of
course a copy of "The measure of Man and Woman"
http://www.wileyeurope.com/WileyCDA/WileyTitle/productCd-0471099554.html

One of the items I consider important in a mobile rig is can I operate
it while not looking at it. In other words I'm keeping my eyes looking
out the windshield not on the radio. I use a FT-900 and it is not the
most user frendly radio for mobile use however I have everything set up
so I don't have to twittle with it much. The new Kenwood looks to me
that it may be better. With large backlite buttons and 200 watts it
should make for quite a good mobile. I'll be waiting for it's arrival
and price, then maybe....., but I do like my FT-900.

I'll say this about looks. When I first seen the ad for the Kenwood
TS2000, I thought that has got to be the uglist radio I have ever seen.
In person it looks quite good, in fact I own one and I find it to be the
all in one radio. If I had only one choice of radios and wanted to do

everything in ham radio, sat., hf, vhf, uhf, moonbounce, ect, ect the TS2000 can do it 160 meters to 1.2Ghz, AM,FM, SSB, packet, rtty sat, ect ect, you name it it will do it.

> owners. The League, as mossbound as it is, speaks for us.

Political-hack lawyers are running the commission now. There is no way they can comprehend the most obvious technical ramifications of their ignorance. It is unlikely that any amount of quick training would allow them to comprehend the obvious, when it comes to PLC. I'm afraid the only thing that would help amateur radio with such government stupidity would be to take William Shakespeare's advice in "Henry VI", Part IV.

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1RV, K1XN & GoList, NG3K, W3UR & The Daily DX, N4AA & QRZ DX, N4GN, K7BV, K8YSE, N8MR, 9V1PC, CE6TBN, CT1END, E21EIC, F5NQL & UFT, G3AB, GW0ANA, JI6KVR & JA-IOTA Islands News, LU5WW, ON5NT and VA3RJ & ICPO for the following DX information.

*** NO BULLETIN ***
*** SPECIAL NOTICE FROM THE EDITOR (by KB8NW) ***
"YOU ARE CRAZY!", Linda said as I told her I was writing this (minutes before leaving). Yep, I know I am crazy, but I feel obligated to send these last minute announcements before leaving to head south. So there will be "NO BULLETIN" for August 25th (I promise). Like I mentioned last week, Linda and I will be heading south, first to Tennesee to drop-off/move my daughter at Middle Tennesee State University (MTSU) and then off to Biloxi, Mississippi. I really need his break to rest up, and I hope that lying in the sun on the beach will help bring back some of my strength. However, PLEASE continue to send your DX info to me......
.. TNXS and GUD DX de Tedd KB8NW

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Friday, 8th/August, through Friday, 15th/August there were 214 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 3X, 4J, 4L, 4S, 4U1I, 4X, 5A, 5B, 5H, 5N, 5R, 5T, 5V, 5W, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9N, 9V, 9Y, A3, A4, A6, A7, AP, BV, BY, C3, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E3, E4, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FR, FY, G, GI, GJ, GM, GU, GW, H4, H40, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HZ, I, IS, J3, J6, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KH9, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, S2, S5, SM, SP, SU, SV, SV5, SV9, T32, T7, T9, TA, TF, TG, TI, TK, TR, TU, TZ, UA, UA2, UA9, UK, UN, UR, V2, V4, V5, V6, V7, VE, VK, VK9N, VP2E, VP5, VP6,

VP8, VP8/o, VP9, VQ9, VR, VU, XE, XU, XW, XZ, YA, YB, YI, YJ, YK, YL,
YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD9, ZF, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

E4, PALESTINE (Good News/Bad News). Achim, DF3EC, who was in Ramallah and was active for a few days over the pass week, is apparently back in Germany. However, "The Daily DX" reported Wednesday that the Israeli security personnel confiscated his transceiver before he left. If you were lucky to work him, QSL via DF3EC direct or bureau.

HB0, LIECHTENSTEIN. Look for Gherardo, IZ1DSH, to be active now through August 19th as HB0/IZ1DSH. Activity will be on 40-10 meters SSB. QSL via the bureau or direct to IZ1DSH.

HS, THAILAND. Champ, E21EIC, informs OPDX that there will be plenty of HS-Hams active in the SEANET Contest. Stations expected to be active are:
HS4BPQ/9 ALL BAND CW
HS0XNO 40M CW
E20HHK/P 20M MIX (AS-101)
HS0EHF 20M CW
HS1JNB 20M SSB
E21EIC 15M MIX (CW,SSB,RTTY,PSK,SSTV)
HS0GBI 15M CW
HS5AYO 15M SSB
HS1PDY ALL DIGI
HS8KGG/SWL SWL
HS0ZBS ?
HS0ZDX ?
HS0ZDZ ?
HS0/OZ1HET ?
E21CJN ? BIG GUN!

IOTA NEWS.....
NA-082. MDXA member Terry Jones, W8JE, along with Mississippi Gulf Coast amateur radio operators Karolina Sarnowska, KD5SDQ and Chris Sarnowski, KB5TBB will activate Ship Island (USI MS-005S, Harrison county), Mississippi, August 16th, weather permitting. Operations are planned to begin approximately 1530z and end approximately 2100z. Activity will be on 40-6 meters, SSB, as conditions permit. Callsign for the station will be W8JE. QSL via W8JE or the operator's home call, via QRZ.com SASE required for response.

OC-NEW. Operators V73T and V73B on Kwajalein are expected to activate a new IOTA as V73T from Taongi, Monday, August 18th. The boat ride there is over 36 hours.

SA-086. The Atacama Desert DX group (Operators XQ1IDM, XQ4ZW, CE1URH, CE1RQB, CE1VBH, CE1FLS, CA2WUI, CD0906 and CE6TBN) will be on the air as 3G2D from Damas Island (DICE ICE-201), October 17th,

18th and 19th. Activity be on 160-6 meters on CW, SSB and
RTTY/PSK. They will have 3 stations running 24 hours daily
like their 3G1P DXpedition. There will be plently of CW.
QSL Manager is XQ1IDM.

LIGHTHOUSE ACTIVITY (ILLW is this weekend!).....
A full list of stations who will be participating in this weekend's ILLW
can be found at: http://lighthouses.net.au/illw/2003_list.htm

A special event station signing CQ0RLH will be active August 17th,
from Roca Ligthouse to join ARLHS ILLW. Reference numbers: ARLHS POR-007
and DFP FES-001. Activity will be on 40/20/17/15/10 meters SSB. QSL via
CT2GZB.

The Metro Amateur Radio Club of Chicago will host a special event on
Sunday, August 17th at the historic Grosse Point (Lake Michigan)
Lighthouse (ARLHS reference USA-359) in Evanston, Illinois. They will
be operating from 1700-2100z using the callsign K9Y. The suggested
frequencies are (+/-):
CW - 7125, 14125, 21125 and 28150 kHz
SSB - 7175, 14250, 21350 and 28400 MHz
QSL via N9NT (QRZ.com).

Area hams from Eastern Massachusetts working in cooperation with the
U.S. Coast Guard (USCG) and National Park Service (NPS) are happy to
announce the FIRST EVER Amateur Radio operation from Boston Light on
Little Brewster Island as N1L. Boston Light (USA # 073) was the first
lighthouse in America. It is currently the ONLY lighthouse still manned
by the USCG. This operation will be take place during this year's 2003
International Lighthouse/Lightship Weekend (ILLW) from 0000z, August
16th to 2200z, August 17th. Operation will be on all ILLW listed
frequencies which can be found at:
http://lighthouses.net.au/illw/2003.htm
N1L (NUMBER ONE LIGHTHOUSE) will also operate on IRLP Node # 4320
and Echolink Node NS1N-R to make this special operation available to
as many people as possible. This is also the first activation of USA
Island # MA-035-S (Little Brewster Island). A color photo QSL will be
via the bureau for DX stations, and the QSL manager is KB1HJO. Send a
SASE to CBA for direct QSL. For interesting reading about Boston Light,
please check out the Web page at:
http://www.lighthouse.cc/boston/index.html

CORRECTION BY Mike, N8MR: From Eagle Harbor, Michigan. Look for the
Eagle Harbor Lighthouse (USA-253) to be activated in the ILLW, August
16-17th (not 15-16th), using the special 1x1 callsign, K8E. Modes of
operation include HF/VHF, CW/SSB, FM Satellite and possible HF digital.
Collectors of ARLHS numbers can get credit for three upon request:
Eagle Harbor Lighthouse USA-253, Front Range Light USA-254 and Rear
Range Light USA-255. QSL via bureau or direct to N8MR with #10 SASE.
Web page is: http://www.kc8nah.com/Interests/illw03.htm

Look for Chris, DL9CHR, to be active as 9A/DL9CHR/p from Savudrija Lighthouse (CLHA reference CLH-073 for the Croatian lighthouse award, ARLHS reference CRO-134) located on Cape Savudrija (WW Loc. JN65rl), August 16-17th. QSL via his home callsign, direct or by the bureau.

Look for special event station CS5E to be active in ILLW, August 16-17th, from Ilha do Bugio (IOTA EU-040 and DIP ES-004) and Bugio Lighthouse (WLA LH-0647, ARLHS POR-005). Activity will be on 40/20/15/10 meters SSB. QSL via CT1CSY.

Members of the Salento DX Team (IK7JWX, I7PXV, IK7JWY, IK6CAC and IK7JPJ) will be active August 16-17th from Torre San Giovanni-Ugento (LE) Lighthouse (Wail PU-003, ARLHS ITA-171). They will be signing homecall/p. Activity will be on 40/20/15/10 meters CW/SSB. QSL via their home callsign, direct or bureau.

Look for the special callsign, LT7W, to be used by "Grupo Titan" during the International Lighthouse & Lightship Weekend from Punta Delgada Lighthouse (ARG-015), Peninsula Valdes, Patagonia. Details can be found at: http://www.LT7W.tk

Operators Simone/DJ2KS, Michael/DJ5KP and Christian/DL6KAC are currently on a Baltic Sea cruise until August 22nd. Their callsign (once in Denmark) will be OZ0AIS/mm. Their final destination will be an island which is part of EU-172 including the corresponding lighthouse. Name and exact location will be announced later due to the fact that bad weather might force them to change their plans. Activity will take place during the ILLW. Outside of the ILLW, they will use the callsign OZ0AIS/mm. 40m only, using a dipole. An APRS position report (starting August 10th/11th) can be found at:
http://www.findu.com/cgi-bin/winlink.cgi?oz0ais
QSL only via DL6KAC either direct or via the German Bureau. OZ0AIS is not member of the Danish Bureau. Make sure "via DL6KAC" is written on the card. Direct QSLs without postage will be returned via the bureau. The Lighthouse-QSLs will be printed after their return.

QSL INFO AND NEWS.....
Carlos Nora, CT1END, reports that the log is now online for the recent activity of CS4B (EU-040 Bugio Island). Also, photos of the CS4B and CS5C (EU-145 Culatra Isl.) operations can be found on the Web pages at: http://ct1end.netpower.pt/cs4b
http://ct1end.netpower.pt/eu145_culatra_2003/
http://www.portal-dx.web.pt

S61, SINGAPORE. Peter, 9V1PC, reports that the Singapore Amateur Radio Transmitting Society (SARTS) will be holding field day operations from St. John's Island off the southern coast of Singapore from the afternoon of Friday, September 5th, to midday Monday, September 8th. Two stations will be active on 160-10 meters with the special prefix S61FD. The S61FD team will have two experienced 160/80m operators: Bob Marshall-Read/G4VGO and Peter Cook/9V1PC. This team will focus on low band operations using an inverted L for transmit and a variety of loops, pennants and possibly beverages for low noise receive. They expect that 1 kW transmit power

should be available. St. John's Island is in Region 3, IOTA AS-019, CQ Zone 28 and ITU Zone 54. QSL cards should be sent to: Incoming QSL Manager, SARTS, Robinson Road P.O. Box 2728, Singapore 904728.

SPECIAL EVENT. Glyn, GW0ANA, reports: "Many Amateur Radio operators may be aware of the significance of "Flatholm Island " located in the Bristol Channel in the UK. The island has a very historic link in connection with our hobby as it was used by Marconi when he demonstrated to the British Post Office that his theory that radio waves would travel across water. He made the link via radio from Lavernock Point in south Wales to the island on Thursday, May 13th 1897. To pay homage to Marconi, the Barry Amateur Radio Society (South Wales) erected a monument on the island and each year make an annual visit to operate a special event station using the callsign "GB5FI" (Flatholm Island). This years'visit will take place between Friday, August 22nd and Wednesday, August 27th." The society will activate this very rare WAB square ST26 and operate mainly on the amateur HF bands to follow in the footsteps of the historic event. This year they also plan to operate via satellite using AO-40 and also Oscar 14 (subject to access in the short pass time). Their priority will be mainly SSB operation, but they may operate on the digital or SSTV modes. This is a very rare opportunity to add to your QSL card collection a "MARCONI EXperiment" location, Flatholm Island, via satellite! Lighthouse ref. number: 0007. QSL via GW0ANA direct CBA or via the Bureau is no problem.

T8, PALAU. Haruki, JH9URT, will be active from here as T88HO and this will be his first DXpedition. Activity will be between August 22-26th and on SSB only on all HF band and 6 meters. QSL direct to his home address below or JARL bureau. His direct address is: Haruki Ohtsubo, 1377-1 Futatsuka, Takaoka, 933-0816 JAPAN.

VK9X, CHRISTMAS ISLAND. Andy Chadwick, G3AB, informs OPDX that he will be active from Christmas Island as VK9XAB from August 30th to September 6th. Activity will be mainly CW. This is a low key DXpedition with 100w and wire antennas. QSL via G3AB.

VP5, TURKS AND CAICOS. Dennis, K7BV/1, will be operating September 9-16th from the Turks & Caicos "HAM-LET" rental QTH. Six meters will be the primary focus (including meteor scatter) with active participation in the ARRL VHF Contest, September 13-14th. There will be HF operating when the 6 meter band is closed (primarly on RTTY and CW). QSL via KU9C. Website info for VP5/K7BV is: http://www.qth.com/k7bv/TURKS

YI, IRAQ. Ghis, ON5NT, informs OPDX that he will be flying into Baghdad on Wednesday, August 13th. He will be there for about 3 weeks. His callsign will be YI/ON5NT (he has had his license since May and is already accepted by the ARRL). Ghis states to not expect big signals from YI. He is running an IC706MKIIg into wire antennas. Also, look for him on 6 meters. QSL via his homecall. Ghis also mentions that Robert, S53R, has finished his holiday time and will be active as YI/S53R (QSL via K2PF). He will be on the same flight into Baghdad with Ghis. Robert should be there for a couple of months. ADDED NOTES FROM ON5NT: Ghis also provided OPDX with his itenary after YI. He will head back to Belgium for 2 weeks, his daughter is getting

married. Then back to U.A.E (A6). He might take another 2 weeks break somewhere at the end of October, early November. Then back to A6, returning home on December 10th (this is his birthday). During the time he is back in A6 (most likely Oct/Nov), Ghis will try to activate AS-021 (this will be a new one for most of the IOTA gang, since "Abu Dhabi" was deleted) and AS-124. The only direct address to use is: Ghis Penny, P.O.Box 93, BE-9700 Oudenaarde. He adds that his YI cards, and also the 5B4/ON5NT cards (for his April 2003 operation) will be printed and answered on his return to Belgium in December. During his absence, Ghis's XYL (he states, "She became an expert in QSLing, first step to get her into ham radio and a license, hi...) answers the incoming direct cards for the stations he manages. They are also still cleaning up the bureau cards for 5X1T (ON6TT) and EL2WW (ON4WW). Since both are members of the UBA, there's no problem with cards via the bureau (only, due to the amount of cards it takes a while). Ghis made 5U7JB also a member of the UBA, so cards are also accepted via the bureau.

ZC4, UK SOVEREIGN BASE CYPRUS. Geoff, ZC4CW, will be active from the Eastern Sovereign Base, Cyprus, for the next few years. QSL via G3AB.

1765. what is a relay in a pileup?

Newsgroup: rec.radio.amateur.dx
Date: 2003-08-15 13:37:55 UTC
From: Harry George <hgg9140@seanet.com>
Message-ID: <m3eknf3d8.fsf@wilma.local>
Source record: 9500

Newbie question: This morning on 20m I was listening to a pileup for a mobile in Minnesota who was 33 from my G5RV near Seattle. I could hear some of the callers but not many. Suddenly a very strong signal came on offering to relay for the mobile (I think). It was very rapid fire for quite a while, and then the strong signal bowed out and someone thanked him for the help.

It was all happening to fast for me to follow. What was I hearing?

Hello All,

I've tried to make a selection of the best info!

Look at my website:

http://www.qsl.net/pd0rkc

New amateur SOFTWARE.
COAX cable info (table).
Compare many ANTENNAS
(tonna/m2/diamond/flexa/cushcraft/cue-dee/hygain....more).
SATELLITE freq. keplerian elements, tracking software (the new NOVA, and
SATSCAPE).
KENWOOD microphone & reset info (and many more).
Datasheets electronics.
All you need is there to find!!!!!

If NOT let me know whats missing (my e-mail adres is on my website!).

> KD7VEY
>
Chances are, there were many stations trying to get through to the
mobile without success and this fella offered to act as net control
(let's not start this thread again..dead horse yada yada yada)for the
mobile station. SInce this other fella could probably hear the stations
trying to contact the mobile, he's offering to relay the callers call-
signs to the mobile, who then work the mobile and this fella offers up
the next callsign he hears

Different schools of thought on this topic/subject

HAve a nice week-end

This sort of thing happens when the DX station can not pick out the mobiles, QRP and weak stations on their own.
Or the DX station is not very good at working a pileup or does not speak English very well.
So a well meaning strong station acts to relay callsigns to the DX.
Or more often takes a list and acts as net control.
Either way it is an assisted QSO and true blue DXers frown on this practice as well as any DX net.

Stated differently when you join the DX club, don't tell em you work the DX nets or lists.

However assisted QSOs, nets, lists, don't show up on QSL cards, so counts for DXCC.

Back to the true blue DXers -- wonder if a P5 came on a DX Net or list, how true and blue would they be ???

On the other hand, it is your station, your DX style, so do what you want.

Hello KB0SWS,

I've been on the newsgroup for a few years.
I posted software & info once in a month (when I updated my page with news).
New visitors can take a look.
When I have some news (like the new kenwood trx) I post my url for info.

That's called news on the newsgroup!

What do you do for the newsgroups!

One mail at one newsgroup (is that spam?).
Some people see new adresses of other newsgroups! (hey is that an idea for people whoe does not know?).

I see often people complain at other people who trie to do the best with their info.
Some people use that to get atention from other complainers, they prefer to read
the comments on that, what a waist of time, use your energy for hamradio news.

Maybe it's better to put your comments on a new newsgroup (news: alt.complain?????).

I seen the new Kenwood advertised on their site, a couple of weeks before
you brought it up in here.

> That's called news on the newsgroup!

I never said anything was wrong with the posts. I was only commenting that
you advertise your site often. However, if you think that everyone here
responding to your site, is putting it down, then maybe it needs to fit into
the groups a bit more.

The 'Rules of the Road' for Usenet hold that a post is not spam if it has a BI (Breidbart Index) of less than 20. The BI is calculated by taking the square root of the total number of groups an article is posted to.

Full details on this measure may be found here.

http://www.stopspam.org/usenet/mmf/breidbart.html

From what I can see, Cor posted an identical message to six groups. The square root of six is about 2.45, so his message cannot be considered spam under Usenet guidelines.

Said guidelines are here.

http://www.faqs.org/faqs/usenet/posting-rules/part1/

If his posts bother you, well... most Usenet newsreaders do have a filter or 'killfile' function. ;-)

An email response asked if it was 14.336 and said this was a "Mobile
Emergency and County Hunters Net." It was in fact that frequency, so
that's what I was hearing. That also explains why evryone was
mentioning counties.

BTW, after posting the question, I realized Seattle to Minnesota is a
long way but not officially DX. What would be the right group to ask
this question?

1779. Anything new with TX0AT

Has anyone heard anything good or positive about the Chesterfield Is TX0AT operation from last year.
Are they going to send the paper work to ARRL DXCC ?
Are they going to send QSLs out.

In addition to the other responses there is another possibility.

If you were listening to one of the nets; Intercon, Maritime Mobile, etc. it was likely a station offering assistance to net control so that the net control could recognize or honor the mobile station's request.

A Minnesota station would not be normal 'DX' but may have been operating from an Island or Lighthouse or Museum Ship etc. In this situation I would not honor an assisted QSO. [Note to the DX purists: I have worked DX on the DX nets but never QSL'd an assisted contact].

I can single post it on all those newsgroups (what's the difference?).
Okay response comes also in all newsgroups, those few mails (also in the past) makes some people mad!?!?!?

I like to see when people comes also with urls of sites who have new software, or some intresting info!

News for the newsgroups!

Most of the spam is commercial adverticeing, I do NOT get payed for my website (I do not have to get payed).
It was many work, Im glad I helped some people on information.

http://sec.noaa.gov/pmap/gif/pmapN.gif
I found (on inet) this nice aurora map (each day a NEW....group fresh map!!!).

Bruce,

But did you look at the date of this material?

"Archive-name: usenet/spam-faq
Posting-Frequency: weekly
Last-modified: 1997/03/25"

Last-modified: 1997... It seems that this info is just over six years old, if I am reading the
article right. (Yes, I did read the article). Technologically speaking, this is ancient news,
worthy of needing to be 'updated' to today's standards.

You also need to consider *how many* different NGs a single person might subscribe to, and all
the additional messages one person might have to "filter" through. This means a BI of 2.45 is
far greater than it seems.

Personally, I (1.) like some of the stuff Cor posts, and (2.) only subscribe to the
'alt.ham-radio.vhf-uhf' NG, so I don't see so much of the same thing. I used to subscribe to
ALL of the 'alt.ham-radio.???' NGs, but it was too much repetition.
--
Regards,
Steve KA4TMB

Hi,

I extended my Excel 10band DXCC Checklist from 2 to 3 modes, so now you can keep record of all worked DXCC countries on 10 bands and 3 modes.

The spreadsheet is free to download an free to use. There is also a 2 mode version available.

You can find it on http://www.pg7v.net (check to download menu)

More newbie questions. Of course the answers will probably come after the contest is over, but it would be information for next time.

I stumbled onto the North American QSO party and responded to 3 CQ's before I realized what was happening. Then I found and read the rules on the web. What I can't figure out is:

a) I have no intention of competing. Should I just stay out of this, and go find other places in the spectrum? Or should I dive in, and respond to any stations I can reach?

b) Do I need to turn in a log for those 3 contacts (and any more if "a" is "go for it"), so that the other guys' logs can be confirmed?

c) I heard some people asking for QSLs. I've just been reading about WAS and see that NAQP could be a great way to get some states. But I also realize that a contest is a hectic time for anything as civilized as QSL cards. What's considered proper form here?

Whatever turns you on. Some compete seriously, some leisurely, some just
make a few QSOs and some stay away.

> b) Do I need to turn in a log for those 3 contacts (and any more if
> "a" is "go for it"), so that the other guys' logs can be confirmed?

No. As long as you don't show up in just one claimed log (i.e. a
unique), your QSOs will be valid for the stations who worked you.
However, contest organizers encourage sending in "check" logs.

> c) I heard some people asking for QSLs. I've just been reading about

No one is stopping you from mailing your QSL and a SASE to the US
stations you worked. You don't have to make an official on-air request
for the QSL. Use qrz.com for the address lookup and most people will
send you their card back. As for the ones who don't - never work them
again in any contest, ever, until the end of time.

> respond to any stations I can reach?

No, go right ahead and dive in! The contesters will appreciate every
contact they get.

In the NAQP contest any contact where at least one participant is in
North America counts for points. There are some contests in which this
isn't true - in which your contact doesn't count and the other guy would
rather you didn't call. This is apparent from the contest rules - you
should continue to look them up.

Some contests require a "serial number" - this is 1 for your first
contact in the contest, 2 for your second, etc..

> b) Do I need to turn in a log for those 3 contacts (and any more if
> "a" is "go for it"), so that the other guys' logs can be confirmed?

You don't *have* to but you should. You never know - you might win! -
especially if you live in a rare state where there's a chance nobody
else will enter<grin>.

Most contest sponsors want you to email them a "Cabrillo" file. If
you're using logging software, there's probably a way to export this file.

> c) I heard some people asking for QSLs. I've just been reading about
> WAS and see that NAQP could be a great way to get some states. But I
> also realize that a contest is a hectic time for anything as civilized
> as QSL cards. What's considered proper form here?

Actually they were probably using "QSL" in a different sense - verbally
confirming proper receipt of the required information, rather than
confirming it in writing with a QSL card.

But there's nothing wrong with sending QSL cards for contest contacts.
Don't ask about QSLing on the air - the stations you're working are in a
hurry. But if you work someone in a state you need, look them up on
qrz.com and mail them a card. You should enclose a S.A.S.E. as some of
these people (especially in rare states) get a LOT of QSL requests!

Unfortunately, some contesters do not QSL even if you do send a SASE.
If you keep participating in the NAQP and Sweepstakes contests, you'll
eventually work someone else in their state who *does* QSL.

(the failure to respond to QSLs is hotly debated among contesters)

Respond to as many or as few as you want. The serious contestants want as many points as they can get and NEED the casual contestors. Without the casual contesters, the scores would stay pretty low. I think I worked 20 stations and then decided I'd rather watch old movies this weekend.

>
> b) Do I need to turn in a log for those 3 contacts (and any more if
> "a" is "go for it"), so that the other guys' logs can be confirmed?
>

You don't have to but with only three, you probably should. This prevents your contact from being tossed out or their logs as "unique." If a couple of those three got it wrong, it would not only be tossed out of those two for errors but out of the third one as it becomes a "unique".

> c) I heard some people asking for QSLs. I've just been reading about
> WAS and see that NAQP could be a great way to get some states. But I
> also realize that a contest is a hectic time for anything as civilized
> as QSL cards. What's considered proper form here?
>

Many do not send QSL cards automatically. However proper etiquette is that if you send them one with an SASE, they should send one back. Now some of these people may not actually have cards since they do not QSL regularly. The really conscientious ones (if they do not have cards) will write the info on a blank 3.5" x 5" card or an interesting postcard or just a sheet of paper and reply that way. For the various awards available, it only has to be written/printed document not specifically a card. The cards are more convenient to file and handle however.

Here is the actual definition of QSL.

QSL? - Do you acknowledge receipt?
QSL - I acknowledge receipt.

The use QSL is to confirm that the information has been sent or received. It doesn't really refer to a card in its basic definition. Thus, a "QSL card" means written confirmation.

Howdy Harry -- NO you do not "have to be in the contest" to make QSo's, nor send in a log. So dive in!

In fact -- contesters appreciate non participants so as to increase their scores.

Contesters are trying to maximize their scores (time is of the essence), so best not engage them in chatter like "What's the QSL route"

For US states -- just go to QRZ or Buckmaster and mail them an SASE. (Self Addressed Stamped Envelope). They can receive hundreds of QSL requests so helping them with return postage is the usual.

For DX -- see Pathfinder for the QSL route URL:
http://www.qsl.net/pathfinder/WebClient/

Have fun -- and if you get a lot of QSO's -- sending in a log is no big deal.

1805. RSGB - Friend or Foe?

Newsgroup: rec.radio.amateur.dx
Date: 2003-08-17 19:23:40 UTC
From: Anon <anon@anon.com>
Message-ID: <BKQ%a.8067$z7.879473@wards.force9.net>
Source record: 9439

Does the RSGB now fulfill any useful function?

Sticky question - although perhaps not really. Suppose we consider the question seriously:

It is regularly pointed out that the RSGB is in fact a limited company, fixated on profit at any cost
to the hobby. Or is the organisation in fact what it claims to be: a national radio society?

If the RSGB IS indeed the UK's "national radio society" then it is quite clearly a disgrace.

A national radio society, within this context, exists solely to defend the interests of the hobby,
and to develop and expand it along democratic lines - those dictated by its members. The RSGB
has never possessed a mandate to represent anyone BUT its members! If you wanted to be involved in the future progress of the hobby then RSGB membership was in your best interests.

Today, however, we find the RSGB actively involved in the total destruction of everything that
amateur radio once stood for. In recent years, we have seen a persistant dumbing-down of the
standards for entry into the hobby. Six year-old children can now fully "qualify" for an amateur
radio licence in this country. This deliberate degradation has now culminated in the complete
sell-out of amateur radio to CB. The once-respected RAE (Radio Amateur's Examination) is now a pathetic joke. Merely a wink-wink pretence to deflect accusations that amateur licences
are now available to anyone, practically for the asking. But they ARE.

Just as CB licences have always been.

And all of this is loudly acclaimed by our "national radio society", the RSGB. They are actually
PROUD of what they have done! I think that single fact tells us all we need to know.

If, however, the RSGB is simply a commercial, profit-making company then it's hard to fault their
agenda. They have every justification in forcing through changes to the structure of amateur radio
designed to maximise their profits and generate increased future income. They have no need to
take any notice of licencees interests or preferences - they will simply do whatever is necessary to

achieve their pre-determined ends as specified by company policy.

But is it not disturbing that they continue with the pretence that they are still a "national radio
society"? When they are clearly nothing of the sort. For example, when phoning Potter's Bar you
have to ask for the amateur radio department.

Amateur radio department? - Surely their entire purpose is amateur radio?

Not so - that's just a small part of their business. But how on earth does this gel with them
supposedly being a "national radio society"?

Sounds more like a con-game to me every day.

So why remain a "member" of this organisation? The most prominent reason that surfaces is use of the QSL Bureau.

Yes, really!

Three things are pertinent to this:

One: E-qsl'ing will inevitably supercede pasteboard cards - and it won't be too long in coming. It's
just too easy, and too cheap, not to succeed. The ARRL's "Logbook of the World" is the first major
step along this route - there can be no turning back now. So the numerous qsl bureaus around the
world have a severely limited future. It's difficult to see this as a good selling point any more. What
happens to your credibility when you close the bureau down?

Two: There IS an alternative, meanwhile. The ISWL (International Short-Wave League) provides a
very efficient bureau service to its members. Certainly at least as good as the RSGB's version - many
would say rather better.

Three: You are perfectly at liberty to collect incoming cards through the RSGB bureau system
without being a member - but you cannot send outgoing qsl cards by this route.

All right, how about RadCom? Is THAT worth the annual fee?

Well, perhaps it used to be - although it's a moot point. But now it's target audience is quite
obviously the children and CB'ers who form the vast majority of entrants to the hobby today.
Another good example of the RSGB turning its' collective back on the very people it came into existance to support. Yet another occasion when we need to ask: Why?

It was recently claimed on uk.radio.amateur that the RSGB is now irrelevant and has no future

in the amateur radio of the 21st Century.

It's hard to argue successfully against this. The "society" appears to have abdicated its' responsibilities in favour of commercial gain. It has presided over the destruction of a once-
respected hobby and is PROUD of this fact. It has striven for several years to REDUCE standards when the very reason for it's existance was to INCREASE those standards.

It has fought for, and achieved, the amalgamation of CB and amateur radio into one unified service - referred to officially by the UK's Radiocommunications Agency as "hobby radio". Will the RSGB shortly have a "hobby radio" department?

In short: they have destroyed everything that they were entrusted to defend.

The only reasonable conclusion is surely that, yes, the RSGB IS indeed irrelevant and will remain
so. Their time is past and amateur radio is dead and gone. It's questionable now if there is any
longer a need for a "national radio society". To do what exactly? Represent us the way the RSGB
"represents" us? No thanks. We're better off without.

I've been an RSGB member for nearly forty years - but I won't be renewing when the sub comes
up in a few months. I can't continue to support this sham. I can't continue to fund an organisation
that has deliberately done so much damage to a hobby I once loved. I will NOT be turned into a
glorified CBer for ANY reason. It is likely that in the near future I will decide not to renew my G3
licence - for exactly the same reason.

If there is any justice in this world, then the RSGB will get what they richly deserve - in full measure.
What they have done is unforgivable, and only worthy of complete contempt.

They certainly have mine.

1808. Looking for QSL Routes: 7Q7XX and 9D5CW

Newsgroup: rec.radio.amateur.dx
Date: 2003-08-18 05:32:11 UTC
From: Larry Johnson <larryj@teleport.com>
Message-ID: <3F406491.889C93B1@teleport.com>
Source record: 9442

I'm trying to find routes for QSLs for 7Q7XX and 9D5CW for QSOs in 1993.

For 7Q7XX, W7GB is not a manager for any station, and neither JH3RRA nor JG3LZG who were listed as managers have an address on QRZ.com.

For 9D5CW, a direct address of POB 24754-154 in Tehran gets returned with the Post Office rubber stamp saying "P. O. Box is mistake", and a listing of PY2CWW for a manager gives nothing in QRZ.com.

If anyone has any other ideas for these two stations, such as home calls of the operators, please let me know.

Thanks,

Larry

I am interested also (and so many others...). This is mail I received some time ago from Canadian ham:

Vlatko,

My name is Guy, VE2QRA. About TX0AT, I e-mail them many times and finally got an answer about one month ago saying that qsl should be ready in a couple of month. So this probably means to be patient. I'm really looking to it since I may have been the only VE2 to make it through!

>
> When you work an exceptionally weak DX station, do u use ESP?
> Is that Extra Sensory Perception or Expected Sensory Perception ??

Expected Sensory Perception amounts to knowing what to expect for the signal report (count em out), callsign (from packet Cluster), etc. So yes you can work the weak ones that are a syllable at a time if the info is repeated several times and you know more or less what to expect.
>
> Is the best filter between your ears ??

Many think so. Some folks are blessed with this -- able to tune out the loud mouthed Mother-In-Law. Some are pitch sensitive and easily discern between two CW or SSB signals.
>
> Can u really copy CW right down into the noise -- if so why??
Experienced CW ops can do this. Again the trained ears and brain
>
> Have you ever copied SSB right down into the noise ?? If not why not ??
I really believe you can. May take several repeats, but that and ESP can do the job.
>
> Do you listen to DX on a Speaker. Are headphones better ??? Which ones --
> Com Phones or Hi-Fi
Can not imagine working weak DX using the speaker. Com phones for young ears, Hi-Fi -phones for the rest of us. The intelligence is primarily in the high tones -- ala kids and YL's breaking a pileup
>
> Do you keep the RF Gain at Max?
> Or advance the audio gain, then bring up the RF Gain control for APPARENT
> improved S/N ratio. Huh how does that work??
Very subjective, but experienced CW and SSB DXers will turn up the audio and bring up the RF gain for just hearing the signal -- try it -- works for many.

>
> Do you use fast AGC or Slow when DXing --- Why ???

Fast AGC. So a strong station doesn't blank out the weak one. Using NO AGC runs the risk of a strong station coming on and blowing out your ears!!!

> Do you keep the RF Gain at Max?

When there are a lot of static crashes from lightning (QRN),
turning down the RF gain makes the interference much less
objectionable and keeps the automatic volume control delay
from reducing the strength of the signal I want to hear.

Otherwise, RF gain at max.

RSGB is the National Society of the UK. Like an non profit they cannot charge enough for membership to cover all their expenses. LIke the ARRL they sell publications and pins etc to cover the extra expenses. The probably also have tried to set up an endowment so they have money in the band for short falls.

Like the ARRL they are the IARU represemtative to the world and to the UK goverment and licemsing authority. I have been a member in the past and like the ARRL they do try to be representative (they are not and will never be a democracy and neither is the UK or the USA for that matter). I feel that they do try to represent the best intersets of all UK hams mwmbwes or not.

Just as I do in the USA with regards to ARRL I say join the RSGB and then vote vote vote!
If you are not a member they have no reason to listen to your whinning!

1815. TZ6RD problems with SE USA

Newsgroup: rec.radio.amateur.dx
Date: 2003-08-20 00:30:19 UTC
From: David L Thompson <thompson@mindspring.com>
Message-ID: <viz0b.757$sV.571@newsread1.news.atl.earthlink.net>
Source record: 9449

Many across the SE USA have complained about the weak or non existent signals from the TZ5RD expedition. I found out that on 20 to 10 they are using a MA5B beam fixed North so the SE USA (from North Florida to North Carolina) is in the side null of the beam. This explains why the are Ok in Europe and even reach W1 to W8 but are ESP to very weak in the SE USA. They also could not use the 400 watt amps so were barefoot.

I did work them on 15 SSB today where they readable to a max of S3 but still nothing on 17, 12, or 10. Some of the SE gang still need TZ on 80 and some of the HF bands. I need TZ on 12 for all bands. I did ask the pilot station to have them use dipoles or one of the verticals on the HF bands so maybe that's why they were readable on 15 even tho conditions went bad after Sunday.

Just wanted to let the SE gang know so they won't be checking their antennas or pulling their hair.

The Isotron should be your last resort. A better plan would be to use a tree and put up a wire
such as one of the 1/4 wave slopers. If you don't have a tree there are still alternatives for say a 25 by 25 space. E-mail me directly and I'll give you details.

Actually, Scott, it's not French but Portuguese, so it is Leste. It used to be a Portuguese colony. The country's official name: Republica Democratica Timor Leste.

1826. re: Rockwell Collins "PropMan 2000" propagation s/w

Newsgroup: rec.radio.amateur.dx
Date: 2003-08-21 13:29:06 UTC
From: "Carl R. Stevenson" <wk3cqth@wk3c.com>
Message-ID: <CO31b.1200$6e5.91003@nnrp1.ptd.net>
Source record: 9360
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx

For those of you who have the Rockwell Collins
"PropMan 2000" propagation prediction s/w
package, you may have noticed that the program
no longer retrieves "Space Weather" input from
the internet automatically, but gives error messages.

This is due to the fact that the sources of the data
have changed because of several factors:

1) NOAA has switched satellites for some of the proton
data, due to operational considerations ... this caused
filenames to change (old filenames based on satellite x
are no longer being updated, but the equivalent data is
now available from satellite y)
2) directory structures on the servers have changed

I have created a new "propman.ini" file that contains
the information necessary to retrieve the space wx
data. It is available for amateur use on my personal
web page at http://home.ptd.net/~wk3c

The SSN (smoothed sunspot data) is no longer available
automatically, but can be retrieved and entered manually
from http://www.nwra-az.com/spawx/env_latest.html

use the "NWRA SSNe" data from the rightmost column
for the current date.

I hope this information is helpful. I have been talking with
the engineer at Rockwell Collins and he has verified that
my propman.ini works correctly. They are also considering
modifying the parser that read the old SSN data file to extract
the SSN data from the website above (if they implement this,
it will require another change to propman.ini to point to the
website so the program can "see" and parse the SSN data)

Message-ID: <3F45A9BF.10404@invalid.invalid>
Source record: 9362

Well, I got another one today. This time from a DX station. A QSL
w/SASE confirming a QSO with PJ2/W9WI.

Problem is, I've never been to the Netherlands Antilles. Nor the U.S.
Virgin Islands. Nor any other country besides the USA and Canada.

I *have* worked Jim Fitzgerald, WI9WI in these (and other) countries.
Obviously, so did the people who keep sending *me* cards!

Moral is, be careful, and be prepared. That funny-looking callsign
might be wrong, but it might not. If the guy running the pileup keeps
sending his call as WI9WI, he probably really *is* WI9WI (and not W9WI)
<grin>!

AK

Recent ARRL release:

The ARRL says Broadband over Power Line (BPL) proponents failed in their comments to the FCC to substantiate their claims that the technology will not cause widespread interference. In reply comments filed August 20--the FCC's deadline to receive comments in the Notice of Inquiry, ET Docket 03-104--the League said that if the FCC is going to rely on industry statements in making decisions on BPL deployment, the industry should back up its assertions with technical studies and hard data and make these public.

"Unfounded assurances that BPL will not cause interference are no substitute for real-world measurements," the League declared, "and the FCC should rely on documented test results and an impact of interference potential based on scientific, not marketing, criteria."

Have a QSL from 7Q7XX for QSO dated 22 Feb 1992.

On QSL says QSL via:
JH3RRA
Box 21
Katano,Osaka
Japan

Shows operator as JG3LGZ

Hope this will help.

Amateur Radio Newsline(tm) Report 1358 - August 22 2003

From the 2003 Huntsville Hamfest and from our studios in New Orleans, this is Amateur Radio Newsline report number 1358 with a release date of Friday, August 22 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. I'm Don Wilbanks, AE5DW, reporting.

We begin this weeks newscast with the sad news that one of the voices so well known to ham radio will be heard no more. This, with word that Amateur Radio Newsline's Vice President and senior anchor Roy Neal, K6DUE, has passed away.

Roy was 82 when he died on Friday, August 15th at a hospital in High Point North Carolina. He had undergone heart valve replacement surgery three days earlier. According to his family, Roy was at peace at the end and did not suffer.

In both the worlds of broadcasting and of Amateur Radio, Roy Neal was a legend. He began his career at WIBG radio in Philadelphia. After military service in World War Two, he returned and helped pioneer the emerging medium called television at station WPTZ. He then joined the National Broadcasting Company where he spent most of his career producing and reporting for Network News. His specialty was science and aerospace.

But to hams, Roy will always be remembered as the person who brought manned Amateur Radio into space through the SAREX and ARISS programs. His close friend and NBC colleague Alan Kaul, W6RCL, joins us later in the newscast with more on Roy's many contributions. (ARNewsline, Philadelphia Broadcast Pioneers)

**

IN THE NEWS: JIM HAYNIE ON BPL

Roys Death came just as the Huntsville Alabama Hamfest was getting underway. One of the major topics hams were talking about is he growing debate over B-P-L or Broadband Over Powerlines. One of the people most concerned is ARRL President Jim Haynie, W5JBP:

--

Jim Haynie, W5JBP: "Broadband Over Powerlines is important, and just as I said on our website - this is bad. This is not good for Amateur Radio and I don't know how we are going to lick it. Quite frankly, and I want to tell you that right now."

--

Haynie made his comments to a packed audience at the hamfest's ARRL Forum. He says the League is doing everything possible to try to convince the FCC to not proceed with rule making B-P-L a reality. (ARNewsline)

**

RESTRUCTURING: HAM RADIO AFTER MORSE CODE

Jim Haynie also shares his thoughts on a subject dear to many hams: Whether Amateur Radio should or should not keep Morse code. Stressing that he speaks for himself and not the League, Haynie says code should be a requirement for the Extra Class license:

--

Jim Haynie, W5JBP: "What if we were to have three classes of licenses? Entry, General and Extra and Entry got phone privileges on he current Novice bands? And that's all.

So we ask questions on the exam about just that. They could only use 100 watts store bought radio equipment. Possibly even a two-year expiration date.

Generals - same thing except no new expiration date. The same privileges they have today. But for Extra we retain the 5 words per minute code requirement."

--

Not everyone agrees with Haynie. Scotty Neustadter, W4WW, is Chairman of the Question Pool Committee for the National Conference of Volunteer Examiners and this is his personal view:

--

Scott Neustadter, W4WW: " This is not your fathers or your grandfathers ham radio. Things have changed. Technology has changed, and I think that - to an extent - that we have to change with them. We have to recognize our history and in no way am I - nor do I know of anyone else ho is advocating any abolition of the right to operate CW on any Amateur band where you can operate it today.

What I do know is that there is a whole lot of people saying that it does not make allot of sense anymore that I require that you be able to do that. I think that's the distinction that we have to keep in mind.

--

While the debate over Morse Code in amateur radio's future goes on _ Jim Haynie points out that what will be decided remains a long way off_perhaps years. (ARNewsline)

**

HAM RADIO HONORS: W6JAY RECEIVES 2003 YHOTY AWARD

As enthusiastic hams began pouring into Huntsville's Von Braun Civic Center Saturday morning _ one of the Hamfest's biggest moments was taking shape. The Huntsville Hamfest is the setting for an exciting yearly event_and that's the presentation of the annual Amateur Radio Newsline Young Ham Of The Year Award. This year's winner is 17-year-old Jay Thompson, W6JAY, of Santa Ana, California:

--

Jay Thompson, W6JAY: "When I first started I did not think that thre was allot to do in Amateur Radio, but the longer I am a part of it , I realized that there is much more that I could do. And I know that as much as I have done so far, I know that there is still kore out there for me. So I'll keep trying to acomplish more and maybe Ill become even better at Amateur Radio in the future."
--

CQ Magazine is one of the award's principal underwriters. Editor Rich Moseson, W2VU, says that_while Jay stood above fellow nominees_many other young hams are big achievers, as well:

--

Rich Moseson, W2VU: "Every year we review applications and nominations from a variety of people. The person you see standing here on the stage is not the only really good kid who has done allot. He's just risen the crop a little bit. There are a whole lot of other young people out there in ham radio doing great things, and we congratulate all of them."

--

The Amateur Radio Newsline Young Ham Of The Year Award is in its 17th year. Vertex Standard and CQ Magazine are the Award's principal corporate underwriters.

That's it from the 23003 Huntsville Hamfest. The rest of the newscast will come from our New Orleans studio, but first this. (ARNewsline)

**

Break 1

From the United States of America, we are the Amateur Radio Newsline, heard on bulletin stations around the world including the 145.600 MHz repeater of the Hiway Amateur Radio Club serving Durban South Africa.

RESCUE RADIO: THE BLACKOUT

Ham radio came to the rescue as cellphone systems totaly failed during the recent North-East blackout. Bill Pasternak, WA6ITF, has more:

--

A New York Times article said it this way: When technology failed on a massive scale, some old-fashioned broadcasting stepped into the breach. This, as ham radio operators took to the airwaves to reach emergency workers.

The technology that failed was the North-East power grid that provides electricity to cities like Cleveland, Detroit and New York. This in turn lead to communications failures as numerous cellular telephone sites without generators or battery back-up - went away -- the afternoon of August 14th .

According to an ARRL Bulletin, with cellular systems overloaded or out altogether, the incident turned into a test of Amateur Radio's capabilities to operate without commercial power. The New York City-Long Island Section Emergency Coordinator is Tom Carrubba, KA2D. He estimates that ham radio operators handled 800 to 1,000 messages from Thursday afternoon until early Friday.

Diane Ortiz, K2DO, is the ARRL Public Information Coordinator for the area. She took to the air when power went down in her Suffolk County community. Ortiz called up an informal VHF net. Over the next 20 hours hams passed about 500 pieces of traffic. In addition to handling messages for people stranded in the city, amateurs also relayed other useful information. This included such items as which stores or gas stations were open.

In the Big Apple itself, ARES teams provided communication support for Red Cross Emergency Response Vehicles set up at transportation centers in Manhattan. ARES members also accompanied Emergency Response Vehicles to fire calls. RACES was activated in the greater New York City area after a state of emergency was declared.

Across the Hudson River in New Jersey, a net linked the Red Cross lead chapter N2ARC in Princeton with other chapters. Further to the West, Michigan ARES teams assisted emergency operations centers and the Red Cross.

In Ohio, Section Emergency Coordinator Larry Rain, WD8IHP, reports that all ARES organizations in the Northern tier of the stated were activated.

For millions of people in the Northeast and Midwest, the August 14th power outage took away access to wireless voice, e-mail and the Internet. The failure of the cellular system was especially evident. Nextel Communications spokesman Chris Grandis said that the company needs electricity to power its cell sites, but when you don't have that, it's out of his company's control.

The same held true for virtually every other wireless provider, few of which bother to have emergency power at cellular and wireless Internet sites.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF.

--

The bottom line: The traditional forms of communications failed, but hams were there to lend a hand. (ARRL, NY Times, others)

**

RADIO LAW: FCC DECLINES TO RECONSIDER ITS HUMAN EXPOSURE TO RF RULES

The FCC has declined to open an Inquiry into updating its human exposure to RF signals rules. In particular, the petitioner in this case wanted the Commission to consider possible health hazards not covered by the current rules, including non-thermal effects and the effects of long-term low-level RF exposure.

According to the CGC Communicator the FCC dismissed the petition, arguing that any such evidence should be presented to other, more appropriate expert agencies. The Commission also noted that its current human exposure rules have recently been upheld by the Second Circuit Court of Appeals. This, in the face of similar arguments by other petitioners. The complete story is in cybrspace at http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-03-191A1.doc (CGC)

**

WRC'03 FALLOUT: GERMANY GOES CODE FREE

It's another week and another country has joined the no-code revolution. Following Switzerland, the U-K, and Belgium, Germany is the latest country to announce that it is abandoning the Morse code test as a requirement for HF band operation.

According to the website of the German national amateur radio society, the DARC, from the 15th of August radio amateurs in Germany with a CEPT Class 2 license are allowed to use the High Frequency bands using their existing callsigns. Further details were to follow, the website said. (GB2RS)

**

RESCUE RADIO: OREGON HAM RECEIVES HONOR FOR GOING THE EXTRA MILE

Back on this side of the Atlantic, an Oregon ambulance dispatch coordinator, EMT and amateur radio operator has been named a recipient of a "Star of Life" award. This, from the American Ambulance Association.

Scott Waggoner, KC7DHJ, of Clackamas County was nominated for the honor by his co-workers in recognition of the many extra tasks he has undertaken at AMR's headquarters in Portland. Among other things, KC7DHJ was cited for his help in setting up portable repeaters during search and rescue operations, his treatment of minor injuries suffered by firefighters and his overtime work on an American Medical Response

ambulance. (CGC from OregonLive.com)

**

ENFORCEMENT: UNCOORDINATED REPEATERS TAKEN OFF THE AIR

It took three letters and allot of patience on the part of the FCC but a repeater interference problem in Stockton California has been solved. This, as Thomas G. De Lasaux, WA6SEK, removes his repeater from the air.

The matter goes back to September 9, 2002, when the FCC notified De Lasaux that his operation of uncoordinated repeaters on 224.660 and 441.275 MHz was causing interference to coordinated repeaters on the same frequencies in his are. By letter dated May 5, 2003, the FCC informed De Lasaux that the information he submitted in regard to the initial inquirey did not demonstrate coordination for either of the repeaters. Also, that until he was able to demonstrate current coordination, the primary responsibility to prevent interference.

At that time the FCC requested De Lasaux inform the agency within 20 days what steps you were taking to resolve the interference issues. On July 1, 2003, the FCC notified WA6SEK that we had not received a response to the May 5th letter, and enclosed an additional complaint. The July 1 letter afforded De Lasaux an additional 20 days to respond, and stated that if the matter were not resolved by July 25, we would initiate enforcement action against his license.

On July 22nd, De Lasaux notified the Commission that your repeaters operating on 224.660 MHz and 441.275 MHz had been shut down and would remain so. The FCC has now terminated all further action in this matter. (FCC)

**

ENFORCEMENT: FCC AFFIRMS $10,000 FINE AGAINST NY PIRATE

The FCC has affirmed a $10,000 fine issued on July 23rd of 2002. This, against the Reverand Yvon Louis in a case the case involves an aleged series of unauthorized FM broadcasts made from Louis' Calvary Tabernacle in Brooklyn, New York.

The FCC says that over the course of several months in 2001, Reverend Louis reportedly transmitted on 93.7 MHz, then switched to 88.1 MHz after getting caught. But it was not over yet. He then used 90.1 MHz after getting caught again, then reverted to 88.1 MHz in open defiance of the FCC order to stay off the air. (FCC, CGC)

**

RADIO HAPPENINGS PAROCHIAL SCHOOLS TO REMOVE CELLULAR ANTENNAS

Bowing to health concerns from parents, sixteen schools operated by the Catholic Diocese of Brooklyn will eliminate cellular antennas mounted atop buildings and church facilities. The on-line edition of the New

York Post reports that one parish stands to lose $18,000 a year in rent money used to offset the school's operating costs as a result of the change. (CGC)

**

COMMUNICATIONS FOR THE HANDICAPPED: BLIND STUDENTS LEARN TO NAVIGATE USING NEW GPS TOOL

A group of blind high school students visiting Catholic University in Washington D.C. recently shouldered specially equipped laptop computers. This, as they navigated about the campus and visited a pizza restaurant led by voice commands and the Global Positioning System.

A $1,000 Global Positioning System add-on to the BrailleNote keypad showed the students that getting around a college campus is suddenly much easier than it used to be. The complete story is on line at www.washtimes.com/business/20030729-093916-2006r.htm (CGC)

**

WITH THE HANDI HAMS: SUMMER CAMP ON THE AIR

Handi Ham station W0EQO, will be on the air during the summer Minnesota Radio Camp from August 23rd through August 30th. You can look for W0EQO on several different bands using CW, single sideband, FM, and digital modes. Also listen in cyberspace for an EchoLink net on Monday evening at 2400 hours GMT. The HandiHams will respond to all QSL requests for all contacts, including EchoLink contacts. (HandiHams)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

INTERNATIONAL - HOLLAND: NEW PREFIXES FOR THE NETHERLANDS

A New call sign prefix went into effect in the Netherlands on August 7th. On the High Frequency bands, the PA, PB, PC, PF, PG and PI prefix callsigns will now be be heard with one, two or three letter suffixes. On VHF and above, the PD, PE and PH are the prefixes, again with one, two or three letter suffixes. For example, the former PBZ0AIU, who sent in this news story, is now PC2A. (PC2A via GB2RS)

**

DX

In D-X, word that GM0GNY, is active as 4K0GNY from an oil drilling and production platform in Azerbaijan. He will be there starting the 20th of August for around a month. Look for him on daily on 40, 20, and 17 meters and QSL as directed on the air. (OPDX)

**

THAT FINAL ITEM: A FINAL 73 TO K6DUE

At the beginning of our newscast, we told you about the passing of a member of the Amateur Radio Newsline family. Roy Neal, K6DUE, died August 15th following heart surgery. One of the people who knew Roy best is Alan Kaul, W6RCL. Roy and Alan worked together at NBC News, and on projects benefitting amateur radio. Alan looks at the life of a man who was an institution in American broadcast journalis, as well as a driving force in amateur radio's conquest of space:

--

When Roy Neal, K6DUE, died last week, he was possibly the best-known ham in America. He left an indelible imprint on Amateur Radio.

Roy, more than anyone else, was responsible for getting ham radio aboard manned space craft and each new mission is testament to his legacy. His efforts earned Roy awards from the Dayton Hamvention, they designated him Ham of the Year and from CQ-Magazine, which this year named Roy to the Amateur Radio Hall of Fame. He also received honors from The American Radio Relay League, and other groups and served as chairman of two key AMSAT committees.

Roy was a good guy. He was my friend and colleague at NBC News.

I met Roy in the 1960's when I was working in Seattle and he came to town to report on aerospace giant Boeing. After I moved to Los Angeles and joined NBC News in the 70's, Roy and I collaborated on a lot of news reports.

As a correspondent Roy was best known for his coverage of the U-S Space program _ he was a friend of the original astronauts _ and often reported from both the launch site at Cape Canaverral and NASA Mission Control in Houston.

Not many people know this but Roy was also the author of a book about America's missile system_. called The Ace In The Hole. It was written at the height of the Cold War.

In the 1970's, Roy teamed with television producer Dave Bell, W6AQ, to launch the first of several documentaries about amateur radio. Number One was a 16-minute film, Moving Up to Amateur Radio. Followed a few years later by The World of Amateur Radio. Dave Bell remembers Roy as the ultimate professional:

--

Dave Bell W6AQ: "Of all the on-camera talent that I have known, Roy was the most assured and had the smallest ego of all of them.

He was a true professional when it came to the news. Everything was always true. Everything was straight from the shoulder and there was no compromise.

Roy was one of the old-school news guy. He grew up in the television business and he understood it better than anybody who is working in it today."

--

In the 1980's Roy helped convince NASA to put ham radio in Space aboard a manned flight of the Shuttle. That first ham-astronaut was Owen Garriott, W5LFL, on board STS-9. Garriott's story of the 1st DX-pedition in Orbit was told by Roy in the television documentary Amateur Radio's Newest Frontier.

--

Audio from ARNF: "This is the story of an expedition. The story of STS-9. The Columbia. And these are the explorers: John Young - the commander. Brewster Shaw the shuttle pilot. And the scientists Dr. Ulf Merbold, Byron Lichtenberg, Robert Parker and Dr. Owen Garriott -- an Astronaut who is also Amateur Radio operator W5LFL. This is an expedition to probe the outer limits of science and Amateur Radio's newest frontier.

--

Roy's next project was called SAREX - Shuttle Amateur Radio EX-periment, followed by the New World of Amateur Radio which profiled a new ham, teen-ager Kelly Howard, N6PNY. She's now all grown up, married and has kids of her own. She fondly remembers working with Roy Neal.

--

Kelly Lenhert (ne Howard) N6PNY: It was all so exciting, but it was also overwhelming. But working with Roy made me feel so comfortable. He made me feel competent in what I could do. He took me under his wing and he was really supportive and he got me to do what I needed to do to make the film and bring out the best in me."

--

Roy's last documentary was called Ham Radio in Space. Roy's interest was a natural fit with AMSAT. Roy's close friend AMSAT Vice President Frank Bauer, KA3HDO, thinks of K6DUE as his mentor.

--
Frank Bauer KA3HDO: "One of the things that Roy taught me was how to distill information into basically sound bites, if you will. I remember one time where we had to give a presentation - at Dayton - and we had 20 minutes. I told him that I did no know how he could so that, and he

said: `Frank, if I can do the whole world on the news in 30 seconds, you can do this in 20 minutes.' So Roy taught me a whole lot from an executive perspective because he was a true executive."
--

Another AMSAT officer who worked closely with Roy is Robin Haighton, VE3FRH, the President of AMSAT North America.

--

Robin Haighton VE3FRH: "The space program itself is in good hands, but there is no doubt about it that we will miss that leveling confidence that Roy always brought to the meetings and the discussions. He made friends with everybody. The moment you met him you felt that here was a man you could trust."

--

Other comments have come in from all over the world From New Zealand, the past president of NZART, Jim Meechen ZL2BHF sent his condolences. As have numerous other Newsline listeners. Another of Roy's friends, Bob Heil, K9EID, had this to say.

--

Bob Heil K9EID: "I'm going to miss his spirit. He had a spirit about him that when you heard him on the air, you stopped tuning. This was something special you were listening to. And it wasn't always the tone of his great broadcast voice. It was his spirit. He was always in an up-mode about this hobby."

--

Roy was in the first generation of television newsmen who began their craft after World War Two. He started in Philadelphia and then moved to the West Coast where he helped found the NBC News bureau in Los Angeles. That was during the days of the old John Cameron Swayzee Camel News Caravan.

Roy was at ease in front of a microphone _ and could talk to millions of television viewers as easily as he could talk to the ham across town. On camera, he had the uncanny ability to read to time, precisely to time. When I produced updates for NBC Nightly News and Roy was the on-camera talent, I would time the newscast and tell Roy how long he would have to report the story.

I'd say something like this: "Roy, can you do it in 19 seconds?"

And Roy would always reply, "You know I can old buddy."

Roy liked that phrase "old buddy." He used the phrase to address friends and co-workers for some time. As for the updates - Roy always got them right. He would stop talking just an instant before we'd have to switch back to the network.

By the time he retired in 1986, Roy had worked out of the Los Angeles news bureau for almost 35-years. He'd probably written millions of words, and brought his audience uncountable hours of news and information.

But even in retirement, Roy Neal didn't stop doing what he did best. He was no stranger to listeners of Amateur Radio Newsline who knew him as a tireless volunteer giving freely of his own time to report the latest information -- always signing off in his own stylized way.

--

"This is Roy Neal, K6DUE. Thanks for listening and 73."

--

73, Old Buddy _ I really hate to see you go.

I'm Alan Kaul, W6RCL, reporting for Amateur Radio Newsline.

--

Roy leaves his wife Pat, and sons Mark and David. Services were held August 19th at the Wesley Memorial United Methodist Church in High Point, North Carolina.

In lieu of flowers the family requests that donations in Roy's mame be made to the Astronaut Scholarship Foundation at the Astronaut Hall of Fame. The mailing address is 6225 Vectorspace Blvd, Titusville, Florida, 32780. Please mark your envelope to the attention of Linn Le Blanc.

And this final thought. Yes, we at Newsline have lost a very dear friend. More important -- so has all of Amateur Radio.

73, Roy. None of us will ever forget you. (ARNewsline, W6RCL)

With the downturn in the solar cycle and worse days ahead, I'm faced with operating on the lower hf bands. 20M has gotten to be very hit or miss wrt propagation and it seems that more and more dx is happening on 40 (with some on 30). I have a 40M dipole up about 30 ft or so, but that really doesn't cut it.

I know that this is like a discussion about "what's the best color", but what antenna systems will work well on 40M, maybe even 80M, that I could mount either on the ground or up no higher than 30 ft? I need to at least get some general direction on this from an experiential data set rather than starting with the ads in QST or CQ.

1842. International Beacon question

Newsgroup: rec.radio.amateur.dx
Date: 2003-08-28 03:04:22 UTC

I have a wire dipole antenna mounted between two maple trees in my yard.

This allows me to pick up The BBC World Service on 5975 VERY loud, along with the Atomic Clock on 10000, and 5000.

However I can't seem to pick up any of the NCDXF/IARU Beacons.

http://www.ncdxf.org/beacons.html

I don't know if it is my antenna, interference, the atmosphere, or a combination that is giving me trouble.

Can anybody else pick these up?

Thanks.

The last time I noticed, a couple of days ago, all the beacons seemed to be working OK. Of course, propagation has been pretty bad lately. You probably know this, but these are CW beacons, so you'll need to tune a little differently than you do for an AM station--say, set your receiver to USB mode and tune 700Hz below the listed frequency. It's rare that I can't hear at least a few of the beacons on 20 and 17 meters, if I camp on the frequency and listen for two or three cycles (I think that's 3 minutes to each cycle.) HTH!

Hi,

I have a Radio shack Dx-394, it has AM, LSB,USB,CW1, CW2.

I've been using AM, because I didn't see anything on the NCDXF/IARU
website about it being anything but AM. I may have missed it.

So I should use USB, and if it claims 14100, I should tune to 13400?

thanks.

The beacons ID's are sent in morse code. The entire format is:
The beacons transmit every three minutes, day and night. This table gives
the minute and second of the start of the first transmission within the hour
for each beacon on each frequency. A transmission consists of the callsign
of the beacon sent at 22 words per minute followed by four one-second
dashes. The callsign and the first dash are sent at 100 watts. The remaining
dashes are sent at 10 watts, 1 watt and 100 milliwatts.

See URL:
http://www.ncdxf.org/Beacon/BeaconSchedule.html

Tune to 14.100 MHz

If you can't copy 22 wpm, use BeaconSee Program
http://sapp.telepac.pt/coaa/

And make sure your computer clock is accurate to within a second or less

It would be (in USB mode) 14099.3 KHz -- but if your receiver
has CW mode, just enable that and tune to 14100 direct! I'm
listening right now and can hear a couple of the 20-meter
beacons weakly in North Carolina, so propagation is not very
good, as has been the case lately. Good luck!

Here is my progress so far...

I can pick up a few of the stations. This maybe normal for this time of year, and from what I'm told about the solar activity.

From St. Louis Missouri area, I can get the South Africa beacon once and a while. Same with the Israeli beacon. The Madeira beacon off the coast of Morocco is the strongest one I can get. I have gotten the Argentina, and Peruvian one a few times, but not consistently. The Venezuela comes in the second best after Madeira, and the UN beacon in New York is a disappointment. I get it, but barely.. I can't get the rest at all.

I am getting some sort of osculating interference at about 1 second intervals. It sounds like a cricket chirping. Also something that sounds like a cell phone ringing, but is this comes and goes. I don't know if this is normal, or something in my house is generating this..

Thanks for the help!!

Very good -- check the beacons throughout the day and night and log them.
Some areas come in during the morning -- others later in the day -- others
at night and that is exactly what the Beacon system is for -- to determne
propagation paths at any particular time.

Neat System for Hams and SWLers
==========

You can use the DX-394's LSB/USB/CW1/CW2 modes to receive Morse coded interrupted CW. The CW1 and LSB modes have the same frequency alignment and the USB and CW2 modes have identical frequency alignment. The CW mode introduces a sharp audio filter that is bypassed in the SSB mode. Ideally, both pairs of modes would have the same frequency alignment and you would hear zero beat in all 4 modes when tuned to the carrier of an accurate reference such as WWV. In practise, improper factory alignment and drift result in a difference between LSB/CW1 and USB/CW2. When properly aligned, you would tune higher than the carrier frequency by 0.6 to 1 kHz when in LSB/CW1 modes and tune low by the same amount if in the other modes to hear a beat note in the 600-1000Hz range. Due to misalignment, your practise may need to be different.

For more on the DX-394, join the 450 member Yahoo!Group at http://groups.yahoo.com/group/RADIOSHACKDX394/ .

1858. Should I run a Sky-wire loop?

Newsgroup: rec.radio.amateur.dx
Date: 2003-08-31 05:20:30 UTC
From: junkmail@altonillinois.com
Message-ID: <70729ae5.0308302120.562ffb11@posting.google.com>
Source record: 9392

Should I run a Sky-wire loop?

I currently have a dipole hung by two trees about 30 feet off the ground.

I would replace the dipole and run the Skywire loop off the same trees, along with two more trees at the same height as the current dipole.

This antenna would only be used for receiving, and never for transmitting, the same for the dipole.

My question is, does anybody think it will make enough of a difference over the dipole to warrant running it?

I would also like to know what your views are on "grounding" either my current dipole, or the Sky-wire.

Currently, I have the coax center wire soldered onto one end of the dipole, and the braid soldered onto the other end. I was told that I should also ground the braid before it comes into the house and into the radio.

I do have a ground wire attached to GND screw on the back of the radio, going outside to a piece of copper pipe pounded into the ground. Is this enough, or do I need to also ground the braid, and if so, how? Will grounding help my reception, or decrease the noise on the line?

Thanks.

as a detested 'CBER' who has been looking at joining the HAM ranks now for
quite a few years but never had the cash I must say I am tempted to say on
the Muppet band where at least everyone behaves with some sense of
understanding of live & let live if this conversation is a showing of the
true HAM colours then I think perhaps the roles a reversing. This has
certainly made me think three or four times weather to bother taking the
exams and taking up a HAM callsign.

1861. An invitation to play nice [was: Re: nice amateur software!]

If you have an interest, please do get your license. I, like others here,
tried CB before getting my license. I was convinced to stay out of CB on
the first day when my wife was profanely ridiculed and insulted because of
her accent BTW. I have no hard feelings about CB'ers so long as we keep our
toys in a neutral corner and play nice. A lot of hams just get ballistic
when they hear that, "two-letter word".
Take my invitation. You'll be glad you did.
P.S. Try not to cross-post to multiple NG's. It tends to confuse the
threads and anger the net gods:)

Tim,
What do you care if they dont like CB? Who cares what anyone thinks?
Get the handbooks from ARRL. You will see they are not the driving force
they think they are. And good luck with your tests

Yes. Stay in CB where you belong.

Unless you have an interest in technical matters, which
will to a large extent remove any need to spend a lot of money,
then you don't have the makings of a Radio Ham anyway.

Please don't confuse usenet with ham radio. Except for a few really
bad apples (which also exist in CB) hams on the air are polite and
courteous and generally abide by "The Amateur's Code". That code
obviously doesn't exist on usenet.

Is there a website that I can go to, enter my USA zipcode or
City/state.....and get beam headings to the DXCC countries?

I am not interested in a website that has a downloadable program.....I
want to be able to get quick beam headings while online.

Thank you..... Lee Carkenord KA0FPJ

As far as I am concerned, even fools are welcome into amateur radio.
When I got my Conditional license at 14 years of age, I was certainly
foolish about a majority of things.

Good deal, Bob. I was just fooling around and "selected all", "copy" and "pasted" in MS xcell. I've got the whole table on my PC without the internet connection. If you wanted, you could do the same and use it as the datasheet in MS Access. A form with the prefix as the "key", a query & Voila! Type in the prefix and it will return your beam heading. I know there are logging programs that'll probably do this but <sigh> I can't put my station in operation 'til we move in to our home. Besides, this might be what the Dr was ordering:)

1874. Ohio/Penn DX Bulletin #624

Newsgroup: rec.radio.amateur.dx
Date: 2003-08-31 21:36:21 UTC
From: Tedd Mirgliotta <kb8nw@barf80.nshore.org>
Message-ID: <MPG.19bc345c6cd9d7ec98969e@news.nccw.net>
Source record: 9207
Cross-posted to: rec.radio.amateur.dx,rec.radio.amateur.misc

SB DX @ WW < KB8NW $OPDX.624
Ohio/Penn DX Bulletin No. 624

The Ohio/Penn DX PacketCluster
DX Bulletin No. 624
BID: $OPDX.624
September 1, 2003
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NC1L, K2PF, NG3K, W3UR & The Daily DX, N4AA & QRZ DX, K8YSE, F5NQL & UFT, JI6KVR & JA-IOTA Islands News, PA0ABM and VA3RJ & ICPO for the following DX information.

SPECIAL NOTE FROM EDITOR (by Tedd KB8NW): Well the "2003 Blackout" affected many including me. As I mentioned in the last bulletin, I finished OPDX.623 within minutes before leaving for my vacation. With the power going out after 3:30 PM Thursday, August 14th, I was unable to finish the bulletin until the power was turned back on Friday morning about 5:30 AM, August 15th. Everything seemed to be fine and working when I left for MTSU in Tennesee and Biloxi, Mississippi, except the UPS backup for my LINUX mail system (BARF80). However, with the rolling blackouts in the Cleveland area, BARF80 took a system hard-drive crash and currently is being worked on by Dave Foran, WB8APD, Administrator for HAMNET.ORG and NSHORE.ORG. All my main mail (between August 16-23rd) is now being stored on NSHORE.ORG until BARF80 is re-activated again. So, that is the reason for the short bulletin this week (NO MAIL - NO INFO). Hopefully, no mail was lost, and if you E-mailed me something, it is still in storage. My mail (as of August 24th) is now being forwarded to a family ISP E-mail account until BARF80 is back online.....

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 24th/August, through Sunday, 31st/August there were 220 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3V, 3W, 3X, 4J, 4L, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5U, 5V, 5W, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9N, 9Q, 9V, 9Y, A4, A6, A7, AP, BV, BY, C3, C6, CE, CE0Z, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, D6, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FR, FY, G, GD, GI, GM, GU, GW, H4, H40, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J7, JA, JD/m, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX,

LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, S2, S5, SM, SP, ST, SU, SV, SV5, SV9, T32, T5, T7, T8, T9, TA, TF, TG, TI, TJ, TK, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VK9N, VK9X, VP2V, VP5, VP8/o, VP9, VQ9, VR, VU, XE, XU, XW, XZ, YA, YB, YI, YJ, YK, YL, YO, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

3B8, MAURITIUS. Ian, 3B8IK, has been active on PSK31 on or around 21070 kHz. Look for him after 0845z and after 1330z.

3B9, RODRIGUES ISLAND. Robert, 3B9FR, (now a NODXA member) was quite active last week (with a great signal) on 20 and 17 meters CW. Watch around 14022 kHz (+/- a few kHz) after 1230z or 0230z. Watch around 18070 kHz (+/- a few kHz) after 1230z and as late as 1700z.

3XY, GUINEA. Leo, 3XY1L, continues to be very active. This past weekend he spent alot of time on 10 meters SSB on 28504 kHz usually between 1700-1900z. His activity during the week was on 15 and 20 meters SSB (21285 and 14195 kHz) between 1700-1900z. QSL via UY5XE.

4S, SRI LANKA. Nelson, 4S7NE, has been very active on the WARC bands with very few takers. Watch for activity on 30 meters as early as 1215z and after 1900z (as late as 0100z). Watch 17 meters around 18072 kHz (+/-) between 1000-1200z. Watch 12 meters around 24901 kHz after 1145z. QSL via: Nelson Ranasinghe, No. 18, Katana Housing Scheme, Demanhandiya 11270, Sri Lanka. Seal the envelope with tape and send only the QSL card with a green stamp. No return envelope is needed.

5W, SAMOA. Manfred, 5W0MW, became active August 29th. Most of his activity has been on 30/20/17/15/12/10 meters, mainly on CW with some SSB. The length of his stay is unknown. QSL via DJ7RJ.

9G, GHANA. Henk, 9G1AA, was heard this past weekend mainly on 15 meters CW/SSB on various frequencies (21007, 21209, 21268 and 21280) and times. QSL via PA3AAW.

9M2, WEST MALAYSIA. Ian, 9M2/G3TMA, was active this past weekend looking for stateside stations on 17 meters CW. Activity was on 18070 khz between 1500-1830z. QSL via the address on BUCK.com. Also active was Masaru, 9M2/JI1ETU, on 15 meters CW/SSB at various times and frequencies. QSL via the address on BUCK.com.

BQ9P, PRATAS ISLAND. Word out of Japan is that the BQ9P operation will have/use SSTV on this trip. According to their Web page, concentration will be on SSTV and the WARC bands. The DXpedition team still needs landing permission, but they say this should not be a problem. This operation is scheduled to take place October 9-16th. Activity will also be on CW/SSB/RTTY and on 160-6 meters. Operators listed so far are: BV3BW, BV3FG, BV4FH, DL3DXX, DK7YY, JI6KVR, OE1WHC, UA3VCS and ZL4PO. Remember their Web is at: http://www3.ocn.ne.jp/~iota/newpage64.htm

F5, FRANCE. Yves, F5PRU, will be in the French Alps for some mountaineering training for the Army September 1-20th. He will start in the town of Briancon (1326m ASL, the highest town in the CEE). In his spare time Yves will be active as F5PRU/p on 40 and 15 meters, mainly CW, using a 3 watt transceiver and a vertical antenna. This operation counts for French reference numbers: Hautes Alpes (DDFM 05) and French Province - Cote d'Aur (DPF 20). QSL via F5PRU, direct or by the bureau.

DXCC NEWS.....
Bill Moore, NC1L, ARRL DXCC Manager, announced that the E4/DF3EC operation (August 7-10th) has now been approved for DXCC.

It was announced (while your Editor was on vaction) by the ARRL Awards Committee that Timor Leste (4W), which was formally known as East Timor (4W), will NOT be added to the DXCC List as a new entity. There will NOT be a removal from the DXCC List, but East Timor's name will be changed to Timor Leste. More details are available via the ARRL Web at: http://www.arrl.org

IOTA NEWS.....
AS-079. Look for Mat, JS6PXB, to sign homecall/6 from Tarama Island (JIIA 079-008), September 2-3rd. Activity will be on 40, 15 and 10 meters CW/SSB. QSL via his home callsign, either direct or via the bureau.

INTERESTING READing AND WEB PAGE. Wino, PA0ABM, provides OPDX readers with the following: "The Gatti-Hallicrafters Expedition of 1947-1948, the first Grand HAM DXpedition ever, found its way to the World-Wide Web in June 2003. Besides the ARRL article (see QST December 1993), you can read the story Gatti told in the International Harvester, and the (short) story of Bob Leo, W6PBV (now W7LR). I can tell now that there is a BIG update available. In this update both hams, Bob Leo, W6PBV (now W7LR), and Bill Snyder, (W0LHS), tell the story in their own words. Bob and Bill provided me with a lot of documents and pictures, which are illustrated on the many web-pages. Make sure you read both stories, they are very different. There is even a Dutch version available. The link is:
http://www.qsl.net/pa0abm/ghe/00ghe.htm
Enjoy the reading. Thanks to Bob Leo and Bill Snyder for letting me do this job.... 73, Wino, PA0ABM, devoted to CW."

SPECIAL EVENT. Look for special event station EO12J to be active to celebrate 12 years of independence in the Ukraine. Activity over the past weekend has been on 20/17/15/12/10 meters. Watch the following frequencies: 14204, 18070-85, 18130, 18145, 21031, 24897, 24945 and 28024 kHz. QSL via K2PF.

ST2, SUDAN. Magdi, ST2BSS, was heard (almost daily) active on 15 meters (21260-21280 kHz) this past week at various times between 1300-1900z. QSL via DL5NAM.

SU, EGYPT. Alan, SU9BN, was active this past weekend on 15/20 meters. Watch between 21250-21280 kHz between 1000-1500z. Also, watch during the week for him on 40 meters around 7005 kHz after 2330z. QSL via EA7FTR.

VK9X, CHRISTMAS ISLAND. Andy, G3AB, is now active as VK9XAB until September 6th. His activity has been mainly on 40/30/20/17/15/12/10 meters CW at various times throughout the day. QSL via G3AB.

XW, LAOS. Operator Larry, XW1A, was heard August 28th on 21290 kHz between 1600-1700z. He stated to QSL via E21EIC direct or via the bureau.

YA, AFGHANISTAN. Sada, YA1D, was heard on 15/20 meters this past week on 21265 kHz at 1545z and on 14270 kHz between 1430-1745z. He said QSL via JG1OWV.

YI, IRAQ. Plenty of activity took place this past week. Patrick, F5ORF, was active as YI/F5ORF, on 20/15 meters. Watch between 1700-1800z on 14195, 21195 or just below 21200 kHz. QSL via KU9C. Also active was Abel, YI/KC0LEK, on 20/15 meters SSB and PSK31. Watch between 1130-1630z on 14070-71, 21070, 21255 and 21302 kHz. QSL via address on QRZ.com. Willie, YI/KV4EB, was mainly active on 17 meters SSB. Watch around 18160 kHz between 1645-2000z. He also sometimes visits 21280 kHz. "The Daily DX" also reports that Willie is now on RTTY, so be watching 14088 kHz possibly around 0300z. QSL via K0JN. Robert, S53R, was also active as YI9R on 20/15/10 meters CW usually between 1130-2000z. QSL via K2PF. Also active this past week on 20 meters was YI/OM2DX and YI/SM7WZA.

ZS0, ST. PETER AND ST. PAUL ROCKS. "The Daily DX" reports that Joca, PS7JN, will once again be active from here between September 1-14th. His expected callsign will be ZS0S. QSL via PS7JN.

As a former VE who has tested many "CBers" into ham radio I would only observe that if you want in, you'll get in.
As a 14 year old in the mid-1950's I sure didn't "have the cash" but I got in without it, and it didn't take "years"..

1879. Re: Should I run a Sky-wire loop?

Newsgroup: rec.radio.amateur.dx
Date: 2003-09-01 08:16:50 UTC
From: Rick Frazier <rick@rickfrazier.com>
Message-ID: <3F530071.60037D61@rickfrazier.com>
Source record: 9213

Walter:

Well, it all depends... (Bet that was a whole lot of help...)
Personally, nearly all of my antennas are for transmission as well as receiving, and I can tell you that what most people call a "Sky Wire Loop" has been pretty effective for me. I am located at an elevation of a whopping 180 feet above sea level, approximately 2 miles from the ocean. My location is about 119.5 degrees north latitude and 155 degrees west longitude on the Big Island of Hawaii, the southernmost island in the island chain. From here, just about everything you'd normally hear is considered DX.

I've had a 600 to 700 loop up, supported by local and brittle trees (albesia) that started with an average installed height of about 30 feet, and eventually got down below 20 feet average height before it got pulled down. At the current time, I've got poles in place to install about a 1000 foot loop nearly 40 feet high, but am waiting for hurricane jimene to pass the big island before I put up the big loop. We expect the hurricane to pass us Monday morning without landfall (if all goes well), and I'll get the wire loop back up once it passes....

I got decent results with the 600+ foot loop on all bands except 160m, and it may have not been all that effective down there anyway, given my location. From here, nearly any contact (except those few within 200 miles) is DX. No short skip from here, unless it is in excess of 2300 miles....

I've been favorably impressed with the performance of the 600+ plus loop both in receive and transmit, so much so that I was willing to spend nearly $500 to put up the 1000 foot loop, not including the cost of the boom truck to raise the poles to support the new loop. If you're so lucky as to have some tall trees, so much the better, as the actual wire costs are pretty inexpensive. I use 12 gauge stranded, insulated wire and have had no problems with wire loops (in several locations) for nearly ten years using typical THHN type stranded wire. You may get away with a smaller gauge wire if you aren't using trees for supports, (but I will still be using 12 Ga. for my pole supported loop... Habits die hard sometimes in the Ham Radio world.) You could even use bare wire, but I prefer insulated wire because if I get in contact with a tree or other support, I don't have to worry much...

Well, this got a bunch longer than I intended, but the bottom line is: If you are wondering about how effective a decent sized loop can be, put one up and find out. Typically, you won't be disappointed. Horizontally oriented loops don't seem to get much of the local interference like vertical whips do, and they are essentially omnidirectional, with some

gain depending upon the number of wavelengths for your band of interest. There are definitely times that the loop outperforms even a decent beam, and others where the beam really shines and loop takes second place, but if you don't have a good tower with a rotatable tower for the bands you are interested in, a large, horizontal loop can't be a bad thing....

Good luck and Good Listening!

Thanks

My biggest problem has been finding someone to test me. Although that now seems to be solved after some e-mails I have received from this posting. hopefully I will be tested soon and can start off on my way into amateur radio. I am very much looking forward to copying some of the people on this group EVEN the ones who insist that as a soon to ex CBer I am not welcome just to prove to them that we are not all a bunch of monkeys who drag our knuckles on the ground. Thanks for the support those who have offered it.

Amateur radio is the study of electronics and the application to real world situations. The license is only the beginning, not the goal. If the intent is to be licensed merely so you can call in the pizza order and nothing more-no education-then you still don't get it. There is no excuse for not getting a license--no excuse for not finding a VE team. The testing is dumbed down and all it takes is $12 and your zip code and you get tested.

Hey Carl, where are you at these days, physically?
Haven't seen you since the SPN days on W6FXN.

Back in the old days in LA, Carl and some other folks on the SPN were the
thing that finally got me motivated enough to study and finally get the code
down, so I could get my ticket.

PTT stands for push-to-talk, usually applied to microphones.
It's acceptable to push an electronic keyer paddle to talk,
but not acceptable to push a microphone key to talk. Pushing
a microphone key is too much like CB. :-) Of course, my
ICom-756PRO is PTT.

No, no, no. It's not that you're unwelcome if you're an ex
CBer, it's that you're unwelcome if you're still a CBer.

If you have no technical interest in the innards of your rig,
and if your prime motivation is not technical, then you're still
a CBer.

Au contraire! We who are wrongly described as, "curmudgeons"
ARE representative of ALL hams.....it's CBers we're not representative
of. If you think that we're not representative of you, then perhaps
you're a CBer-masquerading-as-a-Radio-Ham?

No one detests you just because you are or were a CBer. CBers per se were never the problem, rather the outlaws and deliberately crude troublemakers therein. If you come to ham radio with an attitude that you want to learn the ropes and become a quality ham. you'll be welcomed by all who matter. You can easily disregard the rest.

You will need to act responsibly and work to change from the CB culture to that of ham radio, which is an important enough factor to merit your effort if you wish to avoid problems in "fitting in". Listen a lot, and learn from it. It's for your own good as much as anything else. If one acts like an outlaw CBer while operating on ham radio he shouldn't be surprised to find that attitude unacceptable. And I assure you, the fact that you come from CB will only make you a member of the majority of new hams.
In short, it's all up to you.
But don't start out feeling inferior just because of your CB origins.

Dick

I think he meant "Verizon". They're a mobile-phone company that offers
a two-way radio feature, where you can talk with other Verizon
mobile-phones as if they were VHF hand-held radios. (which I suppose
they are!)

Of course you don't need a ham license to talk on a mobile phone -
though your Verizon phone may not work when the electricity is out, as
many subscribers learned in New York a couple of weeks ago!

Rick,

Thanks for the input, I have been to the big island, twice. Once in 1972, and once in 1978. I would love to go back sometime, but need to talk my wife into it.

Anyway, it also sounds like you have a lot of real estate. I have a pretty big back yard. That is almost made for a sky-wire loop.

Here is photo from last year, you can see that I have trees boarding it all the way around. (the house is behind me when I took the photo) The dipole is currently hooked to the tall maple in the back on the left had side of this photo, running back to the house and another maple tree of equal size in the front yard. There are large trees on the right hand side of the property just out of view of this photo in which I could run a few extra supports.

http://www.altonillinois.com/newhouse/backyard6.jpg

when I bought this house last year, I kind of lucked out. I got a place that is only a half a mile or so from the highest elevation in the county (keep in mind this is Illinois), and I'm only 50 feet or so below that (580 feet)

I am leaning towards putting one up. It doesn't sound like it would take much more work.

How is your feed line grounded?

Thanks.

I believe its similar to what we call in Europe, GSM Pro.
A mobile (cellular) phone with low cost Push To Talk closed group calling.
Technically could, but isn't offered by UK phone networks.

I agree. Those who are contesters but have no
technical acumen are CBers.

Their behaviour as DXers is indistinguishable
from the 27MHz DXers.

I would just like to add that despite my difficulty with words and maths I have managed to gain several qualifications that I am very proud of although I never made it to a university I did gain 4 B's, 3 C's, a D, an E, and an F at GCSE, a BTEC National Diploma in General Engineering (which of course includes analogue and digital electronics along with things like three phase principles),and a City & Guilds Level 1 in Visual Basic. On top of these I hold a BGA endorsement to glide (which I gained at the age of 18). I have a good self taught understanding of PC hardware (I have been building my own P.C.'s since I was 12) and operating systems including DOS and CPM(I know CPM is an Amstrad based system but it is the fore runner of DOS) as well as several high and low level programming languages. I therefore take being called stupid or illiterate as quite an offence. I do have a great interest in learning about the way radios work hence I want to join the armature community although I will probably still use my CB as I have many friends there who except me for who I am and not the problems I have. I would also like to suggest that if CBers are to the dislike of certain members of this news group then perhaps they would like to stay off the newsgroups for that medium and let them get on with it. As such this will be my last posing here until I pass my exams. which I will no matter how long it takes me to solve my problems with the words and numbers involved I will pass.Having had my rant and hopefully shown I am not stupid or thick or whatever other label has been placed on me I would like to say a big thank you to those who have posted in my defence and say I would welcome their input on the CB groups as perhaps they could help dispel some of the fears and misconceptions that

CBers have about armatures. This on its own could make for a better environment for all.

Paul - For what it worth from the ARRL:

A review of the cards received by the ARRL Outgoing QSL Service indicates that most fall in the following range:

Height = 2-3/4 to 4-1/4 in. (70 to 110 mm) Width = 4-3/4 to 6-1/4 in. (120 to 160 mm)

The IARU Region 2 has suggested the following dimensions as optimum:
Height 3-1/2 inches [90 mm] Width 5-1/2 inches [140 mm]

Carl, you display a serious flaw in your logic here, too. I've never been interested in hard-core contesting, but those I've known who were always were very much interested in what was going on inside their rigs. Otherwise their contesting endeavors wouldn't be nowhere near as successful. You seem to fail to recognize that contesters are competitors and competitors are very much involved in the technology involved in their competition.

If you believe otherwise, tell it to the NASCAR people. Their response might be interesting.

Of course you also don't believe that advances in radio technology have seriously improved the operation of CW, so the rest follows.

Actually, IBM looked at CP/M-86 for their PC operating system and then
decided to go with Microsoft instead of Digital Research. If DR had
gotten the contract, Bill Gates' life would probably be a lot different.

IBM did not decide on the operating system. The users decided based on cost. Gates outsmarted DR. He talked IBM into putting out both systems and letting the users decide which one to put on the computer. His was about $ 50 and DR wanted about $ 150. Even though DR was reported to be a much better system the consumer picked the cheaper one and got what they paid for.

That's why they style themselves so grandly as, "Dyslexic".

They can't spell, "Thick"!.

BTW, it didn't take that one long to come up with the
standard excuse of dyslexia to justify his CBness, did it?

If you have the qualifications that you boast, then why
play the dyslexia card to justify your CBness? The RAE is
trivial if you do indeed have the exams below under your belt.

"Armature"? Your head's in a spin....tangled webs, etc.....try
speaking the truth about laziness rather than the dubious
claims about dyslexia.

As to appropriate newsgroups, all the ones above are for Ham
Radio and not for CBers such as yourself.

I suspect IBM, in the end, simply didn't want to commit the necessary
resources to support a proprietary operating system. At least it seemed
that way from my vantage point at Intel.

Same here in old Europe, and if you send cards via bureau, it is best
to keep close to these dimensions because the cards may be bundled, and
what is larger, may be damaged. Also, some bureaux (DL, for instance)
use sorting machines. DARC recommends cards between 85 mm x 135 mm
and 105 mm x 150 mm, paper weight 170 to 220 gram/square meter. Still,
in my experience 160 gram/square meter is OK.
For cards sent by mail, just keep to the dimensions recommended by the
postal administration. However, keep in mind that some people collect
QSL cards in albums with standard-size (whatever that is) pockets.

You can always cut your cards yourself from available stock. Maybe consider
using an older, but rugged laser printer even if it is only monochrome.

I've heard that Avery (tm) has a pre-cut form that's the
right size. I enjoy "rolling my own" QSLs and have done it
for years, laser and inkjet. I've got one for mobile QSOs,
one for PSK31, my regular QSL in monochrome laser printing
for garden-variety QSLs and in inkjet color for special ones.

I run my QSLs on standard white cardstock and then cut them out
with a "Rotatrim" cutter. That makes it fairly fast and easy.
The card size is very repeatable with the Rotatrim and it takes
just a few minutes to turn out a batch of 40-50 cards. The
Rotatrim is a little expensive if you buy a good one, new, but
they are often available used now that more people are abandoning
their traditional photography darkrooms to go digital.

I lay my QSLs out, 4 to a page, so only 3 cuts are necessary
to cut them out of an 8.5x11" page, and the Rotatrim will take
two sheets at once, so three quick cuts gives you 8 QSLs. And
I do all the 3.5" cuts at first and then do the 5.5" cuts--
it really is fast and easy.

I was thinking about doing the same thing - making my own qsls on
photo stock, printing them with a Canon 9000 photo printer. Sort of
like color postcards, but when I figured the cost of the paper and
ink, it turned out that it was much cheaper to buy them preprinted and
apply labels with the qso info on them.

"BPL is a Pandora's Box of Unprecedented Proportions"
By Rick Lindquist, N1RL (ARRL)

- - - - - - - - - - - - - - - - - -
- - - - - - - - - - - - - - - - - -

https://www.arrl.org/forms/development/donations/bpl/

Here's the situation...

Utility companies with deep pockets are promoting a new scheme -- with great potential for causing harmful interference to Amateur Radio operators nationwide. The FCC is considering possible rule changes to aid these commercial interests who want to use existing electrical power lines that run along nearly every street and road, and into every neighborhood, to carry high-speed Internet service into homes and offices.

Why is this important to you?

Broadband over Power Line ("Access BPL") feeds broadband digital signals onto power lines using high-frequency RF from 2 to 80 MHz -- right on top of 80 meters, 40 meters, 20 meters and every other popular ham band all the way up to 6 meters. And it's not just the ham bands -- short-wave listeners are at risk too. Although this technology is already allowed, the industry wants the limits to be relaxed -- with greater interference potential to your ham radio operation.

These BPL signals could transform HF from a quiet haven that hams enjoy to a noisy industry wasteland, changing ham radio forever. It's already hard enough to maintain a regular schedule with your friends, hear weak DX signals, or copy a maritime ham in distress. Imagine trying to do that through several S-units or more of broadband garbage. Imagine not even being able to throw your rig in the car and escape it through mobile operation -- power lines are everywhere! Will you have to operate from a remote site just to enjoy a quiet QSO?

. . .

David Sumner, K1ZZ
ARRL Chief Executive Officer

Larry, that's absolutely true and I should have mentioned
it in my own post on the subject: Rolling your own QSLs
is NOT cheaper, at least not for me, than buying nice ones
from a commercial printer. I just do it because I enjoy
having special ones--I'll do a special batch just for a
big contest, for instance. And I enjoy having designs
that nobody else has (probably). But you're dead right,
it's NOT cheaper than buying them! 73!

Joking apart, I know, and I suspect that you know also,
that dyslexia and intelligence are different and unrelated matters.

So different in fact, that it is perfectly possible to have dyslexics
who are thick.

I think that when we see someone playing the dyslexic
card in this NG to justify their CBness, then we are
seeing examples of dyslexics who are also thick.

Mark -
Verticals do work and don't take much space.
The better the ground (I like to roll out fence wire, then cover with dirt and seed with grass cover.), the better the vertical works. Verts are not that good for short skip (stateside QSOs), but the further out the DX, the better verticals work with their natural low angle of radiation (that can also get into telephones and VCRs). In Ohio days, I used a 44 ft wide 40-meter horizontal monopole (HyGain) on a 40 ft tower. It worked short skip and DX very well, without the interference problems of a vertical, and without an RF-hot tower to keep the kids off of. For 80m, I loaded up 30 ft of insulated tower sections, with some TV mast on top of it (almost a full 1/4 wave), and could work what I could hear. With added coil loading it did a good job on 160m, but had some high voltage at the base (with the KW on) that burned up my first base insulators. (Not a good antenna, if kids can touch it.) Since my move to NC, I'm using a GP - kind of messy, but probably more efficient than an earth ground for the vertical. (For the horizontal dipole, the ground is just to give lightning a place to go - without coming into the house; for the vertical, the ground is half the antenna and needs to be more than a long ground rod.)

1930. Looking for QSL Routes: 7Q7XX via JH3RRA

Newsgroup: rec.radio.amateur.dx
Date: 2003-09-03 00:02:40 UTC
From: Larry Johnson <larryj@teleport.com>
Message-ID: <3F552E00.CC23F4FB@teleport.com>
Source record: 9314

I just had my envelope returned as "Insufficient Address" today. I used
the address:

Shina Takenaka JH3RRA
Box 21, Katano,
Osaka 576
Japan

Anyone else have an address for JH3RRA or JG3LGZ?

Yes, it's for my "Postcard Collection."

Thanks!
LJ

ARRL rejected my QSL for this 1981 Palmyra DXpedition some time ago and couldn't tell me why. They allowed the card from the same group on Kingman Reef. Every time I run across this card I think they were in error. It was a Ten Tec sponsored expedition widely heralded in all the magazines at the time as I remember. The principals involved had experience and not likely to go on an unauthorized expedition. I wonder if any of you had this same problem or if they just screwed up on mine ??

I also live in a city lot and my tree was only about 35' high. I had very good luck on 160 M using an inverted L, a 1/4 inverted L.
Fed at the base. You might try something like a 1/4 inverted L for 80 meters. Get the vertical section as high as you can and then take the horizontal section to another tree. Mine went over my roof to the front yard tree, not much hight then 35' either. It worked very well on 80m.
You could try this on 40M as well. If you have no other support for the horizontal other end, then you could even slope the horizontal end down to a fence.
Also look into 3/8 or 5/8 wave inverted L. They work even better.
My inverted L, was wire up the tree and over to the front yard tree. Fed at the base of the vertical section of the wire.
The more radials the better.

I used to work with a chap who had earlier (late 70's or early 80's)
worked with an ambitious young guy in Albuquerque. When said
youngster wanted to move his small business up to Washington state, he
offered my friend a large chunk of stock to go with him.

He turned it down. I wonder what 20% of MS would be worth today?

He would every morning look at his shitty office and miserable company
we worked for and cry until the first break. By then he was kinda
back in control.

1946. Re: Should I run a Sky-wire loop?

Newsgroup: rec.radio.amateur.dx
Date: 2003-09-04 09:14:05 UTC
From: Rick Frazier <rick@rickfrazier.com>
Message-ID: <3F57025D.8BAE870F@rickfrazier.com>
Source record: 9329

Walter:

I've tried two methods of feeding the loop(s) here. At first, I just hooked a chunk (technical term for random length I had on hand) of coax to the loop, with center conductor to one side and shield to the other side of the loop. This connected to one port of an MFJ 986 Differential T tuner. The coax wasn't separately, using the ground connection through the MFJ tuner and on to station ground, which is a grid of wires buried under a 1600+ square foot concrete slab that is the floor of my Workshop/studio/ham shack. .A second method I used was connecting 600 ohm ladder line to the loop and bringing it down to an old Johnson Matchbox tuner. The tuner case is connected to station ground, but neither leg of the ladder line is.

Both methods got out, and I did pretty well with the coax approach, but I prefer the Johnson Matchbox because I feel it is "cleaner" (another technical term, meaning I just feel better about the balanced tuner than a coax tuner) than the coax type of connection. Propagation has been enough different between the times that I had the coax up and when I put up the ladder line that I can't do a direct A-B comparison, but I think it may have been a little better with the balanced ladder line feeder....

Now that hurricane jimena has passed us by, I'll get moving in getting the big loop up, but now my wife wants me to put a flag/windsock on each of two of the supports, so that may delay me another week or two.... however, when I do put it up, it will go up with 600 ohm ladder line feeding one of my Matchboxes.

Putting up a horizontal loop takes a bit of doing if you want it to stay up. For the first few I've done, I've just got out the old slingshot and lobbed a fishing weight over a series of trees, pulling a nylon line behind, which was connected to a 12 gauge wire that would become the actual antenna. Fairly quick and it works well as a semi-permanent antenna as well as a field day "quickie". However, eventually, it will drift downward and get close enough to the ground you may want to re-string the wire. Not a big deal, especially from the looks of the kinds of trees you have. Here, the only trees I have are just too brittle to keep a wire in them for long. They shed limbs on their own at the slightest excuse. For a more permanent installation, I've purchased threaded thickwall (galvanized) electrical conduit in 2" and 1 1/2" (inside diameter) sizes. Two sections of 2" and two sections of 1 1/2" conduit total about 40 feet, and with guys at the 30 foot level and pulleys at 31, 35 and nearly 40 feet I can haul up a variety of wires without much trouble. The costs did mount, as each 40' pole cost nearly $100, plus "aircraft" wire cable and clamps, and I had to use a boom truck

to pick them up and hold them vertical until they were guyed. I used cracks in the lava for three of the four posts, and the last one went over an existing 1 1/2" diameter 6 foot high pipe at one property corner (a 10 foot pipe sunk in concrete). I'd imagine if you were to do something similar, the conduit would cost less than here, as you don't have to worry about ocean shipping adding costs to simple (but heavy) materials like conduit and pipe. Once I get it all up, I'll total it up and put some pictures on one of my web sites.

thanks
--Rick

What did ARRL say when you reported your finding?

Probably not. The ARRL is loading your computer with software that is
designed to communicate with other software via the internet.

Then again, maybe you should verify your checking account balance,
maybe LOTW is making automatic contributions to the ARRL's BPL
account in the middle of the night :-)

Any software that's on your computer that is allowed to play the ET
PHONE HOME game has the potential of being "spyware". The fact that
your ARRL logbook software has the function of contacting the ARRL's
computer is probably why it got tagged.

The clean it up software you installed is probably just looking for
anything that makes certain system calls, i.e., does things that have
the potential to be "bad".

Just because it got tagged doesn't mean it's doing anything bad. It
just means it has the potential to do things bad. If it is doing
anything bad, it wouldn't be the first time that "trusted" software
got caught.

Anytime you load any application that's capable of communicating over
the internet with other machines, you should be very sure it's NICE
software. Trouble is, that's very hard to be sure of unless you sit
and monitor packets going in and out of your box........

And then there's the bigger problem. Not only do you need to trust
the ARRL not to intentionally do anything bad, you need to trust
that their programmer is smart enuff so that he didn't build in some
more security holes on your box so that somebody else who is bad
can use your ARRL software to do bad things.

Personally, I would never install any (especially FREE) software that
claims to be a trojan finder - who knows more about how to make a good
trojan than the guys who write software to find them. Other than Bill
Gates that is.......

I think your best protection is a firewall. One that requires you to
give specific permission to each program that requires internet
access. That way NOBODY can phone home unless you let them.

Or the ultimate protection scheme. Eventually, we are going to all need to have at least two computers. One named GARBAGE, which we hook to the internet, and another with the mission critical important stuff on it which is NOT hooked to the internet.

At the time of the agreement there was no MS-DOS, it was a re-write of
QDOS (a rewrite of CP/M)

MS-DOS had so many bugs that IBM had to re-write it, and so the product
jointly licensed as both MS-DOS and PC-DOS initially.

DR-DOS was far superior to MS-DOS, but Ms effectively got rid of it's
challenge when it made Windows 3.1 unable to run on DR-DOS.

All good, clean business.

Rick,

I would love to see a photo of the setup when you get done. It sounds really cool.

I have posted some sky-wire questions in a few other groups and some people have told me that I need to use a matching transformer,

http://www2.hard-core-dx.com/nordicdx/antenna/feed/feed1.html

to balance the coax and the wire antenna.

I'm pretty sure I'm going to run a sky-wire, but I may wait until this fall, after the leaves go. It seems easier without all of the leaves when using a slingshot.

I tied mine up with trout line. I bought went I got the 1 oz. egg sinkers and figured it should be able to hold up under bad weather.

about the setup, doesn't the ladder line become part of the antenna?

thanks.

The TrustedQSL software makes use of the "expat" library for parsing XML
documents (see: http://www.libexpat.org/). This library is used in a
number of software projects, and libexpat.dll is the Windows version of
the library. It is not spyware by the remotest stretch of the imagination.
Clearly, Spysubtract is confused.

No, that's not how it works. The TrustedQSL software simply prepares files to be sent to LoTW. The sending is done by the user with an email program or a Web browser file-upload. The TrustedQSL software has no ability to communicate via the network at all.

I don't know what caused the false positive. My guess -- and it's only a guess -- is that libexpat.dll was also used in a product that *is* spyware. Since libexpat.dll is freely available, that wouldn't be too surprising.

> The clean it up software you installed is probably just looking for
> anything that makes certain system calls, i.e., does things that have

I can't imagine what system calls a text-parsing library might do that anyone would consider potentially "bad."

> Just because it got tagged doesn't mean it's doing anything bad. It just
> means it has the potential to do things bad. If it is doing anything
> bad, it wouldn't be the first time that "trusted" software got caught.

It's also worth noting that the spyware-detection software in question has a "whitelist" capability so the user can tell it to skip a particular file or files. Clearly, TrustedQSL isn't the only false positive they detect!

True but moot since the TrustedQSL software is completely network unaware.

That, plus using a mail client not known to be a virus magnet. (There was an article in the local paper just today stating that and listing alternative mail clients such as Eudora and Pegasus.)

> Or the ultimate protection scheme. Eventually, we are going to all need

I leave my Linux box hooked to the 'Net all the time, with both an external firewall and its internal one configured to expose only what needs to be exposed. And my mail client just does text unless I explicitly ask it to open something. And I do regular security updates of the system. So far, so good.

Source record: 9341

Thanks for replies guys. Caveat, I apparently have a different trip as my QSL date is April 25th 1981. However if you had a good one from an AD0S 1980 trip it makes me think all the more that this should be a good one. This same dxpedition went to Kingman Reef also and the ARRL allowed that one, the same card as the link supplied by Derek. They made 5400 contacts while on Palmyra.

I did question the DX desk at the time. I got the answer somewhat to the effect that they didn't have the reason or know the reason but it didn't count and didn't offer to double check. The tone indicated that the case was closed. I know the DX desk is constantly hammered by people wanting anything to count. The QSL card info is correct. I let it drop. If I go back to them again I want to be able to say, look, it did count as others got credit, keeping their identity confidential.

Possible due to the time frame they have discarded supporting info? I don't know.

Thanks, Trav WX0Y tdwalter@netins.net

Hi,
I'm a new general and just made my first South American contact. I need the details of appropriate QSLing. I have the name and address of the individual I contacted. He names a QSL manager in his QRZ profile page. My assumption is I would send the QSL card to the manager. Is this right? Sorry for the dumb question. I'm just getting started in this hobby.
Thanks,

Yup, you got it right.

Let's assume the manager is in the US.
Include a self addressed stamped envelope so he can send the QSL to you.
Also nice to include a bit of money to help cover the managers expenses.
Perhaps $1 would be appropriate ... hence the term "green stamp".

If the manager is outside the US the same ideas apply, but do include
something to cover the cost of postage and QSL card to help out the manager.

If you are not real concerned about getting the QSL quickly, as in "Oh,
nice QSO, but my 147th PY contact" then you might send a QSL via
the bureau and will likely get one back eventually.

I've done a lot of DXing recently but have not been all that concerned
about QSLs ... have a 50 year collection of them ... so others may be
able to provide more up to date comments on current practices.

Those first DX QSLs are sure nice to have though!
I still have my first "Worked All Continents" QSLs neatly mounted
in a little frame I can hang on the wall :-)

Amateur Radio Newsline™ Report 1360– September 5 2003

Amateur Radio Newsline report number 1360 with a release date of Friday, September 5th 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. Pro-code fights back. A petition to retain Morse code testing is filed with the FCC and others are reportedly on the way. Find out the details on Amateur Radio Newsline report number 1360 coming your way right now.

(Billboard Cart Here)

**

RESTRUCTURING: PRO CODE PETITION FLED WITH THE FCC

The proponents of retaining Morse testing for all candidates for a United States Amateur License with high frequency operating priveleges are striking back. This, with a petition that not only asks the F-C-C to retain the 5 word per minute C-W exam, but to also require that Extra class pass a 12 word per minute test. And the organization that I sponsoring the measure also wants written exams stiffened as well. Amateur Radio Newsline’s David Black, KB4KCH, has more on this attempt to row against the deregulatory tide:

--

For the past couple of months, more and more countries have been steering toward making amateur radio code-free. That follows the July abolition of Morse code testing by the World Radiocommunications Conference. In the United States, the Federal Communications Commission has before it six petitions essentially seeking to remove Morse code from amateur radio in the U-S. Supporters of the code have been quiet--until now. A group called FISTS--said to be the largest code advocacy organization in the world--is leading an effort to make Morse code a more prominent part of ham radio and the licensing process.

FISTS is an international Morse code preservation society based in the United Kingdom with chapters world-wide. Its stated objective is to further the use of the Morse code in Amateur Radio communications. The group's north American chapter has delivered a detailed rule-making request to the FCC that seeks more than just making sure that Morse code testing is retained.

FISTS asks the Commission to raise the standards in other areas of testing, too. Nancy Kott, WZ8C, is U-S Chapter Manager for FISTS, and is Editor of Worldradio Magazine. She wrote the rule making request. Among the proposals are keeping code as a mandatory testing element for the General and Extra class licenses. General licenses would require 5 words per minute and Extra class

licenses would require 12 word per minute code proficiency.

FISTS says passing a 5 word per minute code test is no hindrance to people wanting to upgrade, and cites the large number of Technician class operators upgrading to General as proof.

FISTS also says that those aiming for the Extra license should be able to demonstrate Morse code skill at 12 words per minute.

Today's written exams are too easy. At least, that's what FISTS seems to suggest in noting that the FCC sought comments before amateur radio's restructuring about whether fewer morse code requirements should be offset by increased technical content on written questions. FISTS notes that nearly every commenter said yes, but the Commission's Report and Order failed to address the issue.

FISTS says the commission has a chance now to make General class written tests equivalent to the Advanced class written tests before restructuring. In other words, go back to the way it was, with tests that are harder and more thorough.

FISTS wants the Extra class exam to be more thorough, as well. It wants the FCC to require written knowledge of circuit design, information theory, digital methods and encoding schemes and software radio. FISTS says candidates for the Extra class ticket need to show a more thorough knowledge of propagation and geophysics than current tests require.

For the Technician class operator, FISTS suggests merging the Technician and Tech-Plus classes and not require a Morse code exam. But FISTS says technical content should be emphasized and should include the digital modes. FISTS advocates extending Technician Class privileges to include digital modes within the current Novice subbands, which it says should be kept. The group says that would let Technician Class operators participate in the explosive growth in digital applications occurring within the Amateur Radio Service on the high frequency bands.

But when it comes to giving Technicians even limited phone privileges on HF, FISTS says no. The group says the rush of upgrades by Technicians to higher classes following restructuring indicates that the barrier between General and Technician classes has already been lowered enough without needing to go any further.

FISTS also suggests one other big change and that involves taking license tests. Right now, if you fail an exam, you can go back and try again at the same session. FISTS is asking the Commission to impose a 24-hour waiting period before being able re-take either a failed written test or a failed code test.
For the Amateur Radio Newsline, I'm David Black, KB4KCH.

--

There’s 14 pages to the FISTS filing. You can read it on-line at ftp://ftp.qsl.net/pub/n1ea/FIST_FCC_Petition_8-30-303.pdf. As we go to air, no Rule Making designation has been assigned to the FISTS request.

RESTRUCTURING: ACA PAPER SUGGESTS TOTAL RESTRUCTURING OF VK HAM RADIO

Meantime, down-under the Australian Communications Authority has surprised that nations ham radio community with a proposal to totally restructure that nations Amateur Radio service. Jim Linton, VK3PC, has the rest of the story.

--
Radical changes are being proposed for the Amateur Service in the just issued ACA discussion paper entitled "A Review of Amateur Service Regulation.” The paper is sure to stimulate debate, particularly its reference to interference experienced by domestic television and radio receivers, and a suggestion that radio amateurs should take full responsibility to resolve these problems.

A major purpose of the paper is to discuss the implementation of the changes arising out of the World Radiocommunications Conference held in Geneva this year. These changes include the end of mandatory Morse code tests for amateur licences, amateur callsigns, third party traffic, communications during disasters, and reciprocal and visitor licensing.

The ACA, as expected, has also taken the opportunity to discuss restructuring of amateur licensing, the regulatory controls and administration of the Amateur Service in Australia. The paper acknowledges the WIA's proposal for a new entry level licence, and the potential for it to replace the current Novice licence. It discusses restructuring of the current system of seven different amateur licence types (five operator, plus repeater and beacon), to create only two operator licence types - Unrestricted and Novice.

On a positive note the paper hints that the removal of Morse code tests for amateur licences may occur earlier than the ACA's current timetable. It states that if there is sufficient public support, the code requirement could be removed prior to its proposed implementation of regulatory changes flowing from its discussion paper in early 2005.

In a controversial proposal, the ACA is to consider the introduction of a "no interference" policy for radio amateurs. It states "The operation of an amateur station, which is essentially a hobby, should not disturb another person's activities, such as television viewing or radio listening, or affect commercial activities." Should the "no interference" policy be introduced, it would be a major shift from the current ACA policy that provides for a shared responsibility between the radio amateur and his neighbour for the resolution of an interference problem.

To make it clear, the ACA explains "This would mean that an amateur must not cause interference to other radiocommunication services. If causing interference to another service, the obligation will be on the amateur to resolve the problem."

--

The Australian Communications Authority has set a deadline of October 31st as the last day for hams to file responses to its discussion paper. The 50-page discussion paper can be downloaded from www.wiavic.org.au/news or www.wia.org.au/vk4 (Q-News)

**

RADIO LAW: THE ACADEMY OF MODEL AERONAUTICS SAYS NO TO BPL

Back here in the United States, word that the Academy of Model Aeronautics is saying no to the introduction of Broadband Over Powerline or B-P-L technology. In Reply Comments to the FCC, the 175,000 member aviation hobby group says that it is concerned that B-P-L deployment could cause harmful interference to users of Radio Controlled systems and pose a safety hazard to aeromodeling equipment and spectators.

In its filing the A-M-A says that Broadband Over Powerline holds the potential to severely interfere with radio controlled models which operate in or near the 27, 50, 72 and 75 MHz bands. All of these fall within the 1 point 7 through 80 MHz spectrum where the FCC proposes to permit B-P-L to operate.

To the A-M-A this means that Broadband Over Powerline may not yield the benign environment the Commission expects. Also, that it could result in an unanticipated negative impact on Radio Controlled operations. And that’s what it has told the FCC. (AMA release)

RADIO LAW: MARYLAND COUNTY FILES RFI CONTROL APEAL TO FCC

Still with regulatory news, the CGC Communicator reports that Anne Arundel County, Maryland has filed an Application for Review before the full Commission. This, in the hope of reversing an order by the FCC’s Wireless Telecommunications Bureau that prevents the County from entering into the radio frequency interference control business through zoning laws. Laws that could even impact on ham radio, C-B and GMRS operators.

In 2001 Anne Arundel County, Maryland, had enacted legislation requiring that, prior to receiving a County zoning certificate, owners and users of any sort of telecommunications facility had to show that their installation would not degrade or interfere with the County's public safety communications systems. The ordinance also permitted the County to revoke a zoning certificate where degradation or interference was found.

Alarmed, telecommunications providers took the ordanance to the FCC asking that it be overturned. Last July it did just that. It In considering the case, the

Commission found that the challenged provisions of the Anne Arundel County zoning Ordinance infringe on the Commission's exclusive jurisdiction over RFI and are preempted under the doctrine of field preemption. Now the county is upping the antie.

In its pleading, Anne Arundel County maintains that reversal of the Bureau's decision is required because the Order conflicts with a controlling statute of the Communications Act. The County further states that, pending implementation of the Commission's 800 MHz proceeding, the Bureau's decision leaves public safety systems of local governments such as the County's vulnerable and powerless to deal with what it terms as -- quote: " potentially deadly radio frequency interference from wireless systems of commercial mobile radio service providers operating in the 800 MHz band."

The FCC has invited comments on this matter by September 26. More is on-line at the U-R-L featured in this weeks Amateur Radio Newsline printed report.

(DO NOT READ: The complete story in the the FCC website at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-03-2734A1.doc) (CGC)

RESCUE RADIO: CELL PHONE HELPS RESCUE FCC OFFICIAL

A cellular telephone has helped to rescue two men dangling in a gondola buffeted by severe winds near Aspen Colorado. One of them is the chief of the Federal Communications Commission's Wireless Bureau who turned to the phone during an ordeal where he was trapped for more than two hours. Amateur Radio Newsline's Bruce Tennant. K-6PZW, reports:

--

According to news reports John Muleta leaned on the technology he oversees when he and Robert Pepper, an adviser to FCC Chairman Michael Powell, got stuck in the gondola on Monday, August 19th. The two men had used a break in a telecommunications summit to take in the view from atop of 11,000 foot Aspen Mountain.

Their sightseeing trip turned into an ordeal when the tram service abruptly shut down during their return. It stranded Muleta and Pepper n the enclosed gondola part way down the mountain. When help was slow to arrive, Muleta used his cellular phone to call for assistance. But the local service provider provider apparently did not have the latest "enhanced" 911 technology and could not locate him precisely. So Muleta simply directed the rescue effort over the phone.

Once off the mountain Muleta told the press that he was very happy that he had remembered to carry his cellular telephone with him. He added that had he not, that it would have been a much different scenario. This, if they had been trapped all night with the weather getting getting colder.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

Ironically, just before he left for the trip Muleta told an interviewer that the FCC is looking at ways to accelerate the deployment of Enhamced 911 service. This is the system that uses G-P-S technology to more precisely locate callers. (Published News Reports)

**

ENFORCEMENT: INTERNET SALES BRING LETTER OF INQUIREY

The FCC has sent a letter of inquirey to Randy Owen, N9UOM, of Toma Wisconsin regarding his license renewal application. The Commision is asking Owen about his apparent involvement in the sale of non-certified C-B transcievers and non-certified High Frequency amplifiers over the Internet in 2002. Owen is the owner of Roper Electronics whose website was advertising the merchandise for sale. (FCC)

**

ENFORCEMENT: FORMER HAM WARNED NOT TO CONTACT THE FCC

A brefly licensed former ham has been told not to call the FCC and wait for it to contact him. The agency’s Daryl Duckworth, NN0W, explains:

--

(Duckworth) “Jack Gerritsen of Bell California has recieved a warnng notice about a violation of ex-patrte rules after his license had been set aside. His repeated calls to the offices of Administrative Law Judges is a violation odf the Commission’s rules against ex-parte communications. Ex-parte rules place restrictions on contacts with Commission decision making personel.”

--

Gerritsen’s license and KG6IRO call sign were set aside only days after they were issued back in November of 2001. This after the FCC learned that he had been convicted in California state court of a radio related offense. It also recieved complaints alleging that Gerritsen had been on the ham bands prior to recieving his license. (FCC, RAIN)

NAMS IN THE NEWS: 9M2TO WINS UKDXF AZWARD

Some names in the news. The Chiltern DX Club of the U-K DX Foundation has awarded its prestigious 'Local Heroes' Award for 2003 to Tex Izumo, 9M2TO. The club’s awards committee recognized the commitment Izumo has shown in providing many contacts and confirmations with amateurs world-wide on all bands from 160 to 6 metres over a period of many years.

This annual award goes to an operator resident in a DX country who has provided excellent service to the DX community and who maintains a high standard of operating without the benefit of major sponsorship. The award carries a cash prize and a year's honorary membership in the Chiltern DX Club. (GB2RS)

**

NAMES IN THE NEWS: HAM APPEARS ON TV MOTORCYCLE SPECIAL

Bob Mastrangelo, WA6ZTA, of Thousand Oaks Californis reports that he recently participated in the filming of a motorcycle special that aired August 28th on The Travel Channel. The show is called Revolution on Wheels, and Bob is seen in the beginning riding his yellow Honda Gold Wing and is interviewed about 25 minutes later. Since The Travel Channel does repeat these programs, check local listings to see when it will air again and keep an eye open for WA6ZTA. (ARNewsline(tm))

**

NAMES IN THE NEWS: KB4KCH NEW VP OF ARNEWSLINE(TM)

The Board of Directors of the Amateur Radio Newsline has confirmed the appointment of David Black, KB4KCH, of Helena, Alabama, as its Vice President. Black, whom you heard earlier in this newscast will fill out the unexpired term of Roy Neal, K6DUE, who died last month following heart valve surgery.

David Black, KB4KCH, is owner First Frame Video in Birmingham, Alabama. He is also a 20-year veteran of the broadcast television industry. Prior to starting First Frame Video, David worked as a television news reporter and weather anchor at WVTM, the NBC affiliate serving Birmingham, Alabama. KB4KCH also has extensive radio and television experience while working in broadcasting in Texas.

In addition to his reporting and anchoring Amateur Radio Newsline for well over a decade, KB4KCH is active in amateur radio Skywarn and emergency communications. He is past President of the Birmingham Amateur Radio Club and is one of the founders of ALERT Alabama. This is an organization of radio amateurs specializing in Skywarn communications to assist the National Weather Service in the Birmingham area. (ARNewsline (tm))

HAM RADIO IN SPACE: ARISS PACKET UPDATE

An update to last weeks story on the wayward packet radio system on board the International Space Station. Those of you who were on the air on Sunday, August 24 are aware that the packet system was re-activated around 12:00 UTC. Shortly thereafter, the ARISS team received reports from the general ham community that the packet system was operational.

Over the next 9 hours, many hams around the world sent digital signals through the packet system. But later that day, at around 21:22 U-T-C, the packet system abruptly stopped operating while traveling over the Western part of the U.S.

According to AMSAT's Frank Bauer, KA3HDO, the ARISS team has had several discussions on next steps to get the system back up and running properly. But it may be some time before this can be accomplished. This is because the debug efforts may be delayed further due to the arrival of the Progress 12P re-supply ship which will be keeping the two man crew very busy.

Once time is available, the plan is to have the crew report out on the status of the packet module and then to recycle the power. This should bring the packet system back up. If the system abruptly shuts down again after a few hours the ARISS team will then ask the crew to attach a computer to the packet module, download the current parameters to the ground and reset the module.

Stay tuned. ARISS promises to pass along word of progress as it happens. (AMSAT, ARISS)

**

INTERNATIONAL - AUSTRALIA: NEW BANDSPACE FOR VK HAMS

On the international beat, word than all-Australian radio amateurs will be allowed to operate between 3.776 and 3.800 Mhz effective from the 1st of January 2004. The move follows a proposal put to the Australian Communications Authority by the Wireless Institute of Australia several years ago. (GB2RS)

**

INTERNATIONAL - WORLDWIDE: LIGHTHOUSE WEEKEND A BIG HIT

Meantime, reports from the around the world indicate that there was allot of activity in this years International Lighthouse and Lightship Weekend operating event. Jeramy Boot, of the GB2RS News Service has the details:

--

Mike Dalrymple, GM4SUC, the organiser of the International Lighthouse / Lightship Weekend reports that a record number of stations - 369 - were established at lighthouses and lightships in 48 countries - another record -

over the weekend of the 16th and 17th of August.

The official list of participants can be found on the ILLW website. Next year the event will be on the 21 and 22nd of August 2004, and Mike invites individuals and groups to join in with a weekend of enjoying radio from a lighthouse or lightship.

Jeramy Boot, G4NJH

--

The International Lighthouse website is in cyberspace at http://illw.net. GM4SUC adds that as soon as you have your plans for participatiin in the 2004 Lighthouse Weekend made to let him know. You can contact Mike by e-mail to GM4SUC@compuserve.com (GB2RS)

**

DX

In D-X, word that IN3VZE will be active once more as 7Q7CE from Malawi through the 21st of September. QSL as directed on the air. (GB2RS)

And the K3EOD Contest Team will be active in the September VHF UHF contest September 13th to the 14th. The group consists of W3EFH, K3EGE, WR3P, W2SJ and K3EOD. They will be on all bands from 6 meters RF through visible light using SSB, CW and laser communications. For more information please e-mail k3eod@juno.com (VHF REflector)

Lastly, HL1IWD reports that he will be visiting Honolulu through the 12th of September, and will operate as KH6 stroke KB1AIM on 20 metres, mainly CW. QSL is via HL1IWD. (Modern DX)

**

THAT FINAL ITEM: NO MORE USE OF THE WORD E-MAIL IN FRANCE

And finally this week, a note from France where the governmet has said goodbye to the term e-mail in favor of the native language term courriel. A word that linguistically sensitive France is now using to refer to electronic mail in all official documents and hopes that the public will adopt as well.

Frances’ Culture Ministry announced a ban on the use of e-mail in all government ministries, documents, publications or Web sites on July 18th. This, as the latest step to stem what it sees as an incursion of English words into the French language.

Courriel is a contraction of the two words and is a term that has often been used in French speaking Quebec Canada. The ministry's General Commission on Terminology and Neology insists Internet surfers in France are broadly using the term “courrier electronique'' instead of e-mail - a claim some industry experts dispute.

And we thought that you would like to know! (Published reports)

Amateur Radio Newsline™ Report 1360– September 5 2003

Amateur Radio Newsline report number 1360 with a release date of Friday, September 5th 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. Pro-code fights back. A petition to retain Morse code testing is filed with the FCC and others are reportedly on the way. Find out the details on Amateur Radio Newsline report number 1360 coming your way right now.

(Billboard Cart Here)

**

RESTRUCTURING: PRO CODE PETITION FLED WITH THE FCC

The proponents of retaining Morse testing for all candidates for a United States Amateur License with high frequency operating priveleges are striking back. This, with a petition that not only asks the F-C-C to retain the 5 word per minute C-W exam, but to also require that Extra class pass a 12 word per minute test. And the organization that I sponsoring the measure also wants written exams stiffened as well. Amateur Radio Newsline’s David Black, KB4KCH, has more on this attempt to row against the deregulatory tide:

--

For the past couple of months, more and more countries have been steering toward making amateur radio code-free. That follows the July abolition of Morse code testing by the World Radiocommunications Conference. In the United States, the Federal Communications Commission has before it six petitions essentially seeking to remove Morse code from amateur radio in the U-S. Supporters of the code have been quiet--until now. A group called FISTS--said to be the largest code advocacy organization in the world--is leading an effort to make Morse code a more prominent part of ham radio and the licensing process.

FISTS is an international Morse code preservation society based in the United Kingdom with chapters world-wide. Its stated objective is to further the use of the Morse code in Amateur Radio communications. The group's north American chapter has delivered a detailed rule-making request to the FCC that seeks more than just making sure that Morse code testing is retained.

FISTS asks the Commission to raise the standards in other areas of testing, too. Nancy Kott, WZ8C, is U-S Chapter Manager for FISTS, and is Editor of Worldradio Magazine. She wrote the rule making request. Among the proposals are keeping code as a mandatory testing element for the General and Extra class licenses. General licenses would require 5 words per minute and Extra class

licenses would require 12 word per minute code proficiency.

FISTS says passing a 5 word per minute code test is no hindrance to people wanting to upgrade, and cites the large number of Technician class operators upgrading to General as proof.

FISTS also says that those aiming for the Extra license should be able to demonstrate Morse code skill at 12 words per minute.

Today's written exams are too easy. At least, that's what FISTS seems to suggest in noting that the FCC sought comments before amateur radio's restructuring about whether fewer morse code requirements should be offset by increased technical content on written questions. FISTS notes that nearly every commenter said yes, but the Commission's Report and Order failed to address the issue.

FISTS says the commission has a chance now to make General class written tests equivalent to the Advanced class written tests before restructuring. In other words, go back to the way it was, with tests that are harder and more thorough.

FISTS wants the Extra class exam to be more thorough, as well. It wants the FCC to require written knowledge of circuit design, information theory, digital methods and encoding schemes and software radio. FISTS says candidates for the Extra class ticket need to show a more thorough knowledge of propagation and geophysics than current tests require.

For the Technician class operator, FISTS suggests merging the Technician and Tech-Plus classes and not require a Morse code exam. But FISTS says technical content should be emphasized and should include the digital modes. FISTS advocates extending Technician Class privileges to include digital modes within the current Novice subbands, which it says should be kept. The group says that would let Technician Class operators participate in the explosive growth in digital applications occurring within the Amateur Radio Service on the high frequency bands.

But when it comes to giving Technicians even limited phone privileges on HF, FISTS says no. The group says the rush of upgrades by Technicians to higher classes following restructuring indicates that the barrier between General and Technician classes has already been lowered enough without needing to go any further.

FISTS also suggests one other big change and that involves taking license tests. Right now, if you fail an exam, you can go back and try again at the same session. FISTS is asking the Commission to impose a 24-hour waiting period before being able re-take either a failed written test or a failed code test.
For the Amateur Radio Newsline, I'm David Black, KB4KCH.

--

There’s 14 pages to the FISTS filing. You can read it on-line at ftp://ftp.qsl.net/pub/n1ea/FIST_FCC_Petition_8-30-303.pdf. As we go to air, no Rule Making designation has been assigned to the FISTS request.

RESTRUCTURING: ACA PAPER SUGGESTS TOTAL RESTRUCTURING OF VK HAM RADIO

Meantime, down-under the Australian Communications Authority has surprised that nations ham radio community with a proposal to totally restructure that nations Amateur Radio service. Jim Linton, VK3PC, has the rest of the story.

--
Radical changes are being proposed for the Amateur Service in the just issued ACA discussion paper entitled "A Review of Amateur Service Regulation.” The paper is sure to stimulate debate, particularly its reference to interference experienced by domestic television and radio receivers, and a suggestion that radio amateurs should take full responsibility to resolve these problems.

A major purpose of the paper is to discuss the implementation of the changes arising out of the World Radiocommunications Conference held in Geneva this year. These changes include the end of mandatory Morse code tests for amateur licences, amateur callsigns, third party traffic, communications during disasters, and reciprocal and visitor licensing.

The ACA, as expected, has also taken the opportunity to discuss restructuring of amateur licensing, the regulatory controls and administration of the Amateur Service in Australia. The paper acknowledges the WIA's proposal for a new entry level licence, and the potential for it to replace the current Novice licence. It discusses restructuring of the current system of seven different amateur licence types (five operator, plus repeater and beacon), to create only two operator licence types - Unrestricted and Novice.

On a positive note the paper hints that the removal of Morse code tests for amateur licences may occur earlier than the ACA's current timetable. It states that if there is sufficient public support, the code requirement could be removed prior to its proposed implementation of regulatory changes flowing from its discussion paper in early 2005.

In a controversial proposal, the ACA is to consider the introduction of a "no interference" policy for radio amateurs. It states "The operation of an amateur station, which is essentially a hobby, should not disturb another person's activities, such as television viewing or radio listening, or affect commercial activities." Should the "no interference" policy be introduced, it would be a major shift from the current ACA policy that provides for a shared responsibility between the radio amateur and his neighbour for the resolution of an interference problem.

To make it clear, the ACA explains "This would mean that an amateur must not cause interference to other radiocommunication services. If causing interference to another service, the obligation will be on the amateur to resolve the problem."

--

The Australian Communications Authority has set a deadline of October 31st as the last day for hams to file responses to its discussion paper. The 50-page discussion paper can be downloaded from www.wiavic.org.au/news or www.wia.org.au/vk4 (Q-News)

**

RADIO LAW: THE ACADEMY OF MODEL AERONAUTICS SAYS NO TO BPL

Back here in the United States, word that the Academy of Model Aeronautics is saying no to the introduction of Broadband Over Powerline or B-P-L technology. In Reply Comments to the FCC, the 175,000 member aviation hobby group says that it is concerned that B-P-L deployment could cause harmful interference to users of Radio Controlled systems and pose a safety hazard to aeromodeling equipment and spectators.

In its filing the A-M-A says that Broadband Over Powerline holds the potential to severely interfere with radio controlled models which operate in or near the 27, 50, 72 and 75 MHz bands. All of these fall within the 1 point 7 through 80 MHz spectrum where the FCC proposes to permit B-P-L to operate.

To the A-M-A this means that Broadband Over Powerline may not yield the benign environment the Commission expects. Also, that it could result in an unanticipated negative impact on Radio Controlled operations. And that’s what it has told the FCC. (AMA release)

INTERNATIONAL - AUSTRALIA: NEW BANDSPACE FOR VK HAMS

On the international beat, word than all-Australian radio amateurs will be allowed to operate between 3.776 and 3.800 Mhz effective from the 1st of January 2004. The move follows a proposal put to the Australian Communications Authority by the Wireless Institute of Australia several years ago. (GB2RS)

**

INTERNATIONAL - WORLDWIDE: LIGHTHOUSE WEEKEND A BIG HIT

Meantime, reports from the around the world indicate that there was allot of activity in this years International Lighthouse and Lightship Weekend operating event. Jeramy Boot, of the GB2RS News Service has the details:

--

Mike Dalrymple, GM4SUC, the organiser of the International Lighthouse / Lightship Weekend reports that a record number of stations - 369 - were established at lighthouses and lightships in 48 countries - another record -

over the weekend of the 16th and 17th of August.

The official list of participants can be found on the ILLW website. Next year the event will be on the 21 and 22nd of August 2004, and Mike invites individuals and groups to join in with a weekend of enjoying radio from a lighthouse or lightship.

Jeramy Boot, G4NJH

--

The International Lighthouse website is in cyberspace at http://illw.net. GM4SUC adds that as soon as you have your plans for participatiin in the 2004 Lighthouse Weekend made to let him know. You can contact Mike by e-mail to GM4SUC@compuserve.com (GB2RS)

**

DX

In D-X, word that IN3VZE will be active once more as 7Q7CE from Malawi through the 21st of September. QSL as directed on the air. (GB2RS)

And the K3EOD Contest Team will be active in the September VHF UHF contest September 13th to the 14th. The group consists of W3EFH, K3EGE, WR3P, W2SJ and K3EOD. They will be on all bands from 6 meters RF through visible light using SSB, CW and laser communications. For more information please e-mail k3eod@juno.com (VHF REflector)

Lastly, HL1IWD reports that he will be visiting Honolulu through the 12th of September, and will operate as KH6 stroke KB1AIM on 20 metres, mainly CW. QSL is via HL1IWD. (Modern DX)

**

THAT FINAL ITEM: NO MORE USE OF THE WORD E-MAIL IN FRANCE

And finally this week, a note from France where the governmet has said goodbye to the term e-mail in favor of the native language term courriel. A word that linguistically sensitive France is now using to refer to electronic mail in all official documents and hopes that the public will adopt as well.

Frances’ Culture Ministry announced a ban on the use of e-mail in all government ministries, documents, publications or Web sites on July 18th. This, as the latest step to stem what it sees as an incursion of English words into the French language.

Courriel is a contraction of the two words and is a term that has often been used in French speaking Quebec Canada. The ministry's General Commission on Terminology and Neology insists Internet surfers in France are broadly using the term “courrier electronique'' instead of e-mail - a claim some industry experts dispute.

And we thought that you would like to know! (Published reports)

An IRC is an International Reply Coupon. It is useable in any member country of the International Postal Union to buy postage. Since the QSL manager is in Spain, he will need that to buy stamps since he cannot use US stamps.

You can get an IRC at post offices. However, you may have to hunt around for them as not every post office will bother to have them on hand. For awhile, I lived in a small town and they special ordered them for me as I was the only person who ever asked for them. These days, you can probably order them via the internet as the postal service does have a web site.

That first DX contact is a real thrill. I remember too.

I have an old QSL for a contact as a Novice with CR6IP. How does this count, if at all, towards DXCC? I can't find the prefix in the deleted entities list. Is it valid for anything?

Thanks,

Duffy

It should count for Angola, D2. The country prefix has changed, and the
nature of the government has changed, but it's the same country.

The prefix cross-reference table in the ARRL's DXCC list shows

CR6 (before 1976) = D2

If you receive an IRC, simply take it to any post office and buy sufficient postage to reply to the QSL. Usually one IRC will buy enough postage to send mail to any foreign country.

If you want to send someone an IRC, find a post office that has them on hand (not all do) or get them off the internet. Enclose it in an envelope with your QSL, a self-addressed envelope, and then send it to the foreign ham whose card you want.

The reason that IRCs are necessary is that outgoing mail in any country must use the stamps of that country. So it does no good to send a foreign ham a stamped, self-addressed envelope unless you put on stamps from his country. He simply can't use US stamps just as we can't use foreign stamps to mail things here. So enter the IRC. It is accepted by all members of the International Postal Union as a means to buy stamps. So an IRC plus self-addressed envelope is the functional equivalent of the SASE for international purposes.

Don't know if this is still true, but you used to be able to buy IRC's
from some QSL managers at a deep discount.

It's most certainly still true - it's crazy to buy them at
the PO for $1.75 (I think that's the current rate) when a
QSL manager will sell them for about half that price.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 31st/August, through Sunday, 7th/September there were 220 countries active. Countries available: 3A, 3B8, 3B9, 3DA, 3V, 3W, 3X, 4J, 4L, 4S, 4U1I, 4X, 5A, 5B, 5H, 5N, 5R, 5U, 5V, 5W, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9V, 9Y, A4, A6, A7, A9, AP, BV, BY, C3, CE, CE0A, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HI, HK, HK0/a, HL, HP, HR, HS, HZ, I, IS, J3, J6, J8, JA, JD/o, JT, JW, JY, K, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PY, PY0F, PY0S, PZ, S2, S5, S7, S9, SM, SP, ST, SU, SV, SV5, SV9, T7, T8, T9, TA, TF, TG, TI, TK, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, VE, VK, VK9C, VK9N, VK9X, VP2E, VP2M, VP2V, VP5, VP8/o, VP9, VQ9, VR, VU, XE, XU, XX9, YA, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

7Q, MALAWI. Ely, IN3VZE, will be in Malawi from September 4-21st and is expected to use the callsign 7Q7CE. His operation will take place from Club Makokola near Mangochi on the Lakeshore of Lake Malawi. Most of his activity so far has been on 20/15 meters SSB on various frequencies. Most of his activity has been between 0500-1700z. QSL direct to his home callsign, IN3VZE, with return postage: Ely Camin, Corso 3 Novembre 136/2,

3810 Trento - Italy.

9G, GHANA. Alan, G3XAQ, will be operating CW only as 9G5XA again from Accra, Ghana, September 13-21st. This trip he will be installing a WARC antenna at the Technical College club station, so listen for him primarily on those bands.

A6, UNITED ARAB EMIRATES. The Slovenia Contest Club team will be active as/from A61AJ in the CQ World Wide DX SSB Contest (October 25-26th) as a Multi/Multi entry. QSL via N4QB.

DXCC NEWS. It was announced this past week that the following stations from Bhutan are approved for DXCC credit: A51AA, A51KC, A51PK, A51UD, A51WD and A51YL.

EA8, CANARY ISLAND. Daniel, EA5FV, will be active as EA8ZS during the CQ World Wide DX CW Contest (November 29-30th) as Single-Op/All Band/ High Power entry. QSL via EA5FV.

HC, ECUADOR. Jorge, HC1JQ, will participate CQ/RJ WW DX RTTY Contest as a Single-Op/Single Band (10m)/Low Power entry. QSL via HC1JQ.

HS8, THAILAND. Members of the Chumporn Amateuur Radio Society (HS8AC) will demonstrate Amateur Radio operation during the 160th anniversary of the "Langsuan" traditional long boat race. They will use the callsign HS8AC/P on October 11-12th (They will also be active before and after that time). QSL Manager is E21EIC. Operators are: HS1NGR, HS8LR, HS8FZ, HS8JJ, HS8BA, E20HHK, HS0EHF, HS0XNO and E21EIC. Activity will be on 40/20/15/10 meters (80/160m is possible). Mode will be: CW, SSB, RTTY, PSK-31 and SSTV.

IOTA NEWS.....
AF-014. Operators Braga/CT3HU, Helder/CT3HQ, Xavier/CT3JK and Jose/CT3MD will be active as CS9C from Porto Santo Island. Activity will take place before and during a festival on the island. The team will be active on all bands between September 20-27th. QSL direct or via the bureau to CT3MD.

AS-168. Members of the Korea DX Club (KDXC) and the Seorak DX Club will activate Cho Island from October 2-5th. Their callsign will be DS0DX/2. Activity will be on 80-10 meters with CW, SSB and RTTY. QSL Mmanager is HL1XP.

EU-067. Nicolas, F5TGR, will be active as SV8/F5TGR from some of the Cyclades Islands now through September 27th. Activity will be on 20-10 meters on SSB and CW. His schedule is as follows:
September 6-12th - Paros Island
September 13-19th - Santorini Island
September 20-27th - Naxos Island

EU-120. Glyn, GW0ANA, will make a short trip to Steepholm Island on September 10th, weather permitting. This will be a"Micro-lite" expedition with activity on SSB using a TS-50S into an outbacker

antenna. Also, this is a battery operation, so activity will
be only for 5 hours from 1100-1600z. Watch the IOTA frequencies.
QSL via GW0ANA.

OC-033. Masa, JF1UIO, will be active as FK/JF1UIO from Lifou Island
(Loyalty Islands), September 14-20th. Activity will be on
40-10 meters, not including 30 and 20 meters. QSL via his
home callsign.

OC-228. Operators Peter/VK3QI, Keith/VK3FT, Paul/VK3AJJ and Paul/VK3KXG
are expected to activate the South Australia State East Group,
Baudin Rocks (aka Godfrey Island) the last weekend in September,
commencing Thursday, September 25th, and concluding Monday,
September 29th. This will be a special event commemorating
the 200th Anniversary of the death of Captain Nicolas Baudin,
the French explorer, who died in September 1803, on the island
of Mauritius during his return to Europe from exploration of
the Australian coastline. A special commemorative callsign has
been applied for and will be announced later. Their activity
will be on the usual IOTA frequencies both CW and SSB. There
will be an emphasis on 30/40 meters CW and 20/17/15 meters
SSB. The long path to Europe around 0500-0800z will also be
emphasized. The team is also interested in making contacts
with as many French stations as possible. QSL via VK3QI,
direct (any callbook) or via VK3 QSL Bureau.

IS0, SARDINIA. A member of The Pannon DX Club, Geza, HA4XG, will travel
to Sardinia (EU-024) on a holiday with his XYL. His callsign will be
IS0/HA4XG/p. Geza and his wife will be staying at Cugnana Verde (Nr. OLbia),
September 13-20th and Tortoli, September 20-27th. Since this will be a
vacation, his activity will take place during the early morning and late
evening hours. Geza likes the WARC bands but he will be active on 40-10
meters; this depends on the possibilities on places to erect antenna(s).
He prefers CW but will do some SSB operations. QSLs are OK via HA bureau
or direct.

JW, Svalbard. Operators Just/LA9DL, Erling/LA6VM and Halvard/LA7XK will
be active from Longyearbyen on Svalbard during the "2003 Scandinavian
Activity Contest". They will be arriving in Longyearbyen just before noon
Thursday, September 25th and will depart for home early Monday morning,
September 29th. They will operate during the contest with the callsign
JW5X. QSL is via LA5X, direct or via the LA bureau. Before and after the
contest they will be active with their respective JW callsign (JW9DL,
JW7XK and JW6VM). QSL for these contacts are via their home callsigns.
Look for JW7XK to be mainly on BPSK31 and RTTY, while JW9DL and JW6VM will
work SSB and CW.

MJ, JERSEY. Richrad, M5RIC, will be active as MJ2Z for the CQ World Wide
DX SSB Contest (October 25-26th) as a Single-Op/All Band/High Power entry.
QSL via M5RIC.

NH0, MARIANA ISLANDS. Kuro, JH0MGJ (aka AL5A), will go to Saipan, Northern Mariana Islands and operate as AL5A/NH0 from September 20-22nd. Activity will be on 160-6 meters CW/SSB. If he can, Kuro will try RTTY and SSTV as KG6SA. QSL is OK via JH0MGJ.

OH0, ALAND ISLAND. Jukka, OH6LI, will be active as OH0V in the Scandinavian Activity Contest (September 27-28th) as a Single-Op/Single Band (15m)/ High Power entry. QSL via OH6LI.

OH0, ALAND ISLAND. Tomi, OH6EI, will be active as OH0Z in both CW and SSB Scandinavian Activity Contest (SAC). His planned activity is as follows:
SAC CW - September 20-21st, all bands operated by OH6EI and QSL via OH5DX (ex-OH1EH).
SAC SSB- September 27-28th, all bands operated by OH6EI and QSL via OH5DX (ex-OH1EH).
The Web page for these activitie are at: http://www.qsl.net/oh0z

PJ2, NETHERLANDS ANTILLES. Geoff, W0CG, will be active as PJ2DX from Signal Hill, Curacao (SA-006), between September 8-18th. His activity may be limited because it was reported that this is a working trip. He is expected to participate in the WAE DX SSB Contest (September 13-14th). QSL via N9AG.

PJ2, NETHERLANDS ANTILLES. Operators John/K4BAI, Steve/N8BJQ, Don/K8MFO, Jeff/K8ND, Jim/W8WTS, Geoff/W0CG and Leopold/S50R will be active from Curacao as PJ2T in the CQ World Wide DX CW Contest (November 29-30th) as a Multi-2 entry. QSL via N9AG.

PJ4, NETHERLANDS ANTILLES. Chris/DL5NAM, Uwe/DL9NDS and Klaus/DL7NFK will be active as P4/homecall from Bonaire Island (SA-006), October 16-26th. Activity will be on 80-6 meters CW/SSB/RTTY. QSL via their home callsign. They also plan to be active in the CQ World Wide DX SSB Contest (October 25-26th) with a contest callsign. For more information, visit their Web page at: http://www.dxpeditions.dl9nds.de

QSL INFO AND NEWS.....
Activity by CT1GFK/P, CT1GPQ/P and CT2IHP/P over the past weekend was from Rata Island (Portuguese Islands Award - DIP AL-13). A full color QSL card is available. QSL via their home callsigns, direct or by the bureau. All information and online logs are on the Web page at: http://adxg.sytes.net

Jean Michel/F6AJA and Yves/F6CYV have been QSL Manager for more than 15 years for some stations. The majority of the logs (75 logs, more than 240,000 QSOs) are now on the Web. Look for these logs on the Web page at: http://LesNouvellesDX.free.fr

HV3SJ QSLS. John, K1XN (from the GoList), informs everyone that Steve, I0MWI, told him: "All the logs for this callsign have been destroyed. Any reported operation using this callsign is a PIRATE."

Alan, VK4AAR, informs OPDX that he has taken on the job of managing the QSL cards for 9V1DX (Alan). Please QSL direct ONLY with USDs (or IRCs ... but USDs are much preferred!). Card printing is currently being negotiated. VK4AAR's address is: A. Roocroft, POB 421, Gatton 4343,

Australia.

John, K1XN (from the GoList), informs that Venco, Z36W, does not have a QSL Manager and states that he responds to all QSL requests for: Z36W, Z31JA, Z32JA and 4N5JA. Venco prefers direct with a SAE and 1 USD or 1 IRC, but the Bureau is okay. No E-QSL!!! Here is his correct postal address: Venco Stojcev, Ivo Lola Ribar 92, 2000 Stip, Macedonia.

T5/EI5C STATUS (The Final Word). OPDX was informed that someone in Ireland has contacted the "last remaining member" of the T5/EI5C team and the word is "that they had verbal permission from an un-named officer to operate the station in T5 with the club call. They made QSOs and sent out QSLs but they never had any paperwork. The logs are also gone at this stage." YOU MAY FILE THIS CARD!

TI5, COSTA RICA (Update). Operators Harry/AC8G, Ron/WA8LOW, W8ILC/Ron, Brian/KA7KUZ, Kecko/TI5KD, Tony/VE3RZ, Jorge/CX6VM, Ed/K1EP, Tom/ZP5AZL, Juan/ZP5MAL, Dale/N3BNA and Dave/WT8R will be manning the TI5N Contest station as a Multi-Multi entry in the CQWW SSB Contest, October 25-26th. QSL TI5N via W3HNK. For a day or two before and after the contest, the individual operators will be on then using TI5/own-callsign as time permits. Expect a higher level of CW and other non SSB modes on the contest bands due to the large SSB volume in the contest. Attention will also be directed to 6 meters and the WARC bands using various modes. QSLs for the individual QSOs should go to the callbook address unless advised otherwise. IMPORTANT: Do not mix the contest QSL with ones for the individual contacts.

TM8, FRANCE (Special Event). To celebrate the Clipperton DX Convention in Lille (Northern France) on September 20th, look for special event station TM8CDX to be on the air from September 8-21st. QSL via bureau to F5CQ.

VP9, BERMUDA. Operators Joe/K1JN, William/N1HRA, Foster/N3KCJ and possibly others will be active in the CQ World Wide DX SSB Contest (October 25-26th) as a Multi-2 entry. Callsign and QSL route will be announced later.

W0DXCC 2003 IS GETTING CLOSER! The W0DXCC 2003 convention in Bloomington, Minnesota (near Minneapolis/St. Paul Airport and the Mall of America) is only weeks away! The event is on October 18th. They want you to come to hear top DXers speak, including the latest addition to the W0DXCC 2003 program, 160 meter guru Tom Rauch W8JI! There will be DXCC Card Checking, the W0 bureau, ARRL DXAC, and equipment vendors will be there as part of the fun. For details, visit the following Web page at:
http://www.w0dxcc.com
Or E-mail them at < w0dxcc@w0dxcc.com > or send mail to them at:
W0DXCC 2003, PO Box 390633, Minneapolis, Minnesota 55439-0633.

YI, IRAQ. More stations continue to show up from here. Some of the stations active this week were: YI1AL (Op. Ali), YI/N2OBM (Op. Trent), YI1EM (Op. Esam), YI/KC0LEK (Op. Abel, QSL via QRZ.com), YI/KV4EB (Op. Willie, QSL via K0JN), YI/S57CQ (Op. Dane, QSL via S5 7DX), YI1SPY (Op. Mark) and YI1BGD. Most of their activity seems to take place mainly on 20/15 meters.

ZK1, SOUTH COOK ISLAND. Victor, ZK1CG, from Rarotonga, is once again active as ZK1USA. This past week he was heard on 20/15 meters. Watch 14195-200 and 21305 kHz between 0400-0700z.

ZONE 2. Fred, K2FRD, informs OPDX that "It's early, but I've been encouraged to announce my Zone Two Labrador VO2/K2FRD mini-Dxpedition for summer 2004 (about June 1st to about September 7th, 2004)". Details of his operation can be found on the following Web page at:
http://home.stny.rr.com/k2frd/Labrador2004.htm
This page will be updated as plans solidify and the date nears. Fred states, "Everyone seemed pleased with the results of the 2001 DXpedition, so we're gonna do it again except this time, I hope to have RTTY and PSK-31. Details on the Web page."

ZW0, ST. PETER AND ST. PAUL ROCKS. Joca, PS7JN, continues to be active for one more week (unitl September 14th) as ZW0S (not ZS0S as mentioned in OPDX.624). His activity has been mainly RTTY on 20 meters, but there has also been some RTTY activity on 40/30/17/15/12 meters. Joca has also been on PSK31 and SSTV. QSL via PS7JN.

Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.boatanchors,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.swap

This is a USED 20 meter three element full size monoband 20 meter beam:

Boom Length - 16.5 feet
Longest Element - 37 feet
Weight - 35 pounds
Wind Surface - 5.4 square feet
Turning Radius - 20 feet
Gain - 8.5 dB
FTB - 29-25 dB

The bean was installed on a tower for several years. I took it down to install a tri-bander.

It was carefully taken down with a bucket truck, disassembled and packaged in the original box; with all the hardware necessary to reassemble the beam. It is in excellent physical and electrical condition. The original assembly manual is included. However, the elements are tarnished (i.e. not shiny) due to exposure to the weather.

The box is 7 feet long by 6 inches by 5 inches and weighs about 45 pounds.

$175.00 plus shipping from 08809.

Walter:

I really didn't notice any deficiency with the antenna directly fed by coax, without any sort of matching transformer. As such, it is definitely possible the coax became a vertical component of the antenna, and I've actually had one person suggest I had a coax vertical antenna with a huge top hat, but personally don't believe that for a minute.

With the ladder line, some will tell you the vertical component of the ladder line becomes part of the antenna, and while this may be true in some respect, the voltages on the two conductors of the ladder line are opposite all of the time, so they should cancel out, resulting in no net effect for the vertical section of ladder line feeding the loop. Therefore, the loop pattern should be primarily dependent upon the number of wavelengths long each of the sides is, and the relative polarization at the band you are thinking of. Generally speaking, horizontal loops do pretty well as the frequency increases... and typically are not so fussy that they cannot be readily tuned with a decent antenna tuner.

Before I put up the poles, I just used a slingshot and a weight to pull a light but strong twisted nylon line (about the same thickness as a "chalk line") over or through appropriate trees and used it to pull the insulated wire in place. The only pole was a wooden 2x6 that supported the feed corner. With the pole version, nylon ropes hold pulleys that can be raised from the ground, so I can run the loop around the inside of the poles, through the pulleys, then hoist the pulleys up to the top of the poles using the nylon ropes. This gives me the flexibility to lower the wire to change the length (up to the maximum allowed by the inside dimension described by the poles) or add a second conductor below or inside the first one to help broadband the antenna. Art Bell used two conductors about 4 or 5 feet apart vertically, with the lower one a bit shorter than the top one. This may have effectively created the same electrical effect as a 4 or 5 foot diameter element, thus creating a more broadband antenna than a typical loop already is. Once I get the big loop up, I'll be playing with different orientations of a second wire to see how they play...

I'll take pictures and put them on one of my web sites once it's up...

Thx fer answering...
The Yaesu YM-38 is a quite old dynamic desktop microphone, I need schematics
for the circuit inside the mic.
It looks like the YD-148

If life were only that simple. The postmaster at the U.S. post office
where I live has been trying to figure out what IRC's are for about
a year now. He told me that if he ever does figure it out, he'll let
me exchange them for stamps. I got tired of waiting and sold them.

Many U.S. post offices are fine when it comes to buying IRC's but
when it comes to exchanging one for stamps, forget it......

I've gotten my best, fastest return QSL results using Bill Plum's foreign postage stamps. He is quick to turn around an order. I usually go in on an order with a friend of mine who's a DXer, so we save a bit on p/h charges too.

I've gotten cards from Europe and Asia as quick as two weeks by using return foreign postage. Since I don't always "need" a card that quickly, though, I send most of mine through the bureau.

Jackie

Have your Post Office Clerk go to USPS URL:
http://www.usps.com/cpim/ftp/pubs/32html/32h-p.html

Have him/her read:
international reply coupon - A coupon that is exchangeable for postage
(representing the minimum postage on an unregistered air letter) at post
offices in member countries of the Universal Postal Union. The coupon is
sold by post offices worldwide.

Worked for me, after I reminded them that the USA was a member country of
the Universal Postal Union !! Hi Hi

All about postage at URL:
http://ac6v.com/callbooks.htm#SERV

And IRC's are now $1.75 -- see USPS Publication 51

Also many European QSL Managers are now accepting Euro's

It's a question of rational logic: why should anyone help Rumsfeld and Wolfovitz invade a country that had absolutely nothing to do with 9/11, posed no threat to our national security and had no covert nuclear program?

> instead they hinder us, they are not allies but enemies.

Boofuckinghoo, you're getting annoying with this paranoid shit. Why don't you open your eyes and see what the Neocons are doing to this country? Americans are dying over there, and for what? It's about time we had an American lobby in Washington DC.

WA7AA

P.S. How's that search for WMD's going?

I have a MA5V that I use as a backup antenna. It is about 2 - 3 S units
below my G5RV on both receive and Transmit. It is better than nothing and
it has a small footprint. It is easy to assemble, and once assembled can be
separated into two sections (each section about 7 ft) for sort of easy
transport.

There are 'zakly two answers to that question: 1.) To reward
his rich pals in business with plenty of Iraqi plunder, and
2.) To divert public attention from Dubya's ASTONISHING failures
in the domestic area. :-(

It's a question of rational logic: why should anyone help Rumsfeld and Wolfovitz invade a country that had absolutely nothing to do with 9/11, posed no threat to our national security and had no covert nuclear program?

> instead they hinder us, they are not allies but enemies.

Boofuckinghoo, you're getting annoying with this paranoid shit. Why don't you open your eyes and see what the Neocons are doing to this country? Americans are dying over there, and for what? It's about time we had an American lobby in Washington DC.

WA7AA
P.S. How's that search for WMD's going?

1996. Do You Use A Linear On The WARC Bands ? A Poll

Newsgroup: rec.radio.amateur.dx
Date: 2003-09-11 16:10:09 UTC
From: Caveat Lector <CL@latin.com>
Message-ID: <B718b.24947$n94.10212@fed1read04>
Source record: 9280

In another NG, someone claimed that he did not know a single Amp owner that used their linear on the WARC bands. I know many DXers that do particularly on 12 and 17M, so lets see what this group has to say.

On 12M and 17M have you ever used your Linear ??

On 30M the power is limited to 200 Watts as we all know -- but modern amps will tune up on 30M and one can drive it to 200 Watts (CW and FSK Only) and still be in limits. Not all exciters are 100 Watts! Have you ever done this??

Me -- you betcha red ryder -- I use an AL-80B on the WARC bands -- 12M and 17m when I have to.
Don't use it on 30m tho.
Vertical here -- need all the help I can get.

But have worked DXCC-QRP -- so I have done QRP to QRO - hi hi.

Just for record, I was the wide guy who made a disparaging comment about
amps on the WARC bands and starting this whole thing I'm afraid. My comments
were an attempt at irony directed at:
1) CB amps that spray RF 10KHz in all directions (up, down, and for all
I know into undreamed of directions)
2) Overmodulated amplified signals (results similar to the above; often
combined with the above)
3) Folks who run amps when rag chewing when they are not necessary (If
your QSO partner tells you that you are "40 over 9" it seems reasonable to
me to reduce the power and take up less bandwidth).

I have a 1 KW amp and use it on 17 and even 12 on occasion. If the guy you
are trying to work can't copy me, I use the amp. I'm sure every amp owner
does the same thing. This is NOT the same as automatically cranking you the
power every time one turns on the rig - and that was the (attempted) point
of my original message.

2002. ID Wizard - QSLware - New Version

Newsgroup: rec.radio.amateur.dx
Date: 2003-09-11 21:38:58 UTC
From: J Tabor <denews@taborsoft.com>
Message-ID: <vm1qrk5sfbts09@corp.supernews.com>
Source record: 9286

Greetings,

At first glance ID Wizard is deceptively simple - yet under the surface are several useful tools Hopefully you will find ID Wizard worth your time. <G>

ID Wizard is an ID timer with system clock setting and miscellaneous tools. Very handy for any shack machine and also others.

ID Wizard tools include:
Notes - a full-featured text editor
Calculator - with tape display
Conversion Utility - Area, Distance, Mass, Power, Temperature, Time and Volume
Net Utility - Trace Route, Ping and WhoIs
Time setting via the net with Simple Network Time Protocol

Download from:
http://www.taborsoft.com/softstuff/idwiz/

Home of: WinCAP Wizard 3, GeoAlert Wizard, Active Beacon Wizard++, Beacon Wizard, KCal+, NERDAlert, ID Wizard, Alert Wizard, Beacon-Time Wizard, Beacon-Prediction Wizard and more.

It has been our experience over the years that "free" or inexpensive software is held in low regard. This is extremely puzzling, since many feel all software should be free. Personally, I enjoy providing a few "free" apps. Unfortunately I've yet to win the lotto, so the software must support itself - but that's all a different story and you should not be burdened with such.

However ID Wizard isn't free. The requested fee is an email with "any kind" of comment or suggestion.

All comments welcome. We would appreciate any thoughts on these subjects. Thanks for your time and kind consideration. You are also welcome to get my email address from the web site, or qrz.com. We receive many, many, junk email to the address used to post the occasional Usenet message; therefore they are sent to the bit pit on the server and never seen.

73,
Jim de KU5S

The Wise Ones live in the depths of the D, E, and F-Layers, and in the servers at Google.com. They are the descendants of the Gods. I personally subscribe to the theory they are the children of Thor Heyerdahl, the Viking god of Thunder and Balsawood Raft Dxpeditions. But that's another story.

The Wise Ones control everything that happens on the air and on this list, but they can't police every pileup or every newsgroup by themselves, so every morning, just before daylight over Katmandu, the Wise Ones select the "Mostest Intellegentest DXer" in their layer and convey upon him the title INFLICTOR OF HIGHER MORAL HARANGUES. This title and its duties last until the following dawn on Bouvet, if someone is there to observe the sunrise. Otherwise your duties end when WA2MOE gets tired of your crap and sends his lawyers with a gag order.

If you are ever chosen you will know because a representative of the Wise Ones will anoint your temples with oil from a forty year old bottle of Dr. Guano, collected on Ocean Island by VR1L in 1963. For that day you will be known as The Chosen. Your duties will be to seek out those that don't do things the way you do them (in other words, the right way.) When you find them, it will be your duty to correct them.

Think about it...too wide, too weak, too slow, too fast, what's your call dammit, wrong VFO, rotten fist, poor pileup control, wrong band, wrong QSL route, you timed out the repeater, wrong lingo, not enough green stamps, you're in the DX window, no-coders not allowed, coders suck, ... They're all yours.

When you find these wayward ones, you will lumber onto their frequency, stand up in your operating chair and shout, I AM SMARTER THAN YOU, SHUT UP AND LISTEN. You will now have the wayward one's undivided attention. He will think about this very briefly, then yield to your superior intellect. He will be very receptive to your thoughts and point of view.

Lecture him and proceed to the next wrong doer.

Now for the sad part of this tale. There are pretenders and charlatans out there who try to usurp the rightful powers of The Chosen. To you villainous few, I say beware. The Wise Ones also created BAWA (Baddest Ass Whats Around). No matter how bad you are, BAWA has the ability to be badder. You will know when you start your lecture and Bawa yells back, "You're a jerk, but I'm a bigger one. LET'S ESCALATE".

And you will have no choice.

But soon BAWA will tire of you and sink your little balsa boat. As you slip under the surface you will yell, "BUT I WAS RIGHT, DAMMIT" and you will once again prove the ancient mariners axiom -- AN OPEN MOUTH TAKES ON WATER.

dit dit

[snip good UK info]

QRP works! i do have to wonder though about those fellas (and US hams seem to be worst offenders) who feel they have to use 1kW when 100W would do...

so i guess my 100W txcvr is QRP to a linear nut? and my ft-817 is uQRP?

K4UEE (Bob) et Kï¿œIR (Ralph) ont annoncï¿œ une expï¿œdition sur Peter 1er.
Celle-ci devrait avoir lieu pendant le prochain ï¿œtï¿œ austral. Une ï¿œquipe
de 15 personnes est prï¿œvue de partir de Ushuaia le 3 janvier afin
d'arriver sur l'ï¿œle vers le 9. Ils seront QRV avec plusieurs stations
sur toutes les bandes HF en SSB/CW/RTTY.

L'ï¿œquipe espï¿œre rester 3 semaines sur place mais cela est trï¿œs dï¿œpendant
de la mï¿œtï¿œo, assez rude !!!

Il y a une possibilitï¿œ pour les radioamateurs (ou non) de visiter cette
ï¿œle et le Sud Shetland. De plus, quelques places derriï¿œre le micro sont
dispos ! Retour vers le 19 Janvier ï¿œ Ushuaia.
Prenez contact avec K4UEE Bob: k4uee@arrl.net pour informations.

Here's the press release that we put out...it was definately in
English...hi

Press Release

From: K4UEE & K0IR

Re: Planned Dxpedition to Peter I Island, Antarctica 12 Sept. 2003

Bob Allphin, K4UEE, and Ralph Fedor, K0IR, are pleased to announce they
have organized a DXpedition to Peter I Island (3Y0/P). The Dxpedition is
scheduled to occur during the upcoming Austral summer 2004. Their
15-person team is scheduled to depart from Ushuaia, Argentina on Jan. 3,
2004 and arrive at Peter I on approximately January 9th (+/- weather).
They will build the camp infrastructure and install all antennas before
going QRV. This will be a high power DXpedition with an international
team of experienced operators and multiple stations on all HF bands
covering SSB, CW, & RTTY modes.

The team hopes for a 3-week stay on Peter I. Weather, of course, may
dictate otherwise. QSL information and the team roster will be
forthcoming. Several operator positions are available. Also, there are
opportunities for ham or non-ham travelers to visit Peter I, the
Antarctic continent, and the South Shetland Islands returning around
Jan. 19th to Ushuaia, Argentina. Contact Bob, K4UEE at: k4uee@arrl.com for information.

2021. FYI: Language Translator (was Hot new announcement: 3Y0 - Peter Isl)

There is a neat language translator at URL:
http://babelfish.altavista.com/translate.dyn

Another at URL:
http://www.freetranslation.com/

Some one else just did the translation so won't repeat it.

Peter Island 3Y$\square$ -- hey I need that one!!!!!!

But according to some posts here -- ya won't need a linear !!!
Oh Yeah -- well you get em QRP -- Me -- I'm tuning up the AL-80B Linear as
we type.

Someone asked how to type a slashed zero -- try

In several fonts from WA6AXE
http://www.qsl.net/wa6axe/fonts.html

ALSO this works on my PC

Press and hold the 'Alt' key while typing 0 2 1 6 on the numbers key pad
get ø

Now to post and read and see if the ø's come up in ye olde NG

But I think that would only be good for YOUR computer,
which is fine if that's all you need it for. If you send a letter
to somebody in HTML (rich text) using this font, if they
don't have it on their computer as well, they'll get that
annoying large square in place of every slash-zero
you have.

Well, not really, because ALT-0216 is that same Nordic character in almost every font, except in symbols. The problem is that it really does not represent zero, so you can only use it for cosmetic purposes and any logging program will throw up if you attempt to use it. There are fonts available that display zero with a slash, though.

2027. Noise & UTE Dxing question

Newsgroup: rec.radio.amateur.dx
Date: 2003-09-13 15:05:22 UTC
From: Dealmeister <chrisday@paratroopers.org>
Message-ID: <SmG8b.6326$ZG5.1296@newssvr16.news.prodigy.com>
Source record: 9161

Two questions:

1. I like to surf the web while Dxing; my computer creates a lot of noise. Too DX and surf, obviously the radio and PC need to be in relatively close proximity. Anythoughts on how I can cut down the noise?

2. Can anyone recommend a good decoder? Years ago I used the AEA PK-232. These days I'd like to buy a decoder that covers as much of the used formats as possible. Key for me will be simplicity though. I don't want something with a manual or operation that's so technical it won't be fun. I want something that is as "plug and play" as possible.

Any thoughts would be appreciated! Thanks

I solved the problem by using a Toshiba Laptop.
Laptops by design can be well shielded and some like the Toshiba are.
And laptops have an LCD screen eliminating the CRT noise problem, otherwise
see

Computer noise abatement at URL;
http://ac6v.com/comprfi.htm

Your computer can decode digital signals -- for software see URL:
MixW Software
http://www.nvbb.net/~jaffejim/mixwpage.htm
Does:
SSB
CW
AM
BPSK/BPSK63
QPSK
FSK31
RTTY any speed any shift
Packet (VHF) & (UHF)
Pactor RX
AMTOR RX & FEC TX
MFSK/Graphics Color/BW
Throb
MT63
Hellschreiber
FAX
SSTV

Others at URL:
http://ac6v.com/software.htm#DIGITAL

Doesn't even have to be HTML.

It worked on my computer, and I'm not even running the same operating system. (I'm using Linux)

(unfortunately I can't *type* a slashed zero that way on Linux, but if someone else types one I can read it)

2035. Re: Noise & UTE Dxing question

Newsgroup: rec.radio.amateur.dx
Date: 2003-09-14 05:21:06 UTC
From: "Dave, AA6YQ" <aa6yq@ambersoft.com>
Message-ID: <6VS8b.439815$o%2.198891@sccrnsc02>
Source record: 9169

There are many possible sources of RF leakage -- did you assemble this PC yourself, or did you purchase it as a system?

You can try the shotgun approach -- wrap the main unit and monitor in grounded aluminum foil and place ferrite cores on all of its cables -- mouse, keyboard, monitor, AC, etc. If this knocks down the RF, then remove each item one at a time to identify the culprit. Be careful; sometimes there is more than one culprit.

Back in the early 90's, the only way I could use my Commodore Amiga for logging was to wrap the main unit in aluminum foil and fabricate cable shields from aluminum foil. As this was supposedly an FCC class B certified device!

For what its worth, every Dell PC I've purchased over the subsequent years has been RF quiet, as have the Eizo (ex-Nanao) CRT and Plasma monitors I use with them.

73,

Dave, AA6YQ

Yep it shows on many others,
so might be an operating system incompatibility
Glad you responded as I thought it worked on all systems.
Sorry for any confusion.

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

3Y0/P, PETER I ISLAND. Bob Allphin/K4UEE and Ralph Fedor/K0IR are pleased to announce they have organized a DXpedition to Peter I Island (3Y0/P). The Dxpedition is scheduled to occur during the upcoming Austral summer 2004. Their 15 person team is scheduled to depart from Ushuaia, Argentina, on January 3rd, 2004, and arrive at Peter I Island on approximately January 9th (+/- weather). They will build the camp infrastructure and install all antennas before going QRV. This will be a high power DXpedition with an international team of experienced operators and multiple stations on all HF bands covering SSB, CW, and RTTY modes. The team hopes for a 3-week stay on Peter I. Weather, of course, may dictate otherwise. Additional details including QSL information, website and the team roster will be forthcoming. Several operator positions are available. Also, there are opportunities for ham or non-ham travelers to visit Peter I, the Antarctic continent, and the South Shetland Islands, returning around January 19th to Ushuaia, Argentina. For more information, contact Bob, K4UEE at: k4uee@arrl.net

4M, VENEZUELA (Special Event) (*). Alexis, YV5SSB, coordinator of a special DXpedition to San Fernardo de Apure (ITU 12, CQ 09, FJ67) to take place October 7-12th, states to look for 4M9YY to be active to celebrate being on the air for 13 years. Activity will be on all bands and modes, including the satellites. Check out their Web page at: http://www.4m9yy.com.ve

4S7, SRI LANKA. Look for the following operators (with callsigns) to be active until September 18th on 160-6 meters including the WARC bands on all modes. QSL via their home callsign by the bureau or direct via the address on QRZ.com. Operators expected to be active from AS-003 are:
JA3HXJ---4S7YHG Yshihiko Hasegawa JA3ARJ---4S7ARG Tatsuo Okushi
JA3CHS---4S7CHG Sadao Konagai JH3LSS---4S7LSG Kunio Miyagawa
JH3FAR---4S7FAG Nobuko Hasegawa JG3JKG---4S7JKG Tadaaki Tanigawa
JH3GXF---4S7GXG Satoshi Abiko 7J3AOZ---4S7AQG Hiroshi Shirahara
JQ3DUE---4S7DUG Masahiko Ikeda JN4QIN---4S7QIG Misaki Shirahara
JM3INF---4S7YJG Hikari Sakamoto JR3OCS---4S7OCG Fumie Miyamoto
JA3ART---4S7GGG Kazuo Ebihara JA5FDI---4S7FDG Takuo Omura
JR3QHQ---4S7QHG Toru Tanaka JA3AVO---4S7**G Masumi Nakade
JA3UJR---4S7UJG Tsuguya Nakasako JH3PBL---4S7**G Horoko Nakade
JA3DBD---4S7DBG Soichi Mitamoto JI3DST---4S7**G Takeshi Funaki

5R8, MADAGASCAR (*). Phil Whitchurch, G3SWH, and his wife were expected to arrive in Madagascar on September 13th. They will be travelling extensively on the mainland (IOTA AF-013) until the 22nd, where they will then fly to Ile Sainte Marie (IOTA AF-090) and relax for a few days until the 27th. Phil hopes to activate his 5R8HA callsign from the mainland whenever he can and will use 5R8HA/P from AF-090, where he should be more

active. Activity will be CW only on all bands 40-10 meters. Please remember that this will be a "holiday" type operation, not a DXpedition. QSL via G3SWH.

9L1, SIERRA LEONE (*). Jerry, K4ZIN, informs OPDX that he expects to reactivate his 9L1JT callsign during his next trip to Freetown, Sierra Leone, September 15-23rd. Activity will be primarily CW, 40-10 meters. QSL via K4ZIN (Address via QRZ.com).

BQ9P, PRATAS ISLAND (Update). Yuki, JI6KVR, updates us that the operator list so far is: BV4FH, BV3BW, BV3FG, JI6KVR, DL3DXX, DK7YY, ZL4PO, OE1WHC and N2OO. UA3VCS can not make it.

DXCC NEWS. Bill Moore, NC1L, ARRL DXCC Manager, announced that the following operations from Iraq are approved for DXCC credit: YI3DX, YI/9Y4RD, YI/4L4FN, YI/SM4UZM, YI/SM3VRO, YI/SM0URK, YI/SM5WTI and YI/SM5VOH.

DXPEDITION VIDEO (*). Glyn, GW0ANA, informs OPDX that the K8T/K8O American Samoa video is now available. This full 50 minute double video tells the story of their last DXpedition to American Samoa in which they operated from Ofu and Tutullia Islands. This interesting video not only shows hams operating but also gives you a glimpse of the beauty of these islands and its people. The video is available for 20 USD in a bank note or EU20 in a bank note or BPS £15 cheque (payable to Mr G.O.Jones). Mailing address is: Mr G.O. Jones, "Nirvana", Castle Precinct, Llandough, Cowbridge, Wales, CF71 7LX. Any surplus funds will be used in their next DXpedition. Their web page is at: http://www.ukdxers.co.uk

EA8, CANARY ISLANDS. Frank, DH5JG, will be operating as EA8/DH5JG from the Island of La Palma (IOTA AF-004, DIE-013), Canary Islands, October 2-14th. Activity will be on 80-10 meters (including WARC) especially on CW with some SSB. QSL via bureau to home call.

HB0, LIECHTENSTEIN (*). Pierre, HB9QQ, will once again be here as HB0/HB9QQ starting October 12th for a few days, if weather and snow permit. His activity will be mainly on 160 meters. His QTH is at an elevation 2200m. He will be using a dipole at a height of 23m and with 500W. QSL via HB9QQ. George, W5VU, reports, "I worked him very easily on 160m on August 10, 2003, when he was only running 100W."

IOTA NEWS.....
AF-018. Dario, IK4MED, will be active from Pantelleria Island as IH9/IK4MED now through September 26th. Activity will be mainly on CW on HF, 80-10 meters and both CW/SSB. Also, satellite AO-40. QSL via his home callsign through the bureau or direct.

AS-117. Makoto, JN4RDX, will be active from Yashiro Island, now through September 25th. He will use the callsign JN4RDX/4. Activity will be on 20/30/40 meters SSB and CW. QSL via the bureau to his home call or direct.

EU-006. (*) Christian, DL6KAC, will be on holiday on Mallorca Island (DIE: E-021) from now until October 7th. Activity will be on 40-10 meters (maybe 80m), mainly on SSB, but a CW Key is available. QSL via the DARC Bureau or direct (QRZ.com).

EU-011. Members of TADARC (Taunton & District Amateur Radio Club) will be activating St. Mary's Island, Isles of Scilly, with the special event callsign GB0SM. Activity will be from September 20-27th, on 160-10 meters, CW and SSB. QSL via the Bureau or direct to G0PSE: Tom Taylor, 19 Derwent Grove, Taunton, Somerset TA1 2NJ, England.

EU-047. Juergen, DJ7JB, will be active as homecall/p from Borkum Island, October 5-10th. Activity will be on SSB on 160-10 meters. He will check the IOTA frequencies also.

EU-050. (*) Look for Paolo to be active as IL7/IZ8FDH (a member of Vesuvio DX team) from San Domino Island (IIA FG-001) between now and September 18th. Activity will be on HF and 6 meters bands. QSL via the bureau or to: Paolo Capobianco, V. Enrico Cocchia 26, 80124 Napoli. For log info visit the Web page at: http://www.gruppomediterraneo.net/info_next.htm

EU-136. Look for Ron, 9A5JR/p, and Vlado, 9A2V/p, to activate the Island of Ilovik (CI-029) on September 19-20th and the islet/LH of Grujica (CI-026) on September 20-21st. The lighthouse of Grujica is on the Admiralty list of lights (by The UK Hydrographic Office) under LH-number E3044.

EU-174. Michael, DF3IS, plans to be active from Thassos Island located in the Aegean Sea, in the north part of Greece, now through September 25th. Activity will be on 40-10 meters, SSB and CW. QSL via his home callsign (no e-QSL's).

NA-029/
NA-128. Yoshiro, N1VF, will be active as VE2/N1VF from Orleans Island, September 17-19th, and as VY2/N1VF from Prince Edward Island, September 20-23rd. Activity will be on 40-6 meters CW/SSB. QSL via the bureau to his home callsign or direct to:
Yoshiro Nishimura, Takemidai 4-2-6, Suita City, Osaka 565-0863 JAPAN.

IS0, SARDINIA. Operators Lars/DF1LON, Marion/DF4UM, Peter/DH4JQ, Christoph/DK2CRN, Georg/DL1ECG, Karlfried/DL1EK, Stefan/DL1ELY, Gerd/DL3EW, Stefan/DL7AOS and Lars/DL9LR (They are looking for two more operators) will set up a Multi/Multi-station for the CQWW DX SSB Contest on the Island of Sardinia. They will have 3 running stations and an additional multiplier station; all FT-1000 Mark V Field. Their antennas will be monobanders for 10/15/20 meters; a 4 element multiband for multipliers; 2 dipoles each on 160/80/40 meters; a 4-square for 40 meters and beverages. The callsign is not known at the moment and will be announced later together with the QSL route.

KH6, HAWAII. Bill, W8QZA, will be operating the CQWW DX SSB Contest from KH6SQ's QTH on Maui. His callsign will be KH6/W8QZA. He will operate in the contest as a 20 meter Single Band entry and will be QRP. There will be some acivity before and after the contest on HF. QSL via his home call.

KH6, HAWAII (*). Bob, KE0UI, will be active as KH6/KE0UI in the CQ World Wide DX CW Contest (November 29-30th) as a Single-Op/All Band/Low Power entry. He may also be active a day before and after the contest from Kauai. QSL via KE0UI.

KH6, HAWAII (*). Shunichiro, JH7IMX, will be on holiday in Honolulu between September 25-30th and active as K7WD/KH6. He will also be active in the CQ/RJ Worldwide DX RTTY Contest (September 27-28th). QSL via JH7IMX.

KH7K, KURE ATOLL DXPEDITION (Postponed) (*). Kimo Chun, KH7U, informs the following: "Gentlemen: Please be advised that this DXpedition has been postponed until sometime next year.
Due to uncertainties related to transportation access to Midway, our stepping stone to get to Kure, it has been decided to wait until things are settled. It is possible that a necessary part of our travel route may become inaccessible only a couple of weeks before our trip is to start. This is totally beyond our control. This will stop the trip dead in its tracks should it occur. I cannot ask the team members to arrange for the time off work only to find out at the last minute they can't go.
The team is anxious to go. We will continue to raise funds towards this trip which will cost more than was spent to go to Kingman Reef, KH5K, for our successful K5K effort. Please help in any way you can.
I will work to identify the next opportune time and reschedule the trip. Our team is welcome to go by the island manager. It will remain to coordinate transportation and compatibility with the bird nesting season requirements on this "No Landing Allowed" deserted island.
My apologies to all for the delay. I realize that this doesn't help in our effort to give Europe and others who need it all the QSO's they need. We will do all we can to fulfill that goal....."
Aloha, 73 Kimo Chun, KH7U

KH0, MARIANA ISLANDS. Yuki, JA1OGX, will be active as KH0S from Saipan, Northern Mariana Islands, now through September 17th. Activity will be CW/SSB on 40/20/17/15/10 meters. QSL direct to his home address below or the JARL bureau. His direct address is: Yuki Tanabe, 1-28-32, Kamitakaido, Suginami, Tokyo 168-0074, JAPAN.

KP2, U.S. VIRGIN ISLANDS. Jim, N6TJ, will be active as KP2A in the CQWW SSB Contest as a Single-Op/Single Band (20m) entry. QSL via W3HNK.

MU, GUERNSEY. Hein, DL2OBF, will be active as MU/DL2OBF in the CQ WW CW Contest from the clubhouse of the Guernsey Amateur Radio Society (GARS), St. Peter Port, Guernsey, as a Single-Op/All Bands/Low Power entry. QSL via his home callsign; bureau is 100% ok. Hein states, "I have to thank the members of the Guernsey Amateur Radio Society, especially Phil, GU0SUP, for once again giving me the opportunity to visit beautiful Guernsey and operate from the fine GARS clubstation. Please do not expect me to be very active in the days before and after the contest."

NCDXF PRESS RELEASE [NCDXF ELECTION] (*). At its Board of Directors meeting on August 26, 2003, in Berkeley, CA, the Northern California DX Foundation (NCDXF) re-elected the following officers and directors:
President Len Geraldi K6ANP
Vice President Al Burnham K6RIM
Secretary Tom McShane NW6P
Treasurer Bruce Butler W6OSP
Director Rusty Epps W6OAT
Director Dave Pugatch KI6WF
Director Chuck Ternes N6OJ
Director Glenn Vinson W6OTC
Director Steve Merchant K6AW
Director Ken Anderson K6TA
Director Tim Totten N4GN
Information pertaining to the Northern California DX Foundation is available at: http://www.ncdxf.org

NP2, U.S. VIRGIN ISLANDS (*). The Wireless Association of South Hills will be active as NP2SH from St. John, U.S. Virgin Islands from October 4-12th, 2003. The DXpedition team will be on the air during the California QSO party on October 4-5th and the Pennsylvania QSO Party on October 11-12th. Join them during the PA contest for an opportunity to snag the rare VI section during this fun and friendly contest! In addition, St. John is also listed on the RSGB's IOTA "Most Wanted" list (NA-106) and is in grid square FK-77. In between the contests, the NP2SH team will be running both SSB and CW stations on all bands 80-10 meters as band and weather conditions permit. QSL with SASE via N3ZNI. For more infor, contact them at: np2sh@yahoo.com Or visit the Web page at: http://www.w3srl.com

PACIFIC OPERATION (T88 and V63) (*). Look for Jim/W7UG and Tom/K7ZZ to be active from the Pacific at the beginning of October. Their activity will start off from Palau using the callsign T88ZX starting about October 1st and be there for one week. They will then move to Yap Island, Micronesia, using the callsign V63ZT. Activity again will be for one week. Operations will be CW/SSB on 80-10 meters. If there is enough interest in RTTY, they may be active. There will be an emphasis on the WARC bands as long as there is activity. Also, look for them to be active on CW 24 kHz up from the bottom of the band. They will also listen up for the new DXers who might need it. They will also run split in the General portion of the band for SSB. Tom states, "Although we'll be barefoot, we're going to be on the beach and will have a two element vertical dipole array for 20-10 and a single vertical for 80-30." QSL via K7ZZ, CBA and can be found at QRZ.com.

PJ5, ST. EUSTATIUS. Look for Jim, K1NA, to be active as PJ5NA in the CQ World Wide DX CW Contest (November 29-30th) as a Single-Op/All Band entry. QSL via K1NA.

QSL INFO AND NEWS.....
Carlos Nora, CT1END, informs that the logs for CT6B (EU-040 Berlenga Island. QSL via CT1EEN) and CT1EGW/p (QSL via CT1EGW) are now available online at the following Web pages at:
http://ct1end.netpower.pt/ct6b

http://www.portal-dx.web.pt

NOT THE MANAGER. Robert, FK8AH, is not the QSL Manager for FK8KAB/P (QSO dated January 4-6th, 2003). Cards should be sent to A.R.A.N.C., Box 3956, F-98846 NOUMEA, NEW CALEDONIA. Cards already received by FK8AH have been sent to ARANC. Please do not send cards to FK8AH.

Graham, M5AAV, informs OPDX that he has been appointed QSL Manager for GB6MD [Marconi Day Special Event Station - All Years] and also G6PZ - To be heard in most Contests and at other times. QSL either via the Bureau to M5AAV or Direct (enclosing IRC/Greenstamp to Graham - Details on QRZ.com). Also see his Web site at: http://www.users.zetnet.co.uk/m5aav/index.htm

QSL HP0L (Special event station operated from Flamenco Island, Panama Canal Entrance - Pacific side - PAN-024, active August 16-17th, 2003) via HP1IBF or PCARA: P.O. Box 5414, Balboa, Ancon, Panama. (*)

The QSL route for contacts with Max, KH6ZM, after September 1st, 2003, will be "DIRECT ONLY" via I0MWI: Stefano Cipriani, Via Taranto 60, I 00055 Ladispoli (RM), Italy. (*) Please look at the QSL practice on: http://www.qsl.net/i0mwi/qslman.htm

Patrick, WD9EWK, informs OPDX that he has received the logs for Claudio Pons Estel, LU5FII, of San Justo (Santa Fe Province), Argentina, and is now Claudio's new QSL Manager. More information is available about Patrick becoming Claudio's QSL Manager, as well as other stations he takes care of QSLing for, on the Web page at:
http://www.qsl.net/wd9ewk/qsl-mgr.html
Patrick will receive cards either through the QSL bureau or directly. His postal address is listed on the Web page above, as well as in the usual locations like QRZ.com and Buckmaster. (*)

Ric, DL2VFR, was active from Langeland (EU-172), Denmark, last week as OZ/DL2VFR. QSL via his home callsign, either via the bureau or direct if necessary. (*)

Christian, DL6KAC, expects to have the OZ0AIS QSL cards by end of September. He states that they will start with the QSL shipping just after that (First direct cards, then bureau cards). Expect bureau cards to be in the bureau in October/November this year. Some pictures of the operation can be found at: http://www.aatis.de
(click on "Summertour 2003")
Unfortunately, the text is in German, however, they are working on an English version and want to add some more pictures. Additionally there is a log search available (powered by dx.qsl.net). (*)

NEW QSL MANAGER. Ralph, K2PF, informs OPDX that effective immediately, QSL cards for S21B should be directed to KX7YT. (*)

QSL Manager Change: John, N0JT, informs to "Please be advised, and possibly update your databases, WC4H is taking over for N0JT. Due to health concerns, N0JT is no longer a QSL Manager. Including the various

Contest Logs, I have turned all logs, 47 of them, and sent 120 lbs of blank QSL Cards to my friend Carl, WC4H, who is well qualified to assume the duties. WC4H will handle all submissions as of September 4, 2003. N0JT will forward all received mail to WC4H until things settle down. Stations effected are: 3E1AA, 3E1CW, 3E1DX (including many of his contests), 3E500XVH, 3F2XVH, EL2RR, FS5PL, (including his many Contests and IOTA trips) HH2/N3SIY, HI8FHD (on 14.247 only), HJ0QGL, HK0OEP, HP1MM, HP1XVH, J3/KB0QNS, J3/N3SIY, LX1RQ (NA Only), M0ADG, MQ0ADG, PT1TF (14.247 only), TO9PL and XE1/W6EFR. Thanks for your cooperation in the past and good DX", John N0JT....

QSL Manager Change: Luke, PT7WA, informs OPDX that due to family health problems PT7AA transferred to him all his QSL Manager obligations. This includes some of his own operations. Luke is able to confirm QSOs with the following stations. Bureau cards are OK!
SA-003 F.NORONHA ISLAND: ZY0FA 1989, ZY0FCA 1987, ZY0FCM 1987, ZY0FKL 1987, ZY0FMC 1987, ZY0FRT 1987, PY0FK 1995, PT7WA/PY0 2000
SA-010 TRINDADE ISLAND: ZY0TF 1988, ZY0TK 1988-1990, ZY0TR 1988. ZY0TW 1990, PY0TE 1984/1985 (OP. ANTONIO LUIS), SA-014 SP&SP ROCKS, ZY0SS 1989, ZY0SW 1989, ZY0SY 1989, PY0SK 1991, PY0SR 1991, ZY0SK 1994-1997, ZY0SP 1994, ZY0SG 1997
SA-023 ITAPARICA ISLAND: PT7FX/PY6 1999
SA-025 ILHA GRANDE DE SANTA ISABEL: ZW8AA 1992
SA-038 ROCAS ATTOL: ZY0RW 1991-1992, ZY0RK 1991
SA-041 SAO JOAO ISLAND: ZX8CW 1990
SA-046 ITAMARACA & S.ALEIXO ISLAND: PT7WA/PY7 1999, ZV7G 1999
SA-072 CANARIAS ISLAND: PT7AA/PR8 2000
SA-080 TINHARE ISLAND: PT7WA/PY6 1999
Luke will take care of all cards received and not answered. Most of the logs are "paper logs", but he will do his best to answer any question as fast as possible.

Leo, K8PYD, has acquired the logs for VK4TE (from Willis Island) from 1966-1970 for USA stations only. He has no idea how complete these logs are, but he has a few blank cards if anyone is still in need of one from that station.

S7, SEYCHELLES (*). Norbert, DL2RNS, will be here on holiday as S79NS between October 4-17th. He prefers CW and will be using a brand new FT-897. QSL via DL2RNS (DARC Bureau) or direct if necessary. There will be no online log. Please note that 1 USD does not cover the mail from DL to the U.S.

SPECIAL EVENT (*). Look for special event station EN100WAY (World Aviation Year) to be active until September 30th, to commemorate 100 years of world aviation and 85 years of aviation in Ukraine. Activity will be from the club station, UR4WWE, which is located at Lviv State Airport. Activity has been mainly CW, with some RTTY. Watch frequncies 3710, 7071, 14022, 14093, 18115, 18128 and 21010 kHz (+/- 5 kHz). QSL via UT7WZ by the bureau or direct to: Miroslav Lupiy, P.O.Box 94, Lviv, 79000, Ukraine. Bureau cards can also be requested via E-mail at: ur4wwe@ut1wpr.ampr.org

SPECIAL EVENT. Look for Sylvester, DH4PB, who will go to Cuxhaven, to celebrate Professor Ferdinand Braun day as DL0PFB. Professor Braun was with Marconi as a pioneer in wireless radio and the founder of the television tube. Activity will be on CW on all bands. Operations will start on Saturday, September 20th at 0800z.

SPECIAL EVENT. Noel, PT2ND, informs OPDX that the Ministry of National Integration by The National Secretary of Civil Defense, along with the Brazilian Amateur Radio League-LABRE, coordinators of the National Amateur Radio Emergency Network-RENER, will promote on October 4th and 5th as an international amateur radio event celebrating the "International Accident Reduction Day". Many Brazilian amateur radio operators will be operating the special callsign ZY2A between 0000z on October 4th until 2400z on October 5th, on all HF bands SSB, CW and Digital Modes. Noel states, "Natural disasters like earthquakes, floods, tornadoes, landslides, shipwrecks and others, cause huge financial expenses and the loss of many precious human lives. The consciousness of society is fundamental to prevent and minimize its effects. On these situations it is important that organized groups are prepared to immediately help control these events and solve such unexpected problems. The Amateur Radio Community, always willing to help on these circumstances, make themselves present, spreading the news about this event." All Amateur Radio colleagues that contact ZY2A station and submit their QSL cards will receive special commemorative QSL cards by reply, celebrating the International Accident Reduction Day. QSL via PT2AA either through the bureau or direct.

TA3, TURKEY. Operaors Erhard/DL5JQ and Wolfgand/DK3KD will be active as TA3/DK3KD in the CQ World Wide DX CW Contest (November 29-30th) as a Multi-Op/Low Power entry. QSL via DL5JQ.

V26, ANTIGUA AND BARBUDA. Bud, AA3B, informs OPDX that he will be active as V26K starting November 26th through November 30th. This will include the CQWW CW Contest. His activity will be CW only and a Single-Op/ All Band/Low Power entry. QSL via AA3B.

VP5, TURKS AND CAICOS ISLANDS. An enthusiastic Multi-Operator team led by Bud Foster, K4ISV, will be active as VP5B in the CQ World Wide DX SSB Contest (October 25-26th). Operators mentioned are: K4ISV, K1LZ, K4RO, K4UU, K4CN, W5AO and WX3B. QSL via N2AU.

VP6, BERMUDA (*). Bert, PA3GIO, will be active as PA3GIO/VP9 from September 18-28th on Bermuda Island (IOTA NA-005). Activity will be SSB only on 80/40/20/17/15/12/10 meters from the QTH of Ed, VP9GE. QSL (preferable by the bureau or E-mail: qsl@pa3gio.nl) to PA3GIO. Web site for this operation is at: http://www.pa3gio.nl/VP9

YI, IRAQ (*). Masa, JG1OWV, informs OPDX that Sada, JA1AHF, has just gotten his own liscense and is signing YA1D now. The new club station is also licensed as YA0J. Both are from Kabul, Afghanistan. Sada is operating most days after 1230z on 80-10 meters, mainly SSB with some slow CW. He will start to be active on some digital modes soon. QSL for YA1D and YA0J is via JG1OWV.

Excerpts and distribution of The OPDX Bulletin are granted as long as
KB8NW/OPDX/BARF80 receive credit. To contribute DX info, call BARF-80 BBS
online at 440-237-8208 28.8k/14400/9600/2400/1200 and leave a message with
the Sysop or send via InterNet Mail to:
kb8nw@barf80.nshore.org - OR - kb8nw@arrl.net
Use the VOICE or FAX answering machine at 440-237-8208 which shares the
same phone line as BARF-80 BBS using a data/fax/phone switch. To access:
1) Dial Number. 2) Wait for first ring (the second ring should be a false
ring from the fax/data switch box) and then dial four quick ones ("1111").
(NOTE: Some FAX machines that send single "BEEPS" every second will not
have to do this step.) 3) The phone will pick up and after the "BEEP"
leave your voice message or FAX.

2039. Re: Typing a Slashed Zero &#65533;

Newsgroup: rec.radio.amateur.dx
Date: 2003-09-14 23:04:05 UTC
From: Clint <rattlehead@computronDOTnet>
Message-ID: <vm9sv9923qlcca@corp.supernews.com>
Source record: 9173

well, the error is probably on my end..... I would have to guess,
if so many others are getting a slashed zero. I'd like to
be able to generate one, that would really be great for
ham radio stuff on the computer.

On 7Mhz band i hear many stations having contests. Pitty, but only short qso's seems possible, and not easy to get trough with only 45watts and a wire-dipole...

It si a whole lot easier on the 11m band !
I mean the guys in front of the mic is allways gentle when they hear you. A shame that it seems unlike the "ham's" are the same kind :-(

If you want a long QSO, you need to look for the people who are not
contesting or call CQ so that those who are not contesting can find you.

People in contests are trying to get the maximum number of contacts so they
won't be interested in long QSOs.

By Gentle Persons agreement -- contests are not conducted on the WARC Bands 12M, 17M, and 30M.

Most contests are on a weekend so bands are contest free 5 days a week (mostly), so if contests bother you on the weekend --
-- try the WARC Bands.

Also (generally) the contesters are on the lower to middle parts of the band, so tune up at the upper limit of the band for QSO's

Many times during a contest, I have heard QSO's at the upper portions of the bands.

Many have worked DXCC-QRP (5 Watts with a vertical) so different problem.

Hi gang -

I recently returned to 20M CW and am hearing a noise reminiscent of the old "Russian Woodpecker", only with a faster repetition rate. It seems to move around the low end of the CW band and isn't locally generated because I can hear propagation effects on it.

Or are these old ears hearing things?

Thanks; what I'm hearing is on the "Ionosondes, chirpsounders & OTHR
systems page...SUPER DARN OTHR SYSTEM. I didn't realize anyone was
running OTHR (Over The Horizon Radar) any longer since the "Woodpecker"
went QRT.

It's probably an M3 licencee from the UK. These are freebie
licences issued to CBer's in this country which allow them
free access to the ham bands.

If you feel aggrieved about this abuse of the amateur radio
spectrum (and many of us do) then you should address your
concerns to the RSGB, who are primarily responsible for the
creation of this new licencing plan.

The fact that they expect to receive large amount of subscriber
income from this scheme is of course entirely coincidental . . .

Young Nick

(Apologies to Kurt Vonnegut)

To all external appearances, Farnsworth Corners, U.S.A., is bright, cheerful, and happy. However, in dark corners of the city lurk Godless Nocoders who seek to undermine the moral fabric of our mighty Nation.

In a dirty basement apartment, an underfed, seedy-looking old man wearing small, round spectacles and threadbare clothes, types furiously at a musty desk illumined only by a single, naked bulb. As the pages fly through his typewriter, an evil plan gradually emerges: a treacherous treatise which threatens the well-being of the upright citizens of Farnsworth Corners. The work is completed, and the old man leans back thoughtfully and smiles as he rubs the three-day stubble on his chin. The time has come for the Hammer of Maia to strike!

Some weeks later, in another part of town, little Billy Beeper walks home from school. Suddenly he hears a voice right next to his ear.

"Psst! Hey, kid! Would you like to try my 2M HT? It's free!"

Billy's eyes open wide as he faces the stranger. An embroidered patch on the mans soiled jumpsuit reads "Codefree Charlie". "Gosh, no! Nancy told me never to touch a radio which didn't beep!"

"Aw, c'mon!" says the old man. "I only wanna be friends with you!"

"Well, I don't know," replies Billy. "I was told that FM was bad for you!"

"That's just what the grown-ups say to scare you!" says the drooling man.

"The truth is that they don't want you to try it 'cause it'll make you grow up faster and be able to smoke cigarettes and drink liquor just like them!"

Billy is hesitant, but suddenly a tall form looms before them and grabs the ruffian by the collar.

"Golly!" exclaims Billy. "It's Captain Code!"

Yes, Readers, it's Captain Code: faster than a Vibroplex Blue Racer, more powerful than an Alpha three-holer, able to leap tall pileups in a single bound.

"You should be ashamed of yourself, old man," says Captain Code to the hoodlum. "There are far better ways to earn money than to hoodwink innocent children into a life of codelessness. It's to the FCC for you!

"And as for you, young friend, take my advice and stay away from strangers, and believe nothing that they say. It's tragic, but until Godless Nocodism is abolished from the world, there will always be those who would like nothing better than to hurt you ."

"Gee, thanks, Captain Code!" says Billy. "I promise that I'll always listen to Mom and Dad, and I'll keep away from strangers with shacks on their belt!"

2065. QST falls for it

To be fair, there was a day or two gap before people realized that
it was a fake, so it probably just missed their publication deadline.

I hoped you are managing OK without your ass, they are friendly
animals.

Amateur Radio Newsline™ Report 1362– September 19 2003

A NOTE TO THOSE WHO ONLY “READ” AMATEUR RADIO NEWSLINE

As you are aware, Amateur Radio Newsline is, primarily, an audio news service and this weeks newscast is very audio intensive. While reading gives the basic facts, we advise you to download the audio file at http://www.arnewsline.org/quincy to get the most out of the newscast in relation to our coverage of Hurricane Isabel and the role Amateur Radio played and continues to play in storm communications efforts. This is a story told in “sound” from the scene that really cannot be reported in any other way.

**

Amateur Radio Newsline report number 1362 with a release date of Friday, September 19th 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ham radio is there as a hurricane pounds the U-S east coast, the ARRL holds tight on Morse and more petitions are on their way to the FCC. Find out the details on Amateur Radio Newsline report number 1362 coming your way right now.

(Billboard Cart Here)

**

RESCUE RADIO: HAM ADIO AND HURRICANE ISABEL

Her name is Isabel. She is a hurricane that slammed into the United States East coast with gale force winds. Emergency services including ham radio were ready and waiting as we hear in this report:

--

Roaring ashore with winds of more than 100 miles an hour, Isabel made landfall along North Carolina's Ocracoke Island, crossing the Outer Banks around midday September 18th. On the west end of Ocracoke Island, sustained winds were measured at 80 miles an hour. Storm surge of 12 feet was reported I

Bernard Nobles, WA4MOK, is a Section Emergency Coordinator in North Carolina. He says hams mobilized over a large part of the state:

4:07 IN In emergency operations centers
OUT in the eastern part of the state

The action wasn't just in North Carolina. Hams throughout the eastern seaboard were in position, ready to provide backup communications. Only a few hours after the storm had moved ashore, more than 800-thousand customers were without power in North Carolina and Virginia. Bill Moraine, N2COP, is a Public

Information Officer in southeastern North Carolina. He says hams were providing a variety of communications services:

--

IN they really run the range of
OUT in northeastern North Carolina.

--

Morrain says High Frequency conditions were often deplorable with extensive interference. He says the Hurricane Watch Net was being relayed locally through both EchoLink and IRLP, the Internet Repeater Linking Project, to help overcome H-F problem. All along the storms projected path ham radio operators trained in emergency communications were in service or on stand-by alert. The Hurricane Watch Net was busy on 14-point-325 MHz. At the National Hurricane Center in Florida, amateur station WX4NHC helped with relaying storm reports. With hams throughout the mid-Atlantic region helping in the communications effort, Morraine said putting a number on those assisting would be tough:

--

IN We don't have a handle
OUT in this particular disaster One bit of good news.

--

Morraine says Isabel is no Hugo, referring to the devastating hurricane that slammed into North Carolina in 1989:

--

IN Thanksfully, Isabel
OUT about 105.

--

Hams were scheduled to staff the North Carolina Emergency Management Eastern Branch headquarters in Kinston. The amateur station at the state emergency operations center in Raleigh was also activating, with an umbrella of liaison stations being organized to monitor the 146.88 MHz repeater and the Tarheel Net.

The National Weather Service had hurricane warnings posted for parts of North Carolina and Virginia. Forecasters warned hurricane force winds were possible 150 miles inland, along with tornadoes.

As Isabel began moving north after landfall, flooding became a serious threat. At least one hotel in Kill Devil Hills collapsed into the ocean. Evacuations were being ordered along Chesapeake Bay.

In the hurricane's first day ashore, nearly 900 flights had to be cancelled, with some airports closing or limiting service. Up to a foot of rain was possible in West Virginia's hilly Eastern Panhandle, with between 6 and 9 inches of rain expected over parts of Pennsylvania. Amateur radio operators say

they will stay on the air helping--as long as needed.

For the Amateur Radio Newsline, I'm David Black, KB4KCH, in Birmingham Alabama.

+++

As David said, it was North Carolina that was the first to feel Isabel’s fury. Gay Pearce, KN4AQ, is in Raleigh with that part of the story.

+++

Amateur Radio was in full swing in eastern North Carolina as Hurricane Isabel made landfall on Thursday. For hams and everyone else, the term "made landfall" was a confusing one. High winds, rain and power failures reached the Raleigh-Durham area, 150 miles inland, well before the hurricane eye crossed the coastline.

--

IN: WAKE EOC POWER FAIL AUDIO]

--

The Tarheel Emergency Net, North Carolina's ARES net, was in operation, splitting duty between 3923 and 7232 kHz, depending on propagation

--

IN: HF COUNTY CHECK-IN AUDIO],

--

The North Carolina ARES group has not yet begun to use 60 meters.

Most traffic between the coast and the states Eastern Branch headquarters in Kinston was being handled on linked repeater systems.

Several hams have remained on Hatteras Island on the Outer Banks, and for a time, hams across the world could listen to them via Echolink and IRLP connections. That ended as power and phone service failed near the coast.

The National Hurricane Center in Miami continued to use the Internet links to take reports from areas where connections remained in place.

--

[K4JVP AUDIO]

--

There was some confusion early as too many sources of input were mixed together on one combined Echoink/IRLP conference. The National Hurricane Center's liaison station commented:

--

[HNC CONFUSION AUDIO]

--

Control operators were able to clear up that confusion, but locally, repeater operators are finding that they can't mix local emergency and logistics traffic with a full-time Internet connection that's carrying similar traffic on other repeaters. That's a lesson for the next emergency.

Repeaters were used inland as well. The wide coverage 146.88 repeater in Raleigh linked the State EOC with surrounding counties and the Eastern Branch headquarters.

--

[VHF COUNTY CHECK-IN AUDIO]

--

Shelters began filling up as the storm moved inland, but with most shelters located in counties that would receive at least Tropical Storm force winds and a possible loss of power and telephone service, Amateurs were dispatched to provide communications.

--

[SHELTER VOLUNTEER AUDIO]

--

Reporting for Newsline from the fringe of Hurricane Isabel, this is Gary Pearce KN4AQ in Raleigh, North Carolina.

--

More on Hurricane Isabel and the role of ham radio in future Amateur Radio Newsline reports. (Numerous sources)

**

Break 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the WR4AMS repeater serving Eastern Kentucky.

(5 sec pause here)

**

RESTRUCTURING: THE ARRL POSITION - WAIT TO HEAR FROM OUR MEMBERS

Why hasn't the ARRL joined those who have already filed petitions to the FCC on the topics of Morse Code testing and changes to license priveleges? In a note to his constituancy the League’s Southwestern Division Director Art Goddard, W6XD, explains it this way:

“After determining that the FCC will be handling these matters in due course, your ARRL has set a timetable that includes ample opportunity to

collect member input before determining its direction at the January 2004 Board meeting."

Goddard says to say tuned for further developments. He also tells ARRL members to contact their own ARRL Director and make known their views on these vital issues.

Goddard also suppled a brief overview of a meeting in St. Louis this past weekend, where ARRL Directors and Officers took what he calls the next step to define the ARRL's future role in Advancing and Advocating Amateur Radio. Although the details of ARRL's Long Range Plan aren't yet complete, W6XD says that hams can expect to see bold new actions in several key areas. These include advocacy in key regulatory and legislative issues, lifetime learning, certification and personal achievement and public recognition of Amateur Radio as a valuable service. Goddard adds that there will also be financial stability to implement all of these strategies. (ARRL SW Div. Report)

**

RESTRUCTURING: MORE CODE PETITIONS COMING

The ARRL may be taking the correct road on this one. This is because the latest ham radio restructuring show appears to be only in its opening act. In fact, it looks as if the six petitions favoring abolishing Morse testing and the one from FISTS favoring its retention may be only the beginning of a deluge of requests from both sides in the issue. We have heard that there are a number of other petitions already at the FCC or on their way but know little about them. Our Bruce Tennant, K6PZW has more:

As we go to air we believe there are as many as another half dozen petitions being filed on both sides of this contriversial restructuring issue. Amateur Radio Newsline will keep following this story and will have more fore you in upcoming reports. (Various sources)

**

RESTRUCTURING: FILE ON EACH PETITION

Still with this latest round of restructuring. If you are among those planning to file comments on one or more of the Morse petitions already before the FCC then listen up. If you want to make known your feelings on all of them, then you will have to file separate comments on each one.

As of this moment, a comment filed on any one particular petition will be considered for that specific rule making request alone and not on all. And having read the petitions, we can understand why. Each one asks for a specific approach in handling the Morse question and it would be impossible to provide a one comment that would fit all.

By the way, as we go to air the FISTS pro-code request has still not been assigned a rule making designation by the FCC. (ARNewsline(tm))

**

RADIO LAW: CONGRESS MAY INCREASE FCC AUTHORITY TO ISSUE FINES

The Federal Communications Commission would be given the authority to levy significantly higher fines. This, if a bill being considered by the Commerce Committee of the U.S. Senate becomes law. Amateur Radio Newsline's Mark Abramowicz, NT3V, has the details:

--

The Wall Street Journal reports that fines for violating FCC rules could jump tenfold, and activities of lobbyists would be further restricted under a bill introduced in mid-June by Senator John McCain who chairs the Committee that authorizes the agency's funding. In addition to the increase in the Commission's authority to levy fines, the proposed legislation would also extend the statute of limitations on violations of the agency's rules from one year to two.

Other provisions include restrictions that would prevent top staffers from lobbying the agency for one year after leaving their positions, and a ban on the payment of travel expenses of FCC officials by companies and private interest groups. In other words, if the FCC were to send out a representative to any gathering the cost must be borne by the agency and not the events sponsor. Its far to early to know if such a prohibition would impact on the FCC ability to attend hamfests, conventions and other hobby radio gatherings.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

McCain's bill reportedly has the support of Senator Ernest Hollings increasing its chances of gaining broader support. Even so, it is still expected to face tough opposition as it makes its way through the regulatory aproval process. (Published news reports)

**

REMEMBERING : THE 2ND ANNUAL N2LEN 9/11 NET

The second annual N2LEN nine eleven net took place on Thursday, September 11tth. The gathering used voice over I P technology to link repeaters world wide over the Internet. This allowed radio amateurs and non-ham listeners to reflect on the terrorist attacks of two years ago and the role that radio amateurs played in the aftermath.

ARRL President Jim Haynie, W5JBP, was this years keynote speaker. He addressed the role of Amateur Radio in homeland security and urged each amateur to develop his or her emergency communication skills.

As with the 2002 net, this year's cyberspace and radio meting relied on EchoLink and eQSO Internet software connections as well as repeaters and simplex links around the world. (N2LEN Net News Release)

**

AMATEUR RADIO SURVIVAL: UCF CLUB EVICTED FROM ITS HOME

The University of Central Florida Amateur Radio Club station K4UCF has been evicted. This, from the campus location that it had occupied for 30 years. Mert Garlick, N6AWE, reports:

--

According to a qrz.com website posting from Matt Collins, KG4JYD, the eviction took place last June but seems only now to have been made public. It reportedly resulted from faculty complaints about the radio club who concluded that damage to computer equipment was from a lightning strike that entered the building through the club's antenna system. University's plant personnel also complained that club members worked on the roof of the building without authorization.

But Matt Kassawara KG4FEQ , has a differing view. Kassawar who is with the club says that the ham station is the closest equipment to the antenna system. He says that neither that equipment nor the club repeaters were damaged by a lightning strike, indicating that the clubs antenna could not have been the source of the damage.

The club requested that University of Central Florida provide comparable space from which to operate. So far UCF administrators have refused.

For the Amateur Radio Newsline, I’m Mert Garlick, N6AWE.

--

More information is on the web at qrz.com and http://pegasus.cc.ucf.edu/~wb4tcw/evictimeline.html (qrz.com)

**

ENFORCEMENT: NY COURT DISMISSES HAM SCANNER CASE

Some good news for a New York State ham as a court dismisses a misdemeanor charge against Richard C. Lalone, KC5GAX. This for allegedly for violating an anti-scanner provision that state's Vehicle and Traffic Law.

According to the ARRL Letter, in a 1300-word decision, Judge John J. Hallet said it was clear the legislature never intended the provisions of traffic law 397 from applying to licensed Amateur Radio operators. He then dismissed the charge against Lalone August 5th.

The law in question prohibits individuals in New York state -- other than law officers -- from equipping their vehicles with radios capable of receiving signals on the frequencies allocated for police use without first securing a permit. The section also contains an explicit exemption for any person who holds a valid amateur radio operator's license. (ARRL)

ENFORCEMENT: FCC ASKS POWER COMPANY TO TRY HARDER TO RESOLVE NOISE COMPLAINTS

The FCC has asked American Electric Power Company of Columbus, Ohio to take a closer look at several power line noise complaints and try harder to resolve them. This in relation to complaints filed by four Amateur Radio operators in

Ohio, Indiana and Oklahoma.

According to the ARRL Letter AEP responded February 10th to the FCC's initial correspondence regarding the four cases. But the agencys' Special Counsel Riley Hollingsworth says that follow-up reports from the complainants suggest discrepancies exist between what AEP told the FCC and what the complainants report.

Hollingsworth said evidence to date indicates that none of the cases has been satisfactorily resolved. In one case, AEP erroneously identified the amateur's own antenna as the source of the noise.

Now, Hollingsworth has asked AEP to revisit each of these issues and to update the FCC within 45 days of any progress in each case. He also referred the power company to ARRL RFI Specialist Mike Gruber, W1MG, for technical assistance. (ARRL, FCC)

**

ENFORCEMENT: PAGING FINE

The FCC has affirmed a $9,000 fine against Air Paging, Inc.. This for failure to operate its Wireless Radio Station in accordance with its station authorization, continuous radiation of an unmodulated carrier, and failure to provide station identification by the assigned call sign.

Air Paging did not file a response to the initial Notice of Liability, so the $9,000 figure was affirmed. In addition, the Commission does not know if Air Paging has corrected the various violations, so Air Paging has been given 30 days to outline what measures it has taken or will take to correct the violations and ensure that they do not recur. The entire mater is in cyberspace at
http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-03-2741A1.doc (CGC)

**

ENFORCEMENT: TWO MORE TOWER FINES ISSUED

The FCC has issued two more broadcasters hefty fines because of tower related violations. A monetary forfeiture in the amount of $10,000 was issued to Pinnacle Towers, Inc., owner of a tower in Des Moines, Iowa, for failing to clean and repaint its antenna structure to maintain good visibility. Dinged with a $3000 fine is Best Country Broadcasting, LLC, owner of the antenna structure located in Bogalusa, Louisiana. No reason for this fine was mentioned in the FCC digest for the Best Country fine. (CGC)

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

INTERNATIONAL - AUSTRALIA: BPL COMING TO VK-LAND

The problem of Broadband over Powerlines or BPL is about to hit dwn-under. This as Australia makes ready to give it a go. Q-News Graham Kemp, VK4BB, has the latest:

--

PLT, PLC, BPL. What ever way you say it it means noise. Now, the Wireless Institute of Australia - Victoria says there is now clear evidence of a PLT-C/PBL push in Australia. That no-one can continue to be in denial mode.

From the Q-NEWS perspective Barry VK2AAB will no longer be a "voice in the wilderness." Many of us will soon be asking "why didn't we act sooner".

You'll recall months ago we mentioned the little units being sold by DSE. Well these are small fry compared to the same basics being applied to our 240 volt mains supply, or worse, the High voltage distribution system.

--

It appears as id BPL is quickly becoming a world-wide problem for Amateur Radio. (Q-News)

**

RADIO LAW FOLLOW-UP: NEVADA TOLD TO SCRAP NEW RADIO SYSTEM

Here’s a follow up on a story we brought to you several months ago regarding a new state wide radio system in Nevada and an oversight by the regulators planning it. As previousy reported, the Nevada Highway Patrol had spent $14 million on a contract with Motorola to build a computerized radio system. It was activated back in 2000 but nobody from the state ever applied to the FCC for licenses for the frequencies. As a result, the FCC had told the Nevada Highway Patrol and other state agencies to stop using the 140 frequencies by last June.

To comply with the federal order, Nevada has had to scrap a costly radio system that's less than two yeas old. So on Tuesday, September 9th the Nevada state Board of Examiners voted to spend $16.1 million on new radio gear for the Nevada Highway Patrol. (Published news reports)

**

NAMES IN THE NEWS: W4FAL AND K2AD ELECTED NEW NFCC DIRECTORS

Some names in the news. They are Frank Lynch, W4FAL and Doug Sharp, K2AD who have been elected as Directors of the National Frequency Coordinators Council.

The NFCC made known the results on September 6th. This, after twenty-eigh of its member councils took part in the vote.

The National Frequency Coordinators Council is an umbrella group of recognized repeater coordinators. It was formed as the result of a meeting held in St. Charls Missouri in the late 1990's. (ARNewsline(tm))

HAMFESTS AND CONVENTIONS: QUEENSLAND AUSTRALIA ON SEPTEMBER 19-21

On the hamfest scene, the 30th annual North Queensland Amateur Radio Convention takes place September 19th to the 21st. The venue is down-under at James Cook University in the state of Queensland Australia. For details please e-mail k4zz@wia.org.au (Q-News)

**

HAMFESTS AND CONVENTIONS: THE DX BASH IN TEXAS IN OCTOBER

Back on this side of the Pacific, the 13th Annual DX BASH will be held on Oct 10th to the 11 at Lake Buchanan near Austin, Texas. Icom has provided a IC-746 Pro and IC-756 Pro II that will be in use at the W5KFT contest station for attendees to try out in actual "on the air" conditions. Also planned are programs on operating, contesting, towers and antennas. More nformation is on-line at www.dxbash.com (W5KFT)

**

SWL-FESTS: SCADS IN HUNTINGTON BEACH IN SEPTEMBER

And short-wave hobbyists, this one is for you. Word that the Annual Southern California Area D-X'ers Picnic will be held on September 20th from 8am to 4pm. This, at the Huntington Beach Central Park in Huntington Beach California.

Huntington Beach is a suburb of Los Angeles. Further information available from Stewart MacKenzie, WDX6AA, at 714-846-1685 from about 9 a.m. to 8 p.m. - Pacific coast time. (SCADS)

**

DX

In D-X, if you are waiting for a Q-S-L card for last June's WB8XX operation on Antigua, you will have to be patient a bit longer. According to Kevin, cards ordered 2 months ago from PY2TNT never did show up and now it appears that the company maybe out of business. Kevin says that the website is suspended and E-mails bounce. WB8XX adds that he will be ordering more cards from a stateside supplier, and will have all of the cards out as soon as the 2nd order arrives. (VHF Reflector)

**

THAT FINAL ITEM: TEACHING HAM RADIO IN ALBANIA

And finaly this week, how would one of you like to teach ham radio in Albania? Yes, we said Albania. Well you can if you know the British Radio Amateur Examination course and like to travel. Here R-S-G-B Newsreader Jeramy Boot,

G4NJH, with the rest of the story:

--

A radio amateur lecturer is required to help give a radio amateur course in the Technical University of Tirana, Albania, this coming November. The course will integrate amateur radio communications theory and practice into the University's normal study programme.

The course is organised in coordination with the Ministry of Telecommunications in Albania, in conjunction with the IARU, and using RSGB documentation. Several agencies and companies are providing financial support. The applicant should have experience of
teaching electronics and telecommunications at the amateur radio level in a UK setting. The course material is based on the UK RAE at the Full licence level and will lead to a CEPT-recognised qualification for the successful students. The successful amateur will help to coordinate the other visiting lecturers, and the assignment will take three weeks out of a six-week program.

This is a unique opportunity to join a multi-national amateur radio team helping to create a new group of telecommunication engineers to benefit the Albanian economy. It will provide a rich experience, not to mention the opportunity to operate ZA1A from the hotel in any spare moments.

--

For more details, please contact Roger, G3LQP, by e-mail to g3lqp@aol.com (GB2RS)

Interesting clip from the "Amateur Radio Newsline"
Posted here

Morrain says High Frequency conditions were often deplorable with extensive interference. He says the Hurricane Watch Net was being relayed locally through
both EchoLink and IRLP, the Internet Repeater Linking Project, to help overcome
H-F problem. All along the storms projected path ham radio operators trained in
emergency communications were in service or on stand-by alert.

The KTS 24-hour Clock Screen Saver is a great clock for radio listeners.

The KTS 24-hour Clock Screen Saver features:
24-hour analog display
User selectable time zone
Customizable face and hands

This is fully-functional-trial software. But, you can get a free license for the KTS 24-hour Clock Screen Saver - before 0000Z on Tuesday 23 September 2003 - just send an email saying that you read about it here. Use the email address on the website or the software, not the address on this message.

www.taborsoft.com

If you need a different type clock, try the NERDAlert and/or ID Wizard software.

We do not collect, nor de we share email addresses. The purpose of this offer is to provide a community service and introduce you to our software tools for radio users.

Regards,
Jim

Dunno about "deplorable" HF conditions.
I monitored various HF nets in case a relay via the PNW might be needed.
Conditions seems normal to a bit below normal, with occasional periods
of moderate absorbtion on some paths.
Nobody needed a relay via the PNW, but was interesting to listen.

My opinion: What good would IRLP or Echolink be when
there is no power / telephone to run 'em? Waste of time.

Since when did it become a "private" frequency? The H.F. Frequencies used for Ham operation are open to any one with the proper class of license to use them. Of course common courtesy does count when the frequency may already be in use. No wonder people are turning away from Ham. It is getting horrible. Used to be, I boasted it to anyone interested. Now, I tell them not to waste their time. It is getting to be High Power CB. As for the FCC, they have lost the battle so far as I'm concerned. The horses are out of the barn. TOO LATE! I'm about ready to sell all my ham gear.. Get my cash out of it while there is still some value left to it. I would NEVER buy a new rig again, that is for sure. I'll buy "used" if I decide to stay in it. It just isn't worth the huge cash lay out.

Lou

.....
Good thing old Rich Whiten is gone...THAT was a radio Hog times two....
The old YI YI song reminds me of Rich's selfish stupidity as he keyed over
all but a few of his chosen "butt buddies".
Rich would, in his arrogance, ignore all Hams who weren' t running
megawatts....of course old Rich got caught running over the legal
limit...among other things.
Story is that Rich got pissed and sent his resignation of his license to
Riley Hollingsworth. Riley accepted the resignation and rescinded Rich's
license.
Enter another story...Rich is now claiming that his letter of resignation
was sent "by mistake" to Hollingsworth and Whiten wants his license back.
Sorry, Rich. Your weak story ain't holding water up this way.
Gosh...how does one send email "by mistake"?
Rich is full of it...he screwed up out of anger and now he wants to take it
all back. It doesn't work that way.
Porkbutt Song.....YI, YI, YI.....

Ah phonetics

The ARRL and many other national entities recommend the NATO phonetics
for Amateur Radio use as most Hams around the world recognize them.

This alphabet dates from about 1955 and is approved by the
International Civil Aviation Organization, the FAA and the
International Telecommunication Union,
and many National Amateur Leagues/Societies/Orgs.
Note that different bodies prefer different spellings, so one also sees:
Alfa Juliett Juliette Oskar Viktor]

Alpha Bravo Charlie Delta Echo Foxtrot Golf Hotel India
Juliet Kilo Lima Mike November Oscar Papa Quebec Romeo
Sierra Tango Uniform Victor Whiskey Xray Yankee Zulu

See URL: http://www.bckelk.uklinux.net/phon.full.html

However the DX crowd over many years have used their own set --
which includes kilowatt. May be "wrong phonetics", but a fact of life for a
long time.
Unofficial but common DX phonetics are at URL:
http://ac6v.com/dxphonetics.htm

Next we have funny phonetics which are memorable and easy to recall -
like K6AKT - Karl Six Always Killing Time
Wrong phonetics but very very common on VHF repeaters and HF Contests
---

Next we have the old timers who insist on the WWII phonetics:
Able Baker Charlie Dog Easy Fox George How Item Jig King
Love Mike Nan Oboe Peter Queen Roger Sugar Tare Uncle Victor
William X-ray Yoke Zebra
And these guys are always tuning after a CQ Call !!

Then we have the civil entity phonetics. Some hams but many don't use or
understand these:
Adam Boy Charlie David Edward Frank George Henry Ida John
King Lincoln Mary Nora Ocean Peter Queen Robert Sam Tom
Union Victor William X-ray Young Zebra
And a lot of other Boy/Girl names depending on locale

Then we have Hams who don't know any of these and you might hear -- Name is
Tim - Texaco Indigo Macy's
Actually heard this one!

Bottom line -- use the NATO phonetics -- so most all will understand and
always during an emergency.

Message-ID: <9yjbb.1932$Ms2.837@fed1read03>
Source record: 9144

As a matter of reference -- see URL:
http://www.wikipedia.org/wiki/NATO_phonetic_alphabet

Sez

NATO phonetic alphabet
From Wikipedia, the free encyclopedia.

The NATO phonetic alphabet was developed in the 1950s to be intelligible (and pronounceable) to all NATO allies in the heat of battle. It replaced other phonetic alphabets, for example the US military Joint Army/Navy Phonetic Alphabet ("able baker") and several versions of RAF phonetic alphabets. It is sometimes inappropriately referred to as International Phonetic Alphabet, which is actually the official name of an alphabet used in linguistics created in the late nineteeth century.

The NATO phonetic alphabet is now widely used in business and telecommunications in Europe and North America, and has been approved by ICAO for use in international civil aviation. It has been adopted by the International Telegraphers Union (ITU), after which it is named by many radio operators. Although it consists of English words, its letter codewords can easily be recognised by speakers of languages other than English.

Well, yes, I did reply.. among others.. Troll? Ass Hole is a better term.
And back to his comment, he will not run me off, if I so desire to chat on
that frequency. Not a chance.... Lou

YOU WILL NOT TALK ON MY FREQUENCY. DO NOT EVEN GET NEAR 3.894.5. STAY ON 2 METERS WHERE YOU BELONG.

I HEAR ALL.

aY yi YI yi

HO HO

Hi,

To make changes, or customize, the clock use the windows "Display
Properties" dialog, "Screen Saver" tab/page. Note the button labeled
"Settings". Clicking the settings button displays the clock settings dialog.
Click the read me button for a bit more info.

There are two email address links near the bottom of each web page. One is
the logo graphic, the other invites "Comments, Criticisms and Suggestions".
<G> Also find the email address in the "read me" from the settings dialog.

Regards,
Jim

Hi,

Yes, http://www.boulder.nist.gov/timefreq/service/its.htm
is a fair link. However their "example" apps apparently do not use the best
time setting protocol, which is NTP. ID Wizard uses NTP, is free for the
price of a single email and has numerous additional tools. <G>

The two time protocols demonstrated by the NIST example apps work well
enough for most projects.

Regards,
Jim

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 14th/September, through Sunday, 21st/September there were 228 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 3X, 4J, 4L, 4S, 4W, 4X, 5A, 5B, 5H, 5N, 5R, 5U, 5V, 5W, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9X, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J7, J8, JA, JD/m, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PY, PY0S, PZ, S2, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T33, T7, T8, T9, TA, TF, TG, TI, TK, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V5, V7, V8, VE, VK, VK9N, VP5, VP6, VP8, VP8/o, VP9, VQ9, VR, VU, XE, XU, YA, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZD7, ZD9, ZK1/s, ZK2, ZK3, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

2003 MOST WANTED SURVEY. Carl Smith, N4AA, Editor/Publisher - QRZ DX and The DX Magazine (Also, DX Column Editor for CQ Magazine), has once again asked OPDX to help spread the word that the "DX Magazine Most Wanted Survey" is now being taken, and the deadline to respond is October 15th. Here is your chance to be counted and list the DXCC entities you need

or do not have confirmed yet. Not all DXCC entities are listed, only the obvious hard ones. The 2003 survey is available on the Web at:
http://www.dxpub.com/dx_survey2003.html
Look for the results to be listed in early 2004.

3C0, ANNOBON ISLAND. Everything seems to be a go with next weekend's 3C0V DXpedition which begins Sepptember 26th and ends October 10th. Operators and their callsigns are: Franz/DJ9ZB - 3C0F Elmo/EA5BYP - 3C0A Victor/EA5FO - 3C0R Vicente/EA5YN - 3C0V
Activity will be on all bands 160-6 meters CW, SSB, RTTY, PSK and some SSTV. They hope to have at least two stations on the air 24 hours a day. They are still looking for donations; any amount as small as it may be will be appreciated and can be sent to: DX Club Tabarca Island, President Elmo EA5BYP, P.O. Box 3097, 03080 Alicante, Spain. QSL via DJ9ZB. For more information on the 3C0V DXpedition, visit the following Web page at:
http://www.tabarca.es.mn

4W, TIMOR LESTE. Peter, 4W3CW, was heard this past weekend on 30/20/17/12 meters CW between 1000-1330z. He will be on the air for one more year. He works only CW with 100 watts into a vertical. QSL via: Peter McKay, UNMISET, PO Box 2436, Darwin, NT 0801, Australia.

5R8, MADAGASCAR (IOTA Op). Remember Phil, G3SWH, and his wife are expected to fly to Ile Sainte Marie (IOTA AF-090) on September 22nd and stay until the 27th. Phil was active this past week as 5R8HA on 30/20/17 meters CW. He will use the callsign 5R8HA/p from IOTA AF-090. Again, activity is expected on 40-10 meters, CW only. Please remember that he is on holiday and not a DXpedition. QSL via G3SWH.

9H, MALTA (Contest/IOTA Op). The Latvia team consisting of Girts/YL2KL, Karl/YL2MD and Andy/YL2GQT will be active from Gozo Island (EU-023) as 9H3M during the CQ/RJ Worldwide DX RTTY Contest (September 27-28th) as a Multi-Single or Multi-2 entry. QSL via YL2KL. The team will be there from September 24-30th and will be active outside of the contest. Look for Girts/YL2KL as 9H3KKL, Karl/YL2MD as 9H3MMD and Andy/YL2GQT as 9H3GQT. Activity will be on all HF bands CW/SSB/RTTY.

9M6, EAST MALAYSIA. Bob, N2OO, will once again be operating from the Hillview Gardens Resort station < http://www.qsl.net/9m6aac > from October 19th through November 13th as 9M6OO. QSL via N2OO.
Visit Bob's, N2OO/9M6OO, homepage at: http://www.qsl.net/n2oo
Check out the 9M6AAC/9M6A Web page at: http://www.qsl.net/9m6aac

9N, NEPAL. Janusz, SP9FIH, informs OPDX that he will probably be in Nepal from November 15th to December 5th. He expects to only be active on the bands between 20-12 meters because the cost of the amateur radio licence is rather high (about 50 USD per band and 100W transmiter). He will try to concentrate on U.S. propagation as he knows it is a difficult area for U.S. amateurs. Janusz is looking for any advice on what bands and at what times he should operate from during this time of the year (Is there a long path route?). Suggestions are welcome, E-mail to:
sp9fih@poczta.onet.pl

9Y4, TRINIDAD AND TOBAGO. Ben, DL6FBL, will be active as 9Y4TBG in the CQ World Wide DX SSB Contest (October 25-26th) as a Single-Op/All Band/ High Power entry. Antennas to be used are: 10/15/20m (two Tribanders), 40m (2-element beam) and 80/160m (Titanex Vertical, K9AY Loop). QSL via DL4MDO. His web page for this operation is at:
http://www.dl6fbl.de/9y4tbg/

A5, BHUTAN. Hawk, SM5AQD, informs OPDX that he and Pelle, SM7EHU, would be active from A52-land between September 25th and October 2nd. Callsigns and their plans of activity/operations were not provided. QSL via SM7EHU.

BQ9P, PRATAS ISLAND. The Chinese Taipei Amateur Radio League (CTARL) is planning to head back to Pratas Island during an upcoming freight schedule arrangement for Pratas Island, October 7-16th. Updated operator list so far is: BV4FH, BV3BW, BV3FG, JI6KVR, DL3DXX, DK7YY, ZL4PO, OE1WHC and N2OO. They plan to have two stations on the low bands, which will be the focus of DL3DXX and DK7YY. Concentration will also be made on the WARC bands and SSTV. Paul, BV4FH, and team are looking for BQ9P DXpedition sponsors and pilot stations. If you can help, please contact JI6KVR at:
ji6kvr@orange.ocn.ne.jp
Lee, ZL2AL, is the pilot station for the ZL/VK area. The BQ9P Web site is at: http://www3.ocn.ne.jp/~iota/newpage64.htm

DXCC NEWS. Bill Moore, NC1L, ARRL DXCC Manager, announced that the following operation is approved for DXCC credit:
IRAQ - YI1BGD - This operation was on hold for DXCC credit from March 18, 2003 and after. Anyone who had this rejected should contact DXCC at < dxcc@arrl.org > to have their record updated.

EY8, TAJUKISTAN. Nodir, EY8MM, expects to be active in the CQ World Wide DX SSB Contest (October 25-26th) as a Single-Op/Single Band (80m) entry. QSL via K1BV.

FK, NEW CALEDONIA. Akira, JE4WKR, will be active as FK/JE4WKR from September 23-26th from Ile de Pins (OC-032). Activity will be on 40-10 meters CW/SSB. QSL via the bureau to his home callsign or direct to:
Akira Yasumoto, 1-56, Asahihonmachi, Okayama, 700-0865 JAPAN.

FO/A, AUSTRAL ISLANDS. Operaors Richard/DJ4OI, Andreas/DL3GA, Markus/ DL1IAN, and Joachim/DF6IC are now active as FO/homecall from Tubuai (OC-152) until October 3rd. Activity has been mainly CW/SSB but look for RTTY and digital modes. Their expected activity should be on 80-6 meters including the WARC bands. QSL via their home callsign, bureau or direct.

FS, ST. MARTIN. Operators David/K3LP (leader), Larry/N7DD and Clint/W3ARS will head to St. Martin and arrive November 14th. They plan to install antennas and operate as FS/K3LP in the CQWW CW Contest as a Multi-Single entry. QSL via K5KV. Outside of the contest, look for them to sign FS/K3LP (David), FS/N7DD (Larry), and FS/W3ARS. They will return home in December.

HR6, HONDURAS. Joe, VE3BW, has informed OPDX that he has changed his plans for the CQWW SSB Contest and will not be going to St. Kitts (V4). Instead, he will be operating from Roatan, Honduras, from October 19th to November 2nd as VE3BW/HR6. His activity will be on 160-6 meters CW prior to

contest. Peter, VA3WET, will also be joining him and when they are not diving, they will be active on the bands. QSL to their home callsigns.

IOTA NEWS.....
EU-038. Look for Madeleine, PA3CUZ, to be active from Texel Island between October 2-9th. Activity will be on SSB. Please, watch the usual IOTA frequencies. QSL via home callsign.

LIGHTHOUSE ACTIVITY. Look for Kevin, MW3AFR/p, and Mel (callsign not provided) to be active September 28th from Holyhead Breakwater Lighthouse (ARLHS WAL-011). Activity will be mostly on 40 meters. QSL via home call, direct or bureau.

QSL INFO AND NEWS.....
Ron Lago, AC7DX, would like to tell the Ham community that he has found the following OLD logs and will try to confirm all old requests. Some logs are partial logs, some barely readable. Not all blank QSL cards have been found, but he will reprint the ones he does not have. These are all hand written logs and in disarray. Please allow him time to search through these by hand to find your call. Please send your request direct with return envelope and postage to: AC7DX, POB 25426, Eugene, Oregon 97402. Here is the list he has provided:
VK0HM Heard Is. VU2ACD JT1AN 1978-80
VQ9CQ XW8FA C21BD
VQ9SS ZK2VE Niue T30W 1994
VR1BD 1979 KC6VE 1995 T30AC
VR1PK 1979 KC6HA 4B9CQ
VR1AY 1979 KP4AM 1979-81 XB9Z 1992
VP8AWU 1994 HL9MM 3D2WM
V31UN HL9KLT XH9Z 1993

TG0AA QSL DELAY. Dennis Motschenbacher, K7BV, informs OPDX: "The cards for my TG0AA operation in 2003 ARRL DX CW were ordered months ago from the PY2TNT QSL printing service. In the mean time, the fine gentlemen of the Club de Radioaficionados de Guatemala have been getting increasing numbers of anxious inquiries from DXers for status of QSL requests sent to the club. Weeks and weeks of emails to Anderson, PY2TNT, requesting status or return of my money have gone unanswered. Now E-mails bounce and the website of this questionable business is off line. The TG9 club is moving ahead with printing the cards via another route so this matter can be cleared up. Please accept my apologizes for this unfortunate delay brought on by unethical business practices - I hope other operators are not waiting on cards from PY2TNT."

ROUTE 66 CALLSIGNS. OPDX has been asked to explain what are "Route 66" callsigns (N6A-N6M). This is a special event which took place between September 6-14th. This year's 4th annual "Route 66 On The Air" event was hosted by the "Citrus Belt Amateur Radio Club". Several clubs from CA to IL particapate in the event. There are certificates and special QSL cards available. The event is to celebrate the U.S. Highway 66, which was established in 1926 and was the first major improved highway that

linked the West Coast with the nation's heartland. More details and QSL info is available via the following Web page:
http://www.qsl.net/w6jbt

SPECIAL EVENT. The special event station, EM225G, is celebrating the 225th anniversary of Kherson City, Ukraine (CQ zone 16, KH66hp), from September 19-30th. Activity over the past weekend was on 40/20 meters. Watch around 7076 and between 14200-210 kHz between 0900-1330z. QSL via UR3GM, by the bureau (Box 56, Kiev 01001, Ukraine), or direct to: Igor Pulin, Box 23, Kherson 73022, Ukraine. Bureau QSLs can be requested by sending an E-mail to: itel@ukrincom.net

SPECIAL EVENT. During the month of October, look for special event station, HF8JP, to be active to celebrate the 25 years of Pope John Paul II pontificate. The station will be active on 80-2 meters CW/SSB and the digital modes. A special QSL will be available via SP8QED (direct or via the bureau).

V26, ANTIGUA AND BARBUDA. "Team Antigua" will once again activate V26B on the Beautiful Island Nation of Antigua and Barbuda in the 2003 running of the CQWW SSB Contest on October 24-25th. Their plans are to enter the Multi-Operator/Two-Transmitter category. Members of "Team Antigua" will also make special attempts to be active on RTTY, PSK31, 160 meters and the WARC bands a few days both before and after the contest. There is also a possibility of some 6 meter operations with conditions permitting. Their Grid Square is FK-97 and IOTA Number is NA-100. Operators will make their presence felt on all bands starting on or about October 22th until about November 2nd. The members of "Team Antigua" and their callsigns are: V26B - Sam/WT3Q, QSL via WT3Q
V26EW - Ed/N2ED, QSL via N2ED
V26OC - Brian/N3OC, QSL via N3OC
V26R - Mike/KA2AEV, QSL via KA2AEV
V26U - Bill/W2UDT, QSL via W2UDT
Also, a few new members will be announced later with their QSL routes when their Antigian Callsigns become finalized. For a complete station description (with photographs and rate charts) of The Team Antigua, V26B, Superstation, please visit their Web page at:
http://www.frc-contest.org/
(Click on the DXpeditions page and then the Team Antigua, V26B Link!)

V26, ANTIGUA AND BARBUDA. Operators Doug/W3CF, John/WX0B, Sharon/N5CK, Irwin/KD3TB, Andrew/KD3RF, Heinz/DL2BO and Sigmond/KM9M will activate the Royal Antiguan Radio Club Station, V26DX, as a Multi/2 Low Power entry for the CQWW Phone Contest. Operators begin activity October 19th, and the last one out is November 1st. QSL all V26DX QSOs via KU9C with appropriate return postage and self addressed envelope or via the bureau. QSL individual ops via on air instructions. Their planned activity will be on 6 meters and the WARC bands before and after the contest. ADDED NOTES: A "Top Gun" plaque will be given to the first single op station to work them on 6 bands. "Top Gun" T-Shirts will be awarded to the top 9 fastest 6 band single op Q's after that. Their antennas will include:

Force 12 C4 yagi at 120', Optibeam 12-6 at 120', home brew - bent up 6 meter yagi at 120' and a 270' wire terminated over a salt pond @ 120'. Last year's pictures are available at: http://w3cf.com

FREE TRIP TO VP5! Kyle, WA4PGM, informs OPDX that "This is the final notice for those young ops interested in a FREE trip to VP5 during the CQWW CW Contest. Response has been disappointing so far with very few entries, go to < http://www.vp5x.com > for more details and get your essay in ASAP. A participant will be selected soon!"

VP5, TURKS AND CAICOS ISLANDS. Dave, AH6HY, will be up and running from relatively rare Grand Turk Island (IOTA NA-003) from September 26th to October 4th, as VP5/AH6HY. His concentration will be on 40-10 meters, SSB only, using a combination of wire antennas or dipoles depending on the band. QSL is via AH6HY direct or via the bureau.

VP9, BERMUDA. Sasi, VU3SNM/9V1SM, will be active from Bermuda's Biological Station for Research, October 18-27th. Look for VU3SNM/VP9 on 20-6 meters, PSK31 and SSB. Since this is a work related trip, most of the operations will be confined to a few hours in the evenings. QSL to his Manager Joe, W3HNK.

VP9, BERMUDA (Update/Postponed). Due to the result of the damage caused by the hurricane Fabian, Bert, PA3GIO, will now be active as PA3GIO/VP9 from Bermuda (NA-005), November 8-18th (not September 18-28th as first planned). He will operate from the QTH of Ed, VP9GE, and will be active on 80/40/20/17/15/12/10 meters SSB. QSL via PA3GIO, preferably through the bureau (E-mail requests for bureau cards will be welcome at: qsl@pa3gio.nl
The Web page for the operation is at: http://www.pa3gio.nl/VP9

XU, CAMBODIA. Hubert, XU7ACI, can sometimes be found on 15/20 meters SSB between 1300-1500z. He is currently working as a missionary in Phnom Penh for the next two years. QSL via KB8TJP.

YA, AFGHANISTAN. Masa, JG1OWV, informs OPDX that Sada, JA1AKF (not JA1AHF as listed in OPDX.626), signing YA1D from Kabul, is now active on SSTV and PSK with the help of YA1PBV. Look for low band operations to take place after November (Masa will keep us informed). Also, the club station, YA0J, was active on September 11th with guest operators as a memorial. QSL for YA1D and YA0J is via JG1OWV. Masa states that YA1D QSL should be in the mail this week.

ZK3, TOKELAU ISLANDS. Willie, DJ7RJ, is now active as ZK3MW. Over the past weekend he has been very active on 30/12 meters CW with some 15 meters SSB (with a good signal). He is expected to be there until September 28th. QSL via DJ7RJ.

ZK1, SOUTH COOK ISLANDS. Allen, K6USN, was expected to be active as ZK1USN from Rarotonga Island (OC-013) this past week, but there were no QSNs reported. By the time you read this, he is expected to activate Aitutaki Island (OC-083) next for nine days. Activity will be on 40-10 meters CW/SSB. QSL via K6USN.

ZL, NEW ZEALAND. Sasi, 9V1SM (VU3SNM), will be active as ZL/9V1SM/P from the QTHs of Christchurch and Auckland. His operation should commence on September 27th and ends on October 4th. Activity will be on 20-6 meters, PSK31 and SSB. QSL to his Manager, Joe, W3HNK.

2121. RFIDs

Newsgroup: rec.radio.amateur.dx
Date: 2003-09-21 22:19:38 UTC
From: peter@strg-alt-entf.org
Message-ID: <bkl85p$2f1tp$1@ID-31.news.uni-berlin.de>
Source record: 9055

I have just briefly read some technical background on RFIDs and I find it rather disturbing that a lot of the transmitters that potentially will be used in this new trend will operate on shortwave frequencies (e.g. 13.56 Mhz was mentioned in one of the specs).

Will these things be licensed by the FCC or other telecom regulators as low power devices? There will be millions of these things flying around in the future, so I wonder whether this might potentially be sich a threat to the shortwave spectrum as BPL/PLC is too.

4382 virii currently quarantined in Postini for my benefit... 20 have
sneaked through and been gutshot by Snortin' Futilities Antivirus...
have already deleted 1500 virii friday and saturday and gave up to see
what the count rises to. so we're around 5600 for the weakend.

and there were folks at my home ISP who had 4800 by noon saturday.

clearly these script kiddies are not very clever... they could have
directed all this excitement to, say, whitehouse.gov or verisign.com,
and done something useful. or to microsoft.com, where by rights they
really belong :(

HICKORY, NC [UPDATE]: The FCC wrote General licensee John A. Abernethy, K4OKA, July 27, 1999, modifying his license to prohibit operation below 30 MHz for 180 days, effective immediately. Unless he appeals the action, Abernethy may not get back on HF until January 22, 2000. The FCC letter included a copy of a tape recording--supplied by complainants--of transmissions said to be of Abernethy's station on July 16. Hollingsworth's letter described the tape as "consisting of deliberate interference on 3.965 MHz." In the letter, FCC Attorney Riley Hollingsworth, K4ZDH, noted that Abernethy had been warned about deliberate interference at the time his station was inspected last January. Abernethy has 30 days to protest the sanction. FCC personnel inspected Abernethy's station January 21 and 22 in the wake of what Hollingsworth called "longstanding complaints from other amateurs and from our field offices." In particular, he said, the FCC had received "numerous complaints" about profanity, obscenity, deliberate interference, and failure to properly identify. Other complaints to the FCC alleged that Abernethy had aired something called the "Porkbutt Song," the letter said, "for the purpose of harassment or deliberate interference." Hollingsworth said the FCC's High Frequency Direction Finding Center in Maryland tracked the transmissions of the "Porkbutt Song" to K4OKA. The FCC letter also said the Commission had received complaints that Abernethy had used AM and upper sideband on 75 "for the purpose of interference" on or near 3894.5 kHz. Abernethy also was warned in the letter about over-power operation. Hollingsworth said that the FCC has no plans to start revocation proceedings against Abernethy "unless we have evidence of continued violations" of the type the FCC described in its July 27 letter. (For additional details, see "FCC Takes North Carolina Ham off HF for Six Months" elsewhere on the AWE news page.)

This is a little out of date, but should give a little background info for those who are unfamiliar with "BIG AL"...

HICKORY, NC [UPDATE]: The FCC wrote General licensee John A. Abernethy, K4OKA, July 27, 1999, modifying his license to prohibit operation below 30 MHz for 180 days, effective immediately. Unless he appeals the action, Abernethy may not get back on HF until January 22, 2000. The FCC letter included a copy of a tape recording--supplied by complainants--of transmissions said to be of Abernethy's station on July 16. Hollingsworth's letter described the tape as "consisting of deliberate interference on 3.965 MHz." In the letter, FCC Attorney Riley Hollingsworth, K4ZDH, noted that Abernethy had been warned about deliberate interference at the time his station was inspected last January. Abernethy has 30 days to protest the sanction. FCC personnel inspected Abernethy's station January 21 and 22 in the wake of what Hollingsworth called "longstanding complaints from other amateurs and from our field offices." In particular, he said, the FCC had received "numerous complaints" about profanity, obscenity, deliberate interference, and failure to properly identify. Other complaints to the FCC alleged that Abernethy had aired something called the "Porkbutt Song," the letter said, "for the purpose of harassment or deliberate interference." Hollingsworth said the FCC's High Frequency Direction Finding Center in Maryland tracked the transmissions of the "Porkbutt Song" to K4OKA. The FCC letter also said the Commission had received complaints that Abernethy had used AM and upper sideband on 75 "for the purpose of interference" on or near 3894.5 kHz. Abernethy also was warned in the letter about over-power operation. Hollingsworth said that the FCC has no plans to start revocation proceedings against Abernethy "unless we have evidence of continued violations" of the type the FCC described in its July 27 letter. (For additional details, see "FCC Takes North Carolina Ham off HF for Six Months" elsewhere on the AWE news page.)

I wonder if FCC knows he's up to it again?
Maybe we should refer them to this NG...
I don't know if it's such a smart idea for him to brag about his illegal activities on a public newsgroup which is archived by servers everywhere for permanent storage. Especially when everybody knows exactly who he is.

Well, he didn't claim to be "smart". So, I'm sure, in due time he'll be busted again. Those who brag usually are begging to be caught or need severe help! Matter of psychology.

Found this on a QSL mgr list-Depends when and who you worked it looks like..
I have not had much luck going to LU QSL mgrs thru the years.

LU1ZA QSL via LU4AA (Nov.1996) (see also LU4AA *)
LU1ZA QSL via LU6EF (for 1989) (see also LU6EF *)
LU1ZA Serv. Auxil. De Radioafic. De la Armada, Av. del Libertador
8209, Capital Federal, CC 1429, Argentin
LU1ZA QSL via LU4AA (for 1995) (see also LU4AA *)
LU1ZA QSL via LU2CN (for 2001-2002)
LU1ZA QSL via LU4DXU (for QSO with Op. Claudio)

2152. Hi Tension Lines and Ham Radio

Newsgroup: rec.radio.amateur.dx
Date: 2003-09-23 14:08:38 UTC
From: Spurious Noise <HDA@zilch.com>
Message-ID: <GtYbb.6875$Ms2.2087@fed1read03>
Source record: 9086

Can't address the first two but for number 3.
I had a home a coupla hundred feet away from hi tension towers and it was a nightmare plus.

I was not a ham when we moved in but I noticed lines across the TV video on the lower channels all the time
and buzz in the TV audio. Annoying but not unusual in the days of rooftop TV antennas.

It got and very severe when the insulators got damp. In fact at times during the night one could see a blue arc discharge across the insulators.

When I got my ham ticket, I found S9+10 dB of noise was typical on the 160, 80, 40m bands (unusable for the most part)

Less noise up the spectrum but awful at times. Later when a got a small triband beam, I would rotate the antenna 90 degrees away from the power lines to reduce the noise and hope some of my signal got to Europe -- hi hi.

The power company would wash down the lines on occasion when I squawked, but the noise would soon return.

When we moved to a new noise free (underground utilities) location, couldn't believe the difference.

Take a portable SWL receiver and check the noise at various frequencies and areas of the location.

But the noise could be in a "quiet period' i.e., clean and dry insulators.

Your noise may vary as others have reported no problem.

I will never again move in anywhere near these spectrum blasters.

Well, it's pretty unlikely that the guy who got busted for this back
in 1999 is doing this, unless he's incredibly stupid. The headers on
his newsgroup postings point right back to his pesonal account on
Supernews, and the FCC could subpoena his user info and usenet usage
logs from Supernews in a flash if illegal activity is involved.

More likely, it's some troll who heard about the "Porkbutt" story, and
is having some fun stirring the pot a bit. If he really is creating
interference on 3894.5 and bragging about it here, however, he could
get a guest shot on "America's Dumbest Criminals" for this one -
should the FCC get a copy of this somehow.... :)

73, Leo

Not sure how the thread made it past my kill file, but to respond to your comment, I only went with what I was told and seen for myself as witnessed above.. IF there was more than one incident mentioned, then I didn't notice in my speed read of the article.
But, if it's been more than once, then maybe it's time they show him they're done playing games.
Lou

You know, it IS possible that this is a different person just trying to
cause trouble.
I'm gonna traceroute his IP and see whereabouts he is...

Actually, you're probably right. You know, he didn't even start using that
callsign until after the article I posted. I'm going to traceroute his IP so
we know his general location and the name of his ISP. If anyone had actually
heard him on the air we could go straight to the FCC.
Are there any confirmed reports of this guy actually transmitting?

2166. Anybody actually heard "BIG AL" on the air?

Newsgroup: rec.radio.amateur.dx
Date: 2003-09-23 23:41:28 UTC
From: Greg Courville <EngNOSPAMinuitor@Gee-Enginuity.com>
Message-ID: <vn1mh7gl0j7b9d@corp.supernews.com>
Source record: 9002
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.policy

As most of you know, there is a troll on these boards claiming to be K40KA. I'm still trying to figure out whether this guy is just trying to be annoying. If he is actually doing what he said he is, we can go to the FCC, so I'd like to find out if he's actually on the air. Not owning any HF equipment, I can't do much my self. If somebody could listen in when he says he'll be transmitting...

Well first off, the reference violation above is long done with. He spent his time in radio prison and returned to the HF bands. He has basically learned his lesson, this time. And has been a decent operator for several years now.

What I was refering to was he was removed from the radio voluntarily in lieu of being fined a big chunk of bux back in the 70s. He stayed off the air for years. Returned as KJ4JX and began his crap again. He later got his original call back under the vanity system.

He has been a QRMer for many years. BUT as stated above has finally seen the light.

This crap you see here from "BIG AL" is BS.. And same for the "3894.5" crap. Its just a troll.

But I wanted to set the record straight.

Dan/W4NTI

It'd s troll. Big AL gets on occasionaly on 3894.5 and talks with whats left of his "Abernathy Radio Group". Without his Henry 8K of course.

So don't worry about it.

No transmissions that I could hear tonight, leading me to belive that
he is bogus. His ISP, however, cannot be seen, as he is posting
through a third-party newsgroup service, Supernews. We can only trace
him back that far - by the message headers.

Supernews, however, has a very strict Terms Of Service" (TOS)
agreement with its subscribers, which prohibit multiple postings of
this type of nuisance message and nym shifting (at least three
different ones so far, including stealing mine for a while :)).

A few complaints to abuse@supernews.com from the folks in these
newsgroups, with a copy of some of these messages **including
headers** , and he will be 'off the air' here quicker faster than he
can spell FCC! If he can, that is...

Yeah, if you look at some of the other Big-Al threads you'll see that we've decided he's not for real.
Now we're trying to get him for violations of Supernews's policy. Write to abuse@supernews.com and attach segments of his posts. Maybe then he'll have to post directly...

Hi,

There are currently 37 Hams practicing amateur astronomy, see the list here,
http://www.astrosurf.com/lombry/qsl-hamsinthesky.htm

If you are listed and have a QSL, could you send me a scanned picture of
your card (JPG) by email or via UBA buro to ON4SKY. Of course mine, showing
a beautiful ... "sky" after sunset will be send you in exchange, hi !

NB. It is not easy to setup a HF network, even on Echolink due to the time
shift and others personal constraints.

Best 73's and have a clear and dark sky.

Tttt...
Not worst than HF when your RTX experiment a power failure due to a direct
strike... on the antenna or on the main line.
Echolink is a marvellous tool even if I prefer by far working on the air.

This was posted to ARLI, I don't know how many subscribe, but in spite of the numerous comments against BPL (transmitting wideband internet data over power lines, which will destroy the HF radio spectrum), the FCC seems disposed
to encourage it anyway. evil! evil! just look up BPL on the web. The noise from the radiated signals trashed the ham bands thoroughly.

Subject:
[ARLI] FCC Commissioner's Comments Concerning BPL
To:
bvarc@clarc.org, clarc@clarc.org, ARLI@topica.com

The following is a transcript from a recent speech given by FCC Commissioner Kathleen Q. Abernathy at the United PowerLine
Council's annual conference regarding BPL. It seems that she is all for it. It also seems that BPL is going to become a reality, regardless
of what ARRL, the military, or anyone else says. As usual, big industry wins over everyone else because they have the money.

This is from today's FCC Digest.

Paul, N0JAA

Reaching Broadband Nirvana
United PowerLine Council Annual Conference Remarks of Commissioner Kathleen Q. Abernathy
September 22, 2003 (As prepared for delivery)

Thank you very much for inviting me to speak with you. I am very excited about broadband-over-powerline technology. I
have seen it in action, and I believe it has a very bright future. It is a real honor to be your keynote speaker at this
important juncture for BPL.

As a regulator, I am keenly interested in BPL technology for a number of reasons. One of my central objectives as an FCC commissioner is to facilitate the deployment of broadband services to all Americans. I also fundamentally
believe that the FCC can best promote consumer welfare by relying on market forces, rather than heavy-handed regulation. The development of BPL networks will serve both of these key goals. It will not only bring broadband to

previously unserved communities, but the introduction of a new broadband pipeline into the home will foster the kind of competitive marketplace that will eventually enable the Commission to let go of the regulatory reins. I
want consumers to have a choice of multiple, facilities-based providers, including not only cable and DSL, but also powerline, wireless, and satellite services. Such a robustly competitive and diversified marketplace is
something I would call broadband Nirvana. We will not get there overnight, but the continuing development of BPL technology is a major step forward.

While the long-term objective is a robustly competitive marketplace that is free of regulatory distortions, a more immediate question is: What should the FCC do to help foster such an environment? Sticking with my Nirvana
metaphor, I guess the question would be, what is the path to enlightenment?

I believe the answer, in short, is regulatory restraint. It is tempting for regulators to take every new technology or service that comes along and apply the same rules that govern incumbent services. After all, regulatory
parity and a level playing field are intuitively appealing concepts. But I believe that it would be a huge mistake to carry forward legacy regulations whenever new technology platforms are established. Many of our regulations
are premised on the absence of competition, and when that rationale is eroded, we must not reflexively hold on to regulations that no longer serve their intended purpose. In fact, many of our old rules not only become
unnecessary as markets evolve, but they can be fatal to new services that need room to breathe.

The Nascent Services Doctrine applying more stringent regulations to wireline providers at a minimum must be reconsidered. As other platforms, including BPL and wireless, become more widely available, that will further
undermine the justification for regulating incumbent LECs broadband services as if they were the only available offerings. When the Commission completes this rulemaking, I expect that we will eliminate many existing rules and
substantially modify others; the central question is the degree of regulation that will remain during the transition to a more robustly competitive market.

Finally, it is important to recognize that although the emergence of new platforms like BPL will eliminate the need for many competition-related regulations, other types of regulation may well remain necessary. For example, the
FCC must implement public policy goals unrelated to competition, or even at odds with competition. Universal service and access for persons with disabilities are examples of this kind of regulation. These public policy goals
generally should be applied to all service providers, to the extent permitted by the Communications Act. The FCC also must intervene to prevent competitors from imposing externalities on one another and to protect consumers
where market failures are identified. Although, as I have noted, the Commission was right to refrain from imposing heavy-handed price and service-quality regulations on PCS services when the were introduced, it was also right
to adopt strict interference rules to prevent competitors from externalizing their costs. The same principle will apply to BPL. They key point is that, while some degree of regulation is both inevitable and desirable, we
should ensure that it is narrowly tailored to the particular governmental interests at

stake. I appreciate the opportunity to share these thoughts with you, and I would be happy to answer a few questions if we have time.

It won't be just hams and other minor users of spectrum below 80 mHz
who will be very seriously impacted by BPL. There are several states
whose statewice Public Service - State Police FM radio communications
systems are located on Low Band VHF, in the 40-50 mHz region. These
include California Highway Patrol and Missouri Highway Patrol, and at
least a few other state public safety and forestry organizations, as
well as many private users.
From personal knowledge of conditions drawn from many years of
personal involvment with these systems I am certain they cannot co-exist
with BPL.

I know they would all jump at the chance to move up to a trunked UHF
or higher system, but with all the state governmental budget woes that
won't be possible anytime soon.
One can only wonder what FCC is thinking here.
BPL is basically a noise generator that is attractive because it
"wires the world" in the eyes of those for whom that end is
the most important feature of advancing technology. Unfamiliar with
the workings of radio or technology itself, they have eagerly latched
onto the totally inaccurate and selfserving assertions of BPL proponants.

As I said in my comments to the NPRM, there are much better ways to
acoomplish the same end without completely ruining the HF spectrum.

BPL, however, will not only emit a lot of radiated trash into the HF bands,
it will also RECEIVE a lot of radiated trash from the HF bands.

My suspicion is that a fairly low power HF transmitter near a transmission
line, even well out of the near field of the line, will wreak havoc with
BPL communication while operating well below the legal limit.

> As I said in my comments to the NPRM, there are much better ways to
>acoomplish the same end without completely ruining the HF spectrum.

As if the HF spectrum is not already ruined. Doesn't ANYONE take Part 15
seriously? If I ran the FCC, I'd make touch lamps illegal for one thing.

The FCC may be listening to "college boy" engineers.
I saw this happen too many times at government sites.

Someone has told them that "the power lines are balanced, so
there will be no radiation from them! My professor told me so,
my text book says so and that's the end of it!"

Well, as any farm boy radio tinkerer can tell you,
them books is one thing, the real world is another.

BPL *is* coming, folks. Count on it.

One FCC commissioner spouting off at an industry gathering is not
regulation or law. The warmups for the '04 elections are well under
way, this gambit was as likely as not a prelude to tapping the
industry for campaign contributions. She didn't say a thing Powell and
others have not stated previously. Don't sweat it, it's more spurious
emissions and the battle against BPL battle remains on course.

If there were a "million operators on HF", there would BE no HF. The
overcrowding would go even farther than BPL in making it unusable for
anyone.

Duh!

Typical of the ignorant, uneducated geeks who just can't stand any sort of
organization or regulation, Keith would gladly screw things up for thousands
of normal, decent, intelligent hams, just to make some rather dubious
"point" that nobody but another ignorant, uneducated geek would care about.

Notice how he doesn't show a callsign? These days, that is a dead give-away
for the new batch of anti-ham Trolls who are currently infesting the ham
radio - related newsgroups and E-mail lists.

Yes, Keith is a mother's mistake, as he grew up to be an anti-ham Troll.

Sure there would be. And it would sound just like 27 mhz sounds.
Just what Keith has in mind, I'm sure.

2202. Frenchies, back to fr.rec.radio.amateur !

Newsgroup: rec.radio.amateur.dx

Hi OM, YL, and SWL

This post is dedicated to all French spoken hams.
If sometimes in the past you posted messages on fr.rec.radio.amateur forum you quickly discovered that this forum was invaded by CBists and "louts" like Coman, JMBCV and other anonymous who aggravated this forum, widespreading a poor image of amateurs radio activities.

Today, the radioamateur.org forum is temporary closed so hams have to think back to use another forum like the first.

Hopefully, for a few months now, a few amateur radios, including me, are trying to reverse the bad image given by fr.rec.radio.amateur, giving it a new breath and the secret hope to develop this French forum.

So if you can write French and are interested in preserving the interest and ham spirit of our community, I suggest you to post sometimes, the soon the best, your post in French in fr.rec.radio.amateur so that this this forum recover quickly all its health ;-)

Best 73's

Well Dick, apparantly no one else cares. I don't know of any of the aformentioned groups making comments. Do you? Maybe they have no concept of what will happen. Sorta like the FCC having no concept of what will happen either.

Can the FCC be sued for acting in GROSS negligence? Under the premise
that as professionals THEY SHOULD HAVE KNOWN they may be liable.

Yeah, I know you can't sue the government, but it sounds good!

Dave

About all that can be done is go to the congress. They run the FCC. Like
what happened when Powel tried increase the broadcasters chunk of the
stations. Congress got into it and gave them a attitude adjustment.

Boys it looks like it's time to bring back the good ole' spark gap CW transmitters. Will fight hash with some real static! :-)

As a matter of fact, you can. Just not for monetary damages.

ARRL once sued the FCC over the 220mhz band,if you recall. It wouldn't
surprise me at all if a lawsuit did result if they go ahead with BPL;.
It's just to radical a proposal to be even sensible, much less bernefial.

You know, you assholes who are determined to ruin ham radio with your CB behavior, could always do it easier with telephones now that they have unlimited long distance calling. Then we who are real hams could enjoy both the internet and the ham bands.

That might depend on the nature of the signals BPL uses. TJey could be
fairly RFI immune while causing vast amounts of itto other users themselves.

>
>> As I said in my comments to the NPRM, there are much better ways to

> --scott

The BPL proponents assert strongly that it's no worse than any other
Part 15 device, thus trivial. Lots of Part 15 was *never* trivial, and
I along with many others strongly opposed allowing them on HF
in the first place, but you see what good it did.
And they want the Part 15 output levels raised considerably!
What nonsense!
MY fear is that certain politicians have told officials at FCC to
"Make it happen" regardless of the fallout. IOW, the "fix is in".
If the Commissioner's speech in the quoted post doesn't indicate that
what, the heck DOES it indicate??
If that proves to be how it is, the ship will surely go aground,
("hit the sand") and it WILL be time for ARRL and others to file suit.

One thing in our favor- They can't wire the entire
planet at one time, so the early areas should be first to
experience real problems. The first time BPL causes someone
a real serious, costly problem (that WILL happen)
and the lawsuits start, that may slow down the implementation
a bit. Might even head it off. Doesn't look like an exactly
glowing business plan, anyway. And the need to rebuild infra
structure instead of throwing money at BPL was well
demonstrated last month in the NE USA blackout.

I wonder how hams are faring in the test areas. Anyone
heard anything?

(not responding directly to this post but in general)

I was thinking recently about this whole BPL thing, and was thinking that if it is going to affect the amateur bands, that logically it would affect other services such as public safety, governmental, and possibly even military and aviation frequency allocations as well.

My thinking is, if my logic in the above paragraph is indeed true, then wouldn't educating and getting those groups to lobby against BPL be more effective rather than just us as a group collective?? Seems to me that those organizations would have more effective "pull" with the FCC than we would.

Am I wrong in this thinking or ???

2236. DX Request

Newsgroup: rec.radio.amateur.dx
Date: 2003-09-26 12:56:43 UTC
From: Newsgroups <gphillips@marsman.demon.co.uk>
Message-ID: <bl1d2jjfg1$8300dec7@news.demon.co.uk>
Source record: 8922

Anyone know of any Newsgroups for DX TV instead of radio? Or can I pose my question here?

2237. Re: TV DXing (Was DX Request)

Newsgroup: rec.radio.amateur.dx
Date: 2003-09-26 14:03:53 UTC
From: Spurious Noise <HDA@zilch.com>
Message-ID: <TIXcb.26317$Ms2.10867@fed1read03>
Source record: 8923

Not aware of a Newsgroup for DX TV but the question and discussions
for TV DXing have been posted on several newsgroups
Go to URL: http://groups.google.com/
Type in TV DX and get many many posts on the subject -- a lot on
rec.radio.shortwave

For example, google revealed , the Worldwide TV-FM DX Association
at URL http://anarc.org/wtfda/
has a TV DXing FAQ

Since the lower TV channels are in the 50 MHz range (Channel 2 is 55 MHz),
the hams who are active on the 6 Meter
band (50 - 54MHz) have experience with the propagation characteristics in
this frequency region, so many here will have some input on that. Indeed 6M
DXers watch TV Channel 2 for signs of "skip" due to F-Layer or Sporadic E
propagation (some others as well)

Go ahead and ask. And also try rec.radio.shortwave.

TV DXing will be a lot more interesting than some of the junk recently seen
here.

Heck, I wish I could find some other internationally-recoginsed
phonetic for the letter i . Inmy experience, it's incredibly hard to
get either India or Italy understood under marginal conditions. My
suffix, IRT is usually mangled in contests and DX-peditions. The
"Romeo Tango" bit comes through great, but the "India" gets lost.

That was the reason I went to a vanity call sign. My old call WB8EIY was
murder to get across.

I got a card from him. If I recall correctly, I sent it directly to his address in the Western Sahara and received it back within a month. I think he's with the UN and has moved on by now. Maybe to East Timor.

The FCC have caved into the BM (Big Money) Boys on nearly every other issue.
This doesn't surprise me.

The commissioners are lawyers except for two of them, none have engineering or technical degree.
